☐ IF NECESSARY, PLEASE INCREASE MY BIDS BY ☐1 ☐2 ☐3 INCREMENT(S)*Lots will be purchased as much below top bids as possible.*☐ I WANT TO LIMIT MY BIDDING TO A TOTAL OF \$

at the hammer amount for all lots listed on this bid sheet. I am aware that by utilizing the Budget Bidding feature, all bids on this sheet will be affected. If I intend to have regular bidding on other lots I will need to use a separate bid sheet.

Do you want to receive an email, text message, or fax confirming receipt of your bids?

☐ Email ☐ Cell Phone Text ☐ Fax

Payment by check may result in your property not being released until purchase funds clear our bank. Checks must be drawn on a U.S. bank. All bids are subject to the applicable Buyer's Premium. See HA.com for details.

I have read and agree to all of the Terms and Conditions of Auction: inclusive of paying interest at the lesser of 1.5% per month (18% per annum) or the maximum contract interest rate under applicable state law from the date of auction.

REFERENCES: New bidders who are unknown to us must furnish satisfactory industry references or a valid credit card in advance of the auction date.

**(Signature required)** Please make a copy of this bid sheet for your records.☐ I HAVE PREVIOUSLY BOUGHT FROM HERITAGE AUCTIONS☐ I HAVE A RESALE PERMIT – please contact 877-HERITAGE (437-4824)

Non-Internet bids (including but not limited to, podium, fax, phone and mail bids) may be submitted at any time and are treated similar to floor bids. These types of bids must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and will be considered your high bid.

Current Bid	Bid Increment

## 7 Easy Ways to Bid

## 1 Internet

Simply go to [www.pearsoncmg.com](http://www.pearsoncmg.com)

Simply go to [www.HA.com](http://www.HA.com), find the auction you are looking for and click "View Lots" or type your desired Lot # into the "Search" field. Every lot is listed with full descriptions and images. Enter your bid and click "Place Bid." Internet bids will be accepted until 10:00 PM CT the day before the live auction session takes place.

## 2 eMail

You can also

You can also email your bids to us at [Bid@HA.com](mailto:Bid@HA.com). List lot numbers and bids, and include your name, address, phone, and customer # (if known) as well as a statement of your acceptance of the Terms and Conditions of Sale. Email bids will be accepted up to 24 hours before the live auction.

### 3 Postal Mail

Simply complete the B

Simply complete the Bid Sheet on the reverse side of this page with your bids on the lots you want, sign it and mail it in. If yours is the high bid on any lot, we act as your representative at the auction and buy the lot as cheaply as competition permits.

## 4 In Person

Come to the auction and view the lots in person and bid live on the floor.

**5 FAX**  
Follow t

Follow the instructions for completing your mail bid, but this time FAX it to (214) 409-1425. FAX bids will be accepted until 12:00 PM CT the day prior to the auction date.

## 6 Live By Phone

Call 877-HERITAGE (437-482)

Call 877-HERITAGE (437-4824) Ext. 1150 and ask for phone bidding assistance at least 24 hours prior to the auction.

**7 Live using HERITAGE Live!®**  
Auctions designated as "Heritage Live Enabled" have

Auctions designated as "Heritage Live Enabled" have continuous bidding from the time the auction is posted on our site through the live event. When normal Internet bidding ends, visit [HA.com/Live](http://HA.com/Live) and continue to place Live Proxy bids. When the item hits the auction block, you can continue to bid live against the floor and other live bidders.

*Because of the many avenues by which bids may be submitted, there is the real possibility of a tie for the high bid. In the event of a tie, Internet bidders, within their credit limit, will win by default.*

# HERITAGE AUCTIONS

Dear Bidder:

Welcome to our November 2014 Beverly Hills event! Heritage always looks forward to presenting a U.S. Coins Signature Auction at our saleroom in Beverly Hills, California. This year, four exciting Floor Sessions will be presented. A sizeable Premier Session on Thursday evening, November 6 features more than 600 exceptional bidding opportunities. Together, the Signature® Floor Sessions and fast-paced Signature Internet Session® bring you more than 4,800 U.S. coins ranging from scarce, early type to notable modern issues.

Here are just a few highlights:

- A large contingent of early silver dollars come from several different consignors, offering an unusually large number of original Flowing Hair and Draped Bust dollar selections in many of the most popular "collector" grades.
- The single finest-certified 1870 Seated dollar in PR67 ★ Ultra Cameo NGC offers spectacular quality and eye appeal. All Seated dollars are rare with Deep or Ultra Cameo surfaces, and this is an outstanding, high-grade example.
- A turn-of-the-century Liberty quarter eagle in PR68 Deep Cameo PCGS is an exceptional representative of the 1900 date, seldom seen in this lofty grade.
- The King of Morgan Dollars – an 1895 PR64 Cameo PCGS example – takes center stage among many nice silver dollars in the sale -- a mostly brilliant proof with dynamic frosted contrast between the motifs and the mirrored fields.
- Several 1907 Saint-Gaudens High Relief double eagles in a range of Mint State grades are in the sale, led by a truly exceptional MS66 NGC Flat Rim example of extraordinary quality.

We sincerely hope you can join us for this event in Beverly Hills, but if the distance or timing of the sale is a problem, please remember there are a variety of methods to place your bids either before the auction or in "real time." We offer live telephone bidding or real-time interactive online bids through Heritage Live!® Of course, we are happy to accept your bids via e-mail, fax, or regular mail before the auction.

However you participate, we wish you the very best of luck and happy bidding!

Sincerely,

Greg Rohan  
President

Todd Imhof  
Executive Vice-President

# SESSION ONE

## COLONIALS

- 3001** 1652 Oak Tree Shilling Fine 15 PCGS. Noe-5, W-470, Salmon 3-D, R.2. A pleasing mid-grade example of this moderately plentiful Oak Tree variety. The reverse is boldly detailed with clear lettering. The obverse is slightly off-center south, as usual, with considerable weakness on the central tree. Both sides exhibit deep olive-gray patina in the recesses and light lavender-gray over the exposed surfaces. Listed on page 39 of the 2015 *Guide Book*. PCGS# 20
- 3002** 1652 Pine Tree Shilling, Small Planchet — Repaired — NGC Details. VF. Noe-25, W-890, Salmon 8-E, R.5. 71.3 gn. A much better Pine Tree die variety, attributed by a repunched HV in MASATHVSETS and a die break from the upper left corner of the first I in XII. The obverse is strongly clashed between 8 and 9 o'clock, undoubtedly very rare as such. Mint clips affect the left obverse and right reverse margins. The steel-gray surfaces are granular, and appear whizzed near 6 o'clock on both sides. Listed on page 39 of the 2015 *Guide Book*. PCGS# 24
- 3003** 1722 Rosa Americana, Period After REX, AU55 PCGS. CAC. M. 3.12-C.2, W-1326, R.3. A deep walnut-brown example that displays light wear on the curls near the ear. No marks are remotely consequential, and the surfaces show minimal granularity. Struck from widely rotated dies. Listed on page 43 of the 2015 *Guide Book*. PCGS# 149
- 3004** 1787 Massachusetts Half Cent — Cleaning — PCGS Genuine. Unc. Details. Ryder 5-A, W-5960, R.3. A smooth deep medium brown example with well struck borders and softness of impression at the centers. No marks are present across most of the coin, but the obverse field is glossy between the arrow and WEALTH. The rare late die state with a cud at 1 o'clock on the reverse. Listed on page 59 of the 2015 *Guide Book*. PCGS# 296

### 1788 Massachusetts Cent, AU55 Period, Ryder 2-B, W-6200

- 3005** 1788 Massachusetts Cent, Period, AU55 PCGS. CAC. Ryder 2-B, W-6200, R.4. This variety is usually seen only in XF and lower grades; AU coins, such as this Choice example, are seldom encountered. Dusky auburn-brown and olive-tan colors blend over each side, with smooth underlying surfaces. The strike is bold and well-centered, with only light wear seen over the high points of the design. Listed on page 59 of the 2015 *Guide Book*. Population: 14 in 55, 30 finer (10/14). PCGS# 311
- 3006** 1786 Vermont Copper, VERMONTENSIMUM VF20 PCGS. RR-8, Bressett 6-E, W-2030, R.4. This olive-brown copper as splashes of maroon patina on the obverse, with a minor planchet void at 10 o'clock. Old verdigris appears near the reverse border. Listed on page 72 of the 2015 *Guide Book*. PCGS# 545

### 1786 Vermont Landscape, AU50 VERMONTENSIMUM, Ryder-6, Whitman-2020

- 3007** 1786 Vermont Copper, VERMONTENSIMUM AU50 PCGS. RR-6, Bressett 4-D, W-2020, R.2. The obverse is struck approximately 5% off-center south, with a minor planchet streak above the plow at the handle. Otherwise, the obverse is well-struck, with the legends bold and the seven trees fully brought up. The reverse is more properly centered, with the lower half of the dentilation visible and the legend full. Struck from a late state of the reverse die, with the diagnostic eyebrow crack under the QU of QUARTA forming an inverted V at the upright of T. Glossy, medium chocolate-brown color covers both sides of this attractive Landscape copper. Listed on page 72 of the 2015 *Guide Book*. PCGS# 545
- 3008** 1795 Talbot Allum & Lee Cent MS65 Brown PCGS. Fuld-1, W-8620, R.1. A handsome Gem that boasts smooth prooflike fields and a sharp strike. Golden-brown lurks in design recesses, while the high points are medium brown and the open fields display hints of steel-blue. Listed on page 76 of the 2015 *Guide Book*. PCGS# 640
- 3009** 1792 Washington Born Virginia Cent, Inscribed Reverse — Environmental Damage — PCGS Genuine. Fine Details. Baker-60, W-10730, R.5. The typically seen variety, with the General Reverse and the dates positioned left. This example is mildly granular on each side, but the bust is bold and most inscriptions remain clear. The central reverse is weak, more due to wear than environmental damage. Overall, this is a pleasing, chocolate-brown example of this popular Washington Born Virginia copper. Listed on page 82 of the 2015 *Guide Book*. PCGS# 723

## HALF CENTS

- 3010** 1795 Plain Edge, No Pole, Thin Planchet, C-6a, B-6a, R.2, VF20 PCGS. Manley Die State 1.0. A nicely detailed example with consistent and pleasing walnut-brown surfaces. A narrow obverse edge flaw is noted at 5 o'clock, and a loupe reveals thin marks below the ER in LIBERTY and on the base of Liberty's neck. No Talbot, Allum & Lee undertype is perceptible. Our EAC grade VG10. PCGS# 35089
- 3011** 1797 1 Above 1, C-1, B-1, R.2, Fine 15 ANACS. Manley Die State 2. Plain Edge. Struck on a cut-down Talbot, Allum, & Lee cent, with lettering from the previous design visible in the left obverse field. This is also an important *Guide Book* variety with a second 1 seen in the field above the primary 1 in the date. Remarkably problem-free, with smooth medium brown surfaces and clear legends. The strike is well-centered and wear is even. Our EAC grade VG7. PCGS# 35101

**1800 Half Cent, C-1, MS62 Brown**  
Attractive for the Grade

**3012 1800 C-1, B-1, R.1, MS62 Brown NGC.** Manley Die State 3, a scarce intermediate die state. Cohen-1 is the only known die variety for the 1800 half cent. As a date, this issue is not overly elusive, and is often selected for type representation. This Mint State piece shows a blend of auburn and burgundy hues over each side, with sharp central devices and glossy, minimally abraded surfaces. Our EAC grade AU55. Census: 18 in 62 Brown, 22 finer (10/14). PCGS# 35119

**3013 1804 Spiked Chin, C-8, B-7, R.1, AU58 PCGS.** Manley Die State 3.0. A medium brown example of the famous "Spiked Chin" variety, caused when a bolt (or some other hard object) was struck into the obverse die. Despite its injury, the obverse die remained in use and was eventually paired with four different reverses. The surfaces of the present coin are unblemished and attractive. Our EAC grade XF40. PCGS# 35167

**3014 1825 C-2, B-2, R.1, MS64 Brown PCGS.** Manley Die State 1.0 with full definition on the branch stem. Curiously, clash marks within the wreath, characteristic of MDS 3.0, are also present. A beautiful deep brown near-Gem that exhibits lavender, rose, and sea-green undertones. The coruscating surfaces are virtually unabraded. Our EAC grade MS60. PCGS# 35249

**3015 1855 C-1, B-1, R.1, MS64 Red PCGS.** The sole dies. A splendid orange-red near-Gem. Lustrous and nearly mark-free. The strike is good except on portions of the dentils. A lens reveals scattered minor carbon. Certified in a first generation holder. Our EAC grade MS64. Population: 174 in 64 (1 in 64+) Red, 30 finer (9/14). PCGS# 35335

**1855 Half Cent, C-1, B-1, MS65 Red**  
Single-Finest Certified at PCGS

**3016 1855 MS65 Red PCGS. C-1, B-1, R.1.** This attractive Gem offers well-detailed design elements that show just a touch of softness on some of the stars. The well-preserved original red surfaces show a few microscopic carbon specks, but vibrant mint luster radiates from both sides. Our EAC grade MS65. Population: 1 in 65 Red, 0 finer (10/14). PCGS# 35335

**LARGE CENTS**

**1793 Chain Cent, Fair 2**  
S-4, Periods, Smooth Surfaces

**3017 1793 Chain, AMERICA, Periods, S-4, B-5, R.3, Fair 2 PCGS.** The E in ONE nearly touches the chain, and ERTY are closely spaced. These characteristics confirm the Sheldon-4 variety despite substantial wear. The chain is clear, Liberty's eye is visible, and most of the portrait is nicely outlined. The medium brown surfaces are surprisingly free from verdigris and abrasions. Our EAC grade Basal State 1. PCGS# 35444

**3018 1793 Wreath, Vine and Bars Edge, S-11a, B-16a, High R.4 — Tooled — NGC Details. VG.** S-11 is usually encountered with a lettered edge. S-11a is very scarce, particularly with a fully readable date. This walnut-brown example is granular from environmental exposure, and the obverse field is smoothed near 3 and 9 o'clock. The reverse is hairlined near 7 o'clock, and ONE CENT is burnished. Our EAC grade AG3.

**3019 1794 Head of 1794, S-65, B-51, R.1 — Environmental Damage — PCGS Genuine. XF Details.** The "Shielded Hair" variety, with the lower-left border broad. This example shows moderate roughness over each side due to corrosion, but retains clear legends and strong devices. Chocolate-brown color balances the visual appeal. Our EAC grade Fine 12.

**3020 1796 Liberty Cap, S-86, B-7, R.5, — Environmental Damage — PCGS Genuine. VF Details.** The surfaces combine olive and steel-brown, with noticeable granularity evenly distributed across the obverse and reverse. The overall appearance is hardly objectionable, and this example will certainly find a home in a type or date set. Our EAC grade VG8. PCGS# 35765

**3021 1796 Liberty Cap, S-87, B-8, R.3 — Environmental Damage — PCGS Genuine. VF Details.** The surfaces are deep burgundy in color and very finely granular when viewed through a lens, but the unaided eye finds this piece to be quite attractive for a Details coin. The devices are bold with substantial detail for the VF level, and the legends remain clear. An impressive coin, considering the minor environmental affects. Our EAC grade Fine 15.

**3022 1796 Reverse of 1795, S-92, B-28, R.3 — Environmental Damage — PCGS Genuine. VF Details.** Dark brown fields contrast with lavender high points. Liberty's hair has ample definition, but the surfaces are moderately granular. We note a thin mark down from the N in CENT and a minor obverse rim bruise at 6:30. Our EAC grade VG10. PCGS# 35813

**3023 1802 S-226, B-2, R.3, AU55 NGC.** Breen Die State III, with a crack through the tops of AMER. Newcomb considered this to be a rare die state. The sharpness is XF45, with a scratch dividing the upright of the first T in STATES. This piece has probably been cleaned and retoned. Reddish steel-brown and apple-green are intermingled on both sides, with glossy surfaces. Our EAC grade VF35. PCGS# 36293

**3024 1814 Plain 4, S-295, B-2, R.1, XF45 PCGS.** There is no evidence of die cracks or die chips on the obverse of this early die state cent. Both sides have olive and mahogany surfaces with traces of verdigris. Myriad handling marks are trivial. Our EAC grade VF25. PCGS# 36517

**1814 Large Cent, AU53  
Plain 4, S-295, B-2**

**3025** 1814 Plain 4, S-295, B-2, R.1, AU53 PCGS. The final Sheldon variety, the Plain 4 1814 is obtained with little difficulty in well worn grades, but sharp examples are scarce. This deep brown cent is only lightly abraded and retains ample mint gloss. The profile shows strike doubling but there are no “mumps” die breaks present due to the early die state. Our EAC grade XF40. PCGS# 36517

**3026** 1820 Large Date, N-13, R.1, MS64 Brown PCGS. The usually encountered late die state with cracks across the obverse margin. Principally toned golden-brown, but olive-green outlines design elements. A lustrous and lovely near-Gem. A small strike-through (as made) affects the rim near star 5. One slender mark noted near star 4. Our EAC grade MS60. PCGS# 36673

**1824 N-4 Cent, MS62 Brown  
Smooth Chocolate Surfaces**

**3027** 1824 N-4, R.2, MS62 Brown PCGS. The late die state with a crack between stars 5 and 6. A second bold crack connects the 4 in the date to the final three stars. A pleasing chocolate-brown example that has a well struck portrait and wreath. The stars show customary softness. Marks are virtually absent except for a faint thin vertical mark west of the O in ONE. Our EAC grade AU50. PCGS# 36775

**1836 N-7 Cent, MS65 Brown  
Believed the Finest Known**

**3028** 1836 N-7, R.4 MS65 Brown PCGS. The wavy-top of Liberty's head, and the die crack through the tops of D ST, confirm the variety. This example has fully lustrous olive and gold surfaces with traces of sea-green toning. An attractive Gem. There are no Mint State examples of this scarce variety recorded in the Noyes Census. Dan Holmes had an AU50, and Ted Naftzger had a cleaned AU. We believe that this piece is the finest known 1836 N-7 cent. Our EAC grade AU58. PCGS# 37129

**1839 Cent, MS65 Brown  
Booby Head, N-13**

**3029** 1839 Booby Head, N-13, R.2, MS65 Brown PCGS. The pick-up point for N-13 is the nicely repunched star 12. Die cracks through much of UNITED STATES provide further identifiers. The present high grade representative displays remnants of the initial orange-red in protected regions, but the open fields and high points are brown. Crisply struck and lustrous with only trivial marks save for an unobtrusive tick on the O in ONE and a small obverse rim depression at 1:30. Our EAC grade MS63. PCGS# 37252

**1840 Cent, MS65 Brown  
N-8, Large Date**

**3030** 1840 Large Date, N-8, R.1, MS65 Brown PCGS. Die State d, with rim cud extending from star 9 to below the date. It is unusual to find an example of this die state with this many of the rim cuds visible, as they are usually obscured by variances in die alignment. The coin displays glossy burgundy-brown toning with tinges of coppery-red luster in the protected regions and subtle bluish overtones overall. The border dentils and some of the stars exhibit weakness from the late die state, but the central motifs are well-defined. The surfaces are void of significant imperfections, as suggested by the Gem grade. Our EAC grade MS60. PCGS# 395840

**3031** 1844/81 N-2, R.2 — Improperly Cleaned — NGC Details. Unc. Ex: Adam Mervis Collection. Grellman Die State a. The popular inverted date variety, reminiscent of the similar blunder on the 1865-S eagle. An attractive medium brown example that shows the typical strike usual for N-2. Three trivial ticks noted on the jaw, beneath star 10, and the N in CENT. Recolored at one point and nicely retuned. Our EAC grade AU50. Ex: Pre-Long Beach (Ira & Larry Goldberg, 2/2008), lot 1580.

**3032** 1852 N-16, R.1, MS66 Brown NGC. Grellman Die State b. An easy variety to identify, courtesy of the many small lumps (presumably caused by die rust) on ONE CENT. A late die state example with flowlined fields. A splendid chocolate-brown Premium Gem. Exemplary aside from a slight rim nick on the reverse at 5:30 and a small spot east of the T in CENT. Encapsulated in a prior generation holder. Our EAC grade AU55. PCGS# 147269

**3033** 1852 N-22, N-9, R.1, MS64 Red PCGS. Die State c, with considerable die erosion in the fields, but the reverse uncracked. The central devices and stars are sharp, and the border dentils grow weak only beneath the date. Vibrant coppery-red luster illuminates each side, and there are no obvious signs of carbon spotting. Our EAC grade MS62. PCGS# 147286

**1853 N-25 Cent, MS65 Red  
Lustrous Orange-Gold Gem**

**3034 1853 N-25, R.1, MS65 Red PCGS.** Grellman Die State b. This lustrous orange-gold Gem has a bold strike at the centers and on the lower reverse and coronet. The stars, lower obverse, and upper reverse exhibit incompleteness. Only incidental contact is present, but we note a fingerprint fragment near star 8 and a small spot near the I in AMERICA. Our EAC grade MS64. PCGS# 403925

**3035 1855 Upright 55, N-4, R.1 MS64 Red PCGS.** Grellman Die State a, and likely part of the large hoard that Bob Grellman discusses in his die variety study of the late date cents. Two small die chips straddle Liberty's jaw on the obverse of N-4, and that feature is diagnostic for the variety. This lovely cent has brilliant orange surfaces with full mint luster. Our EAC grade MS63. PCGS# 46953

**3036 1857 Small Date, N-4, R.1, MS64 Red and Brown PCGS.** CAC. Grellman Die State c. Substantial peach-red fills design recesses, although the high points and open fields are brown. An unabraded Choice final-year large cent with superior eye appeal for the designated grade. Our EAC grade MS63. PCGS# 403970

## FLYING EAGLE CENTS

**3037 1857 MS64 PCGS.** Soft bronze-gold luster reveals faint tinges of lavender-red color on each side of this Choice Flying Eagle type coin. Some minor striking weakness is noted on the forward edge of the eagle's left wing, but the devices are otherwise well-defined. No mentionable abrasions are observed with a loupe. NGC ID# 2276, PCGS# 2016

**3038 1857 MS64 NGC.** An apricot-gold near-Gem that boasts booming luster and an absence of abrasions. The strike shows minor softness on the tail and the upper right portion of the wreath. A lens reveals distributed pinpoint carbon.  
Ex: Scotsman, 5/2005, lot 401, which realized \$2,070. NGC ID# 2276, PCGS# 2016

**1857 Flying Eagle Cent, MS65  
Splendid Strike and Color**

**3039 1857 MS65 PCGS.** An outstanding Gem type coin. The pumpkin-gold surfaces are lustrous and display only trivial contact. A lens is required to locate infrequent minute carbon. The strike is precise except for incompleteness on the A in STATES. Relatively few high-grade Flying Eagle cents retain their initial color, but the present coin is little changed from its appearance during the Buchanan administration. NGC ID# 2276, PCGS# 2016

**1858 Large Letters Flying Eagle Cent, MS65  
Lustrous Spot-Free, Fully Struck Example**

**3040 1858 Large Letters MS65 PCGS.** High Leaves Reverse. Closed E in ONE. Nice cartwheel luster complements a full strike on this vibrant cent. An excellent example of the Large Letters variant, struck from the 1857 hub type with the AM of AMERICA touching at the bottom serifs. Tan-gold surfaces show just one or two minor, insignificant marks and not a fleck or spot to be found — a gleaming Gem in every sense of the word. NGC ID# 2277, PCGS# 2019

**3041 1858 Small Letters MS64 PCGS.** Low Leaves, Close E in ONE. A sharply struck Choice cent. The chestnut-gold surfaces are unmarked and satiny. One small spot noted in front of the beak. The dies are widely rotated, unusual for the series. NGC ID# 2279, PCGS# 2020

**3042 1858 Small Letters MS64 PCGS.** CAC. Low Leaves Reverse. Close E in ONE. A splendid chestnut-gold Choice cent. The strike is intricate, and the lustrous surfaces are smooth aside from a tiny strike-through (as coined) beneath the second S in STATES. NGC ID# 2279, PCGS# 2020

## INDIAN CENTS

**3043 1859 MS64 PCGS.** A satiny Choice example of this one-year, Laurel Wreath subtype. The headdress feathers and the ribbon are sharp, though some of the finer wreath details are blurred from die wear. Original tan-gold luster illuminates each side. NGC ID# 227E, PCGS# 2052

**1859 Indian Cent, MS65  
Tied for Finest at NGC**

**3044 1859 MS65 NGC.** The Indian design made its debut in 1859 and the reverse featured a laurel wreath motif that was only used that year, making the issue an important one for type collectors. This impressive Gem displays sharply detailed design elements on the obverse, but a touch of softness shows on the wreath. The lustrous original red surfaces have mellowed to light brown in some areas. Census: 2 in 65, 0 finer (10/14). NGC ID# 227E, PCGS# 2052

**3045 1860 MS66 NGC.** This is an aesthetically pleasing example of the usual Rounded Bust variety of 1860 Indian cent, with sharp design elements and pristine tan surfaces. Both sides exhibit brilliant satin luster. Census: 39 in 66 (1 in 66 ★), 3 finer (10/14). NGC ID# 227F, PCGS# 2058

- 3046 1863 MS64 PCGS.** A nice-for-the-grade example of this midseries copper-nickel cent, showing some interesting die cracks and die lines on the obverse. A well-struck piece with no mentionable carbon. A tiny fleck appears in the reverse denticles close to 9 o'clock. NGC ID# 227J, PCGS# 2067
- 3047 1863 MS66 PCGS.** Almond-tan and orange surfaces are complemented by glints of saffron and pale olive on this impeccably preserved Premium Gem copper-nickel cent, one of the finest survivors of this more than 150-year-old mintage. The strike is sharp save on the feather tips which are just a touch soft. Even under a loupe, no mentionable contact appears. Population: 43 in 66 (2 in 66+), 0 finer (10/14). NGC ID# 227J, PCGS# 2067
- 3048 1864 Copper-Nickel MS66 PCGS.** Attractive light grayish-tan luster emanates from both sides of this Premium Gem copper-nickel cent. The design elements are well struck, including relatively strong detail in most of the feather tips. Some minor softness is noted in the upper-right corner of the shield. A couple of minute marks are concealed within the shield. This is one of the most difficult dates in the copper-nickel series to find with attractive eye appeal. Population: 21 in 66 (1 in 66+), 1 finer (10/14). NGC ID# 227K, PCGS# 2070
- 3049 1870 MS65 Red and Brown NGC. CAC.** Bold N. The surfaces are sharply struck on this piece throughout save for a couple of feather tips and including all four diamonds on the ribbon. Intermingled red and brown appear amid no trace of carbon. Nice for the grade, a sentiment which CAC shares. NGC ID# 227U, PCGS# 2098
- 3050 1871 MS64 Brown PCGS.** Bold N. The 1871 Indian cent is one of several elusive issues from the period, seldom seen in pleasing Mint State condition. This Choice example has glossy chocolate-brown patina, with subtle tinges of coppery-orange luster in the recesses. The strike is crisp throughout, and no major abrasions are observed. Population: 36 in 64 Brown, 13 finer (9/14). NGC ID# 227V, PCGS# 2100
- 3051 1877 XF45 PCGS.** Only light wear shows on the design elements of this pleasing Choice XF specimen, with even medium brown surfaces that show some granularity in the left obverse field. The 1877 Indian cent is a low-mintage key to the series. NGC ID# 2284, PCGS# 2127
- 3052 1888/7 Snow-1, FS-301 — Environmental Damage — PCGS Genuine. XF Details.** Key to a Guide Book collection of business strike Indian cents, the 1888/7 shows the “ear” and a “dash” of an underdigit 7 near the final date digit. A die break above the E in UNITED provides a further diagnostic. A well defined dark gray example with a moderately granular lower reverse. PCGS# 37543

**1894 Cent, MS66 Red  
Rich, Frosty Luster**

- 3053 1894 MS66 Red PCGS.** A Registry-quality blazer, this full Red Premium Gem showcases bronze-gold and coppery-red luster, with boldly defined design elements. Close scrutiny with a loupe reveals a few microscopic specks on the obverse, but no mentionable abrasions are observed. This issue is moderately obtainable in full Red condition, but those grading finer than this piece are rarely seen. Population: 30 in 66 (2 in 66+) Red, 0 finer (9/14). NGC ID# 228N, PCGS# 2189

- 3054 1903 MS66 Red PCGS. CAC.** Glowing luster illuminates the copper-red surfaces of this gorgeous Premium Gem representative. The motifs are boldly impressed with four full diamonds on the ribbon, and each side lacks any distracting impairments. PCGS has certified only seven numerically finer pieces (10/14). NGC ID# 228Y, PCGS# 2216
- 3055 1909 MS66 Red PCGS.** An important transitional issue, representing the last of the Indian cent design before introduction of the Lincoln cent late in the year. This Premium Gem has frosty luster with pale orange mint color on the obverse, and rich orange reverse luster. PCGS has only certified five finer examples (10/14). NGC ID# 2297, PCGS# 2237
- 3056 1909 MS66 Red PCGS. CAC.** This final-year Indian cent is better than most surviving examples, with only five higher-grade submissions at PCGS (9/14). Both sides display brilliant orange mint luster and bold design motifs that combine for exceptional eye appeal. NGC ID# 2297, PCGS# 2237

**1909 Indian Cent, MS66+ Red  
Excellent Final-Year Type Coin**

- 3057 1909 MS66+ Red PCGS. CAC.** This high-end Premium Gem represents the final year of the Indian design, making it a popular choice for type collectors. The design elements are sharply detailed and the well-preserved original red surfaces radiate vibrant mint luster throughout. PCGS has graded only five numerically finer examples (10/14). NGC ID# 2297, PCGS# 2237
- 3058 1909-S MS63 Red and Brown PCGS.** Well-balanced coppery-orange and auburn-brown hues encompass each side of this Select Mint State example. A few small specks are noted near the upper-right obverse field, but are not overly detracting. The 1909-S is significantly more elusive in Mint State than its Lincoln counterparts. NGC ID# 2298, PCGS# 2239
- 3059 1909-S MS64 Red and Brown NGC. CAC.** A pleasing Choice example of this final-year, key-date issue, this piece displays well-balanced copper-orange and pale brown hues, with satiny underlying luster. As is diagnostic of genuine examples of this San Francisco issue, the upper headdress feathers are not fully defined, though the eye appeal is seemingly uninhibited. NGC ID# 2298, PCGS# 2239

## PROOF INDIAN CENTS

- 3060 1862 PR65 Cameo NGC.** From a reported mintage of only 550 pieces, this 1862 proof cent showcases tack-sharp, frosty devices set against unusually deep mirrors. Warm bronze-gold toning graces the relief elements, though the fields show deeper sun-orange hues. Census: 19 in 65 Cameo, 27 finer (10/14). PCGS# 82259
- 3061 1862 PR66 Cameo PCGS.** Eagle Eye Photo Seal, card included. A prominently mirrored and crisply struck wheat-gold Premium Gem. Only minute contact and carbon determines the grade. A meager proof mintage of 550 pieces. PCGS# 82259
- 3062 1863 PR64 Cameo PCGS.** This Choice proof displays unusually reddish-orange color for the copper-nickel composition, being especially attractive when tilted beneath a light. The devices are sharply impressed and provide pleasing contrast. Population: 9 in 64 Cameo, 19 finer (10/14). PCGS# 82262

**3063 1864 Copper-Nickel PR64 PCGS.** This Choice example was struck from mildly rotated dies, with deeply reflective fields and bold design elements. Shades of coppery-orange and sun-gold illuminate the recesses. A scattering of microscopic flecks is observed on the obverse with close examination. NGC ID# 229E, PCGS# 2265

**3064 1864 Copper-Nickel PR64 Cameo PCGS.** This proof issue is genuinely scarce with a Cameo designation, and carbon-free examples, such as this piece, are particularly difficult to locate. The sharp, softly frosted devices provide the necessary contrast, while the fields show varying shades of sun-gold and coppery-red toning. Population: 29 in 64 (2 in 64+) Cameo, 34 finer (10/14). PCGS# 82265

#### 1864 Bronze No L Cent Gem Red and Brown Example

**3065 1864 Bronze No L PR65 Red and Brown NGC. CAC.** Accurate mintage records for the bronze No L 1864 proof cent are not known to exist, though estimates range from just 150 pieces (the *Guide Book*) to 300 examples (Rick Snow). Whatever the case, the issue is one of the keys to the proof Indian cent series, and is scarcely seen with remaining Red color. This Gem representative is boldly struck throughout, with shades of cherry-red and bronze-gold over each side. The strike is full and the preservation is excellent. The obverse exhibits pleasing field-motif contrast, though the reverse is bit too deeply toned to warrant a Cameo designation from NGC. Census: 22 in 65 (1 in 65 ★ Red and Brown, 1 in 65+★) NGC ID# 229F, PCGS# 2277

#### 1877 Indian Cent, PR63 Red and Brown Nice Alternative to the Key Business-Strike Issue

**3066 1877 PR63 Red and Brown PCGS.** Only 900 proof Indian cents were struck in 1877, and the date saw the rarest business-strike issue of the series. The original red surfaces of this attractive Select example have mellowed to light brown and lavender in some areas, with sharply detailed design elements and slightly reflective surfaces under the patina. NGC ID# 229W, PCGS# 2319

**3067 1881 PR66 Red and Brown PCGS. CAC.** This deeply mirrored proof exhibits profoundly vivid cherry-red, lemon-gold, and fire-orange toning, with a few small violet accents seen over the obverse portrait. The strike is razor-sharp and the eye appeal is incredible. Population: 21 in 66 (1 in 66+) Red and Brown, 7 finer (10/14). NGC ID# 22A2, PCGS# 2331

**3068 1886 Type One PR66 Red and Brown PCGS. CAC.** A boldly struck Premium Gem proof from the earlier hub type. The devices are struck to full definition and are set against highly reflective fields. Olive and sun-gold hues encompass much of each side, with deeper cherry-red overtones seen over the central obverse. Population: 36 in 66 (2 in 66+) Red and Brown, 2 finer (9/14). NGC ID# 22A7, PCGS# 2346

#### 1892 Indian Cent, PR66 Red Cameo Tied for Finest Certified

**3069 1892 PR66 Red Cameo PCGS.** Slight weakness of the feather tips appears on the obverse of this exceptional Premium Gem Cameo proof, while all other details are boldly defined. The surfaces are exceptional, with satiny devices floating over deeply mirrored fields. Pale orange surfaces are evident, with lighter orange near the periphery. Population: 5 in 66 Cameo, 0 finer (9/14). PCGS# 82365

**3070 1894 PR65 Red Cameo NGC.** A stunning Gem proof Indian cent, with brightly mirrored fields and sharply detailed devices that show bold cameo contrast. This Gem is tied for the finest Cameo example at NGC, with no Ultra Cameos certified for the issue. Census: 2 in 65 Cameo, 0 finer (10/14). PCGS# 82371

**3071 1895 PR66 Red and Brown PCGS.** Eagle Eye Photo Seal, card included. Vivid ruby-red dominates the obverse and the right reverse. The left reverse is navy-blue, and the portrait high points are blue-green. The central reverse displays a blush of yellow-gold. NGC ID# 22AH, PCGS# 2373

**3072 1899 PR64 Red Cameo PCGS.** This is a lovely proof with fully brilliant red mint color and excellent Cameo contrast. The design elements are sharply struck and the surfaces have splashes of light toning. Cameo proofs are scarcely seen in the numismatic market place. Population: 2 in 64 Cameo, 5 finer (10/14). PCGS# 82386

**3073 1900 PR66 Red PCGS.** A flashy peach-gold and olive specimen that boasts a full strike and minimal carbon. An ideal candidate for a high quality type set. Certified in a green label holder. Population: 15 in 66 Red, 6 finer (10/14). NGC ID# 22AN, PCGS# 2389

## LINCOLN CENTS

**3074 1909-S VDB AU50 PCGS.** A partly lustrous medium brown key date cent. A subtle russet spot is on the obverse field beneath IN. The high points of Lincoln's head have a glossy appearance. Certified in a green label holder. NGC ID# 22B2, PCGS# 2426

**3075 1909-S VDB AU55 PCGS.** The westernmost mint struck a mere 484,000 Lincoln cents with Victor David Brenner's initials in 1909, ensuring the issue as the preeminent date in the series. This Choice AU example shows light golden-brown color over the often-seen woodgrain surfaces. The devices are sharply detailed, and light ticks are evenly scattered. NGC ID# 22B2, PCGS# 2426

**3076 1909-S VDB AU58 PCGS.** A light coppery-brown example, this low-mintage key date features bold definition throughout and ample remaining luster. The faintest trace of rubbing, imperceptible without magnification, is all that prevents a Mint State designation. NGC ID# 22B2, PCGS# 2426

**3077 1909-S VDB MS62 Brown PCGS.** This Mint State example features copper-brown surfaces overall with areas of mint-red in the design recesses. Each side shows crisp detail throughout, although the reverse initials are somewhat softly impressed. A pleasing coin from a famous 20th century issue. NGC ID# 22B2, PCGS# 2426

**3078 1909-S VDB MS62 Brown NGC.** A lovely key date representative from a low mintage of only 484,000 pieces, this coin exhibits chocolate-brown surfaces overall with areas of mint-red remaining. Lincoln's portrait details are strongly impressed, and the V.D.B. initials are bold. NGC ID# 22B2, PCGS# 2426

**3079 1909-S VDB MS62 Brown NGC.** Tinges of coppery-orange luster highlight glossy auburn-brown toning on each side of this key-date Lincoln cent. A few small carbon specks are noted upon close examination, but are not detracting to the unaided eye. NGC ID# 22B2, PCGS# 2426

**3080 1909-S VDB MS63 Red and Brown PCGS.** Rich coppery-orange luster in the recesses accents glossy auburn-brown toning elsewhere, complementing sharp design elements. This is an attractive mid-grade Uncirculated example of this key-date Lincoln, ideal for the casual date collector. NGC ID# 22B2, PCGS# 2427

**3081 1909-S VDB MS64 Red PCGS.** Both sides of this Choice Mint State piece exhibit brilliant orange luster, intermingled with gold overtones. A few scattered obverse spots limit the grade of this brilliant Lincoln key. NGC ID# 22B2, PCGS# 2428

---

**1909-S VDB Lincoln Cent, MS65 Red  
Rich, Shimmering Luster**

**3082 1909-S VDB MS65 Red PCGS.** A glowing coppery-orange example of this key date Lincoln cent. The strike is crisp and the surfaces are exceptionally well-preserved, with only a single tiny speck noted above the Y in LIBERTY. An appealing coin that will please even the most discerning collector. Numerically finer pieces will prove challenging to locate. NGC ID# 22B2, PCGS# 2428

---

**1909-S VDB Cent, MS65 Red  
Natural Mint Red Color**

**3083 1909-S VDB MS65 Red PCGS.** The popularity of the S-VDB is a constant in U.S. numismatics. Worth a premium as soon as they were minted, considerable numbers were set aside in high grade. Even so, the number of Gem Red examples is not enough to satisfy collector demand for the one-year type. This piece shows natural Mint Red color with just a touch of pale olive and a few flecks on each side. Strongly defined throughout. A lovely Gem example of this important early Lincoln cent. NGC ID# 22B2, PCGS# 2428

---

**1909-S VDB Lincoln Cent, MS65 Red  
Sought-After Series Key**

**3084 1909-S VDB MS65 Red PCGS.** A delightful Gem representative of the low-mintage key to the series, this coin exhibits razor-sharp definition on all design elements and the original red surfaces radiate vibrant mint luster on both sides. Overall eye appeal is terrific. We expect intense competition from series enthusiasts when this lot is called. NGC ID# 22B2, PCGS# 2428

**3085 1909 MS67 Red PCGS.** Orange-gold, somewhat frosty luster gives this Superb Gem type coin immense visual appeal. Essentially carbon-free with bold design elements and carefully preserved surfaces. Population: 73 in 67 (4 in 67+) Red, 0 finer (10/14). NGC ID# 22B3, PCGS# 2431

---

**1909-S Lincoln Cent, MS66 Red  
Seemingly Underrated in High Grades**

**3086 1909-S MS66 Red PCGS. CAC.** Blended shades of bronze-gold and coppery-orange luster encompass each side of this well-preserved semikey Lincoln cent. The strike is crisp throughout Lincoln's jacket and hair, and only a few small freckles are seen near the borders upon close examination. Although not quite as popular as the 1909-S VDB, the 1909-S is actually the scarcer coin in Premium Gem Red condition, and PCGS has certified only five examples numerically finer (9/14). NGC ID# 22B4, PCGS# 2434

**3087 1909-S/S S Over Horizontal S, FS-1502, MS66 Red PCGS. CAC.** A magnificent apricot-gold Premium Gem of this popular first-year variety. The strike is precise and the luster is booming. Only the infrequent pinpoint fleck precludes perfection. PCGS# 37645

**3088 1909-S/S S Over Horizontal S, FS-1502, MS66 Red PCGS. CAC.** A beautiful wheat-gold Premium Gem. The essentially unabraded surfaces are lustrous and boldly struck. A lens reveals infrequent pinpoint flecks. Nearly unobtainable any finer. PCGS# 37645

**1910 Lincoln Cent, MS67 Red  
Registry-Quality Example**

- 3089 1910 MS67 Red PCGS.** This Superb Gem is among the finest that survive from a mintage of nearly 147 million coins. The fiery-red surfaces show swirling luster and impressive detail on Lincoln's hair, beard, and shoulder. Only a tiny tick above the O in ONE prevents an even higher grade. Population: 26 in 67 Red, 0 finer (9/14). NGC ID# 22B5, PCGS# 2437

**1912-D Lincoln Cent, MS65+  
Lustrous Original Red Surfaces**

- 3090 1912-D MS65+ Red PCGS. CAC.** A high-end Gem with original red surfaces that show only one microscopic speck of carbon on the reverse. The design elements are sharply detailed and the well-preserved surfaces radiate vibrant mint luster on both sides. PCGS has graded only 18 numerically finer examples (10/14). NGC ID# 22BB, PCGS# 2455

**1914 Lincoln Cent, MS66 Red  
Well-Preserved Lustrous Surfaces**

- 3091 1914 MS66 Red PCGS.** The original red surfaces of this spectacular Premium Gem are free of visible distractions and show no trace of carbon. The design elements are well-detailed and vibrant mint luster radiates from both sides. Overall eye appeal is outstanding. Population: 66 in 66 (1 in 66+) Red, 5 finer (10/14). NGC ID# 22BG, PCGS# 2470

- 3092 1914-D AU58 NGC.** Deep olive-green toning blankets much of both sides, leaving tinges of coppery-red luster in the protected regions. Slight friction does not overly affect the finer details. This key Denver issue has proven to be quite difficult to locate with pleasing eye appeal. NGC ID# 22BH, PCGS# 2471

**1914-D Cent, MS63 Brown  
Appealing for the Grade**

- 3093 1914-D MS63 Brown PCGS. CAC.** This key issue is quite elusive in pleasing Mint State condition, even more so than the widely popular 1909-S VDB. This example displays sharp design definition and only small surface ticks. Subtle tinges of coppery-red luster in the recesses highlight glossy medium brown patina overall. A few small carbon specks are seen upon closer examination, but are not obvious to the unaided eye. NGC ID# 22BH, PCGS# 2471

- 3094 1915 MS66 Red PCGS. CAC.** a few toning swirls appear in the right obverse field of this brilliant and highly lustrous Premium Gem. Both sides have full orange mint color and sharp design motifs. Population: 88 in 66 (2 in 66+) Red, 9 finer (10/14). NGC ID# 22BK, PCGS# 2479

**1916-D Cent, MS65 Red  
Copper-Orange Color**

- 3095 1916-D MS65 Red PCGS.** The issue's mintage of nearly 36 million coins does not allude to the scarcity of Gems with original Red coloration. This representative offers satiny luster and well-struck devices over copper-orange surfaces that show only a few tiny ticks. Population: 57 in 65 (2 in 65+) Red, 15 finer (9/14). NGC ID# 22BP, PCGS# 2491

**1916-D Lincoln Cent, MS65 Red  
Conditionally Rare Example**

- 3096 1916-D MS65 Red PCGS.** Early branch mint Lincoln cents with full mint Red surfaces are hard to come by. This Gem representative displays strong luster and intense orange coloration over each side. The strike detail is above-average, as many coins were struck from widely spaced dies. Population: 57 in 65 (2 in 65+) Red, 15 finer (9/14). NGC ID# 22BP, PCGS# 2491

- 3097 1916-S MS64 Red PCGS.** Vivid coppery-orange and bronze-gold hues encompass each side of this Choice representative, while satiny luster highlights sharply struck design elements. A few faint flecks are noticed under magnification, but are not distracting. PCGS has certified only 23 numerically finer examples within the Red color category (9/14). NGC ID# 22BR, PCGS# 2494
- 3098 1916-S MS64 Red PCGS. CAC.** Both sides of this near-Gem exhibit light orange luster with frosty surfaces and slight brownish overtones. This is an exceptionally challenging issue with full mint color. PCGS has only certified 23 finer examples (10/14). NGC ID# 22BR, PCGS# 2494
- 3099 1917 MS66+ Red PCGS. CAC.** Blazing orange-gold and coppery-pink luster illuminates frosty, nearly undisturbed surfaces on each side of this high-end Premium Gem example. The strike is crisp throughout. A loupe reveals a few faint fleck in the right reverse field, though the eye appeal is not inhibited. PCGS has certified only 17 numerically finer examples within the Red color category (9/14). NGC ID# 22BS, PCGS# 2497
- 3100 1917-S MS64 Red PCGS.** Rich orange luster appears on the brilliant, virtually spot-free surfaces of this sharply defined near-Gem Lincoln cent. A few scattered marks on the reverse appear to remain from the planchet before this piece was struck. Population: 59 in 64 (1 in 64+) Red, 18 finer (10/14). NGC ID# 22BU, PCGS# 2503
- 3101 1918-S MS64 Red PCGS.** The strike on this San Francisco Mint cent is typical, with peripheral weakness at the left side of the obverse and reverse. A few scattered spots appear on the obverse, preventing a higher numerical grade. Population: 69 in 64 (1 in 64+) Red, 16 finer (10/14). NGC ID# 22BX, PCGS# 2512

**1922 No D Lincoln Cent, AU50  
FS-401, Strong Reverse**

- 3102 1922 No D, Strong Reverse, FS-401, AU50 PCGS.** Die Pair 2. The Strong Reverse, also known as Die Pair 2, is the premier 1922 No D Lincoln cent. The obverse has TRUST, RTY, and the final 2 stronger than other elements, and the reverse exhibits comparatively bold definition. This variety is always graded by the reverse alone. This example has pleasing dark chocolate surfaces combined with hints of olive and gold. PCGS# 37678

**1922 No D Lincoln Cent, FS-401, AU53  
Die Pair 2, Strong Reverse**

- 3103 1922 No D, Strong Reverse, FS-401, AU53 PCGS.** Die Pair 2. This splendid No D cent has pristine surfaces for the grade with lovely pale blue toning over is smooth medium brown surfaces. The obverse is sharper than usual for the variety, and the reverse is expectedly crisp. An impressive example for the advanced collector. PCGS# 37678

- 3104 1924-D MS64 Red PCGS.** With a low mintage of little more than 2.5 million pieces, the 1924-D cent is highly elusive with full Red color. This near-Gem exhibits smooth, satiny luster with rich copper-red and bronze-gold hues blended across each side. Some softness of strike is noted on the upper-left reverse, but a lack of carbon gives this piece a high degree of visual appeal. Housed in a green label holder. NGC ID# 22CD, PCGS# 2554
- 3105 1925 MS67 Red PCGS.** Blazing sun-red mint bloom delivers incredible eye appeal on this boldly struck Superb Gem. A small, shallow strike-through is noted below the G in GOD, and a couple faint specks are seen with a loupe, but these are hardly worthy of mention. This piece is tied numerically with the example in the current highest-rated Registry Set. Population: 63 in 67 Red, 0 finer (9/14). NGC ID# 22CF, PCGS# 2560
- 3106 1925 MS67 Red PCGS.** Radiant bronze-gold peripheral hues give way to rich coppery-orange luster in the central regions, and only faint signs of carbon are detected with a loupe. The surface quality is outstanding and Lincoln's shoulder is particularly clean. This Registry-quality piece is tied for the finest certified at PCGS and NGC (9/14). NGC ID# 22CF, PCGS# 2560
- 3107 1926-S MS64 Red and Brown NGC.** A challenging date with any degree of remaining mint red. This Choice example displays luminous burgundy-red toning and carefully preserved surfaces. The devices exhibit above-average definition for this San Francisco issue. NGC has encapsulated only 29 numerically finer Red and Brown examples (10/14). NGC ID# 22CL, PCGS# 2574
- 3108 1934 MS67+ Red PCGS. CAC.** The 1934 Lincoln cent issue is among our favorite dates in the later Wheat series, both due to its position as the first high-mintage emission after the low-production 1931-33 cents as well as the curious one-off shape of the 3 in the date. This fiery piece boasts rich red luster and a bold strike throughout carbon-free surfaces. Population: 10 in 67+ Red, 8 finer (10/14). NGC ID# 22D9, PCGS# 2635

**1936-S Cent, MS67 Red  
Registry Set Candidate**

- 3109 1936-S MS67 Red PCGS.** Vibrant coppery-red mint luster engulfs each side of this Superb Gem. The strike is boldly impressed, with good definition over the O in ONE, which is usual weak. A few faint toning flakes are noted on the reverse, but do not distract. The 1936-S cent is encountered with some frequency at the MS67 Red grade level, but none have graded finer at either PCGS or NGC (7/14). NGC ID# 22DG, PCGS# 2656

**1936-S Lincoln Cent, MS67 Red  
Among the Finest Certified**

- 3110 1936-S MS67 Red PCGS.** Despite significant numbers of full Red Mint State survivors, only 51 1936-S cents have been certified at the MS67 grade level by PCGS, with none finer (9/14). This piece displays radiant coppery-orange luster, with only a few minute carbon specks detected upon close examination. This coin represents an important opportunity for the Registry Set collector, as it is tied numerically with the example in the current highest-rated Registry Set. NGC ID# 22DG, PCGS# 2656

**1936-S Lincoln Cent, MS67 Red  
Exceptional Registry Set Candidate**

- 3111 1936-S MS67 Red PCGS.** Vibrant mint luster and sharply detailed design elements are the calling cards of this impressive Superb Gem. The original red surfaces are free of mentionable distractions and overall visual appeal is outstanding. This coin will be a welcome addition to a fine collection or Registry Set. Population: 52 in 67 Red, 0 finer (10/14). NGC ID# 22DV, PCGS# 2656
- 3112 1940-S MS67+ Red PCGS. CAC.** A Registry Set essential, this piece is one of only seven in MS67+ Red at PCGS, with a sole MS68 Red finer (10/14). The pristine surfaces on this well-struck coin are largely brick-red in the centers with lighter hints of tan-gold at the rims. NGC ID# 22DV, PCGS# 2692
- 3113 1945 MS67 Red PCGS. CAC.** Supremely lustrous and near-pristine, this specimen is tied as one of the finest-graded examples at PCGS. The Registry Set specialist should take special notice of this impeccably preserved Superb Gem example. Population: 63 in 67 Red, 0 finer (10/14). NGC ID# 22EG, PCGS# 2734

**1946 Cent, MS67 Red  
Superb Registry Coin**

- 3114 1946 MS67 Red PCGS.** This luminous, coppery-red Superb Gem is tied with just 19 others as the finest certified of the date at PCGS (9/14), and ranks numerically equal to the example in the current highest-rated Registry Set. The strike is crisp and the surfaces are void of carbon spotting. An important opportunity for the advanced Lincoln cent collector. NGC ID# 22EK, PCGS# 2743

**1949 Cent, MS67 Red  
None Certified Finer by PCGS or NGC**

- 3115 1949 MS67 Red PCGS.** From an original mintage of well over 200 million coins comes this conditionally rare Superb Gem, one of just 18 pieces rated MS67 Red by PCGS. Sharply struck with beautiful mint-red coloration and lovely, shimmering luster. Some interesting, horizontal die striations are noted on the reverse, but post-strike surface flaws are virtually nonexistent on both sides of this impressive example, destined for a top-notch Registry Set collection. Population: 18 in 67 Red, 0 finer (9/14). NGC ID# 22EV, PCGS# 2770

**1949 Cent, MS67 Red  
Rich Mint Luster**

- 3116 1949 MS67 Red PCGS. CAC.** Frosty, coppery-red mint bloom illuminates boldly struck devices on each side of this well-preserved Superb Gem representative. A few faint freckles are noted on each side upon close examination, though the appeal is hardly inhibited. This piece is tied for the finest certified at PCGS (9/14), and is numerically equal to the coin in the current highest-rated Registry Set. NGC ID# 22EV, PCGS# 2770
- 3117 1949-D MS67 Red PCGS.** This is a fiery-red example with satiny luster and only a few areas of minor strike incompleteness. Although the issue is common across virtually all grade levels, comparable Superb Gems are very scarce. In fact, PCGS has certified just 41 submissions in 67 Red and none finer (9/14). NGC ID# 22EW, PCGS# 2773

- 3118 1949-D MS67 Red PCGS. CAC.** Satiny, coppery-red luster engulfs each side of this beautiful Superb Gem, and close examination reveals only a single, minute carbon speck on the lapel. This piece, tied for the finest certified at PCGS (9/14), is also numerically equal to the example in the highest-rate Registry Set. NGC ID# 22EW, PCGS# 2773
- 3119 1950 MS67 Red PCGS.** Only a few dozen Superb Gem 1950 Lincoln cents survive from a mintage of more than 272 million coins. This brilliant and highly lustrous example has rich reddish-orange luster, fiery mint color, and bold design motifs. Population: 32 in 67 Red, 0 finer (9/14). NGC ID# 22EY, PCGS# 2779
- 3120 1950 MS67 Red PCGS.** Balanced orange-red and copper-gold hues blend over both sides of this Registry-quality Superb Gem. The devices are sharply detailed and close examination reveals only a few faint surface grazes. PCGS has graded 32 MS67 Red examples, with none finer (9/14). NGC ID# 22EY, PCGS# 2779
- 3121 1950 MS67 Red PCGS.** Among the finest-certified. This coppery-red Superb Gem displays a full strike over highly lustrous, well-preserved surfaces. Registry Set collectors should note that PCGS has seen just 32 coins in MS67 Red and none finer (9/14). NGC ID# 22EY, PCGS# 2779

---

**1952-S Cent, MS67+ Red  
The Sole Finest Certified**

- 3122 1952-S MS67+ Red PCGS.** Virtually flawless surfaces showcase a well-executed strike and deep coppery-red mint luster, with a couple small ribbons of mint-green toning seen across Lincoln's jacket toward the date. A small speck adjacent to the N in ONE is the only sign of carbon. Hundreds of this date have been certified by PCGS and NGC in MS67 Red, but this coin stands as the only example to receive a Plus designation, and none have been encapsulated finer (9/14). Obviously, this piece is less than half a point finer than the example in the current highest-rated Registry Set. NGC ID# 22F8, PCGS# 2803

---

**1953 Cent, MS67 Red  
Important Registry Coin**

- 3123 1953 MS67 Red PCGS.** PCGS has certified only 14 1953 Lincoln cents at the MS67 Red grade level (9/14), and this luminous, coppery-orange representative ranks a full grade point finer than the coin in the current highest-rated Registry Set. The devices are boldly struck amid satiny luster, and the surfaces are void of even minor carbon spotting. NGC ID# 22F9, PCGS# 2806
- 3124 1953-D MS67 Red PCGS.** Dense, peach-orange color reverberates with booming mint luster over each side of this crisply struck, well-preserved Superb Gem. An important opportunity for the Registry Set collector, as this piece is one of just 29 MS67 examples at PCGS, with none numerically finer (9/14). NGC ID# 22FA, PCGS# 2809

- 3125 1953-D MS67 Red PCGS.** This gorgeous representative offers satiny luster over unimpaired surfaces with faint lime-green toning. Red Premium Gems from this issue are fairly available. However, the certified population data dramatically declines at the Superb Gem level. From an original mintage of over 700 million coins, PCGS has certified a mere 29 examples in 67 Red, and none finer (9/14). NGC ID# 22FA, PCGS# 2809
- 3126 1955 Doubled Die Obverse, FS-101, XF45 PCGS.** The obverse legends are die doubled with an extraordinary spread. This moderately circulated representative displays deep tan-brown and sea-green toning. No marks are consequential, although the right obverse field has scattered small spots. PCGS# 37910
- 3127 1955 Doubled Die Obverse, FS-101, AU55 PCGS.** A colorfully toned example of this famous and dramatic overdate. Orange-red clings to protected areas, but open areas display olive-green and lilac-red. There are no mentionable marks. PCGS# 37910
- 3128 1955 Doubled Die Obverse, FS-101, AU55 ANACS.** Forest-green and lavender toning encompasses this satiny and well defined doubled die cent. Smooth aside from a few hair-thin marks near the NE in ONE. The best known die variety of the Lincoln cent series. PCGS# 37910

- 3129 1955 Doubled Die Obverse, FS-101, AU58 PCGS.** The famous *Guide Book* variety, exhibiting wide die doubling on all obverse lettering. This high-end AU example shows glossy chocolate-brown patina and retains strong detail. PCGS# 37910
- 3130 1955 Doubled Die Obverse, FS-101, AU58 NGC.** A charming chocolate-brown near-Mint example. The cheekbone has a trace of wear but both sides exhibit satin luster. One tiny spot is noted beneath the U in TRUST. PCGS# 37910
- 3131 1955 Doubled Die Obverse, FS-101, MS63 Brown PCGS.** A chocolate-brown cent with coruscating luster and only incidental abrasions. Rotation beneath a light reveals ruby-red and aquamarine undertones. Among the most famous of all doubled die varieties, regardless of series or denomination. PCGS# 37910
- 3132 1956 MS67 Red PCGS.** Radiant luster illuminates even coppery-red color on each side of this high-end Registry coin. A few faint flecks are noted upon magnified examination, but are not discernable to the naked eye. Population: 25 in 67 (1 in 67+) Red, 0 finer (10/14). NGC ID# 22FK, PCGS# 2836

---

**1960 Lincoln Cent, Large Date, MS67 Red  
Conditionally Rare With Registry Set Potential**

- 3133 1960 Large Date MS67 Red PCGS.** A supremely lustrous Superb Gem cent with rich, even cherry-red toning and razor-sharp strike definition. Other than a couple of tiny specks in the lower right obverse field, both sides of the piece are carbon-free. A beautifully preserved coin with impressively clean surfaces, worthy of the finest Lincoln cent set. Population: 9 in 67 Red, 0 finer (9/14). NGC ID# 22FW, PCGS# 2860

**3134 1960-D Large Date MS67 Red PCGS.** Several small, interesting die breaks appear across Lincoln's head, in the 9 of the date, and the B in LIBERTY. This Superb Gem example exhibits strong mint luster and vibrant copper-orange color over well-struck surfaces. The fields reveal a number of die polish lines. Population: 15 in 67 Red, 0 finer (9/14). NGC ID# 22FY, PCGS# 2866

**3135 1960-D Large Date MS67 Red PCGS.** This full mint Red Superb Gem displays rich, coppery luster and well-struck devices. The surface preservation is excellent, though a few faint carbon specks are noted on the reverse. PCGS has awarded this lofty grade to just 15 coins with none finer (9/14). NGC ID# 22FY, PCGS# 2866

**3136 1965 MS67 Red PCGS.** Both sides of this Superb Gem exhibit heavy die polishing lines, imparting a satiny orange glow. The color is impressive and the surfaces are pristine. Population: 20 in 67 Red, 0 finer (9/14). NGC ID# 22G9, PCGS# 2896

#### 1984 Doubled Ear Cent, MS68 Red FS-101, Doubled Die Obverse

**3137 1984 Doubled Ear, FS-101, MS68 Red PCGS.** Lincoln's ear is widely die doubled south, as is his chin and bowtie. An outstanding orange-red and olive-green example, as made aside from a solitary fleck beneath the U in TRUST. The Lincoln Memorial set, once derided as a beginner's assemblage, is now stocked with numerous scare to rare *Guide Book* varieties. Population: 17 in 68 Red, none finer (10/14). PCGS# 38088

**3138 2010-D MS67 Red PCGS.** Blazing pinkish-orange satin luster appears on both sides of this Superb Gem, one of only four similarly certified examples at PCGS (9/14). Virtually perfect surfaces show only a few microscopic marks. NGC ID# 22KM, PCGS# 416671

### PROOF LINCOLN CENTS

**3139 1909 PR66 Red and Brown PCGS.** Rich coppery-red and sun-gold luster emanates from beneath deeper purple and burgundy overtones on this high-end first-year proof. The strike is bold and the preservation is exceptional. Population: 36 in 66 (1 in 66+) Red and Brown, 4 finer (9/14). NGC ID# 22KS, PCGS# 3304

**3140 1909 PR66 Red and Brown PCGS.** A boldly struck proof from the first year of the Lincoln type, this Premium Gem is awash in rich orange-gold, burgundy, violet, and royal-purple toning. No surface flaws are immediately discernable, and the eye appeal is seemingly unrivaled. Population: 36 in 66 (1 in 66+) Red and Brown, 4 finer (9/14). NGC ID# 22KS, PCGS# 3304

**3141 1913 PR65 Brown PCGS.** Cherry-red accents uniformly brown surfaces on both sides of this early Lincoln cent proof. The strike is expectedly strong with remarkable detail in the hair and beard in particular. Population: 26 in 65 Brown, 10 finer (9/14). NGC ID# 22KW, PCGS# 3315

**3142 1913 PR65 Red and Brown PCGS. CAC.** The obverse of this Gem matte proof Lincoln cent is brilliant, fiery orange with hints of pale lilac toning. The reverse exhibits lustrous bronze color with a single small carbon fleck. This is an important opportunity to acquire an exceptional example. PCGS has only certified 26 finer Red and Brown pieces (10/14). NGC ID# 22KW, PCGS# 3316

**3143 1914 PR65 Brown PCGS. CAC.** The glowing matte surfaces of this Gem proof emit hues of olive-gold, burgundy, and auburn-red, while the devices exhibit the exceptional sharpness that makes proof Lincolns of this period so popular among collectors. Close examination fails to reveal any mentionable marks. Population: 17 in 65 Brown, 23 finer (9/14). NGC ID# 22KX, PCGS# 3318

**3144 1915 PR66 Brown NGC.** A beautiful matte proof Lincoln cent, fully struck and nearly pristine, with rich red-brown color, and cobalt-blue undertones on each side. Other than a small contact mark on Lincoln's forehead, near the temple, the surfaces appear mark-free. From a scanty original proof mintage of 1,150 pieces, this issue is scarce at all levels. Census: 12 in 66 Brown, 2 finer (10/14).  
*Ex: Long Beach Signature (Heritage, 1/2004), lot 5284.* NGC ID# 22KY, PCGS# 3321

#### 1915 Cent, PR66 Red and Brown Only Two Finer Coins at NGC

**3145 1915 PR66 Red and Brown NGC. CAC.** The mintage of proof Lincoln cents dwindled to a mere 1,150 pieces in 1915, and the Mint discontinued proof offerings after the following year. This lustrous Premium Gem displays slightly granular proof matte surfaces, with shades of deeply original copper-orange mixed with light brown toning. The design elements are sharply detailed and the surfaces are free of distracting contact marks and carbon specks. Census: 17 in 66 Red and Brown, 2 finer (9/14). NGC ID# 22KY, PCGS# 3322

**3146 1937 PR66+ Red PCGS. CAC.** Subtle contrast occurs between the satiny devices and glassy fields. An impressive visual display includes vivid amber-orange, coppery-red, olive-gold, and lemon-yellow hues. PCGS has certified only 11 numerically finer examples (10/14). NGC ID# 22L4, PCGS# 3338

**3147 1938 PR67 Red PCGS. CAC.** A hint of field-to-device contrast appears on this boldly defined and deeply mirrored Lincoln cent. Both sides exhibit brilliant orange mint color. This Superb Gem is tied for the finest that PCGS and NGC have graded. Population: 33 in 67 Red, 0 finer (9/14). NGC ID# 22L5, PCGS# 3341

**3148 1938 PR66 Red Cameo PCGS. CAC.** A fiery orange Premium Gem Cameo proof, one of few similar pieces ever certified. This example has satin devices on deeply mirrored fields with exceptional mint color and impressive contrast. Population: 13 in 66 Cameo, 2 finer (10/14). NGC ID# 22L5, PCGS# 83341

**1942 Cent, PR66 Red Cameo  
Problem-Free Example**

**3149 1942 PR66 Red Cameo PCGS. CAC.** This fully struck Premium Gem proof 1942 cents shows much pleasing contrast between the fields and devices. Problem-free surfaces display much eye appeal and a noteworthy absence of any distractions. The meager population of six in PR66 Cameo at PCGS and 16 at NGC is further narrowed to only three so graded at NGC (9/14). NGC ID# 22L9, PCGS# 83353

**3150 1960 Small Date PR68 Red Deep Cameo PCGS.** Strong Deep Cameo contrast is seen over each side of this magnificent specimen as richly frosted devices seem to float over deeply mirrored, jet-black fields. Fully struck and nearly flawless, with a small shiny spot just above Lincoln's eye that may be from incidental contact. Population: 40 in 68 Deep Cameo, 0 finer (9/14). NGC ID# 22LL, PCGS# 93392

**3151 1962 PR69 Red Deep Cameo PCGS.** A beautifully preserved Registry Set candidate, this Deep Cameo proof showcases fire-red mint bloom and deeply reflective fields. This piece is tied with 34 others as the finest certified Deep Cameo at PCGS (10/14). NGC ID# 22LR, PCGS# 93398

**3152 1969-S PR69 Deep Cameo PCGS.** Plum-red and coppery-orange hues encompass each side of this unsurpassed, virtually perfect proof. Tied with 46 others for the finest Deep Cameo certified by PCGS (10/14). NGC ID# 22LY, PCGS# 93422

**3153 1970-S Large Date PR69 Deep Cameo PCGS.** Varying eye-catching hues of cherry-orange lie over pristine, unblemished surfaces. Detailed devices float on nearly bottomless swirling liquid fields. Population: 50 in 69 Deep Cameo, 0 finer (10/14). NGC ID# 22M2, PCGS# 93430

**TWO CENT PIECES**

**3154 1864 Small Motto, FS-401, MS63 Brown PCGS.** Streaks of deep brown overlie unabraded chestnut-tan surfaces. Crisply struck and satiny. The scarce introductory subtype, which constituted a slender minority of the productive 1864 emission. PCGS# 38232

**3155 1864 Large Motto MS65 Red NGC.** An outstanding type coin, this first-year Large Motto two-cent piece has brilliant orange and gold luster. Both sides have extensive die cracks in the peripheral regions. NGC ID# 22N9, PCGS# 3578

**3156 1865 MS66 Red and Brown PCGS. CAC.** This lovely Premium Gem combines an early die state obverse with a late die state reverse, the latter exhibiting extensive die cracks. Delicate bluish-brown toning appears on brilliant orange surfaces. An exceptional example. Population: 28 in 66 (1 in 66+) Red and Brown, 0 finer (9/14). NGC ID# 22NA, PCGS# 3583

**3157 1865 Plain 5 MS65 Red PCGS.** Orange-gold and olive shades encompass this beautiful, lustrous, and precisely struck Gem. Blushes of steel-gray are evident near CENTS. The right reverse border displays a few minute flecks. PCGS# 38249

**3158 1867 Doubled Die Obverse, FS-101, AU58 PCGS. CAC.** This is one of the strongest doubled dies in the two cent series. Bold doubling is evident on all nearly all obverse relief elements, with the spread most obvious on IN GOD WE TRUST. The strike is bold, with particular notice given to the reverse bow knot, and the glossy, light brown surfaces are free of any distracting abrasions. PCGS# 38271

**3159 1872 Doubled Die Obverse, FS-101, AU53 PCGS.** The motto is die doubled, most apparent on the top of the U in TRUST. The variety is undesignated on the PCGS insert. A lightly circulated chocolate-brown example of the low mintage final business date of the series. Unobtrusive marks are noted near the left scroll end and the W in WE. PCGS# 38292

**PROOF TWO CENT PIECES**

**1864 Two Cent Piece, PR65 Brown  
Large Motto Variant**

**3160 1864 Large Motto PR65 Brown PCGS. CAC.** Approximately 100 proof two cent pieces were struck in 1864, the first year of the denomination. This sharply detailed Gem displays reflective fields and well-preserved copper-red surfaces that have mellowed to lavender and blue in some areas. Population: 6 in 65 Brown, 9 finer (10/14). NGC ID# 274T, PCGS# 3621

**3161 1869 PR65 Red and Brown NGC.** A fully struck, luminous example, this Gem proof displays warm coppery-orange color in the mirrored fields, with lightly dappled burgundy overtones on each side. No significant marks are observed. From a recorded mintage of only 600 coins. Census: 52 in 65 Red and Brown, 27 finer (9/14). NGC ID# 274Y, PCGS# 3640

**1870 Two Cent, PR66 Red and Brown  
Among the Finest Certified**

**3162 1870 PR66 Red and Brown NGC.** The original red surfaces of this delightful Premium Gem have mellowed to light brown and lavender in some areas, but no mentionable distractions are evident. The design elements are sharply detailed and the fields are deeply reflective, under the patina. Census: 20 in 66 Red and Brown, 0 finer (10/14). NGC ID# 274Z, PCGS# 3643

**1873 Two Cent, PR64 Red and Brown  
Closed 3 Variant, Proof-Only Issue**

- 3163 1873 Closed 3 PR64 Red and Brown PCGS. CAC.** Scholars still debate whether the Closed 3 variety should be considered an "original" proof and the Open 3 a restrike, when in fact there is probably less consternation among collectors, who invariably would like a nice example of each kind. This deeply mirrored Closed 3 example shows the diagnostic die line through TRUST that confirms its variety. The fields flash with glowing orange color while purple-brown patina visits the motifs. A bold strike completes the considerable appeal of this near-Gem proof. NGC ID# 2753, PCGS# 3652

**THREE CENT SILVER**

- 3164 1852 MS66 NGC.** Seemingly pristine and essentially white with coruscant luster, this trime has a pebbly texture towards much of the peripheries and smoother textured centers. Striking characteristics are typical for the issue with slight weakness noted on some of the reverse stars. Census: 100 in 66 (2 in 66+), 15 finer (10/14). NGC ID# 22YZ, PCGS# 3666

**1856 Three Cent Silver, Richly Toned MS65  
Extraordinary, Original Surfaces**

- 3165 1856 MS65 NGC. CAC.** Ex: Eric P. Newman Collection. The mintage for the 1856 three cent silver was generous, compared to the previous year, with 1.4 million pieces struck. Still, only 15 Gems have survived according to NGC Census data, and a mere four are finer (9/14). All too often the problem for collectors is not only one of unavailability of the Type Two in high grades, but an even greater problem of originality. Those who view the Newman coins will come to the same conclusion as we the catalogers have: These are original coins. This particular piece has deep olive and rose toning that covers each side. Look beneath and bright mint luster flashes at the viewer. The obverse is fully detailed, while the reverse shows slight softness of definition, as often seen. Light die clashing is noted at the top of the obverse. NGC ID# 22Z5, PCGS# 3672

- 3166 1858 MS64 PCGS.** The final issue in the Type Two design, seldom offered at the Gem grade level. This near-Gem piece shows sharp central devices, with just a touch of weakness on the reverse stars. Mottled golden-orange and amber-brown toning encompasses each side, with occasional hints of olive and gunmetal-blue. Struck from mildly rotated dies. NGC ID# 22Z7, PCGS# 3674

- 3167 1862 MS66 PCGS.** Fiery cherry hues occupy the obverse of this colorful Premium Gem, while pale yellow, blue, and lavender shades appear on the reverse. Both sides are remarkably contact-free. The 1862 three cent silver pieces were the last six-digit mintage in the series, which ended in 1873. NGC ID# 22ZB, PCGS# 3680

- 3168 1862 MS66 PCGS. CAC.** A lustrous and essentially pristine Civil War Premium Gem. Glimpses of golden toning include a tiny reverse spot near 9 o'clock. A clashed example with well struck borders and a somewhat soft impression at the centers. Certified in a green label holder. NGC ID# 22ZB, PCGS# 3680

- 3169 1865 MS64 NGC.** Rich sea-green, tan-brown, and lilac toning embraces this fully struck and flashy Civil War near-Gem. The fields are clashed but void of marks. Certified in a pre-hologram holder. Just 8,000 pieces were struck. NGC ID# 22ZF, PCGS# 3685

- 3170 1871 MS65 PCGS.** By 1871, the three cent silver type was near its end, and only 3,400 business strikes were produced. Mint State survivors are scarce in all grades, but are available enough to be collectible. This Gem example displays semiprooflike fields, as do nearly all examples of this date, with shades of lavender, turquoise, and golden-gray toning over each side. The reverse arrows are not fully defined, though the strike is otherwise pleasing. Population: 14 in 65, 33 finer (9/14). NGC ID# 22ZM, PCGS# 3692

**PROOF THREE CENT SILVER**

**1865 Three Cent Silver, PR66  
Contrasted Gunmetal Gray/Blue Patina**

- 3171 1865 PR66 NGC.** Rich, gunmetal-gray and blue toning covers both sides of this contrasted proof three cent silver, an appropriate patina for this scarce Civil War era issue. Just 500 proof silver trimes were minted. All silver and gold coins were hoarded in 1865, leading to the introduction of the nickel three-cent coins during the year. A nicely mirrored example with frosted, fully-struck devices, scarce in Premium Gem condition. Census: 18 in 66, 7 finer (9/14). NGC ID# 27CB, PCGS# 3715

- 3172 1872 PR65 Cameo PCGS.** As a date, the proof 1872 silver three cent is fairly plentiful, but Cameo examples are genuinely scarce in all grades. This Gem representative displays a faint blush of light golden color over each side, with sharp devices are deeply mirrored fields. Population: 9 in 65 (1 in 65+) Cameo, 10 finer (10/14). PCGS# 83723

**THREE CENT NICKELS**

- 3173 1875 Misplaced Date, FS-301, MS66+ NGC.** The flag (or base?) of an errant 1 is visible protruding from the lower part of Liberty's neck. This variety is not overly rare, but it is dramatic enough to warrant substantial demand from *Cherry-pickers'* enthusiasts. This Plus-graded example displays frosty silver luster and crisp design definition. A small planchet void is noted beneath middle Roman numeral on the reverse. PCGS# 410345

- 3174 1876 MS65 NGC. CAC.** Ice-blue and pale champagne hues blend over frosty original luster on each side of this Gem example. The motifs are sharply impressed and devoid of mentionable marks. Census: 17 in 65 (1 in 65+), 4 finer (10/14). NGC ID# 275A, PCGS# 3744

**3175 1884 XF45 PCGS. CAC.** The 1884 three cent nickel issue boasts the second-lowest mintage in the series with a production of only 1,700 coins. This Choice XF example offers steel-gray surfaces and minimal marks. The well-struck devices retain a substantial amount of detail despite slight high-point rub. Population: 7 in 45, 25 finer (10/14). NGC ID# 275F, PCGS# 3752

**3176 1889 MS66 NGC.** This is an important coin for final-year type purposes, from a small mintage of 18,100 pieces. The current Premium Gem offers impeccably smooth, satiny surfaces that are lightly toned on the reverse. Census: 26 in 66 (1 in 66 ★), 3 finer (10/14). NGC ID# 275J, PCGS# 3758

## PROOF THREE CENT NICKELS

**3177 1865 PR63 PCGS. CAC.** An almond-gold and olive-green specimen. Intricately struck and unabraded, but the surfaces are somewhat muted. The date is repunched west. The scarcest proof date of the series, although the 1877 often trades for more since no business strikes were coined that year. NGC ID# 275K, PCGS# 3761

**3178 1868 PR66 Cameo NGC.** One of the more elusive proof issues in the series, particularly in high grades. This example boasts nearly brilliant surfaces, save for a few deep golden accents in the upper reverse margin. Fully mirrored fields impart strong contrast with the softly frosted devices. Census: 28 in 66 Cameo (5 in 66 ★ Cameo, 2 in 66+★ Cameo), 12 finer (10/14). PCGS# 83764

**3179 1868 PR66 Cameo PCGS. CAC.** It would be difficult to overstate the eye appeal of this Premium Gem Cameo, with stark field-device contrast and warm champagne toning overall. The devices are tack-sharp and show remarkably little of the usual die lapping. No mentionable marks are observed upon close examination. Population: 15 in 66 Cameo, 1 finer (10/14). PCGS# 83764

**3180 1870 PR66 Cameo PCGS. CAC.** The earlier proofs in the three cent nickel series are elusive with contrast. This example is brilliant and fully detailed, with deeply mirrored fields and satin devices. Less than 20% of PCGS certified 1870s are designated as Cameo proofs. Population: 11 in 66 Cameo, 1 finer (9/14). PCGS# 83766

**3181 1873 Closed 3 PR66+ PCGS. CAC.** Softly frosted devices yield to moderately reflective fields beneath a thin veil of light golden color. All 1873 proof three cent nickels are of the Closed 3 variety, and are seldom offered in this high of grade. Population: 20 in 66 (2 in 66+), 1 finer (10/14). NGC ID# 275U, PCGS# 3769

**3182 1873 Closed 3 PR66 Cameo NGC.** This high-grade representative has a full strike and only a whisper of tan toning. Pristine, since a wispy lint mark beneath the chin is as produced. Struck from moderately rotated dies. Census: 20 in 66 Cameo, 3 finer (9/14). Ex: Milwaukee ANA (Heritage, 8/2007), lot 332. PCGS# 83769

**3183 1874 PR66 Cameo PCGS. CAC.** Struck from fresh dies, with bold design elements and no evidence of die lapping. Mirrored fields frame thickly frosted devices, displaying just a blush of light golden color over each side. The proof 1874 three cent nickel is scarcely seen with cameo contrast in any grade, and is rare with such at the Premium Gem level. Population: 23 in 66 (1 in 66+) Cameo, 0 finer (10/14). PCGS# 83770

**3184 1876 PR66 Cameo PCGS.** The proof 1876 three cent nickel is scarce at the Premium Gem grade level, with or without a Cameo designation. This piece is a remarkable coin with bold field-motif contrast and razor-sharp design definition. Close examination is needed to detect any grade-limiting surface flaws. Population: 18 in 66 Cameo, 0 finer (10/14). PCGS# 83772

**3185 1878 PR67 PCGS. CAC.** The 1878 three cent nickel was produced only in proof format, making an example from its 2,350-coin mintage mandatory for a complete date set. This high-end piece displays faint pastel hues of gold, lavender, and ice-blue, with an overall iridescent appearance when tilted beneath a light. Moderate mirroring is seen in the fields, and the devices are sharply impressed. Population: 13 in 67, 1 finer (10/14). NGC ID# 275Y, PCGS# 3774

**3186 1879 PR67+ PCGS. CAC.** As the Plus designation attests, this piece is firmly in the upper end of its assigned grade. The fields are deeply mirrored and deliver near-cameo contrast with the sharp devices. A few tiny strike-throughs in the left obverse field should not be mistaken for contact marks, of which there are none. Population: 43 in 67 (1 in 67+), 2 finer (10/14). NGC ID# 275Z, PCGS# 3775

**3187 1879 PR67 Cameo NGC. CAC.** A moderately available proof issue, but seldom available in full Cameo. This carefully preserved piece shows bold contrast and sharp definition. A thin blanket of pale champagne toning warms the deep mirrors. Census: 29 in 67 Cameo (1 in 67 ★ Cameo), 7 finer (10/14). PCGS# 83775

**3188 1880 PR67 PCGS.** Pristine surfaces appear on both sides of this delicately toned champagne Superb Gem proof. Both sides have moderately mirrored fields with lightly lustrous devices. Population: 40 in 67, 0 finer (10/14). NGC ID# 2762, PCGS# 3776

**3189 1881 PR67 ★ Cameo NGC. CAC.** An incredible Superb Gem, this Cameo proof is one of the finest at its grade level. Both sides are fully mirrored with lustrous and sharply detailed devices. Census: 33 in 67 Cameo (4 in 67 ★ Cameo), 10 finer (10/14). PCGS# 83777

**3190 1883 PR67+ ★ NGC. CAC.** This Superb Gem proof is brilliant and untuned with deeply mirrored fields and lustrous white devices, carrying the Plus and Star designations. Census: 85 in 67 (3 in 67 ★, 1 in 67+★), 4 finer (10/14). NGC ID# 2765, PCGS# 3779

**3191 1884 PR67+ ★ Cameo NGC.** A sensational Superb Gem Cameo proof, this double-designated specimen approaches the finest ever certified. Both sides are brilliant and highly lustrous with fully and deeply mirrored fields around satiny white devices. Census: 23 in 67 Cameo (1 in 67+ Cameo, 1 in 67 ★ Cameo, 1 in 67+★ Cameo), 5 finer (10/14). PCGS# 83780

**3192 1886 PR67 Cameo NGC.** Considerable golden overtones grace each side of this Superb Gem Cameo proof. Gleaming fields provide a suitable backdrop for the well-frosted devices. Census: 16 in 67 Cameo (1 in 67+ Cameo, 1 in 67 ★ Cameo), 0 finer (10/14). PCGS# 83782

**3193 1889 PR67 Cameo PCGS. CAC.** A dazzling final-year proof, this piece showcases razor-sharp devices and noticeable cameo contrast. The surfaces are remarkably free of the usual mint-made strike-throughs that typical affect examples of this type. Traces of light golden color only increase the immense visual appeal. Population: 21 in 67 Cameo, 1 finer (10/14). PCGS# 83786

## SHIELD NICKELS

**3194 1867 Rays MS64 PCGS.** A brilliant and rather prooflike near-Gem that is well preserved but has a typical strike. Several wispy die cracks (as made) along the borders are characteristic of the issue. The date is lightly strike doubled. NGC ID# 22NY, PCGS# 3791

**3195 1868 MS66 PCGS.** For a business strike, this Premium Gem is remarkably sharp, with full definition seen on virtually all design elements, including the leaf veins. Frosty cartwheel luster illuminates warm champagne toning on each side, and the surfaces are void of significant contact marks. Population: 31 in 66 (4 in 66+), 1 finer (10/14). NGC ID# 22P2, PCGS# 3795

- 3196 1869 MS65+ PCGS. CAC.** This satiny light gray Gem has bold design motifs with exceptional eye appeal. Both sides are brilliant and untoned. Several die cracks join the peripheral lettering on the reverse. Population: 63 in 65 (2 in 65+), 14 finer (10/14). NGC ID# 22P3, PCGS# 3796

**1872 Shield Nickel, MS66  
Extremely Rare Any Finer**

- 3197 1872 MS66 PCGS. CAC.** Although the 1872 Shield nickel was produced in large numbers, the date is definitely rare at the MS66 grade level, and finer coins are almost never available. This delightful Premium Gem displays sharply detailed design elements, with some recutting on the stars and a network of spidery die cracks on the obverse. The well-preserved lustrous surfaces show attractive hints of pale gold toning. Population: 21 in 66 (1 in 66+), 1 finer (10/14). NGC ID# 22P6, PCGS# 3799

- 3198 1876 MS65 PCGS. CAC.** Blushes of light golden-gray visit this satiny and fully struck Centennial-year Gem. Practically devoid of marks, and housed in an old green label holder. Population: 47 in 65 (1 in 65+), 13 finer (9/14).  
*Ex: Long Beach Signature (Heritage, 9/2006), lot 774, which realized \$1,552.50. NGC ID# 22PB, PCGS# 3805*

- 3199 1882 MS66 PCGS. CAC.** With a mintage in excess of 11 million coins, one might expect this issue to be common, but it is seldom seen at the Premium Gem grade level and is rare any finer. This example displays frosty silver-gold luster and carefully preserved surfaces. Bold definition on the stars, shield lines, and leaf veins completes the eye appeal. Population: 75 in 66 (3 in 66+), 6 finer (10/14). NGC ID# 22PC, PCGS# 3812

**PROOF SHIELD NICKELS**

- 3200 1867 No Rays PR64 PCGS. CAC.** An unusually attractive example for the grade, this Choice proof exhibits remarkably bold striking definition, with the only discernable weakness seen on a couple reverse stars, where it is minor. Highly reflective fields showcase peripheral green-gold and cherry-orange hues around pale lavender-gray centers. The Shield nickel enthusiast will find much to admire about this well-preserved proof. NGC ID# 22PE, PCGS# 3821

- 3201 1868 PR65 Cameo PCGS.** Bold, softly frosted relief elements deliver stark white-on-black contrast with deep mirroring in the fields. Only a few faint hairlines limit the grade, and just a suggestion of light golden color is seen over each side. The eye appeal is outstanding for a Shield nickel proof from the 1860s. Population: 35 in 65 (1 in 65+) Cameo, 14 finer (9/14). PCGS# 83822

- 3202 1872 PR66+ PCGS. CAC.** Similar to FS-101, the obverse is lightly die doubled, with the annulet being the pick-up point, as usual. Bold design elements and mirrored fields deliver outstanding visual appeal, while a loupe reveals no mentionable surface flaws. Traces of light golden color over each side attest to the originality of this intriguing piece. Population: 55 in 66 (1 in 66+), 2 finer (10/14). NGC ID# 276N, PCGS# 3826

- 3203 1873 Closed 3 PR66 Cameo PCGS. CAC.** Cameo proof Shield nickels of any issue are rarely encountered. Only a little more than 15% of all PCGS certified proof Shield nickels are designated as Cameo or Deep Cameo. This Premium Gem has sharp design elements with brilliant, untuned surfaces and excellent eye appeal. Population: 26 in 66 Cameo, 1 finer (9/14). PCGS# 83827

**1873 Shield Nickel, PR66 Cameo  
Closed 3 in the Date**

- 3204 1873 Closed 3 PR66 Cameo PCGS. CAC.** The Closed 3 was only used early in the year on business strikes, but all proofs of this year show this feature. The present coin is a sharply detailed Premium Gem, with frosty devices and deeply mirrored fields that show bold cameo contrast. No mentionable distractions are evident. Population: 26 in 66 Cameo, 1 finer (10/14). PCGS# 83827

- 3205 1875 PR65 Cameo NGC.** The 1875 is an elusive Shield nickel issue, and this Gem Cameo proof is an exceptional example. Both sides have delicate gold toning over fully mirrored fields and sharp design motifs. Light cameo contrast completes the picture of this beautiful specimen. Census: 15 in 65 Cameo, 12 finer (10/14). PCGS# 83829

**1876 Shield Nickel, PR67  
None Certified in Higher Numeric Grades**

- 3206 1876 PR67 NGC.** This spectacular Superb Gem exhibits razor-sharp definition on the frosty design elements, but the fields are hazily reflective, with light gray and apple-green toning and little field-device contrast. No mentionable distractions are evident. Census: 5 in 67 (1 in 67 ★), 0 finer (10/14). NGC ID# 276T, PCGS# 3830

**1876 Shield Nickel, PR67 Cameo  
One Numerically Finer at NGC**

- 3207 1876 PR67 Cameo NGC.** The 1876 proof Shield nickel is much more difficult to locate than its generous mintage of 1,150 pieces would suggest. The present coin is a sharply detailed Superb Gem, with frosty design elements and reflective fields that show bold cameo contrast. The well-preserved surfaces are mostly brilliant, with highlights of pale gold toning. Census: 6 in 67 Cameo (1 in 67 ★ Cameo), 1 finer (10/14). PCGS# 83830
- 3208 1878 PR64 PCGS. CAC.** A satiny proof-only near-Gem that boasts a bold strike and a mark-free appearance. Medium chestnut-gold and ice-blue toning. A small spot is noted on the obverse margin at 7:30. Housed in a green label holder. NGC ID# 276V, PCGS# 3832
- 3209 1878 PR66 NGC.** A sharply detailed Premium Gem from a proof mintage of 2,350 pieces, this coin displays moderately reflective, well-preserved surfaces with a few hints of sea-green and lavender-gray toning. NGC has graded 20 numerically finer examples (10/14). NGC ID# 276V, PCGS# 3832
- 3210 1878 PR66+ PCGS.** The second proof-only mintage among Shield nickels, this PR66+ example is among the finest survivors, pinkish-gray with a complete strike and impeccable preservation. Population: 148 in 66 (3 in 66+), 16 finer (10/14). NGC ID# 276V, PCGS# 3832

**LIBERTY NICKELS**

- 3211 1883 With Cents MS66 PCGS.** The third nickel design of 1883 following the Shield and Liberty No Cents designs. This Premium Gem has splashes of gold toning on its highly lustrous light gray surfaces. Both dies are cracked, the obverse especially so. Population: 61 in 66 (5 in 66+), 2 finer (10/14). NGC ID# 22PH, PCGS# 3844
- 3212 1884 MS65 PCGS.** A lovely Gem with brilliant luster shining through gold toning, this example has a sharp strike with slight weakness only at the lower left branch of the wreath. PCGS has only certified 30 finer examples (10/14). NGC ID# 22PJ, PCGS# 3845

**1884 Liberty Nickel, MS66  
Extremely Rare in Finer Grades**

- 3213 1884 MS66 PCGS.** Despite the large mintage of more than 11 million pieces, the 1884 Liberty nickel is rare in MS66 condition, and finer examples are virtually unobtainable. This impressive Premium Gem displays sharply detailed design elements and well-preserved lustrous surfaces under light shades of golden-tan and lavender-gray toning. Population: 30 in 66 (4 in 66+), 0 finer (10/14). NGC ID# 22PJ, PCGS# 3845
- 3214 1885 AU58 NGC.** Liberty Head nickels have been a popular by date collectors since the advent of collecting boards in the 1930s. Coins dated 1885, 1886, and 1912-S are considered key. Though several hundred 1885s have been certified by NGC and PCGS at all grades, this near-Mint State coin is at the intersection of desirability and affordability, graded higher than most of the certified coins but at a price typically half that of near-Gem examples. Even olive-gray toning covers each side of this well-detailed, lustrous key. Ex: *ANA Signature (Heritage, 7/2008)*, lot 1304. NGC ID# 2773, PCGS# 3846
- 3215 1885 MS61 NGC.** Tan-gold, olive-green, and rose-gray enrich this gently shimmering and intricately struck key date nickel. The fields appear pristine, and the cheek displays only faded marks. NGC ID# 2773, PCGS# 3846
- 3216 1886 MS63 PCGS.** A delightful Select Mint State example, this semi-key Liberty nickel is infrequently located in any Mint State grade. This example has brilliant light gray luster with a splash of pale gold toning on the obverse. NGC ID# 22PK, PCGS# 3847
- 3217 1888 MS65 PCGS. CAC.** This lovely Gem has a bold strike with reflective fields and lustrous devices. Both sides are nickel-gray with faint champagne toning. Population: 71 in 65 (3 in 65+), 18 finer (10/14). NGC ID# 2774, PCGS# 3849
- 3218 1889 MS66 NGC.** Both sides have lovely gold, orange, and peach toning, while the right reverse also shows an element of lavender. Well struck for the date with all stars complete. NGC has graded just two numerically finer pieces (10/14). NGC ID# 2775, PCGS# 3850

**1890 Nickel, MS66  
Among the Finest Certified at PCGS**

- 3219 1890 MS66 PCGS.** Above-average detail is present on peripheral details such as the obverse stars and the ears of corn. This Premium Gem is smooth with a touch of satin to the luster, largely gleaming silver-nickel with hints of blue at the interiors and touches of greenish-gold and crimson close to the rims. Population: 16 in 66 (4 in 66+), 0 finer (9/14). NGC ID# 22PM, PCGS# 3851

- 3220 1890 MS66 NGC.** Dappled peach and orange toning drapes the satiny surfaces of this sharp Premium Gem. Minimally marked and immensely appealing. Census: 10 in 66, 1 finer (10/14). NGC ID# 22PM, PCGS# 3851
- 3221 1892 MS65 PCGS. CAC.** Peach and nickel-blue hues prevail on this satiny Gem. Minimally marked, though the strike is blunt on several stars and the lower wreath. PCGS has graded 20 numerically finer examples (10/14). NGC ID# 2777, PCGS# 3853
- 3222 1894 MS66 NGC.** A stunning example of the scarce 1894 Liberty nickel, this Premium Gem exhibits a bold strike, including a strong ear of corn at the lower left reverse, and gorgeous intermingled blue and gold toning. Census: 20 in 66, 2 finer (10/14). NGC ID# 2779, PCGS# 3855
- 3223 1895 MS65 PCGS.** A boldly struck Gem with vibrant luster and light olive-gold toning, intermingled with mottled hues of peach-gold and metallic-blue on the reverse. Well-preserved and free of surface flaws. Population: 65 in 65 (3 in 65+), 16 finer (10/14). NGC ID# 277A, PCGS# 3856
- 3224 1895 MS65 PCGS.** Sharply struck and showing faint amounts of mottled patina, this is an impressively preserved Gem example with clean surfaces and gleaming satiny mint luster. Population: 65 in 65 (3 in 65+), 16 finer (10/14). NGC ID# 277A, PCGS# 3856
- 3225 1895 MS65 NGC.** A frosty and fully lustrous Gem, this 1895 Liberty nickel is brilliant light gray, exhibiting a hint of peripheral iridescence on each side. Every individual kernel appears in both ears of corn on the reverse. Census: 44 in 65 (2 in 65 ★), 11 finer (10/14). NGC ID# 277A, PCGS# 3856
- 3226 1895 MS65+ PCGS. CAC.** A somewhat better date in Gem and finer grades. This satiny example displays dusky olive-tan peripheral toning around pale rainbow hues in the centers. Star 7 is not fully defined, though the strike is otherwise sharp. Population: 65 in 65 (3 in 65+), 16 finer (10/14). NGC ID# 277A, PCGS# 3856
- 3227 1898 MS66 PCGS.** Lovely gold toning appears over brilliant and frosty light gray surfaces on this lustrous Premium Gem. The strike is excellent and the surfaces are pristine. Population: 30 in 66, 1 finer (10/14). NGC ID# 22PR, PCGS# 3859
- 3228 1899 MS66 PCGS.** A plentiful date, but seldom available at the Premium Gem grade level. This piece shows satiny golden-gray luster and carefully preserved surfaces. The lower-left portion of the wreath is especially sharp on this example. Only one coin is numerically finer at PCGS (10/14). NGC ID# 22PR, PCGS# 3860
- 3229 1900 MS66 PCGS. CAC.** The lower left branch of the wreath displays typical weakness, while all other aspects of this frosty and lustrous light gray Premium Gem are exquisite. Population: 54 in 66 (2 in 66+), 6 finer (10/14). NGC ID# 22PS, PCGS# 3861
- 3230 1900 MS66 PCGS. CAC.** Lustrous grayish-tan surfaces exhibit sharply struck design motifs. A couple of light peripheral cracks are visible on the reverse. Population: 54 in 66 (2 in 66+), 6 finer (10/14). NGC ID# 22PS, PCGS# 3861
- 3231 1900 MS66 PCGS. CAC.** Well-struck devices and satiny luster are the hallmarks of this Premium Gem. Pale golden-gray toning blankets each side, with a few tiny specks noted in the right obverse field. Population: 54 in 66 (2 in 66+), 6 finer (10/14). NGC ID# 22PS, PCGS# 3861
- 3232 1902 MS66 PCGS. CAC.** Solidly struck with glowing satiny luster and attractive apricot and rose-gray toning. No distracting marks appear on either side of this impressive piece. Population: 55 in 66 (1 in 66+), 5 finer (10/14). NGC ID# 277D, PCGS# 3863
- 3233 1902 MS66+ PCGS. CAC.** A light gold tint warms frosty cartwheel luster on both sides of this Plus-graded Premium Gem. Beautifully preserved, with sharp definition over most areas, though just a touch of softness noted on select stars and the lower-left portion of the wreath. Population: 55 in 66 (1 in 66+), 5 finer (10/14). NGC ID# 277D, PCGS# 3863
- 3234 1905 MS66 PCGS. CAC.** The bold strike of this Premium Gem Liberty nickel includes an unusually sharp ear of corn in the left branch of the wreath. This piece exhibits frosty light gray luster with an absence of toning. Population: 81 in 66 (3 in 66+), 0 finer (10/14). NGC ID# 277G, PCGS# 3866
- 3235 1905 MS66 PCGS. CAC.** A carefully preserved late-series type representative. Satiny luster illuminates iridescent olive-gold toning over each side, growing deeper toward the peripheries. A sharp strike completes the appeal. None are numerically finer at PCGS (10/14). NGC ID# 277G, PCGS# 3866
- 3236 1908 MS66 NGC.** Apricot and nickel-gray overall with a few lavender and peach elements. The obverse stars show central lines, though the left ear of corn is weak on the reverse. Census: 7 in 66 (1 in 66 ★), 1 finer (10/14). NGC ID# 22PT, PCGS# 3869
- 3237 1909 MS66 PCGS. CAC.** The sharp strike includes a full ear of corn at the lower left reverse on this lovely Premium Gem. Both sides have satiny light gray luster with splashes of brilliant gold toning. Tied for the finest certified at PCGS and NGC. Population: 27 in 66 (1 in 66+), 0 finer (10/14). NGC ID# 277K, PCGS# 3870
- 3238 1911 MS66 ★ NGC.** A Star designation recognizes olive-brown, pine-green, lavender-red, and sun-gold toning that embraces each side of this Premium Gem representative. The strike is lacking slightly on a couple stars, as well as the lower-left portion of the wreath, though the devices are otherwise well-defined. Census: 27 in 66 (1 in 66 ★), 1 finer (10/14). NGC ID# 277M, PCGS# 3872
- 3239 1912 MS66 PCGS. CAC.** Exceptionally bright and lustrous for this often-lacking date. Typically softly struck on some of the obverse stars and on the left ear of corn but with clean fields. A small depression near the bottom of the large Roman numeral V appears to be a planchet flaw (as struck). Tied for numerically finest in the combined certified population (10/14). NGC ID# 277N, PCGS# 3873

---

**1912-D Liberty Nickel, MS66  
None Finer at PCGS**

- 3240 1912-D MS66 PCGS.** With a mintage of nearly 8.5 million pieces, the 1912-D Liberty nickel is surprisingly elusive in higher Mint State grades. This attractive Premium Gem offers well-detailed design elements, with just a touch of softness on the lower wreath and upper stars. The well-preserved lustrous surfaces display shades of greenish-gold and nickel-gray toning. Population: 35 in 66, 0 finer (10/14). NGC ID# 277P, PCGS# 3874
- 3241 1912-S MS64 NGC.** A near-Gem example of this low-mintage San Francisco issue (only 238,000 produced). Pale amber toning overall complements sharply struck design elements, with well-preserved, satiny surfaces. NGC ID# 277R, PCGS# 3875

**3242 1912-S MS64 NGC.** Struck only over a four-day period in December 1912, a mere 238,000 pieces were produced of this key issue. The surfaces show the usual satiny finish, and the striking details are good but a bit short of complete. Even gray-rose patina is seen over each side, and the only mark of note is located in the obverse field behind Liberty's head. NGC ID# 277R, PCGS# 3875

**3243 1912-S MS64 PCGS.** Tinges of gold and lavender-gray color blanket glossy, minimally marked surfaces on this Choice example. Some of the finer design elements are not fully brought up, a frequently seen characteristic on this key San Francisco issue. NGC ID# 277R, PCGS# 3875

---

**1912-S Nickel, MS65  
Vibrant Mint Luster**

**3244 1912-S MS65 PCGS.** This delightful Gem represents the last year of business-strike production for the Liberty Head design, and the San Francisco Mint struck only 238,000 pieces. The design elements are sharply detailed and the surfaces display vibrant mint luster under attractive shades of champagne-gold and lavender toning. PCGS has graded only 17 numerically finer examples (9/14). NGC ID# 277R, PCGS# 3875

---

**1912-S Nickel, MS65  
Elusive Branch Mint Issue**

**3245 1912-S MS65 PCGS.** The 1912-S nickel boasts the lowest mintage in the Barber Liberty Head series, and also ranks as the sole San Francisco issue of the type. Gem examples are located with only limited difficulty, but finer pieces are decidedly rare and challenging to obtain. This MS65 coin displays iridescent silver-gray toning and only a few minute surface ticks to limit the grade. The lower-left portion of the wreath is not fully defined, as is typical of this type in general, though the strike is sharp on the obverse stars. PCGS has encapsulated only 17 numerically finer coins (9/14). NGC ID# 277R, PCGS# 3875

---

**1912-S Liberty Nickel, MS65  
Important Issue for Type and Date Collectors**

**3246 1912-S MS65 PCGS.** From a small mintage of 238,000 pieces, the 1912-S represents the last collectible date of the Liberty nickel design. This impressive Gem exhibits sharply detailed design elements and lustrous lightly marked surfaces, under attractive shades of lavender-gray and champagne-gold toning. PCGS has graded 17 numerically finer examples (10/14). NGC ID# 277R, PCGS# 3875

---

**PROOF LIBERTY NICKELS**

**3247 1883 No Cents PR66+ Cameo PCGS. CAC.** The ever-popular No Cents variety, this Plus-graded Premium Gem Cameo boasts pinpoint-sharp design definition and carefully preserved mirrors. A blush of gold toning warms each side. PCGS has certified only 15 numerically finer Cameos (10/14). PCGS# 83878

**3248 1885 PR66 Cameo PCGS.** This popular date enjoys strong demand due to the rarity of associated business strikes. The Premium Gem offered here has delicate champagne toning over brilliant surfaces with fully mirrored fields and lustrous devices. Population: 52 in 66 (3 in 66+) Cameo, 11 finer (9/14). PCGS# 83883

---

**1885 Nickel, PR66+ Cameo  
Standout Example of This In-Demand Issue**

**3249 1885 PR66+ Cameo PCGS. CAC.** The 1885 proof Liberty nickel is an issue whose demand increases from the paucity of the circulation-strike coins. This lovely Premium Gem proof offers deeply contrasted surfaces with a full strike throughout — even on the lower-left ear of corn on the reverse. Beautiful golden-rose color and a lack of distractions make this a standout example. Population: 51 in 66 (3 in 66+) Cameo, 11 finer (10/14). PCGS# 83883

**3250 1891 PR66+ Cameo PCGS. CAC.** A challenging issue with cameo contrast. This Plus-graded piece shows warm amber-gold and violet peripheral toning around light champagne centers, leaving the devices starkly contrasted with the deeply mirrored fields. Population: 27 in 66 (4 in 66+) Cameo, 3 finer (10/14). PCGS# 83889

**3251 1893 PR66 Cameo PCGS. CAC.** A lovely Premium Gem Cameo proof, this Liberty nickel has sharp details with excellent contrast beneath delicate champagne toning. Population: 45 in 66 (6 in 66+) Cameo, 14 finer (10/14). PCGS# 83891

- 3252 1893 PR66+ Cameo PCGS. CAC.** This high-end Premium Gem displays sharply detailed design elements, with frosty luster that contrasts boldly with the reflective fields. Hints of greenish-gold and lavender toning enhance the outstanding eye appeal. Population: 45 in 66 (6 in 66+) Cameo, 14 finer (10/14). PCGS# 83891

**1893 Liberty Nickel, PR67 Cameo  
Among the Finest Certified**

- 3253 1893 PR67 Cameo PCGS. CAC.** A nominal proof mintage of 2,195 Liberty nickels was accomplished at the Philadelphia Mint in 1893 and this delightful Superb Gem is one of the finest survivors. The devices exhibit razor-sharp definition throughout and the richly frosted design elements contrast boldly with the pristine mirrored fields. Population: 14 in 67 Cameo, 0 finer (10/14). PCGS# 83891

- 3254 1896 PR66 Cameo PCGS.** Glassy sea-green fields and lightly frosted gold motifs are pleasingly contrasted on both sides. A slight degree of streaky tan patina is noted on the obverse. Population: 24 in 66 (1 in 66+) Cameo, 1 finer (10/14). PCGS# 83894

- 3255 1897 PR66 Cameo PCGS. CAC.** A fairly plentiful proof issue overall, but scarcely seen with cameo contrast. This Premium Gem example displays tack-sharp definition and distinct field-device contrast. Pale amber-gold toning stretches across each side in thin ribbons of color. Population: 32 in 66 (7 in 66+) Cameo, 18 finer (10/14). PCGS# 83895

- 3256 1897 PR66+ Cameo PCGS. CAC.** Stark cameo contrast complements razor-sharp details of this high-end Premium Gem. The surfaces exhibit excellent preservation and are largely untoned, save for a faint golden tint around the rims. Population: 32 in 66 (7 in 66+) Cameo, 18 finer (10/14). PCGS# 83895

**1897 Liberty Nickel, PR67  
Lightly Toned Cameo Surfaces**

- 3257 1897 PR67 Cameo PCGS. CAC.** Despite the adequate mintage of 1,938 pieces, the 1897 proof Liberty nickel is elusive in grades above the Gem level, with Cameo surfaces. This magnificent Superb Gem exhibits needle-sharp definition on all design elements and the deeply mirrored fields contrast dramatically with the frosty devices. The pristine surfaces display attractive shades of pale gold toning, with outstanding eye appeal. Population: 18 in 67 (2 in 67+) Cameo, 0 finer (10/14). PCGS# 83895

- 3258 1900 PR67 PCGS. CAC.** The Mint struck a sizeable quantity of Liberty nickel proofs in 1900, to the tune of 2,262 pieces. However, few examples survive as carefully preserved as this Superb Gem. Blue and lavender patina intermingle over mostly steel-gray surfaces. Razor-sharp, as expected, and highly appealing. Population: 26 in 67 (1 in 67+), 1 finer (10/14). NGC ID# 278A, PCGS# 3898

**1906 Liberty Nickel, PR67 Cameo  
Unusually Sharp Contrast**

- 3259 1906 PR67 Cameo PCGS.** The Philadelphia Mint adopted a new finish for proof coins in 1902 and coins from later years with cameo surfaces are seldom encountered. This spectacular Superb Gem offers sharply detailed design elements with enough mint frost to produce a high degree of contrast with the deeply reflective fields. Population: 19 in 67 (1 in 67+) Cameo, 2 finer (10/14). PCGS# 83904

**1906 Liberty Nickel, PR67 Cameo  
Delicate Multicolor Toning**

- 3260 1906 PR67 Cameo PCGS. CAC.** An attractively mirrored, pleasingly contrasted specimen from this issue of 1,725 proofs. Delicate aqua, green-gold, and lilac-blue tints run over both sides of this Superb Gem. A well-executed strike sharpens the design elements. Virtually flawless eye appeal. Population: 19 in 67 (1 in 67+) Cameo, 2 finer (10/14).  
Ex: *Central States Signature* (Heritage, 4/2008), lot 407; *Baltimore Signature* (Heritage, 7/2008), lot 1322; *FUN Signature* (Heritage, 1/2010), lot 544. PCGS# 83904

- 3261 1910 PR67 PCGS.** The otherwise brilliant surfaces of the Superb Gem proof exhibit subtle splashes of light golden-brown and an expectedly razor-sharp strike. A total of 2,405 specimens were struck and PCGS has certified only 32 in 67 (1 in 67+), with 2 finer (10/14). NGC ID# 278L, PCGS# 3908

**1910 Nickel, PR67 Cameo  
Scarce at This Grade Level**

- 3262 1910 PR67 Cameo PCGS. CAC.** The relief elements are fully struck with shimmering, frosty luster, while the fields exhibit a profound depth of mirroring. A thin veil of light golden toning graces each side, but leaves this piece with stark field-motif contrast. The surfaces are seemingly pristine, even upon close examination. From a mintage of 2,405 proofs. Population: 21 in 67 Cameo, 2 finer (9/14). PCGS# 83908

## BUFFALO NICKELS

- 3263 1913-D Type One MS67 PCGS.** Soft lavender-gray and champagne hues fade together over both sides of this Superb Gem, with satiny, almost undisturbed mint luster. Slight evidence of die erosion is noted upon close examination, though the striking sharpness is not apparently affected, as all relief elements are bold. Population: 57 in 67 (2 in 67+), 2 finer (9/14). NGC ID# 22PX, PCGS# 3916
- 3264 1913 Type Two MS66+ PCGS. CAC.** Wisps of ice-blue and champagne toning grace silky luster on each side of this beautifully preserved Premium Gem example. Slight striking weakness is noted on the bison's shoulder and the Indian's hair. PCGS has certified 21 numerically finer representatives (10/14). NGC ID# 22PZ, PCGS# 3921
- 3265 1913-D Type Two MS65 PCGS.** A pleasing Gem example of this semikey date, with light olive-gold toning over smooth, satiny surfaces on each side. Some minor softness on the centers is not uncommon for the issue, and the eye appeal is not overly affected. NGC ID# 22R2, PCGS# 3922
- 3266 1913-S Type Two MS64 PCGS. CAC.** The Type Two 1913-S nickel is one of the major key dates in the series, being particularly challenging in pleasing Mint State condition. This Choice example displays satiny luster beneath iridescent shades of golden-gray, olive, and pale lavender toning. Slight striking softness is noted on the bison's shoulder and the Indian's braid, though the motifs are otherwise boldly impressed. NGC ID# 22R3, PCGS# 3923

### 1913-S Type Two Nickel, MS65 Popular Low-Mintage Issue

- 3267 1913-S Type Two MS65 PCGS.** This satiny Gem displays iridescent rose-gold and silvery-gray color over each side, with light pastel-green shades on portions of the obverse. The strike is generally pleasing overall, including the peripheral details, with the high point of the hair braid and the fur atop the bison's head exhibiting the only notable weakness. Scattered minute flecks of carbon appear on both sides and a few small laminations are present on the reverse. PCGS has awarded higher numeric grades to only 34 examples (9/14). NGC ID# 22R3, PCGS# 3923
- 3268 1914-S MS65 PCGS.** Soft satin luster and remarkably smooth, well-preserved surfaces are attributes of this highly attractive Gem example. A trifle weak on some of the high points, but a splendid piece overall and conditionally scarce any finer. NGC ID# 22R6, PCGS# 3926
- 3269 1915-S MS65 ANACS.** This piece is unusually well-struck for the issue, with only minor softness seen on the bison's shoulder and Indian's braid. Iridescent golden-gray toning blankets the satiny surfaces, increasing the overall appeal. Finer representatives are seldom encountered. NGC ID# 22R9, PCGS# 3929
- 3270 1918 MS65 PCGS.** This is an exceptionally sharp representative from an issue that typically appears weakly struck. The surfaces are awash in softly frosted luster and delicately toned in shades of faint peach-orange and rose. NGC ID# 22RG, PCGS# 3937
- 3271 1918/7-D FS-101 VG8 PCGS.** The broad downstroke of the underdigit 7 is apparent, as is the diagnostic small die crack above the braid. A stone-gray representative with pleasing surfaces aside from a slender and minor mark on the Indian's forehead. PCGS# 38446

- 3272 1918/7-D FS-101 VG10 PCGS.** A collectible cream-gray late die state example of the coveted series key. Only lightly abraded. Although the date exhibits wear appropriate for a VG Buffalo nickel, the dual strokes of the 7 are noticeable within the 8. PCGS# 38446

### 1918/7-D Nickel, VF20 Well-Defined Underdigit

- 3273 1918/7-D FS-101 VF20 NGC.** Scarce and popular, most examples of this overdated issue are in low grades with the underdigit 7 minimized by wear. This example is more detailed than normally seen for the grade, with the date area intact. The Indian's cheekbone is rounded and defined, although the bison's horn is only half-visible. A nice example, properly graded. PCGS# 38446
- 3274 1919 MS66 PCGS. CAC.** Shimmering, satiny luster illuminates faint pastel hues on the obverse and shines through a thin veil of light golden toning on the reverse. The strike is sharp and the surfaces are beautifully preserved. PCGS has certified only 13 numerically finer representatives (9/14). NGC ID# 22RL, PCGS# 3941

### 1919-S Nickel, MS64+ Rich, Satiny Mint Luster

- 3275 1919-S MS64+ NGC.** Striking quality is a significant concern among collectors seeking an example of this San Francisco issue, as most pieces were struck with excessively worn dies. The present coin is rather sharp on the obverse, but is typically weak on the reverse, showing signs of die erosion in the recesses. This "two-faced" appearance is not uncommon, as undated tail dies were frequently used much longer than head dies, and therefore show more extensive fatigue. The specialist, however, will appreciate the smooth, satiny surfaces and warm golden-gray toning of this near-Gem. NGC has certified only 20 numerically finer representatives (9/14). NGC ID# 22RN, PCGS# 3943
- 3276 1921-S MS63 PCGS.** A somewhat better San Francisco issue, with its high-grade scarcity partly due to characteristically poor striking quality. This example was struck from heavily worn dies, as evidenced by flow lines in the recesses, but retains remarkably sharp central definition. Mottled golden-gray toning blankets each side. A thin planchet lamination is observed along the bison's lower body. NGC ID# 22RU, PCGS# 3948
- 3277 1923 MS66+ PCGS.** The 1923 is somewhat scarcer than most other Philadelphia issues in top grades. This Premium Gem example displays luminous luster emanating from minimally marked and generally well-struck surfaces. A touch of softness is noted above the bison's horn and on the central obverse hair strands. PCGS has certified only 14 numerically finer representatives (9/14). NGC ID# 22RV, PCGS# 3949

- 3278 1923-S MS64+ PCGS. CAC.** Moderately available in Choice condition, the 1923-S Buffalo nickel is genuinely scarce in finer grades. This Plus-graded example boasts unusually sharp definition for the issue, despite evidence of minor die erosion in the recesses. Traces of light golden color complement the satiny luster. PCGS has certified 50 numerically finer coins (10/14). NGC ID# 22RW, PCGS# 3950

**1924-S Buffalo Nickel, MS62**  
**Low-Mintage Issue, Few Examples Saved**

- 3279 1924-S MS62 PCGS. CAC.** The 1924-S Buffalo nickel claims a low mintage of 1.4 million pieces, making the issue quite scarce in the context of the series. This impressive MS62 specimen offers well-detailed design elements, with just a touch of the usual softness on the bison's shoulder, and slightly subdued mint luster, under shades of nickel-gray and champagne-gold toning. NGC ID# 22RZ, PCGS# 3953

- 3280 1925-D MS64 PCGS.** Lovely gold toning appears on both sides of this brilliant Choice Mint State nickel. The strike is well above average and the eye appeal is equally strong. NGC ID# 22S3, PCGS# 3955

**1925-D Nickel, MS65**  
**Better-Than-Average Strike and Luster**

- 3281 1925-D MS65 PCGS.** From a mintage of 4.4 million pieces, the 1925-D Buffalo nickel is a challenging date in high grade, primarily because of typically weak striking characteristics and insipid mint luster. This sharply detailed Gem features well-preserved lustrous surfaces under shades of champagne-gold and ice-blue toning. Population: 96 in 65 (1 in 65+), 10 finer (10/14). NGC ID# 22S3, PCGS# 3955

- 3282 1925-S MS63 PCGS.** Dusky orange-gold, lavender, and powder-blue toning graces each side of this satiny Mint State example. Considerable striking weakness is noted on the central regions and the bison's head, a characteristic that is frequently seen on this San Francisco issue, but the smooth surfaces balance the eye appeal. NGC ID# 22S4, PCGS# 3956

**1925-S Buffalo Nickel, MS64**  
**Exceptionally Well-Struck and Attractive**

- 3283 1925-S MS64 PCGS. CAC.** The 1925-S is usually plagued by striking problems because of the overextended use of and broad set distance between the dies. Such is not the case with this exceptional Choice representative. The Indian's hair braid and the bison's head details are clear, and the mintmark is bold. A lack of individually significant marks and delicate golden-gray toning further contribute to the CAC-recognized eye appeal. PCGS has seen only 28 numerically finer submissions (10/14). NGC ID# 22S4, PCGS# 3956

**1926-S Buffalo Nickel, AU55**  
**Low-Mintage Series Key**

- 3284 1926-S AU55 NGC. CAC.** From a low mintage of 970,000 pieces, the 1926-S Buffalo nickel is one of the key dates in the series. This Choice AU specimen shows only a trace of wear on the unusually well-detailed design elements and the lightly abraded surfaces retain much original mint luster, with hints of silver-gray and golden-tan toning. NGC ID# 22S7, PCGS# 3959

- 3285 1927 MS66+ PCGS. CAC.** The hair immediately above the Indian's hair braid is not fully defined, though the remainder of the design elements are unusually well brought up for this San Francisco issue. Satiny luster highlights champagne-green and powder-blue toning on each side. Only six coins are numerically finer at PCGS (10/14). NGC ID# 22S8, PCGS# 3960

- 3286 1928 MS66+ PCGS. CAC.** Glowing, silky-smooth surfaces illuminate soft hues of lavender-blue and pale champagne on each side, while the preservation is seemingly perfect. Slight softness is observed on the hair above the Indian's braid, though the strike is otherwise crisp, despite minor die erosion that is seen in the recesses. PCGS has certified only 15 numerically finer representatives (9/14). NGC ID# 22SB, PCGS# 3963

**1928-D Nickel, MS66  
Above-Average Strike**

**3287 1928-D MS66 PCGS. CAC.** The 1928-D Buffalo nickel is almost always seen with some degree of striking deficiency, but an above-average example can be located with patience. This representative exhibits strong borders, with just a touch of softness on the bison's shoulder and the Indians central hair strands. Iridescent golden-gray toning warms smooth, satiny surfaces on each side, giving this piece a high degree of eye appeal. Gem examples of this issue are encountered with some frequency, but Premium Gems such as this coin are seldom seen. Population: 48 in 66, 0 finer (9/14). NGC ID# 22SC, PCGS# 3964

**3288 1929 MS66+ PCGS. CAC.** Iridescent champagne toning reveals the occasional wisp of pale lavender-blue color as it spreads across both sides of this high-end Premium Gem example. The devices are sharply struck and the surfaces are devoid of any discernable contact marks. Only six coins are numerically finer at PCGS (10/14). NGC ID# 22SE, PCGS# 3966

**1934-D Buffalo, Nicely Preserved MS66**

**3289 1934-D MS66 PCGS.** This lovely Premium Gem sports amber and lavender hues on each side with excellent preservation. The strike from the dies is boldly impressed, but the dies show considerable fatigue that has resulted in a lack of detail noticeable on the Indian's braid, the hair above, and the cheekbone, and on the high points of the buffalo's shoulder on the reverse. The profile is noticeably strike-doubled. Population: 64 in 66 (3 in 66+), 0 finer (10/14). NGC ID# 22SM, PCGS# 3973

**3290 1937-D Three-Legged, FS-901, AU58 NGC.** A heavily collected *Guide Book* variety with the bison's forward right leg largely effaced by die lapping. This example displays strong detail and deep golden-gray patina. Some minor evidence of die erosion is seen in the recesses, as usual. PCGS# 38475

**3291 1937-D Three-Legged, FS-901, AU58 NGC.** Chestnut-gold and dove-gray toning embraces the present satiny and minimally marked Borderline Uncirculated nickel. The identifiers of this key variety are all plainly visible. Subject to ceaseless demand from generations of collectors. PCGS# 38475

**3292 1937-D Three-Legged, FS-901, AU58 NGC.** Dove-gray and almond-gold blend throughout this briefly circulated key date nickel. Abrasions are absent, as is the front foreleg of the bison. But diagnostics are present, such as the granular back leg. The obsolete *Cherrypickers'* number (FS-020.2) is listed on the insert. PCGS# 38475

**1937-D Buffalo Nickel, MS62  
Popular Three-Legged *Guide Book* Variety**

**3293 1937-D Three-Legged, FS-901, MS62 PCGS.** An impressive MS62 example of this extremely popular die-polishing error, with well-detailed design elements that show just the slightest softness on the bison's shoulder and hair above the braid. The mint luster is slightly subdued, but the surfaces show minimal signs of contact for the grade. PCGS# 38475

**3294 1937-D Three-Legged, FS-901, MS62 NGC.** Blended almond-gold and stone-gray toning visits this lustrous and minimally marked key date nickel. All diagnostics for the *Guide Book* variety are plain, such as the missing foreleg and the granular back leg. Ex: *FUN Signature (Heritage, 1/2005)*, lot 5936. PCGS# 38475

**PROOF BUFFALO NICKELS**

**3295 1914 PR66 PCGS.** Tack-sharp details are the hallmark of this Premium Gem proof, though the exceptional surface preservation also contributes to the immense visual appeal. Diagonal ribbons of bronze-gold toning cover much of the obverse and the lower-right portion of the reverse. NGC ID# 278T, PCGS# 3991

**3296 1936 Type One — Satin Finish PR67 PCGS.** Prized by numismatists today, the Satin Finish proofs were not as popular with collectors in 1936, who preferred the brilliant finish style. This spectacular Superb Gem is sharply detailed, with vibrant luster and lovely ice-blue and champagne-gold toning. NGC ID# 278X, PCGS# 3994

**3297 1937 PR65 PCGS.** Iridescent apple-green, apricot-gold, and lavender shades embrace this nicely struck and unabraded Gem. Scattered pinpoint carbon is all that limits the grade. Encapsulated in an old green label holder. NGC ID# 278Z, PCGS# 3996

**3298 1937 PR67 PCGS. CAC.** Fully struck, satiny devices yield to deeply mirrored fields, while the surfaces are seemingly pristine. The coin appears brilliant at first glance, though subtle hues of ice-blue and pale champagne color are seen when turned beneath a light. PCGS has certified just 18 numerically finer representatives (9/14). NGC ID# 278Z, PCGS# 3996

**3299 1937 PR67 PCGS. CAC.** Delicate champagne toning graces the mirrored surfaces of this impressive Superb Gem proof. Both sides have bold design motifs and a hint of contrast. PCGS has only certified 18 finer examples (10/14). NGC ID# 278Z, PCGS# 3996

## JEFFERSON NICKELS

- 3300** 1939 Doubled Monticello, FS-801, MS65 PCGS. MONTICELLO and FIVE CENTS exhibit extraordinary die doubling. One of the best known die varieties of the Jefferson series. Butter-gold, dove-gray, and plum-mauve toning graces this lustrous Gem. The reverse is pristine and the left obverse displays moderate marks. PCGS# 38481

### 1943/2-P Jefferson Nickel, MS66 Full Steps Wartime Silver Composition, *Guide Book Variety*

- 3301** 1943/2-P Doubled Die Obverse, FS-101, MS66 Full Steps PCGS. CAC. The lower diagonal stroke of the 2 is bold underneath the 3 on this popular variety, and it is especially bold on this uniformly frosty Premium Gem Full Steps example, seemingly an early strike from fresh dies. Light golden patina further enhances the appearance, and the steps are no-questions full throughout. Population: 27 in 66 (1 in 66+) Full Steps, 3 finer (10/14). PCGS# 38500

- 3302** 1947-D MS67 Full Steps PCGS. The 1947-D is a little scarcer than the 1946-D and is normally found with a medium to full strike. This piece shows an exceptional strike with full steps. Light khaki-gold flows over the pristine surfaces, accented by iridescent light-pink and sea-green undertones. A coin with outstanding appeal and among the finest certified. Population: 18 in 67 Full Steps, 0 finer (9/14). NGC ID# 22U6, PCGS# 84032

### 1953-D Nickel, MS66+ Full Steps Tied With One Other Coin for PCGS Finest

- 3303** 1953-D MS66+ Full Steps PCGS. A highly lustrous Premium Gem with an expectedly full strike for the Full Steps designation. The entirely untoned surfaces feature radiant luster and are devoid of any marks visible without magnification. This is the finest example we have offered and Registry-Set specialists should bid accordingly. Population: 16 in 66 (2 in 66+) Full Steps, 0 finer (9/14). NGC ID# 22UP, PCGS# 84050

- 3304** 1954-S MS64 Five Full Steps ANACS. In 2002, Bernard A. Nagengast estimated that only one out of 3,000 1954-S nickels exhibits five steps, and adds that the issue was dubbed "The King" by the PAK Full Step Nickel Club. A lustrous and clashed pumpkin-gold and ice-blue near-Gem. NGC ID# 22UU, PCGS# 84054

### 1957-D Nickel, MS67 Full Steps Sole Finest Full Steps Example at NGC

- 3305** 1957-D MS67 Five Full Steps NGC. This boldly struck, satiny Superb Gem ranks as the single finest of just 47 Five Full Steps examples at NGC (9/14), making it the ultimate Registry Set coin for the advanced specialist. Soft rainbow hues stretch across each side beneath a thin veil of golden-gray toning, and the surface preservation is nearly perfect. NGC ID# 22V3, PCGS# 84062

- 3306** 1959-D MS66 Full Steps PCGS. The sharp strike exhibits five-and-a-half steps to Monticello on this brilliant and untuned Premium Gem. Both sides display pristine, satiny gray surfaces. Population: 12 in 66 Full Steps, 0 finer (10/14). NGC ID# 22V7, PCGS# 84066

## PROOF JEFFERSON NICKELS

- 3307** 1940 Reverse of 1940 PR67+ PCGS. CAC. A prime Registry Set candidate, as PCGS has certified only two numerically finer representatives (10/14). Iridescent tan-gold peripheral toning surrounds cool ice-blue central color on the obverse, while the reverse exhibits concentric rainbow shadings around the margins, fading to champagne over Monticello. NGC ID# 22YC, PCGS# 4177

- 3308** 1942 Type One PR68 NGC. A decisively struck and beautifully toned example of what would be the last five cent proof until 1950. Outer bands of peach and yellow cede to watery blue-green in the centers. Magnificently preserved and among the best examples of the issue available today. Census: 9 in 68, 0 finer (10/14). NGC ID# 27A3, PCGS# 4179

## EARLY HALF DIME

- 3309** 1795 V-6, LM-9, R.4, — Smoothed — PCGS Genuine. XF Details. A bisecting obverse die crack is frequently encountered on this die. The light silver obverse and pewter-gray reverse exhibit a combination of adjustment marks, hairlines, and tooling. PCGS# 38593

## BUST HALF DIMES

### 1830 Half Dime, MS66 V-7, LM-7, Full Strike

- 3310** 1830 V-7, LM-7, R.2, MS66 PCGS. Repunching on the 8 in the date and the 5 in 5C confirm the collectible Valentine variety. The variegated golden-brown and stone-gray obverse center is bounded by rich forest-green patina. The reverse displays aquamarine and russet shades near the rims. Fully struck and highly lustrous with only minor field contact. PCGS# 38645

- 3311** 1831 V-1, LM-6, R.1, MS64 PCGS. Star 3 is repunched and the reverse border displays numerous spindly die cracks. A lustrous and precisely struck near-Gem. The caramel-gold and gunmetal toning is more pervasive on the obverse. The reverse field has a few slender bright areas near the eagle. PCGS# 38661

- 3312** 1832 V-8, LM-5, R.1, MS64 NGC. Rich caramel-gold toning adorns the obverse, though the reverse is brilliant. Well-struck and satiny with a smooth reverse and light contact on the obverse field. A minor lamination, as made, affects the NI in UNITED. PCGS# 38667

### 1832 Half Dime, MS65 V-8, LM-5, Nearly White

- 3313** 1832 V-8, LM-5, R.1, MS65 PCGS. CAC. Only a wisp of olive-gold toning is evident on this lustrous and well struck Gem. Both sides are exceptionally devoid of marks, and the eye appeal is outstanding, even by the lofty standards of the designated third party grade. The pick-up point for the available LM-5 is a filled second S in STATES. PCGS# 38667

- 3314** 1834 V-1, LM-2, R.1, MS64 PCGS. Only a hint of olive-gold toning visits this fully struck and highly lustrous near-Gem. The trivial field grazes do not appear to limit the grade. A "Scarface" variety with a delicate vertical die crack between the nose and drapery. PCGS# 38702

- 3315** 1835 Small Date, Small 5C, V-7, LM-10, R.1, MS64 PCGS. CAC. Attractive fire-red and orange toning endows the obverse border. The fields are ocean-blue and the devices are dove-gray. The strike is close to full. A small spot is noted at 12 o'clock on the reverse, and a few delicate marks are on the field near star 2. PCGS# 38719

## SEATED HALF DIMES

- 3316** 1837 No Stars, Large Date (Curl Top 1) MS65 NGC. An important No Stars type coin. Traces of light golden color accent frosty, carefully preserved mint luster. Slight striking softness is seen on the AL in HALF, though the obverse is fully defined. Census: 125 in 65 (1 in 65+, 1 in 65 ★), 100 finer (10/14). NGC ID# 232M, PCGS# 4311

### 1844 Half Dime, MS67 Boldly Struck and Beautifully Toned

- 3317** 1844 MS67 PCGS. Normal Date. A top-notch example of the Normal Date variety, seen less frequently than the Repunched Date variant of this issue. Beautiful pink and blue patina complements the pristine preservation and a nice bold strike on this Superb Gem, one of only 11 such in this top grade at PCGS (10/14). NGC ID# 2335, PCGS# 4333

- 3318** 1854 Arrows MS65 PCGS. One of the more available dates from the With Arrows type, ideal for type purposes. This Gem example displays intermingled shades of olive-gold, gunmetal-blue, and battleship-gray toning. The devices are boldly struck and no obtrusive abrasions are present. Population: 46 in 65, 12 finer (10/14). NGC ID# 2342, PCGS# 4358

- 3319** 1858 MS66 PCGS. A fairly plentiful issue for the period, but seldom available in Premium Gem condition. This example displays mottled orange-gold, olive, and champagne toning, with satiny underlying luster. Liberty's head is not fully defined, though the strike is otherwise pleasing. Population: 67 in 66 (6 in 66+), 13 finer (10/14). NGC ID# 233U, PCGS# 4367

### 1862 Half Dime, MS67 Stunning and Well-Preserved

- 3320** 1862 MS67 PCGS. Unusual but attractive patina on this Superb Gem 1862 half dime includes cool mint, copper, and pastel lavender shades prevailing on the obverse. The reverse shows echoes of similar color against an untuned silver-white center. Both sides of this stunning coin are markedly free of contact. The large mintage approaching 1.5 million coins marks this as a type issue, but few survivors possess the eye appeal shown here. Population: 49 in 67 (4 in 67+), 3 finer (9/14). NGC ID# 234B, PCGS# 4381

---

**1862 Seated Half Dime, MS67  
Sharply Struck, Clashed Specimen**

- 3321 1862 MS67 PCGS.** Widespread hoarding and the financial stresses of the Civil War would greatly reduce mintages of small change in the following years, but the 1862 Seated Liberty half dime enjoyed a healthy production total of almost 1.5 million pieces. This spectacular Superb Gem is among the finest survivors, with sharply detailed design elements and vibrant mint luster throughout. A few hints of cerulean-blue and greenish-gold toning accent the pristine surfaces, which show interesting clash marks on both sides. Population: 49 in 67 (4 in 67+), 3 finer (10/14). NGC ID# 234B, PCGS# 4381

- 3322 1873 MS66 PCGS.** Pale olive, lavender, and russet-gold toning allows frosty mint luster to shine through on each side. Portions of the wreath are softly defined, as usual, though the obverse is well-struck. The eye appeal is fully appreciated when the coin is turned beneath a light. Population: 8 in 66, 3 finer (10/14). NGC ID# 2353, PCGS# 4404

---

**PROOF SEATED HALF DIMES**

- 3323 1859 PR64 PCGS.** Hollow star centers identify the modified obverse employed by the Philadelphia Mint in 1859. The figure of Liberty is also slimmer than on previous Seated half dime issues. This Choice proof displays deep gunmetal-blue and olive-gold toning. The fields are deeply reflective and the strike is bold throughout. NGC ID# 235P, PCGS# 4438

- 3324 1859 PR64 PCGS.** Ocean-blue, lavender, and gunmetal-gray occupy the obverse. The reverse is lilac-red, tan-gold, and cream-gray. A flashy and fully struck near-Gem. The ephemeral Paquet obverse subtype with hollow-centered stars. The 1 in the date is widely repunched at its base. NGC ID# 235P, PCGS# 4438

---

**1859 Seated Half Dime, PR65  
Exceptional Cameo Specimen**

- 3325 1859 PR65 Cameo NGC.** A delightful Gem from the second year of the Mint's program of commercial proof offerings, this sharply detailed example displays frosty devices and deeply reflective fields with a high degree of cameo contrast. A few highlights of greenish-gold and cerulean-blue toning add to the outstanding eye appeal. Census: 3 in 65 Cameo, 6 finer (10/14). PCGS# 84438

- 3326 1863 PR66 PCGS. CAC.** The Mint produced only 460 proof half dimes in 1863, and high-grade survivors are seldom encountered. This piece displays moderate mirroring in the fields and soft mint frost over the devices, with splashes of amber-gold and aquamarine toning on each side. Close examination reveals fine, crisscrossing file adjustment marks across the fields on each side, an unusual characteristic for a mid-19th century coin, though the effects make for an interesting piece. Population: 12 in 66, 2 finer (10/14). NGC ID# 235Y, PCGS# 4446

- 3327 1863 PR65 Cameo PCGS. V-1.** Following a small mintage of just 460 proofs, this same die pair was employed for business strike production, producing only 18,000 examples of that variant. The 1 and 8 in the date are lightly recut, a diagnostic of this obverse. This is a light golden Gem example of the scarce proof issue, with deeply mirrored fields and sharp, frosted motifs. A lack of contact marks further increases the visual appeal. Population: 8 in 65 Cameo, 4 finer (9/14). PCGS# 84446

- 3328 1870 PR66+ NGC.** The mirrored fields provide tremendous flash when tilted beneath a light, beautifully highlighting the razor-sharp devices. Peripheral toning in shades of ocean-blue and teal surrounds softer lavender-gold centers, giving this high-end proof immense visual appeal. Census: 27 in 66 (1 in 66+), 9 finer (10/14). NGC ID# 2367, PCGS# 4453

---

**EARLY DIME**

---

**1807 Dime, JR-1, XF45  
Deep Original Patina**

- 3329 1807 JR-1, R.2, XF45 NGC.** Only one die pair is known for the 1807 dime, and the reverse was also employed for quarter eagle coinage dated 1805 through 1807. This Choice XF example of the dime issue shows deep gold and lavender-gray toning. The central devices are boldly struck, though the border details are weakly defined. The latter is due more to excessive die lapping than insufficient striking pressure, and is characteristic of most representatives of this issue. PCGS# 38770
-

## SEATED DIMES

- 3330 1839 No Drapery MS64 PCGS. Fortin-106c, R.3.** An extreme late die state of Fortin-106, Fortin-106c exhibits profound die cracks and moderate erosion on each side, the most noticeable characteristic being a bold die crack at 12 o'clock on the obverse, extending down through Liberty's head. This Choice example is sharply struck, with satiny luster shining through light golden-gray and lavender-blue toning. The reverse is rotated clockwise 18 degrees, as is diagnostic of this variety. Population: 35 in 64 (2 in 64+), 34 finer (9/14). NGC ID# 237X, PCGS# 4571

### 1852-O Seated Liberty Dime, MS63 Conditionally Rare at This Level, Ex: Pittman

- 3331 1852-O MS63 NGC. Ex: Pittman.** Despite a mintage of 430,000 pieces, the 1852-O Seated Liberty dime is surprisingly rare in pleasing Mint State condition. This beautifully toned example displays vivid amber, gold, and aquamarine peripheral toning around light champagne centers. Some typical lightness of strike is seen on the upper wreath and the central figure of Liberty, but is well-balanced by semiprooflike mirroring in the fields around the borders. A beautiful coin from a historic collection. Census: 6 in 63, 11 finer (10/14). Ex: *Numismatic Gallery* (5/1948), sold as part of lot 291; *John Jay Pittman Collection, Part I* (Akers, 10/1997), lot 613. NGC ID# 238P, PCGS# 4598

- 3332 1853 Arrows MS66 NGC.** Dappled shades of mauve and golden-brown lightly color the obverse borders. The central obverse and entire reverse surfaces maintain their brilliance. This remarkable Premium Gem is fully struck and wonderfully preserved. The left arrow is repunched, and a number of die cracks occur on each side. Census: 44 in 66 (1 in 66+, 1 in 66 ★), 16 finer (10/14). NGC ID# 2398, PCGS# 4603

- 3333 1854 Arrows MS65 PCGS. Fortin-104a.** A Top 100, late die state variety, with numerous peripheral die cracks on the obverse. This satiny Gem example is moderately well-struck, with only a touch of softness on the lower-right wreath leaves. Sun-gold, olive, and ocean-blue hues encompass each side, with the deeper colors more prominent on the obverse. Population: 21 in 65, 12 finer (9/14). NGC ID# 239A, PCGS# 4605

- 3334 1856-S — Cleaning — PCGS Genuine. AU Details.** The first S-mint dime issue has a meager mintage of 70,000 pieces. Few were saved, and sharp examples are rare. The present pearl-gray and tan coin has little if any circulation wear, but is mildly bright and displays horizontal obverse hairlines. The reverse rim has a small nick at 12 o'clock. NGC ID# 238W, PCGS# 4613

- 3335 1858-S XF45 PCGS.** Deep gray surfaces display natural steel-blue and gold toning on both sides of this scarce S-Mint issue. A few scattered handling marks are consistent with the grade. Population: 8 in 45, 19 finer (10/14). NGC ID# 2393, PCGS# 4618

- 3336 1860-O — Cleaning — PCGS Genuine. XF Details.** Slight surface roughness appears on the light gray surfaces of this key Liberty Seated dime. Both sides are free of unsightly marks, although a few trivial handling marks are evident. NGC ID# 239E, PCGS# 4632

- 3337 1861-S AU53 NGC. Fortin-101, R.5.** The 1861-S dime is a significant semikey date in all grades, and is rare in AU and finer condition. This example displays soft pewter-gray surfaces with small tinges of olive toning around the borders. The strike is sharp for the issue, and only slight friction is observed on each side. Census: 2 in 53, 12 finer (9/14). NGC ID# 239G, PCGS# 4634

### 1862 Dime, Toned MS66 Elusive in This Grade

- 3338 1862 MS66 PCGS. CAC.** Seated dimes of 1862, from a mintage exceeding 800,000 pieces, are a common date through MS62. Even Select through Gem examples can be located with diligent searching. Premium Gems such as the present offering are elusive, with only 30 coins seen by PCGS and NGC combined, and the two services have rated a mere three pieces even finer. Light gray patina runs over the lustrous surfaces that have been well cared for, and the design elements are well-struck. Population: 15 in 66 (2 in 66+), 2 finer (10/14). NGC ID# 239H, PCGS# 4635

- 3339 1871-CC — Damage — PCGS Genuine. Fine Details.** The first Carson City dime issue, the 1871-CC has a tiny mintage of 20,100 pieces, few of which were saved. A majority of survivors have problems, and the present silver-gray example shows smoothing on the central reverse. Most of ONE DIME is effaced. All letters in LIBERTY are clear. NGC ID# 23A5, PCGS# 4654

### 1871-CC Seated Dime, XF Details Famous Series Rarity

- 3340 1871-CC — Cleaning — PCGS Genuine. XF Details. Fortin-101.** Light hairlines are visible under light at an angle, the most overt sign of cleaning on this rare Carson City issue. Otherwise, the coin retains a pleasing silver-gray appearance and no evidence of harsh handling. Scattered small marks are few and generally unnoticed except with a glass. This coin is eminently collectible with the minor cleaning, a prize for the astute series specialist with so few examples of the issue available in any condition.

**1872-CC Dime, XF Details  
Key Carson City Issue**

- 3341 1872-CC — Cleaning — PCGS Genuine. XF Details. Fortin-101.** Carson City dimes of 1871 through 1874 often show a degree of surface porosity, so the slightly mattelike surfaces of this dime are perhaps not entirely a result of the light cleaning. The coin displays a rather monochromatic deep-gray coloration, although the devices are bold and retain considerable sharpness — a valued attribute for this challenging issue that is often found in low circulated grades.

- 3342 1884-S MS64 PCGS. Fortin-104, R.4.** A slightly better date in Mint State grades. This Choice example displays rich coppery-red and orange-gold peripheral toning around pale champagne centers. The coin is well-struck and exhibits few grade-limiting luster grazes. Population: 16 in 64 (1 in 64+), 3 finer (10/14). NGC ID# 23AY, PCGS# 4693

**PROOF SEATED DIMES**

**1863 Dime, PR65 Ultra Cameo  
Fully Struck With Bold Contrast**

- 3343 1863 PR65 Ultra Cameo NGC. Fortin-101, R.4.** A single die pair was employed for proof and business strike dime production in 1863, coining 460 and 14,000 coins, respectively. This Gem is undeniably from the proof striking period, as evidenced by the profoundly deep mirroring in the fields and the heavily frosted, needle-sharp design elements. A thin veil of light champagne toning warms each side, and only a few faint hairlines are seen in the fields under magnified examination. An immensely appealing proof. Census: 2 in 65 Ultra Cameo, 6 finer (9/14). PCGS# 94756
- 3344 1869 PR66 PCGS. CAC. Fortin-105, R.3.** This carefully preserved proof boasts largely sharp design definition, with the only exception being the extreme upper-left portion of the wreath, an area that is often lacking in detail. A myriad of mottled colors blankets each side, with deeply reflective underlying fields. Population: 8 in 66, 0 finer (10/14). NGC ID# 23CT, PCGS# 4762

**1871 Half Dime, PR66  
Lovely Concentric Toning**

- 3345 1871 PR66 PCGS. CAC.** This Premium Gem proof is among 15 submissions in this top grade at PCGS, and none are finer (10/14). Each side sports lovely concentric toning with rose surrounded by aqua and mint shades. The strike is not absolute on all of the wreath details on the reverse, but there is no contact worthy of singular mention save for a single small mark atop Liberty's left arm. NGC ID# 23CV, PCGS# 4764

- 3346 1874 Arrows PR64 NGC. Fortin-101, R.3.** Pale lavender-gold toning warms deeply mirrored fields on each side of this boldly struck Choice proof. Only 700 examples were minted, and the available population plunges dramatically above the PR64 grade level, where NGC has certified only 28 pieces (10/14). NGC ID# 23DJ, PCGS# 4770

- 3347 1874 Arrows PR64 PCGS. CAC. Fortin-101, R.3.** A boldly struck Choice proof, this piece displays deeply reflective fields and vivid multicolor toning that shows its full potential when tilted beneath a light. PCGS has certified only 30 numerically finer non-Cameo representatives (10/14). NGC ID# 23DJ, PCGS# 4770

- 3348 1874 Arrows PR64 PCGS. CAC.** This die pair was later employed for business strike coinage. This Choice proof is deeply toned with burgundy, olive, and golden-gray over the obverse, and brighter sun-gold, sea-green, blue, and lavender on the reverse. The strike is bold and there are no discernable contact marks. NGC ID# 23DJ, PCGS# 4770

- 3349 1879 PR65 PCGS. CAC. Fortin-102, R.3.** Vivid hues of orange-gold, lavender, ocean-blue, and turquoise envelop both sides of this Gem proof, with the deeper colors more prevalent on the obverse. The strike is well-executed, as is expected for a proof issue. Population: 31 in 65, 26 finer (10/14). NGC ID# 23D4, PCGS# 4776

- 3350 1879 PR65 Cameo PCGS.** Wonderful reflectivity complements exquisite toning, with turquoise-blue margins merging with pink and orange-gold centers. The motifs are fully struck and nicely frosted for maximum contrast with the deep-mirrored fields. An excellent Gem proof dime. Population: 16 in 65 Cameo, 10 finer (10/14). PCGS# 84776

- 3351 1880 PR66 PCGS. CAC.** Vibrant emerald and lavender tones grace the surfaces of this lovely Premium Gem proof Seated Liberty dime. Both sides exhibit noticeable field-to-device contrast, although the depth of toning prevents a Cameo designation. Population: 32 in 66 (2 in 66+), 13 finer (10/14). NGC ID# 23D5, PCGS# 4777

- 3352 1881 PR66 NGC.** This lovely Premium Gem proof has intermingled gold, sea-green, and iridescent toning over both surfaces, masking the obvious cameo contrast, and preventing a Cameo designation. Census: 30 in 66 (1 in 66+), 16 finer (10/14). NGC ID# 23D6, PCGS# 4778

- 3353 1881 PR66 PCGS. CAC. Fortin-101, R.3.** From a mintage of 975 proofs, this Premium Gem representative exhibits attractive ice-blue and purple-gray toning over each side. The design elements are fully struck, and the eye appeal is strong. Proofs from this issue frequently serve as alternatives to the business strike coins, of which only 24,000 were produced. Population: 18 in 66, 7 finer (10/14). NGC ID# 23D6, PCGS# 4778

- 3354 1883 PR66 NGC.** Ex: Eric P. Newman Collection. Beautifully toned on each side, this Premium Gem displays shades of blue-green, plum, orange, and yellow-gold. On the reverse, gleaming straw-gold centers are framed by generous peripheral shades of blue and green. A few minute marks on the seated Liberty emerge beneath a loupe. NGC ID# 23D8, PCGS# 4780
- 3355 1884 PR66 NGC.** Deeply reflective proof mirrors are evident on each side when examined with a magnifier or when held at just the right angle. The obverse displays layers of rich red and blue toning, while the reverse exhibits vivid electric-blue patina. Only 875 proofs were struck. NGC ID# 23D9, PCGS# 4781
- 3356 1884 PR65 Cameo PCGS.** The sharply detailed and frosty design elements of this attractive Cameo Gem proof contrast noticeably with the reflective fields. Well-preserved beneath attractive jade-green and powder-blue toning. Population: 15 in 65 (1 in 65+) Cameo, 37 finer (10/14). PCGS# 84781
- 3357 1888 PR66 Cameo PCGS.** Light contrast appears between the satiny and sharply defined design motifs, and the fully and deeply mirrored fields. This Premium Gem Cameo proof is brilliant and untuned with excellent eye appeal. Population: 11 in 66 (1 in 66+) Cameo, 2 finer (10/14). PCGS# 84785

## BARBER DIMES

- 3358 1895 MS64 PCGS.** The 1894 Barber dime is a slightly better date in most grades, and is seldom seen at the Choice Mint State level. This sharp example displays satiny mint luster with wisps of light golden color. Heavy clash marks are observed on each side. Population: 34 in 64 (2 in 64+), 28 finer (10/14). NGC ID# 23DV, PCGS# 4806
- 3359 1899-S MS64 PCGS.** An attractive Choice example of this conditionally scarce issue, with sharply detailed design elements and lustrous semiprooflike surfaces, under shades of lavender-gray and sea-green toning. Population: 30 in 64, 26 finer (10/14). NGC ID# 23EB, PCGS# 4820
- 3360 1900-S MS65 NGC.** Delicate gold, blue, and violet toning appears over ivory surfaces on the obverse of this splendid Gem. The reverse is essentially brilliant and untuned. Both sides exhibit sharp design motifs. Census: 10 in 65, 5 finer (10/14). NGC ID# 23EE, PCGS# 4823
- 3361 1904 MS65+ PCGS. CAC.** Despite a mintage in excess of 14 million coins, this Philadelphia issue is seldom available at the Gem grade level and is genuinely rare any finer. This Plus-graded piece displays varying shades of olive-gold and sun-orange toning, with satiny underlying mint luster. A bold strike and clean fields complement the overall appeal. Population: 42 in 65 (2 in 65+), 10 finer (10/14). NGC ID# 23ER, PCGS# 4833
- 3362 1907 MS66 PCGS. CAC.** The 1907 dime is an available issue in most grades, but becomes scarce at the Premium Gem level. This representative is nearly untuned, with frost-white mint luster shining through a thin veil of pale golden color. The lower-right wreath leaves are lacking slightly in striking definition, though the design elements are otherwise bold. Population: 22 in 66 (4 in 66+), 1 finer (9/14). NGC ID# 23F3, PCGS# 4842
- 3363 1907-D MS65 PCGS.** An attractive Gem example of this conditionally elusive Denver issue, with satiny luster shining through pale lavender-gold and olive toning. The strike is crisp, and the surfaces exhibit only a few grade-consistent ticks upon magnified examination. Population: 9 in 65 (1 in 65+), 11 finer (9/14). NGC ID# 23F4, PCGS# 4843
- 3364 1907-O MS66 PCGS. CAC.** Satiny luster beneath shades of green-gold and aquamarine toning attests the originality of this Premium Gem example. The strike is slightly soft on some of the finer design elements, as is typical of this New Orleans issue, but the eye appeal is hardly affected. Population: 16 in 66 (2 in 66+), 2 finer (9/14). NGC ID# 23F5, PCGS# 4844

## 1913-S Dime, Pristine MS66 Low-Mintage Issue

- 3365 1913-S MS66 PCGS.** A wide medley of color includes a demure obverse lightly toned in rose, amber, and mint shades with a few dollops of deeper olive-brown, the latter shade reappearing in abundance around the reverse periphery amid burgundy with a gold center. The low-mintage 1913-S, struck to the extent of only 510,000 coins, is seldom seen with the pristine preservation present here. Population: 19 in 66 (1 in 66+), 4 finer (10/14). NGC ID# 23FS, PCGS# 4864

- 3366 1914-D MS66+ PCGS.** Extravagant, deep toning decorates the well-preserved surfaces of this outstanding Premium Gem, in hues of purple, emerald-green, and reddish-brown. A sharply struck example with clean, splendidly preserved surfaces. Population: 22 in 66 (2 in 66+), 2 finer (10/14). NGC ID# 23FU, PCGS# 4866
- 3367 1914-D MS66 PCGS. CAC.** A ring of copper-gold patina on each side surrounds unperturbed silver-white interiors on this lovely Premium Gem, whose high grade and CAC preservation separate it from most of its cohorts. PCGS reports 22 submissions in MS66 yet only two finer, and CAC shows eight in MS66 with two finer (including PCGS and NGC coins) (9/14). A great-looking example of this late-series issue. NGC ID# 23FU, PCGS# 4866

## 1916-S Barber Dime, MS66 None Certified Numerically Finer

- 3368 1916-S MS66 PCGS. CAC.** Despite a mintage of nearly 6 million coins, this final-year San Francisco issue is scarce at the Gem grade level and is rarely seen finer. This Premium Gem example is boldly struck with frosty, untuned mint luster. Some faint surface grazes on Liberty's cheek preclude an even finer grade, though the coin appears pristine to the unaided eye. Population: 23 in 66 (5 in 66+), 0 finer (9/14). NGC ID# 23FZ, PCGS# 4871

## PROOF BARBER DIMES

### 1900 Barber Dime, PR67 Near-Cameo Contrast

**3369 1900 PR67 NGC.** A rarely encountered Superb Gem, this boldly struck 1900 proof dime showcases remarkably deep mirroring around softly frosted devices, delivering near-Cameo contrast. The surfaces are seemingly perfect, and just a faint tint of light golden toning is detected in the fields. Census: 19 in 67 (1 in 67+, 1 in 67 ★), 6 finer (10/14). NGC ID# 23GD, PCGS# 4884

**3370 1900 PR66 Cameo PCGS.** While high grade examples of this issue are not overly scarce compared to other proof issues of the period, examples exhibiting cameo contrast are in the distinct minority. Green-gold, amber, and violet-blue colors blanket each side of this intricately struck Premium Gem. A few tiny strike-throughs are noted in the right obverse field, but are well-hidden by the rich patina. The devices are thickly frosted, with the contrast only reduced where the vibrant colors are strongest. Population: 22 in 66 (2 in 66+) Cameo, 10 finer (10/14).  
Ex: *Dallas Signature (Heritage, 11/2005), lot 1054.* PCGS# 84884

**3371 1905 PR65 NGC.** Faint honey patina graces the obverse margin, but this beautiful Gem is otherwise fully brilliant. The reverse features obvious cameo contrast, although not designated as such on the NGC insert. The portrait provides mild but noticeable contrast. The 05 in the date is repunched north. Census: 39 in 65, 55 finer (10/14).  
Ex: *Dallas Signature (Heritage, 12/2004), lot 5793.* NGC ID# 23GJ, PCGS# 4889

**3372 1908 PR66 PCGS.** Highly reflective fields and razor-sharp design elements yield intermingled wheat-gold and lavender-orange toning, with occasional specks of blue and mint-green. Population: 24 in 66 (1 in 66+), 10 finer (10/14). NGC ID# 23GN, PCGS# 4892

**3373 1910 PR65 Cameo PCGS.** Heavily frosted, needle-sharp devices deliver profound contrast with the mirrored fields. No contact marks are observed, and any grade-limiting hairlines are well-masked by rich orange-gold, violet, and champagne toning in the margins. Population: 12 in 65 (1 in 65+) Cameo, 13 finer (10/14). PCGS# 84894

**3374 1913 PR66 Cameo PCGS.** The veneer of champagne-gold patina is slightly deeper on the reverse of this Cameo. Sharply struck and nicely preserved. Population: 13 in 66 (1 in 66+) Cameo, 4 finer (10/14). PCGS# 84897

## MERCURY DIMES

**3375 1916 MS67 Full Bands PCGS. CAC.** Even the most minute design feature is struck to full definition on this superb Full Bands representative. Vibrant luster coats each side in frosty radiance, while a blush of amber-gold color on the left-hand portion of the reverse is the only trace of color. PCGS has certified just 10 numerically finer Full Bands representatives (10/14). NGC ID# 23GX, PCGS# 4905

**3376 1916-D VG10 NGC.** The 1916-D dime is the key to the Mercury dime series, with a low mintage of only 264,000 pieces, and is widely pursued in all grades. This example is boldly detailed for the grade, with original battleship-gray patina. The date and mintmark are clear. Close examination reveals a few grade-consistent circulation scars in the right obverse margin. NGC ID# 23GY, PCGS# 4906

**3377 1916-D — Improperly Cleaned — NGC Details. VF.** This stone-gray key date dime is sharper than most '16-D dimes, which are typically encountered in Fair through VG grades. Devoid of noticeable marks, and the surfaces are attractive despite a mild cleaning. NGC ID# 23GY, PCGS# 4906

**3378 1916-D — Cleaned — ANACS. MS60 Details.** Most '16-D dimes are heavily circulated, but the present piece is fully defined and exhibits vibrant luster. Light to medium silver-gray and tan toning visits unmarked surfaces. Designated as cleaned by ANACS, but the distinction will be lost on many collectors. NGC ID# 23GY, PCGS# 4906

**3379 1919-D MS65 NGC.** Ruby-red, lemon-gold, and jade-green toning endow this well struck and coruscating Gem. The 1919-D ranks among the most important conditional rarities of the series. Housed in a prior generation holder. NGC ID# 23H9, PCGS# 4924

### 1919-D Dime, MS64 Full Bands Nice for the Grade

**3380 1919-D MS64 Full Bands PCGS.** This well-struck near-Gem 1919-D dime shows light flecks of grayish toning on the obverse, and both sides are predominantly golden-toned with good luster. Few marks are visible for the assigned grade, and all of the fasces bands are well struck up. Population: 73 in 64 (3 in 64+) Full Bands, 18 finer (10/14). NGC ID# 23H9, PCGS# 4925

**3381 1921-D MS64 NGC.** Attractive autumn-brown, fire-red, and sea-green peripheral toning encroaches upon brilliant centers. The bands are very close to full separation on this semikey Denver issue. Lustrous and well struck with exemplary preservation. Housed in a prior generation holder. NGC ID# 23HF, PCGS# 4936

**1921-D Dime, MS65**  
**Luminous, High-Quality Representative**

- 3382 1921-D MS65 PCGS. CAC.** An attractive Gem example of this popular key date. The surfaces are beautifully preserved, with frosty luster and pale lavender-gold toning overall. Slight striking softness on the central regions and portions of the extreme outer peripheries preclude a Full Bands designation from PCGS. Population: 17 in 65, 11 finer (9/14). NGC ID# 23HF, PCGS# 4936
- 3383 1925 MS66+ Full Bands PCGS. CAC.** The availability of this issue with Full Bands definition declines significantly beyond the Gem grade level. This high-end Premium Gem piece displays essentially brilliant, frosty luster that is free of contact marks. A bold strike produces undeniably full bands on the reverse. Population: 52 in 66 (3 in 66+) Full Bands, 27 finer (10/14). NGC ID# 23HM, PCGS# 4949
- 3384 1926-D MS65 Full Bands NGC.** An unusually bold, satiny example of this poorly produced Denver issue. Liberty's hair curls and the reverse bands are sharply delineated, and each side shows lightly dappled olive-gold toning with strong underlying luster. Encapsulated in a prior generation holder. Census: 43 in 65 (1 in 65+) Full Bands, 13 finer (9/14). NGC ID# 23HS, PCGS# 4957
- 3385 1926-S MS64 PCGS.** Light to medium sun-gold toning graces this lustrous, typically struck, and splendidly preserved Choice dime. Among the scarcest Mercury issues in Uncirculated grades. Certified in a green label holder.  
*Ex: Wes Rasmussen Sale (Superior, 2/1998), lot 1914. NGC ID# 23HT, PCGS# 4958*
- 3386 1927-S MS65 NGC.** Peach-gold and ice-blue shades embrace this lustrous and virtually unabrased Gem. One small spot noted on the back of Liberty's neck. Certified in a former generation holder.  
*Ex: Superior, 9/1999, lot 1104. NGC ID# 23HW, PCGS# 4964*
- 3387 1928-D MS64 Full Bands PCGS.** Subtle hues of lavender-gold toning accent satiny luster on each side of this Full Bands example. A lack of obtrusive abrasions complements the sharply struck motifs. The 1928-D dime is seldom seen finer with Full Bands definition. NGC ID# 23HY, PCGS# 4969
- 3388 1929 MS67 Full Bands PCGS.** A beautifully toned Superb Gem with pinkish-gold reverse patina and pastel obverse rim toning in shades of mint, ice-blue, amber, and lavender. A top-notch piece for the grade and issue, with no strike softness on the date. Population: 82 in 67 (5 in 67+) Full Bands, 0 finer (10/14). NGC ID# 23J2, PCGS# 4973
- 3389 1929-S MS66 Full Bands PCGS.** Frost-white, seemingly flawless surfaces highlight bold design definition on each side of this Premium Gem example. PCGS has certified 43 numerically finer examples within the Full Bands category (9/14), but it is doubtful if very many surpass this blazer in regards to eye appeal. NGC ID# 23J4, PCGS# 4977
- 3390 1930 MS66 Full Bands PCGS. CAC.** Intermittent amber-red, pine-green, and lemon-gold hues accent pale lavender-gray toning on each side. The strike is bold and any minute, grade-limiting luster grazes are fully masked by the rich coloration. PCGS has certified only 16 numerically finer pieces with a Full Bands designation (10/14). NGC ID# 23J5, PCGS# 4979

**3391 1930-S MS67 PCGS. CAC.** The central bands on the reverse are separated, but not quite rounded enough to qualify for the Full Bands designation. Mottled lavender-gray, olive-gold, and aquamarine toning coats each side, but does not subdue the radiant luster. Population: 4 in 67, 0 finer (10/14). NGC ID# 23J6, PCGS# 4980

**3392 1934-D MS67 Full Bands PCGS.** This sharply defined Superb Gem features fully split bands on the reverse. Both sides are frosty and highly lustrous with brilliant silver surfaces. Population: 50 in 67 (4 in 67+) Full Bands, 0 finer (10/14). NGC ID# 23JB, PCGS# 4991

**1935-D Dime, MS67 Full Bands**  
**Tied for Finest at PCGS**

**3393 1935-D MS67 Full Bands PCGS. CAC.** The Denver Mint produced more than 10 million dimes in 1935, but striking quality was lacking, as this issue is among the more challenging of the period to locate with Full Bands definition. This example shows above-average sharpness for the issue and exceptional preservation. Pale gold and ice-blue toning encompasses much of each side, though deeper amber hues are seen around portions of the peripheries. Population: 26 in 67 Full Bands, 0 finer (9/14). NGC ID# 23JD, PCGS# 4995

**3394 1937-S MS67+ Full Bands PCGS. CAC.** A gorgeous, rainbow-toned example of this San Francisco Mercury dime issue. Fully struck and immaculately preserved, with lustrous surfaces and outstanding visual appeal. Population: 9 in 67+ Full Bands, 1 finer (10/14). NGC ID# 23JL, PCGS# 5009

**3395 1939-D MS68+ Full Bands PCGS. CAC.** The occasional splash of pine-green, sun-gold, and violet-red color visits the vibrant, silvery-white surfaces of this high-end Full Bands representative. PCGS has certified 16 numerically finer examples within the Full Bands designation (10/14), but it is doubtful if any possess more eye appeal than this Plus-graded piece. NGC ID# 23JS, PCGS# 5019

**3396 1942/1 FS-101 MS61 NGC.** A blatant overdate variety, struck during World War II. Lustrous and nicely struck with delicate almond-gold toning. Minor spots are noted inside the obverse rim at 4 and 10 o'clock. The NGC holder notes the previous *Cherrypickers'* attribution of FS-10.7. PCGS# 145473

**3397 1943 MS67+ Full Bands PCGS. CAC.** This boldly detailed Superb Gem has brilliant and frosty silver luster. Splashes of gold and iridescent toning on both sides enhance the eye appeal of this delightful Mercury dime. PCGS has only certified three finer examples (10/14). NGC ID# 23K8, PCGS# 5045

**3398 1944 MS67 Full Bands PCGS.** Faint pastel hues grace satiny luster on each side of this fully struck representative. Normally considered a plentiful date, the 1944 dime is seldom available at the MS67 Full Bands grade level, and finer pieces are prohibitively rare, with only two such coins graded at PCGS (10/14). NGC ID# 23KB, PCGS# 5051

## PROOF MERCURY DIMES

- 3399 1936 PR66+ PCGS. CAC.** A fully struck proof, this high-end Premium Gem displays satiny devices set against deeply reflective fields. A thin veil of lemon-gold toning warms each side, with deeper lavender-brown hues seen periodically around the peripheries. NGC ID# 27DG, PCGS# 5071
- 3400 1939 PR67 Cameo NGC.** This is an amazing example and surprisingly rare. Cameo proof coins from the 1936 to 1942 era, regardless of denomination, are very rare. In fact, PCGS and NGC have combined to certify just 453 Cameo proofs from *all years and all denominations* issued between 1936 and 1942. Census: 15 in 67 Cameo (2 in 67 ★ Cameo), 1 finer (10/14). PCGS# 85074
- 3401 1942 PR68 NGC.** A generous mintage of 22,329 proofs makes this issue accessible well into the upper Gem grades, where it then becomes more challenging. The flashy, mirrorlike surfaces are entirely brilliant and generate extraordinary visual appeal. NGC has graded only one numerically finer (10/14). NGC ID# 27DN, PCGS# 5077
- 3402 1942 PR68 PCGS.** A hard, brilliant sheen covers pristine surfaces that show expectedly pinpoint definition. The discerning collector need not look any further for a finer Winged Liberty representative. Population: 59 in 68 (2 in 68+), 0 finer (10/14). NGC ID# 27DN, PCGS# 5077
- 3403 1942 PR68 NGC.** This stunning Superb Gem proof has light cameo contrast despite the lack of a designation. Both sides have delicate bluish-gold and iridescent toning. NGC has only certified one finer example of this final proof Mercury dime issue (10/14). NGC ID# 27DN, PCGS# 5077

## ROOSEVELT DIMES

- 3404 1949-S MS67 Full Bands PCGS.** An important offering for the Registry Set collector and one of just 16 examples rated MS67 Full Bands by PCGS, with none finer as of (10/14). A lovely Roosevelt dime with lustrous snow-white surfaces that are impeccably preserved, and faint touches of patina near the borders. NGC ID# 23KW, PCGS# 85093
- 3405 1952-S MS67+ Full Bands PCGS.** An amazing Superb Gem, this 1952-S Roosevelt dime has a bold strike and exceptional eye appeal. Both sides are mostly brilliant, with an intense peripheral frame of gold and iridescent toning. Population: 57 in 67 (15 in 67+) Full Bands, 4 finer (10/14). NGC ID# 23L7, PCGS# 85102

### 1958 Dime, MS67 Full Bands Conditional Rarity at This Level

- 3406 1958 MS67 Full Bands PCGS.** A condition rarity in this grade, the 1958 in MS67 Full Bands shows only seven submissions at PCGS and 11 at NGC (10/14). The last example we offered, an NGC coin with the Star designation, brought \$2,585 in June 2014. This piece is an untoned, pristine Superb Gem with a full strike throughout. NGC ID# 23LM, PCGS# 85116

## PROOF ROOSEVELT DIME

- 3407 1952 PR68 Cameo PCGS.** This deeply mirrored white-on-black Cameo is nearly untoned, with only a blush of amber-gold color seen around portions of the peripheries. PCGS has certified only nine Cameos at the PR68 grade level, with just one numerically finer (9/14). This piece is tied numerically with the example in the current highest-rated Basic Registry Set. NGC ID# 27EL, PCGS# 85227

## TWENTY CENT PIECES

- 3408 1875 MS62 NGC.** Although not quite as popular, the 1875 twenty cent piece is somewhat scarcer than its Carson City counterpart, especially in Mint State condition. This example is well-struck, with sun-gold and bluish-gray toning. Light abrasions accompany the grade, but do not overly detract. NGC ID# 23R5, PCGS# 5296
- 3409 1875 MS64 PCGS. BF-1, R.1.** An essentially brilliant near-Gem with smooth, satiny surfaces and minor incompleteness of strike at the centers. A first-year die marriage most interesting for its concentric die lines on the upper obverse. Population: 63 in 64 (2 in 64+), 28 finer (10/14). NGC ID# 23R5, PCGS# 5296
- 3410 1875-CC AU50 ANACS. BF-4, R.2.** The Wide CC variety. Golden-brown and navy-blue toning enriches the margins of this lightly worn Carson City type coin. Ample luster flashes from the borders. The fields display scattered small marks, most evident beneath the beak. NGC ID# 23R6, PCGS# 5297
- 3411 1875-CC MS62 NGC. BF-2, R.1.** A chestnut-gold and stone-gray example. Crisply struck and lustrous with a smooth reverse and a few inconsequential obverse field grazes. The sole collectible Carson City issue. NGC ID# 23R6, PCGS# 5297

### 1875-CC Twenty Cent Piece, MS62

- 3412 1875-CC MS62 PCGS. BF-2, R.1.** Lane Brunner and John Frost, authors of *Double Dimes, The United States Twenty-cent Piece*, state that this is the usually encountered variety. The new reference, published in July 2014, will likely heighten interest in this long-neglected denomination. This pleasing Mint State piece is mostly brilliant with lovely peripheral gold and iridescent toning. NGC ID# 23R6, PCGS# 5297
- 3413 1875-S MS63 PCGS. BF-14, R.1.** Booming luster sweeps the dove-gray and slate surfaces of this well struck and lightly abraded Seated type coin. According to Brunner and Frost, BF-14 shows the top of a 1 misplaced in the dentils beneath the 8 in the date. NGC ID# 23R7, PCGS# 5298

## PROOF TWENTY CENT PIECE

1876 Twenty Cent, PR64 Cameo  
Great Eye Appeal

- 3414** 1876 PR64 Cameo NGC. Light, even honey-colored patina in the reflective fields contrasts nicely against the dove-gray devices on this beautiful near-Gem Cameo proof twenty cent piece. The 1876 circulation strikes were a meager issue of 14,400 pieces, but the proofs were struck in larger quantity than in 1875, 1,500 versus 1,200. Few survive with finer eye appeal than this marvelous coin, a great choice for a type set. Census: 18 in 64 Cameo, 36 finer (10/14). PCGS# 85304

## EARLY QUARTER

1806 Draped Bust Quarter, XF40  
Scarce B-5 Variety

- 3415** 1806 B-5, High R.4, XF40 PCGS. CAC. A substantial mintage of 206,124 Draped Bust quarters was achieved in 1806, with 10 die varieties known for the date. This coin represents the scarce B-5 variety, with the lower left serif of 1 missing and 25 located close to UNITED on the reverse. This attractive XF example retains much original design detail, but shows the softness always seen on the central reverse. The bluish-gray surfaces are lightly abraded for the grade. PCGS# 38931

## BUST QUARTERS

1822 B-1 Quarter, AU55  
Sharply Struck and Lightly Circulated

- 3416** 1822 B-1, R.2, AU55 PCGS. Scattered copper-colored hues predominate against smoke-gray and vague bluish tones on this light circulated Bust quarter. A noticeable pair of digs in the planchet appear just right of the date, and they are, along with a single mark on Liberty's cheek, among the few singular signs of contact. The reverse is free of mentionable marks, and both sides show an excellent sharp strike. A great-looking example of the easier variety for the year. PCGS# 38969

1824/2 Quarter, B-1, VF30  
Eye-Appealing for the Grade

- 3417** 1824/2 B-1, R.3, VF30 PCGS. The sole die pair known for the year, the B-1 quarter was overdated 1824 over an earlier unused 1822 obverse die. This die could have been among the last produced by Mint Engraver Robert Scot, who died on Nov. 1, 1823, or one of the first produced by contract engraver Christian Gobrecht, according to the Steve Tompkins reference, where he theorizes that the 1824/2 quarters may have been the delivery of December 31, 1823. (William Kneass was hired as chief engraver on January 29, 1824.) The surfaces are a melange of dusky rose, gold, pink, slate, and steel-blue, with scattered marks on each side and contact marks consistent with the grade. More eye appeal is present than might be surmised from the grade. PCGS# 38972

- 3418** 1825/4(2) B-2, R.2, VF35 PCGS. A dusky dove-gray Capped Bust quarter. The surfaces are refreshingly free from abrasions, and the eagle's feathers display impressive definition. The curls and claws show wear commensurate with the grade. PCGS# 38975

- 3419** 1831 Small Letters, B-4, R.1, AU58+ PCGS. CAC. The 5 in 25 C. is repunched on this variety. This reverse die was also employed for the B-3 variety. This Plus-grade AU piece displays substantial mint luster beneath lavender-gray and orange-gold toning. The strike is pleasantly sharp throughout. PCGS# 38983

- 3420** 1834 O Over F in OF, B-1, FS-901, R.1, AU58 NGC. Well struck and coruscating with dappled forest-green and lilac peripheral patina. The blundered reverse with the O in OF punched over an errant F, added in recent years to the *Guide Book*. A fairly late die state with cracks from the cap and across the lower bust, and clash marks from the shield near the ear. PCGS# 38992

## SEATED QUARTERS

### 1839 No Drapery Quarter, MS63 Rare 'Very Long Claws' Variety

- 3421** 1839 No Drapery MS63 NGC. Briggs 4-C. While all 1839 No Drapery quarters are notably scarce in MS63 or finer grades, the issue is excessively rare in Mint State when seen with the Very Long Claws reverse. This is an enigmatic variety, first identified by Harry Smith in 1989 and listed in the 1991 Larry Briggs *Encyclopedia* as Briggs 4-C, where it was tentatively described as "unique." Today — 23 years later — more examples are known and, in fact, we have sold nine examples of the Very Long Claws reverse in the past 15 years.

We estimate no more than 6% of the 1839 quarters display this distinctive reverse die, with the present coin the highest-certified example we have sold. Bold, widely separated dentils give the coin a "beaded edge" appearance on both the obverse and reverse — a possible diagnostic for the die pair, mentioned by Briggs. A touch of strike weakness is seen at the centers, where minor blending affects Liberty's head, upper gown lines, and stars 7 and 8. All examples we've seen show weakness at the eagle's left (facing) leg and talons. Silver-gray centers glow with subtle iridescence, and scattered amber-gold toning becomes stronger at the margins. This important Briggs 4-C representative is certainly among the finest extant of the variety.

Ex: *Long Beach Bullet Sale* (Heritage, 1/2004), lot 559. NGC ID# 23SF, PCGS# 5392

- 3422** 1840 MS62 PCGS. Briggs 1-A. An attractive coin for the grade with a minimum of contact marks and pleasing, amber-brown toning thinly dispersed over silvery, semiprooflike surfaces. A darker band of toning crosses the eagle's right (facing) wing and a small area of deeper gray sits beneath stars 4 and 5 in the left obverse field. The strike is bold except for a few of the stars, which lack their centers to one extent or another. A notably scarce issue in Mint State — the first year for the "With Drapery" design. Few examples are certified finer. Population: 3 in 62, 11 finer (9/14).  
Ex: *Milwaukee CSNS Signature* (Heritage, 5/2004), lot 6935, which realized \$1,782.50. NGC ID# 23SH, PCGS# 5397

### 1841 Seated Liberty Quarter, MS64 Challenging Early Date

- 3423** 1841 MS64 NGC. Briggs 1-A. Satiny and boldly detailed with the exception of a few obverse stars (as characteristic of the variety), being layered in gray-lilac patina that deepens to speckled violet and crimson hues in the protected areas. This Briggs 1-A variety shows doubling of the reverse legend "STATES OF AM" — diagnostic on all examples of the die pair, with a die crack from the base of M to the eagle's right (facing) wing. All early Seated Quarter issues are scarce in Mint State and the 1841, from a slightly reduced mintage of 120,000 pieces, is no exception. Census: 27 in 64, 6 finer (9/14).  
Ex: *Baltimore Signature* (Heritage, 7/2003), lot 6922. NGC ID# 23SK, PCGS# 5399

- 3424** 1841-O MS63 NGC. Briggs 1-A. The reverse exhibits extensive peripheral die cracks, a characteristic of this tail die which was previously employed for part of the 1840-O coinage. The eagle's left (facing) leg is not fully defined, though the strike is otherwise sharp. Satiny luster shines through dusky golden-gray toning on each side, attesting to the originality of the surfaces. Census: 11 in 63, 6 finer (10/14). NGC ID# 23SL, PCGS# 5400

### 1842-O Large Date Quarter, MS63 Robust Mint Luster

- 3425** 1842-O Large Date MS63 PCGS. Briggs 3-C. Dashes of dove-gray and chestnut color deny full brilliance, but this satiny and sharply struck New Orleans quarter is carefully preserved and attractive. All of the vertical shield lines extend into the horizontal lines and several also extend below the shield, which suggests they were strengthened by hand on the working die. Population: 6 in 63, 8 finer (9/14).  
Ex: *ANA Signature* (Heritage, 7/2005), lot 6005. NGC ID# 23SP, PCGS# 5402

**1843-O Quarter, Small O, AU58  
Only Slightly Circulated**

**3426 1843-O AU58 PCGS.** Small O. The 1843-O Seated quarter had a fairly generous mintage of nearly 1 million coins, but most certified survivors hover around XF40 at best. This near-Mint State jewel shows beautiful deep-blue patina around the upper obverse, with silver and russet-gold lower down. The reverse is lightly toned, and generous luster shines forth despite light circulation and a few scattered marks. Population: 7 in 58, 6 finer (10/14). NGC ID# 23SS, PCGS# 5405

**3427 1843-O Large O, FS-501, VF35 PCGS.** CAC. The rarity of the Large O variety is recognized by *Cherry-pickers*, although the *Guide Book* presently omits any distinction. This well defined and problem-free silver-gray example has pleasing original surfaces and good eye appeal. PCGS# 395927

**1844 Quarter, MS64  
Original Surfaces, Sharply Defined**

**3428 1844 MS64 PCGS.** Those Seated quarter collectors who like their star centers fully struck will find that to be only the first of several praiseworthy attributes on this near-Gem 1844. Another is the original surfaces, golden-brown with tinges of silver-tan in the central areas, and yet another is the lack of mentionable abrasions. A common issue in lower grades, but seldom seen so fine. Population: 5 in 64, 2 finer (9/14). NGC ID# 23ST, PCGS# 5406

**3429 1845 MS64 PCGS.** CAC. **Briggs 3-C.** Large 5 Over Small 5. Well-detailed beneath steel-gray and pastel toning. A difficult early No Motto issue in better Mint State grades and most likely Condition Census with the dramatically repunched 5. Population: 19 in 64, 4 finer (10/14).  
*Ex: FUN Signature (Heritage, 1/2003), lot 6660; Long Beach Signature (Heritage, 9/2003), lot 6656. NGC ID# 23SV, PCGS# 5408*

**1845/845 Seated Liberty Quarter, MS64  
FS-301, Date Repunched North**

**3430 1845 Repunched Date, FS-301, MS64 NGC.** CAC. **Briggs 3-C.** The date is noticeably repunched, most evident on the flag of the 5 and the crossbar of the 4. Larry Briggs estimated 30% of the 1845 survivors are the Obverse 3 overdates, with the underdigits noticeably smaller than the primary numerals. Fivaz-Stanton suggest the initial date punch was intended for either a half dime or dime. Creamy mint luster gleams beneath well-struck, silver-gray surfaces. Rare in this attractive near-Gem condition, with a total of three MS64 coins confirmed as the FS-301 variety by PCGS and NGC combined and none finer (9/14). PCGS# 395928

**1847 Quarter Dollar, MS64  
Errant 8 in Rock Variety**

**3431 1847 MS64 PCGS.** **Briggs 3-C.** Briggs Obverse 3, with the bottom of an extra 8 imbedded in the rock above the primary digit. Well struck, even on Liberty's hair and on the eagle's talons. Gently toned in occasional chestnut hues over frosty, silver-white surfaces, this lustrous near-Gem has no singularly relevant marks, and the eye appeal is pleasing. From a later state of the obverse die, with several spidery die cracks at the margins, and an extended crack through the date to Liberty's foot and then to the edge. Scarce in Mint State despite a decent mintage. Population: 9 in 64, 2 finer (9/14).  
*Ex: Long Beach Signature (Heritage, 9/2005), lot 2642. NGC ID# 23SX, PCGS# 5410*

**1849-O Quarter, AU Details  
Significant New Orleans Rarity**

- 3432 1849-O — Improperly Cleaned — NGC Details. AU. Briggs 1-A.** The 1849-O is one of the major key dates in the Seated quarter series, and is the rarest pre-1853 issue. The mintage for this year was not individually recorded, but it is believed that about 16,000 pieces were struck, these being included in the mintage figure of the 1850-O. The 1849-O is most often seen in lower circulated grades, and is decidedly rare above the VF level, and almost unobtainable in Mint State. This piece is lightly cleaned, but displays nearly complete detail and light golden-gray patina. A still-pleasing example for the Seated quarter specialist. NGC ID# 23T3, PCGS# 5414

**1850 Seated Quarter, MS64  
Choice, Surprisingly Elusive Issue**

- 3433 1850 MS64 NGC. Briggs 1-A.** A large silver melt in 1853 may have something to do with the scarcity of this Philadelphia issue despite a reasonable mintage of 190,800 pieces. Silver coinage in general from half dimes to dollars were melted for their silver content in the early 1850s. This softly frosted, boldly struck near-Gem survivor is untuned with a pleasing, silver-white sheen. The base of a misplaced 1 in the dentils is obvious, signifying the Briggs Obverse 1. A large, curving die crack through STATES is not mentioned in the Briggs reference, although Reverse A matches the other diagnostics. Few coins are certified finer by either service. Census: 7 in 64, 4 finer (9/14). NGC ID# 23T4, PCGS# 5415

**1851 Quarter, MS64  
Sharp, Silver-White Example**

- 3434 1851 MS64 PCGS. Briggs 1-A.** Many vertical lines extend upward into the horizontal lines on the reverse shield, confirming the Briggs 1-A die pair for this sharp and lustrous near-Gem quarter. Understandably scarce because much of its 160,000-piece mintage did not escape the melting pots, only a dozen or so pieces are numerically finer at both services combined. A light, mint-caused grease mark crosses Liberty's outstretched shin. Attractive nonetheless, with flashy surfaces and mint-fresh appeal. Population: 7 in 64, 8 finer (9/14). NGC ID# 23T6, PCGS# 5417

- 3435 1851-O VF20 PCGS.** Light gold and blue overtones visit this moderately worn O-mint quarter. Faint flickers of luster remain in the fields. Scattered small digs are consistent with the grade. Population: 6 in 20, 33 finer (9/14). NGC ID# 23T7, PCGS# 5418

- 3436 1851-O VF35 PCGS. Briggs 1-B.** A scarce No Motto Seated Liberty quarter in Very Fine, locating coins in Extremely Fine or better becomes challenging, as only 88,000 coins were struck. The surfaces show a typically soft strike and bright gray patination throughout. Population: 1 in 35, 23 finer (10/14). NGC ID# 23T7, PCGS# 5418

- 3437 1851-O — Repaired — NGC Details. AU.** An olive-gold and cream-gray example of this elusive New Orleans issue. The fields have been carefully smoothed, but the motifs show only slight wear. Since the bullion value of quarters exceeded face in 1851, just 88,000 pieces were struck. NGC ID# 23T7, PCGS# 5418

**1851-O Quarter, AU50  
Scarce, Just 88,000 Pieces Struck**

- 3438 1851-O AU50 NGC. Briggs 1-B, R.5.** The high intrinsic silver value kept mintages small for most silver denominations in the early 1850s. Many coins were melted in 1853. This New Orleans issue is seldom seen in any condition, with XF or finer examples always challenging to find. The current example is typically struck, with weakness at Liberty's head and the peripheral stars, but the eagle is boldly detailed. A soft golden patina attends the silver surfaces, which retain mint luster at the edges and among the motifs. Census: 2 in 50, 7 finer (9/14). NGC ID# 23T7, PCGS# 5418

**1852-O Quarter, XF40  
Undeniably Original Toning**

- 3439 1852-O XF40 NGC. Briggs 1-B.** The 1852-O Seated quarter had a low mintage of only 96,000 pieces, and an even lower survival rate. The date is rare in all grades and prohibitively so in Mint State. Even the famous Eliasberg and Pittman collections did not contain problem-free examples of this elusive New Orleans issue, the former representative being scratched and the latter example being cleaned. This XF coin exhibits deep original toning in shades of gunmetal-gray, gold, and sea-green, with well-detailed devices. A highly appealing example, ideal for the quality-conscious collector. Census: 1 in 40, 11 finer (9/14). NGC ID# 23T9, PCGS# 5420

**1852-O Quarter, Mint State Sharpness  
Rare New Orleans Key**

- 3440 1852-O — Improperly Cleaned — NGC Details. Unc. Briggs 1-B.** The rarity of the 1852-O quarter in high grades is such that most collectors ultimately settle for heavily worn or damaged pieces. However, in XF and finer grades, even “problem” coins are difficult to locate. This piece is sure to draw substantial attention from Seated quarter specialists, as it exhibits Uncirculated detail and a moderately sharp strike. NGC notes old, light cleaning, but the evidence is well-hidden beneath mottled lavender-gray toning. The specialist will appreciate the rarity and appeal of this still-pleasing O-mint quarter. NGC ID# 23T9, PCGS# 5420
- 3441 1853-O Arrows and Rays AU58 NGC.** A stone-gray, near-Mint representative with almond-gold accents and sharp design detail for the issue. Smooth save for wispy marks near star 12 and two or three tiny, mint-made areas of rim crumble on the obverse, perhaps related to extra metal on the reverse rim, accompanied by a cud and die crack at A of STATES. Though more than 1.3 million examples were coined for this issue, few were saved, as most fueled the commerce of the bustling port city. Census: 8 in 58, 14 finer (9/14). Ex: *Beau Clerc Collection (Heritage, 1/2007), lot 2911; Long Beach Signature (Heritage, 9/2007), lot 1188.* NGC ID# 23U5, PCGS# 5428

**1854-O Arrows Quarter  
Seldom Seen in Near-Gem, Bold Strike**

- 3442 1854-O Arrows MS64 NGC. Briggs 3-C.** Satiny with a thin veil of milk-white patina streaked across the obverse and much above-average sharpness for the issue. Unlike the half dollar denomination, where Mint State examples of the New Orleans issue are more available than similarly dated P-mints, the underappreciated 1854-O quarter was struck in far fewer numbers and is much more elusive in Uncirculated condition than those produced at the “mother” mint. Census: 6 in 64, 4 finer (9/14). Ex: *Long Beach Signature (Heritage, 6/2004), lot 8192.* NGC ID# 23U7, PCGS# 5433
- 3443 1855 Arrows MS63+ PCGS.** Bronzelike iridescence covers the richly toned surfaces of this smooth and attractive Arrows half, with a full strike on the devices including all of the star centers. Soft luster glows beneath the patina with olive and blue accents. This is a high-end coin for the Select Uncirculated grade, as confirmed by the PCGS Plus designation. Population: 29 in 63 (3 in 63+), 28 finer (9/14). NGC ID# 23U8, PCGS# 5435
- 3444 1858-S VF35 NGC. Briggs 2-B.** The 1858-S quarter is much more elusive in the upper circulated grades than its mintage of 121,000 coins might suggest. This Choice VF example displays undeniably original olive-gray toning in the recesses, with lighter hues of the same over the relief elements. This is an immensely attractive coin for the grade, ideal for the collector who appreciates old-time patina. Census: 4 in 35, 21 finer (10/14). NGC ID# 23TK, PCGS# 5447
- 3445 1858-S XF40 ANACS.** Moderate wear is appropriate for the assigned grade, although the eye appeal and delightful toning gives the impression of a finer coin. Variegated shades of orange, blue, and olive-gold provide both sides with a natural, time-earned patina. Hints of mint luster remain beneath the toning. There are no distracting marks or abrasions on the smooth fields or well-detailed devices. Scarce this nice. NGC ID# 23TK, PCGS# 5447
- 3446 1859 MS64 PCGS.** Type One Obverse and Reverse. A fully struck and satiny almond-gold and sky-gray representative. The fields display only faint contact. Clashed near Liberty's raised arm. Population: 29 in 64, 12 finer (9/14). NGC ID# 23TL, PCGS# 5448
- 3447 1859-S VF25 NGC. Briggs 1-A.** The sole die pair known for the mintage of 80,000 pieces, always showing some crumbling around several of the obverse stars. The 1859-S is a rare coin in any grade, and most survivors are AG-VG, per Larry Briggs' reference. This piece shows some minor planchet roughness and irregular toning but is free of major problems. NGC ID# 23TN, PCGS# 5450
- 3448 1859-S VF30 NGC. Briggs 1-A.** An important semikey issue in the Seated quarter series, from a mintage of only 80,000 pieces. This example displays original battleship-gray patina with tinges of deeper olive in the recesses. Wear is even and consistent with the grade. This date is rarely found with original surfaces such as are seen on this piece. Census: 3 in 30, 10 finer (10/14). NGC ID# 23TN, PCGS# 5450
- 3449 1860 MS64 NGC.** Type Two Obverse and Reverse. A lustrous, untuned, and well preserved quarter held back in grade only by an indifferent strike on the left-side stars. The central devices are sharply impressed. Census: 10 in 64, 8 finer (9/14). NGC ID# 23TP, PCGS# 5451

- 3450 1860-O MS63 PCGS.** Pearlescent-white coloration flashes champagne-gold highlights amid generous, satiny mint luster. A well-produced New Orleans issue with few marks, pleasing eye appeal, and only the slightest hint of softness near the upper portion of the obverse stars. Scarce this nice, rare any finer. Population: 21 in 63, 13 finer (9/14). NGC ID# 23TR, PCGS# 5452

**1860-S Seated Quarter, VF25  
Challenging Series Key Date**

- 3451 1860-S VF25 ANACS. Briggs 1-A.** The 56,000-piece San Francisco mintage circulated heavily in the West, and attrition soon rendered the date nearly unobtainable in high grades. Just one coin has been certified in Mint State (the MS61 NGC Gardner specimen), leaving collectors to pursue the best circulated example they can find (and afford). Jim Gray wrote in *The Gobrecht Journal*, "the most underappreciated an undervalued of all Seated coins is the 1860-S quarter..."

Problem-free examples of this issue quickly disappear into better collections. This smooth, attractive coin is nicely detailed for the VF level with no distracting abrasions. Solid, bold rims and dentils surround lively, reddish-bronze surfaces. A carefully preserved prize for the series specialist. NGC ID# 23TS, PCGS# 5453

- 3452 1861 MS64 PCGS.** Type Two Obverse and Reverse. This Civil War near-Gem is richly patinated in jade-green, fire-red, and autumn-gold. Precisely struck and carefully preserved. QUAR is lightly die doubled.  
Ex: *Long Beach Signature* (Heritage, 6/2010), lot 645. NGC ID# 23TT, PCGS# 5454

**1861 Quarter, MS65  
Frosty Luster, Lightly Toned**

- 3453 1861 MS65 PCGS.** The 1861 quarter is one of the more plentiful issues of the period, but is nonetheless challenging to locate at the Gem grade level. This piece exhibits vibrant mint luster that yields to soft amber-gold, violet, and aquamarine toning in the margins. The strike is bold and the preservation is excellent. Population: 39 in 65, 16 finer (10/14). NGC ID# 23TT, PCGS# 5454

**1866 Motto Seated Quarter  
Elusive, Choice Uncirculated Example**

- 3454 1866 Motto MS64 PCGS. Briggs 1-A.** The introductory Motto issue. The luster is mildly reflective, not unexpected because just 17,000 business strikes were struck. Silver coins were out of circulation in favor of Fractional Currency during this era. Splashes of apricot-gold and aqua-blue color enrich the borders. The centers and right side stars are not fully brought up by the dies as described in the Briggs reference, and the fields show faint, diagonal die polish lines as made. Population: 4 in 64, 8 finer (9/14).  
Ex: *St. Louis CSNS Signature* (Heritage, 5/2005), lot 6866. NGC ID# 23UB, PCGS# 5468

- 3455 1867 XF40 PCGS. Briggs 1-A.** Recutting shows on the denomination and OF AMERICA on the reverse, and BER on the shield is faint on the obverse. Briggs remarks that this issue is seldom seen in lower grades but ranks it R.5 in XF-AU, due in part, no doubt, to the meager mintage of 20,000 pieces. This example shows grade-consistent wear amid moderate multicolor patina, but the only singular mark is a small tick right of the 7. Population: 6 in 40, 39 finer (10/14). NGC ID# 23UD, PCGS# 5470

- 3456 1867 AU55 PCGS.** A lightly toned and unblemished Choice AU example of this better Reconstruction issue. Just 20,000 pieces were struck, since unbacked fractional currency dominated East Coast commerce. Shield lines are clashed near the base of the pole, and portions of drapery are lapped.  
Ex: *Atlanta Signature* (Heritage, 8/2001), lot 5895. NGC ID# 23UD, PCGS# 5470

**1867-S Seated Quarter, XF45  
Rare in All Grades**

- 3457 1867-S XF45 PCGS. Briggs 1-A, R.6.** An elusive San Francisco date from a mintage of just 48,000 coins. This example is lightly worn with hints of luster beneath the sandy-brown and silver-gray patina. Bold detail remains despite the moderate circulation. A rare date in all grades, with Choice examples such as this attractive coin always in demand. Population: 4 in 45, 7 finer (9/14).  
Ex: *Dallas Signature* (Heritage, 10/2006), lot 428. NGC ID# 23UE, PCGS# 5471

- 3458 1869-S AU50 NGC. Briggs 1-A.** The late die state variant, with a long arcing die crack visible along the upper obverse margin. This example displays deep golden-gray patina with tinges of olive and gunmetal-blue in the recesses. With a mintage of only 76,000 pieces, this issue is understandably scarce in all grades. Census: 6 in 50, 7 finer (10/14). NGC ID# 23UJ, PCGS# 5475

- 3459 1871-S VF25 PCGS. Briggs 1-A.** A challenging semikey issue with a mintage of only 30,900 pieces. This lightly circulated example displays original battleship-gray patina with small tinges of deeper gunmetal-gray color in the recesses. Detail is pleasing for the grade and there are no mentionable surface faults. Population: 2 in 25, 30 finer (10/14). NGC ID# 23UP, PCGS# 5480

**1872 Seated Quarter, MS64  
Attractive, Prooflike Fields**

- 3460 1872 MS64 PCGS. Briggs 2-B.** A very flashy and highly reflective coin that is well defined in most areas. Each side shows subtle golden patina that adds considerable character to the overall eye appeal of this lovely coin. Housed in a green label holder. An excellent value for an MS64 piece, and a much scarcer date in the better grades of Mint State with only 13 other pieces so graded by PCGS and two finer (9/14).  
*Ex: New York Signature (Heritage, 11/2003), lot 6187. NGC ID# 23UR, PCGS# 5481*

- 3461 1872-CC — Improperly Cleaned — NGC Details. Fine.** A scant mintage of 22,850 pieces ensures the rarity of this Old West issue. NGC has a Census of 26 pieces in all grades (9/14). All legends are bold but the surfaces are mildly granular and exhibit unnatural rose-red and lilac shades.

**1874-S Quarter, MS65  
Brilliant, Frosty Example**

- 3462 1874-S Arrows MS65 NGC. Briggs 1-A, R.3.** Cartwheel luster flashes over the brilliant, frost-white surfaces with a mere hint of golden-gray patina doing little to inhibit the untuned silver appeal. Most likely one of the hoard coins discovered in 1949 at a West Coast bank, which were slowly dispersed into the market over the next 30 years. A sharp, solid Gem example, with all details bold except a few of Liberty's uppermost hair strands. Census: 35 in 65, 29 finer (9/14). NGC ID# 23VY, PCGS# 5495
- 3463 1875-CC XF45 NGC. Briggs 2-B.** Warm golden highlights enhance the silver-gray surfaces of this scarce Carson City quarter, which saw a low mintage of just 140,000 pieces. A perfect "collector coin" with no discernible faults for the assigned grade other than a slight rim mark at 5 o'clock on the obverse, that appears to be more of a shiny spot in the patina than any kind of rim bruise. Census: 5 in 45, 34 finer (9/14). NGC ID# 23UY, PCGS# 5499

**1877 Quarter, MS67  
Modest Cameo Contrast**

- 3464 1877 MS67 NGC.** Dazzling cartwheel luster engulfs the seemingly perfect surfaces of this fully brilliant Superb Gem. Soft mint frost graces the devices, subtly contrasted with the moderately mirrored fields, giving this piece a level of eye appeal that is rarely encountered on the Seated Liberty type. Slight softness appears over a few of the design elements, though the sharpness is otherwise pleasing. Census: 36 in 67 (1 in 67+, 5 in 67 ★), 8 finer (9/14). NGC ID# 23V5, PCGS# 5504

**1881 Seated Quarter, MS66  
Scarce Prooflike Business Strike**

- 3465 1881 MS66 NGC. Briggs 1-A. R.5.** Business strike Quarter production amounted to just 12,000 pieces in 1881, all of which were struck in the Philadelphia Mint. A popular issue due to the scant mintage, and the present brilliant Gem is surely among the finest coins extant. The finish is noticeably prooflike, and the frosty devices have pleasing white on black contrast. With the exception of one or two star centrils, the strike provides sharp definition over all the design elements. An attractive coin in all regards. Census: 12 in 66, 12 finer (9/14).  
*Ex: Long Beach Signature (Heritage, 9/2002), lot 6503; Orlando FUN Signature (Heritage, 1/2003), lot 6713. NGC ID# 23VD, PCGS# 5513*

**1882 Seated Quarter, MS66+  
Struck From Late-State Dies**

- 3466 1882 MS66+ PCGS.** The centers of this piece are frosty and silver-white, although a faint touch of amber patina runs near the rims. This piece is virtually pristine in terms of preservation, but the stars and Liberty's sandal are noticeably soft on the obverse. A stray raised lump of metal is in Liberty's lap, another indicator of die fatigue. This piece must have been among the last struck from this small mintage of 15,200 circulation strikes. More signs of aged dies appear on the reverse, which shows noticeable clashing in several areas and again, pristine preservation with great luster. An interesting and appealing coin. Population: 21 in 66 (3 in 66+), 18 finer (10/14). NGC ID# 23VE, PCGS# 5514

**1883 Seated Quarter, MS66  
Extremely Sharp Circulation Strike**

- 3467 1883 MS66 NGC. Briggs 2-A, High R.4.** Reflective fields surround the central motifs, with enough mint frost to display brilliant cartwheel luster over both sides of this glittering Premium Gem quarter. Struck from a late state of the reverse die, with the uppermost berry separated from its stem. Nearly fully struck with intense silver appeal. A few sky-blue and gold highlights enhance the visual impact. Census: 15 in 66, 4 finer (9/14). NGC ID# 23VE, PCGS# 5515
- 3468 1884 MS65 PCGS. Briggs 1-A.** Fully prooflike fields and frosted devices deliver bold cameo contrast, while a band of amber toning surrounds the peripheries. The strike is sharp and there are few signs of surface contact. The Mint struck only 8,000 business strikes in 1884, and it is not uncommon for a high-grade example to exhibit prooflike qualities. Population: 17 in 65, 29 finer (10/14). NGC ID# 23VG, PCGS# 5516

**1886 Quarter, Sharp MS65  
Mintage of 5,000 Pieces, Seldom Seen Finer**

- 3469 1886 MS65 PCGS.** A sharply struck gray-white Gem example of the lowest-mintage Seated quarter from the 1880s, this 1886 was among only 5,000 business strikes produced. A few streaks of graying toning run across Liberty. The strike is quite bold, and a thin scraped through the vertical shield lines is the only singularly mentionable contact. Some die lapping and planchet roughness appears around the eagle's left wing. Population: 10 in 65, 18 finer (10/14). NGC ID# 23VJ, PCGS# 5518

- 3470 1888-S MS64 PCGS.** A lovely example of the scarce Seated Liberty quarter issue that is elusive in Mint State grades. This piece has gray patina with splashes of gold and cobalt-blue toning on the obverse. A few deep gold toning lines appear on the reverse. Population: 34 in 64 (1 in 64+), 9 finer (10/14). NGC ID# 23VN, PCGS# 5521

- 3471 1890 MS65 PCGS. Briggs 2-B.** Splashes of sea-green, violet, sun-gold, and midnight-blue accent both sides of this Gem example, residing primarily in the margins. The motifs are well-struck and display frosty original luster. Population: 34 in 65, 46 finer (10/14). NGC ID# 23VP, PCGS# 5523

- 3472 1891 MS65 NGC.** A highly attractive final-year example with lovely pale gold, russet, and mauve toning over satiny, carefully preserved surfaces. Most of the elements are sharply struck, save for a few obverse stars. NGC ID# 23VR, PCGS# 5524

- 3473 1891 MS65 PCGS.** Golden-gray, peach, and pale turquoise patina blanket each side of this Gem final-year type coin, with deeper shades toward the borders, while softly frosted luster complements well-struck design elements. Population: 66 in 65, 30 finer (10/14). Ex: *Long Beach Signature* (Heritage, 6/2011), lot 3485. NGC ID# 23VR, PCGS# 5524

- 3474 1891 MS66 NGC. Briggs 7-G.** This is an impressive, high-grade 1891 quarter. The surfaces display thick mint frost that is abundantly evident even through the medium-density iridescent toning. The peripheral stars show some softness, but the centers of each side are strongly struck. Light die clashing is seen in the fields on each side. The upper loops of an errant 8 and 9 are seen in the dentils below the date, a diagnostic of this variety. Census: 50 in 66 (1 in 66 ★), 14 finer (10/14). Ex: *Houston Signature* (Heritage, 12/2009), lot 536; *Long Beach Signature* (Heritage, 2/2010), lot 1074. NGC ID# 23VR, PCGS# 5524

**PROOF SEATED QUARTERS**

- 3475 1859 PR63 PCGS. Briggs 1-A.** Proof quarter production amounted to only 800 pieces in 1859, this being one of the first proof issues with a recorded mintage. The present example displays mirrored fields and sharp motifs. Light golden toning blankets each side. NGC ID# 23WL, PCGS# 5555

- 3476 1861 PR63 PCGS.** Type Two Obverse and Reverse. The reverse field and eagle are brilliant, but the remainder of this lovely specimen is orange-gold, fire-red, and navy-blue. Precisely struck and flashy. Much scarcer than implied by the mintage of 1,000 pieces, since hundreds of unsold sets were melted by the Mint. NGC ID# 23WN, PCGS# 5557

- 3477 1873 No Arrows PR64 Cameo NGC. Briggs 1-A.** All 1873 No Arrows proof quarters were struck from dies bearing the Closed 3 logotype. This Cameo representative displays glassy fields and sharp design elements. Splashes of light teal toning color the fields, leaving the central motifs boldly set apart. PCGS# 85572

### 1876 Quarter, Stunningly Toned PR66 Popular Centennial Date

- 3478 1876 PR66 PCGS.** Stunning patina intermingles in shades of mint, teal, rose, aqua, steel-blue, and lilac on this Centennial-year Seated quarter proof, which shows virtually pristine preservation under the moderate layer of toning. The large mintage figure of 1,150 proofs included, Walter Breen theorizes in his *Proof Encyclopedia*, some dated 1875. The Centennial date makes this issue popular, of course, and this example's standout surfaces certainly make it a tempting potential acquisition. Population: 10 in 66, 2 finer (10/14). NGC ID# 23X8, PCGS# 5577

- 3479 1878 PR64 NGC. CAC.** This eye-appealing proof, from a mintage of only 800 coins, is attractively toned and predictably well-detailed. The surfaces are devoid of any singularly distracting blemishes, and the green CAC approval sticker affirms the quality of the piece. Census: 62 in 64 (1 in 64+), 29 finer (10/14). NGC ID# 23XA, PCGS# 5579

- 3480 1879 PR65 PCGS. Briggs 2-B.** Crisp devices exhibit substantial mint frost, though rich multicolor toning precludes a Cameo designation from PCGS. Vivid sun-gold, lavender, ocean-blue, and mint-green hues encompass each side in concentric bands of color. Population: 35 in 65, 16 finer (10/14). NGC ID# 23XB, PCGS# 5580

- 3481 1883 PR65 PCGS.** This gorgeous gem has rich lavender and peripheral blue toning on both sides, masking the contrast between the satiny devices and deeply mirrored fields. Population: 40 in 65, 34 finer (10/14). NGC ID# 23XF, PCGS# 5584

### 1883 Quarter, Beautiful PR65 Gold CAC Label

- 3482 1883 PR65 PCGS. Gold CAC. Briggs 1-A.** A single reverse die was used to strike both the proof and business strike quarters of this year, but the proofs are easily differentiated by the tops and an errant 83 seen in the dentils below the date. This example displays deeply reflective, remarkably clean fields, with frosted devices and boldly struck design elements. Soft shades of deep violet and royal-blue encompass much of the obverse, while the reverse displays warm champagne-gold peripheral toning around a pale mint-green center. An exceptional piece in every respect, housed in first generation holder with a gold CAC sticker. Population: 40 in 65, 34 finer (9/14). NGC ID# 23XE, PCGS# 5584

- 3483 1883 PR65 Cameo PCGS. Briggs 1-A.** This proof issue is especially challenging with cameo contrast. This Gem representative displays sharp, frosty devices and deep mirroring in the fields. Light golden hues grace each side, aiding in the overall eye appeal. Population: 22 in 65 (2 in 65+) Cameo, 11 finer (10/14). PCGS# 85584

- 3484 1885 PR66 NGC. Briggs 3-B.** A couple of the stars around Liberty's head are not fully defined, but the strike is otherwise sharp. Deep reflectivity in the fields highlights vivid shades of sea-green, royal-blue, and violet toning. Due to the scarcity of high-grade business strikes, this proof issue is frequently chosen for date representation. Census: 21 in 66, 23 finer (10/14). NGC ID# 23XH, PCGS# 5586

- 3485 1887 PR66 PCGS. Briggs 2-B.** Vivid royal-blue, lavender-gray, and lime-gold toning blankets the deeply mirrored fields of this Premium Gem proof. The devices are well brought up and the surfaces are devoid of contact marks. From a proof mintage of 710 pieces. Population: 26 in 66, 4 finer (10/14). NGC ID# 23XK, PCGS# 5588

## BARBER QUARTERS

- 3486 1892 MS64 Prooflike NGC. Type Two Reverse.** A fully struck and carefully preserved pearl-gray Choice first-year type coin. The fields are flashy and minimally abraded. Census: 3 in 64 Prooflike, 5 finer (10/14). PCGS# 75601

- 3487 1894-S MS65 PCGS Secure.** Sharply detailed design elements and vibrant mint luster are evident under attractive shades of violet, gray, and pale gold toning. Population: 17 in 65, 5 finer (10/14). NGC ID# 23Y3, PCGS# 5609

### 1903-O Quarter, MS66 Seldom Seen in This Grade

- 3488 1903-O MS66 PCGS.** Saffron, mint, and orange rim toning on the obverse surrounds a light-gray center, while the reverse displays pastel teal with a pinkish-rose center and hints of lavender, a beautiful quarter. The preservation is impeccable underneath the light toning, and the strike is quite sharp overall, save for some softness on the right shield corner and the eagle's claws, particularly the right one. The 1903-O Barber quarter is seldom seen in MS66 and almost never finer. Population: 6 in 66, 1 finer (10/14). NGC ID# 23YW, PCGS# 5635

- 3489 1906-D MS65 PCGS.** Concentric rings of pale green-gold and ocean-blue surround lavender-gray centers on this sharply struck Gem. A few faint grazes on each side are all that interrupt the frosty luster beneath the patina. Population: 21 in 65 (2 in 65+), 10 finer (10/14).  
Ex: Dallas Signature (Heritage, 11/2006), lot 674. NGC ID# 23Z6, PCGS# 5643

- 3490 1907 MS65 PCGS. CAC.** Warm golden toning accents frosty luster on each side of this Gem example. The strike is sharp on the eagle's talons and right (facing) shoulder, areas that are typically weak. A lack of noticeable surface flaws completes the eye appeal. Population: 42 in 65, 20 finer (10/14). NGC ID# 23Z8, PCGS# 5645

**1908-S Barber Quarter, MS65**  
**Underrated Issue in High Grade**

**3491 1908-S MS65 PCGS.** The 1908-S quarter, with a moderately low mintage of 784,000 pieces, is a challenging issue across nearly all Uncirculated grades, and David Lawrence goes so far as to say the issue is "Undervalued in most Mint State grades. Even though Gems are no bargain compared with some other dates, you should not let one go." This Gem is impressively well-struck with radiant, satiny luster. Pale olive-gray toning embraces the borders, attesting to the originality of the well-preserved surfaces. Population: 12 in 65 (1 in 65+), 8 finer (10/14). NGC ID# 23ZE, PCGS# 5652

**3492 1913-S VG10 PCGS.** The 1913-S Barber quarter claims a series-low mintage of just 40,000 pieces, and collectors prize examples of this issue in all grades and conditions. The date and legends are completely legible on this well-worn VG10 specimen, and the pleasing gray and blue-steel surfaces are problem-free. NGC ID# 23ZW, PCGS# 5666

**3493 1916-D MS66+ PCGS.** This brilliant Premium Gem represents the final Barber quarter issue. Both sides are untuned with frosty silver luster and excellent design definition. PCGS has only certified 14 finer examples (10/14). NGC ID# 2426, PCGS# 5674

**3494 1916-D MS66+ PCGS.** A Plus designation recognizes exceptionally well-preserved surfaces which allow the thickly frosted mint luster to spiral around each side uninterrupted. The strike is sharp and a blush of pale amber toning along the lower obverse and upper reverse rim is the only suggestion of color. Only 14 coins are numerically finer at PCGS (10/14). NGC ID# 2426, PCGS# 5674

**3495 1916-D MS66 PCGS. CAC.** Blazing frost-white mint bloom engulfs each side of this carefully preserved final-year type coin. The sharp motifs exhibit a few faint luster grazes on the obverse, but the eye appeal is hardly inhibited. PCGS has certified only 14 numerically finer representatives (10/14). NGC ID# 2426, PCGS# 5674

**1916-D Quarter, MS67**  
**Vibrant Luster, Semiprooflike Fields**

**3496 1916-D MS67 PCGS.** An available date in the absolute sense, the 1916-D Barber quarter is a notable condition rarity at the MS67 grade level, as PCGS has seen only 14 such coins and none finer (9/14). This radiant representative displays dazzling, nearly brilliant centers with warm lavender-gold toning around the peripheries. The eagle's right (facing) talons, as well as star 3 on the obverse, are not fully defined, though the strike is otherwise pleasing. No mentionable abrasions are present. NGC ID# 2426, PCGS# 5674

**PROOF BARBER QUARTERS**

**3497 1893 PR66 Cameo PCGS.** From a proof mintage of 792 pieces, this beautifully toned Cameo exhibits lavender-gold, violet, and sea-green hues across deeply mirrored fields, while the devices are boldly impressed and the surfaces are free of any mentionable marks. Population: 14 in 66 (1 in 66+) Cameo, 18 finer (10/14). PCGS# 85679

**3498 1894 PR65 Cameo PCGS.** Gold, cerulean-blue, copper, plum, and sea-green are among the colors present on the obverse of this attractively toned Gem. Smaller areas of toning appear on the reverse. This well-struck example displays a pleasing degree of cameo contrast. Population: 26 in 65 Cameo, 19 finer (10/14). PCGS# 85680

**1897 Barber Quarter, PR66 Cameo**  
**Only 731 Pieces Struck**

**3499 1897 PR66 Cameo PCGS.** Only 731 proof Barber quarters were struck in 1897 and few survivors can match the quality and eye appeal of the present coin. This delightful Premium Gem displays sharply detailed frosty design elements that provide bold cameo contrast with the deeply mirrored fields. The well-preserved surfaces show a few hints of pale gold and ice-blue toning. Population: 14 in 66 Cameo, 12 finer (10/14). PCGS# 85683

**3500 1898 PR66 Cameo PCGS.** Well-made, high-grade Cameo representatives of this date are slightly more plentiful than those of many other issues in the series, making the 1898 an ideal candidate for type purposes. This incredible Premium Gem displays strong black-on-white contrast from all angles, with boldly struck design elements and nearly unblemished surfaces. A faint creamy-golden hue graces each side, adding to the excellent visual appeal. Population: 10 in 66 (2 in 66+) Cameo, 21 finer (10/14). Ex: *FUN Signature* (Heritage, 7/2007), lot 774; *Dallas Signature* (Heritage, 11/2007), lot 611. PCGS# 85684

**1899 Quarter, Richly Toned PR67**

**3501 1899 PR67 NGC.** Intense purple-gray and orange-rose toning colors the surfaces with light-green toward the edges. The strike is complete, as one would expect of a proof, with bold detail on this Superb Gem proof Barber quarter, of which only 846 pieces were struck. Census: 22 in 67, 7 finer (10/14). NGC ID# 242E, PCGS# 5685

**3502 1899 PR64 Cameo PCGS. CAC.** This deeply mirrored Choice proof displays thick, satiny luster over the devices, with pleasing contrast. The strike is crisp on the talons and the upper-right corner of the shield, and the surfaces are free of marks. Pale sun-gold and lavender-blue toning graces each side. Population: 13 in 64 Cameo, 19 finer (9/14). PCGS# 85685

**1903 Barber Quarter, PR67  
Deeply Mirrored, Richly Toned**

- 3503 1903 PR67 PCGS.** Vivid electric-blue, violet, and champagne-gold toning beautifully blends across the highly reflective surfaces of this Superb Gem quarter. Sharply struck and seemingly pristine; a nearly unimprovable representative of this early 20th century issue. A mere 755 proofs were produced, and approximately half of those have been graded by the two major services combined, a population that may even include a number of resubmissions. Ex: *Dallas Signature (Heritage, 11/2007)*, lot 613. NGC ID# 242J, PCGS# 5689

- 3504 1905 PR65 PCGS.** This reflective Gem proof displays little contrast on the obverse, which exhibits mottled pink, sage, olive, and charcoal hues with much underlying brilliance. The reverse shows more contrast and less color, mostly pinkish-gold. This is a lovely representative for the grade. Population: 53 in 65, 43 finer (10/14). NGC ID# 242L, PCGS# 5691

- 3505 1907 PR64 PCGS. CAC.** Intermingled gold, heather, and sky-blue toning appear on both sides of this Choice proof, with a few insignificant contact marks and hairlines that prevent a higher numerical grade. NGC ID# 242N, PCGS# 5693

- 3506 1909 PR66 Cameo NGC.** This incredible Premium Gem displays a startling white-on-black cameo flash when the coin is tilted in the light. The sharply detailed design elements are unusually frosty for a proof coin of this era, and the deeply mirrored fields are impeccably preserved. Census: 9 in 66 Cameo, 12 finer (9/14). PCGS# 85695

**1912 Barber Quarter, PR67 Cameo  
Only 700 Pieces Struck**

- 3507 1912 PR67 Cameo NGC.** Generous contrast and delightful toning appear on this Superb Gem proof 1912 quarter, the fields highly reflective and the devices well-frosted. Pale blue, rose, and gold toning intermingles throughout the surfaces on both sides to delightful effect. The proof strike is full save for a tad of weakness on the upper-right shield corner. Census: 11 in 67 Cameo (1 in 67+ Cameo, 1 in 67 ★ Cameo), 3 finer (10/14). PCGS# 85698

- 3508 1913 PR65 PCGS.** From a small proof mintage of 613 pieces, this sharply detailed Gem displays reflective surfaces under rich shades of cobalt-blue, champagne-gold, and lavender-gray patina. Population: 30 in 65, 41 finer (10/14). NGC ID# 242V, PCGS# 5699

**1914 Barber Quarter, PR67  
Lowest Mintage of the Series**

- 3509 1914 PR67 NGC.** The 1914 proof Barber quarter has the distinction of being the lowest-mintage issue in the entire series, with 380 pieces struck, and the present coin has few peers and fewer betters. The gold-tinged silver-white surfaces show moderate contrast but excellent eye appeal, with deeply mirrored fields on both sides and the mint frost a tad thicker on the reverse. Census: 17 in 67 (2 in 67 ★), 10 finer (10/14). NGC ID# 242W, PCGS# 5700

**STANDING LIBERTY QUARTERS**

- 3510 1917 Type One MS66 Full Head NGC.** The razor-sharp strike of this Premium Gem type coin is complemented by rich, satiny luster and delicate champagne toning. The upper portion of the obverse also displays small splashes of pine-green, russet, and amber-red color. NGC ID# 242Z, PCGS# 5707

- 3511 1917 Type One MS66 Full Head PCGS. CAC.** The strike is especially sharp on this frosty, carefully preserved Premium Gem. Blended shades of pale champagne and ice-blue encompass each side, giving this piece exceptional eye appeal, fit for a high-end type or date set. NGC ID# 242Z, PCGS# 5707

- 3512 1917 Type Two MS66 Full Head PCGS.** Frosty golden-gray luster blankets each side of this Premium Gem example, with tinges of olive and amber color also seen over the lower-right obverse and upper-right reverse margins. The inner shield lines and the leading edge of the eagle's left (facing) wing are softly struck, but the coin is otherwise well-defined. PCGS has certified only 10 numerically finer Full Head examples (9/14). NGC ID# 2434, PCGS# 5715

- 3513 1917 Type Two MS66 Full Head PCGS. CAC.** All of the shield rivets are present and accounted for on this Premium Gem Full Head Type Two, even though a couple of them are not sharp. This piece is far better-struck for the Type Two than normal, and the softly frosted silver surfaces with light rim patina generate ample eye appeal. A great coin for type purposes, and with the CAC green bean. Population: 80 in 66 (4 in 66+) Full Head, 10 finer (10/14). One of 17 in this grade at CAC. NGC ID# 2434, PCGS# 5715

**1918/7-S Quarter, Very Fine**

- 3514 1918/7-S FS-101 VF20 ANACS.** Sole series overdate. Powder-blue and slate-gray toning visits this key variety quarter. No marks are conspicuous to the unaided eye, although a loupe reveals faint scuffs near the Y in LIBERTY and the reverse field near the wings. Some plumage detail is present, and all legends are crisp save for the lower half of the date. PCGS# 395949

- 3515 1919 MS65 Full Head PCGS.** Dynamic cartwheel luster sweeps this nearly untoned and carefully preserved postwar quarter. The die alignment favors Liberty's head, which is well defined. NGC ID# 243B, PCGS# 5729

**1919 Quarter, MS66 Full Head  
Razor-Sharp Detail, Premium Type Coin**

- 3516 1919 MS66 Full Head PCGS.** Among Type Two Standing Liberty quarter issues, the 1919 is one of the most often seen with sharp detail throughout the head, shield, eagle's feathers, and central gown folds, making it a favorite among collectors who are seeking the best strike possible. However, that is not to say that the issue is plentiful with a full strike, it is only more available with such than most other dates in the series.

This Premium Gem representative showcases full definition on the shield, Liberty's head and gown, and the leading edge of the eagle's left (facing) wing, elements that are typically weak on all issues in the series. Vibrant, frosty luster illuminates a thin blanket of light golden toning, and the surfaces are void of any immediately perceptible abrasions. PCGS has certified only 26 numerically finer Full Head examples (9/14). NGC ID# 243B, PCGS# 5729

**1919-D Quarter, Evenly Toned MS64  
High Eye Appeal**

- 3517 1919-D MS64 PCGS.** Both sides are evenly matched in an array of rose, lavender, and gold patina on this attractive near-Gem 1919-D Standing Liberty quarter. Few marks are in evidence on either side, further increasing the appeal. The head is somewhat softly struck, as are some of the shield rivets, but this coin nonetheless has a high quotient of eye appeal. A die crack connects the digits of the date. Population: 92 in 64 (1 in 64+), 75 finer (10/14). NGC ID# 243C, PCGS# 5730

- 3518 1920 MS65 Full Head PCGS.** This crisply struck Gem offers elegant luster and impressive eye appeal. The carefully preserved surfaces are entirely deserving of the grade assigned. PCGS has graded just 33 finer Full Head pieces (10/14). NGC ID# 243E, PCGS# 5735

- 3519 1921 AU58 PCGS.** A clear date and complete shield rivets are the hallmarks of this near-Mint key-date quarter. Substantial luster illuminates light golden and ice-blue toning over each side, and only slight friction is noted over the high points. NGC ID# 243H, PCGS# 5740

**1923 Standing Liberty Quarter, MS65  
Elusive Example With Full Head Definition**

- 3520 1923 MS65 Full Head PCGS.** A highly lustrous and essentially untoned Gem that has strong definition on the devices. Only a few scattered marks are present on the surfaces. Despite a mintage of over 9.7 million pieces, a comparatively small percentage of pieces attain Full Head status. Population: 42 in 65 Full Head, 37 finer (10/14). Ex: FUN Signature (Heritage, 1/2007), lot 4192; Dallas Signature (Heritage, 10/2008), lot 759. NGC ID# 243J, PCGS# 5743

**1923-S Quarter, MS64  
Nearly Complete Head Definition**

- 3521 1923-S MS64 PCGS.** A mintage of 1.3 million pieces was not particularly low for the series, but heavy circulation and consequential wear effacing the raised date numerals, makes the 1923-S one of the most sought-after and elusive of all Standing Liberty quarters. This near-Gem displays well-struck design elements, with a bold date and nearly full definition on Liberty's head. Softly frosted luster shines through dusky silver-gray toning on each side, while the surfaces are free of any major distractions. NGC ID# 243K, PCGS# 5744
- 3522 1924 MS65 Full Head PCGS. CAC.** Nearly full shield details accompany the full head details on this impressive Gem. Both sides have satin luster beneath dappled heather and gold toning. Four bold date numerals make this piece especially appealing to the specialist. PCGS has only certified 55 finer examples (10/14). NGC ID# 243L, PCGS# 5747
- 3523 1924-S MS65 NGC.** Satiny luster and pale lavender-gold toning blanket each side of this carefully preserved Gem. Parallel die striations, an affect of die lapping, are seen in the fields upon close examination. Considerable weakness is noted on the eagle's body, but the obverse is better-defined. Census: 58 in 65 (1 in 65 ★), 22 finer (10/14). NGC ID# 243N, PCGS# 5750
- 3524 1926 MS65 Full Head PCGS.** Sharply struck and immensely appealing, this shimmering Philadelphia coin has strong luster and blue-tinged surfaces with small flecks of crimson toning at the periphery. A lovely example of this Recessed Date issue. Population: 92 in 65 (1 in 65+) Full Head, 39 finer (10/14). Ex: ANA Signature (Heritage, 8/2007), lot 759. NGC ID# 243R, PCGS# 5755
- 3525 1927-D MS66 PCGS. CAC.** This brilliant and frosty Premium Gem exhibits delicate gold toning on each side, with bold design motifs that show weakness only at Liberty's head and the shield at 7 o'clock. Population: 32 in 66 (1 in 66+), 1 finer (10/14). NGC ID# 243V, PCGS# 5762

**1929-S Quarter, MS67 Full Head  
Unabraded Throughout**

- 3526 1929-S MS67 Full Head NGC.** The surfaces of this Superb Gem are largely dusky golden-gray with scattered accents of deep ochre-brown. The head detail is sufficient for the Full Head designation although some of the shield rivets are softly struck. No marks of any significance appear on either side of this late-series issue. Census: 31 in 67 (6 in 67 ★) Full Head, 1 finer (10/14). NGC ID# 2444, PCGS# 5777

- 3527 1930 MS66 Full Head PCGS.** A beautifully preserved, frosty Premium Gem example, this piece showcases bold design definition throughout. The reverse exhibits just a trace of light golden color, while the obverse shows deeper shades of amber-orange, olive, and golden-gray. PCGS has certified only 36 numerically finer Full Head examples (9/14). NGC ID# 2445, PCGS# 5779

**1930 Standing Liberty Quarter, MS67  
Spectacular Full Head Example**

- 3528 1930 MS67 Full Head PCGS.** The 1930 Standing Liberty quarter was a well-produced issue, but Superb Gem specimens with Full Head definition, like the present coin, are seldom encountered. This spectacular MS67 specimen displays impeccably preserved surfaces, with vibrant mint luster and delicate shades of pale gold toning. Population: 36 in 67 Full Head, 0 finer (10/14). NGC ID# 2445, PCGS# 5779
- 3529 1930-S MS66 Full Head PCGS. CAC.** An amazing example with sharp details, this final Standing Liberty quarter issue has brilliant and frosty silver luster beneath a dusting of champagne toning. Only 19 finer submissions have been graded at PCGS (10/14). NGC ID# 2446, PCGS# 5781

**WASHINGTON QUARTERS**

- 3530 1932 MS66+ PCGS.** Pale, iridescent olive-gold toning blankets the left-hand portion of each side, while the remainder shows lighter pastel hues. The strike is crisp and the frosty luster cartwheels without interruption. Only three coins are numerically finer at PCGS (10/14). NGC ID# 2447, PCGS# 5790

**1932 Quarter, MS66+  
Beautifully Toned Registry Coin**

- 3531 1932 MS66+ PCGS.** An exceptional Premium Gem, this first-year Washington quarter exhibits both bold design elements and seemingly perfect surface preservation. Each side displays vibrant, frosty luster beneath beautifully iridescent pastel hues of blue, gold, and silvery-rose. PCGS has only certified three finer examples (9/14). NGC ID# 2447, PCGS# 5790
- 3532 1932 MS66+ PCGS. CAC.** In the first year of the venerable Washington quarter dollar series, the Philadelphia Mint struck just more than 5.4 million examples; more than ten times the mintage at either Denver or San Francisco. Easily the best choice for first-year type purposes, this Premium Gem representative should serve the needs of the high-end date or type specialist in this immensely popular series. This piece is somewhat softly struck, but boasts immaculately clean surfaces and soft, shimmering mint luster. The silver-gray coloration is enhanced by light accents of gold and reddish-tan on both sides. Population: 217 in 66 (18 in 66+), 3 finer (9/14). NGC ID# 2447, PCGS# 5790

- 3533 1932-D MS63 PCGS.** The 1932-D is the cornerstone to the Washington quarter series in Mint State grades and claims a mintage of only 436,800 coins. Powder-blue accents complement lilac and golden-gray color overall. This Select example shows lightly dispersed ticks over each side, but they undistracting. NGC ID# 2448, PCGS# 5791
- 3534 1932-D MS64 PCGS.** This key-date near-Gem Washington quarter boasts a light ring of cinnamon patina near the peripheries, contrasting with silver-white centers. Few marks appear, even under a loupe, making this a great-looking potential set upgrade. Gems of the issue are far more expensive. NGC ID# 2448, PCGS# 5791
- 3535 1932-D MS64 PCGS.** Golden-orange, lavender, and cobalt-blue hues appear mottled over each side of this Choice example. The Denver Mint produced just 436,800 Washington quarters in the series' first year of issue, and the date is the undisputed cornerstone to the set in Uncirculated grades. NGC ID# 2448, PCGS# 5791
- 3536 1932-D MS64 PCGS.** Cream-gray, pink, and dappled charcoal colors grace this satiny key-date quarter. The fields are refreshingly devoid of contact, and only intense inspection locates a couple of tiny and well-concealed marks on the obverse portrait. The demand for quality Mint State examples of the key 1932-D is much greater than the meager supply.  
Ex: *New York Signature* (Heritage, 6/2005), lot 5610. NGC ID# 2448, PCGS# 5791
- 3537 1932-S MS64 PCGS. CAC.** The 1932-S boasts the lowest mintage in the Washington quarter series (408,000 coins), and has long been considered a key date in all grades. This Choice example shows sharp motifs and well-preserved, frosty surfaces. A thin veil of light golden toning blankets each side, while small tinges of olive, cherry-red, and forest-green color are also seen periodically around the obverse periphery. NGC ID# 2449, PCGS# 5792

#### 1932-S Quarter, Toned MS65

- 3538 1932-S MS65 PCGS.** Dappled autumn-brown and emerald-green compete for territory across this thoroughly lustrous and suitably struck Gem. One of the most coveted issues in the series, along with the 1932-D. A thin toning streak on the forehead will identify the present piece.  
Ex: *Long Beach Signature* (Heritage, 5/2008), lot 1375. NGC ID# 2449, PCGS# 5792

- 3539 1934 Doubled Die Obverse, FS-101, MS64 PCGS.** Widespread die doubling on IN GOD WE TRUST, and ultra-thick letters in LIBERTY and the date, are characteristic of this well-known *Guide Book* variety. A lustrous Choice quarter with delicate tan toning and a bold strike. PCGS# 5900
- 3540 1935-D MS67 PCGS. CAC.** Despite a production of nearly 6 million quarters at the Denver Mint in 1935, high-grade examples are elusive. This Superb Gem is among the finest known, with PCGS having awarded the MS67 grade to only 21 examples (1 in 67+), with none finer (10/14). Among the attributes this piece possesses are rich satin luster and silver-white surfaces overall, with some splashes of toning, primarily on the obverse. The hues include red-orange, golden-brown, and gray. A die break appears at the base of the portrait. NGC ID# 244E, PCGS# 5798

- 3541 1936-D MS66 NGC.** The 1936-D is one of the more challenging issues in Gem and finer condition. This representative displays satiny, silvery-gray luster beneath wisps of light golden color. The strike is crisp and there are no marks of consequence. Census: 67 in 66 (5 in 66 ★, 1 in 66+★), 7 finer (10/14). NGC ID# 244H, PCGS# 5801
- 3542 1936-D MS66 PCGS. CAC.** Scarcely encountered at the Premium Gem level and rare any finer. This well-struck representative exhibits frosty, nearly undisturbed surfaces and sharply struck motifs. A faint light golden tint accents each side, while a few russet speckles are seen around the rims and behind Washington's head. PCGS has seen only 14 numerically finer submissions (10/14). NGC ID# 244H, PCGS# 5801
- 3543 1937-D MS67 PCGS.** Just a suggestion of light golden color is present over this otherwise frost-white Superb Gem. The strike is exceptionally bold and the eye appeal is unimpeded by contact marks. The mintmark is noticeably repunched north, unlisted in the *Cherry-pickers'* reference. Population: 49 in 67 (1 in 67+), 0 finer (10/14). NGC ID# 244L, PCGS# 5804
- 3544 1937-S MS67 NGC.** This piece represents an important opportunity for the Registry Set enthusiast, as it is tied for the finest certified at NGC (10/14). Brilliant, softly frosted luster highlights careful preservation and sharp motifs. NGC ID# 244M, PCGS# 5805
- 3545 1940 MS67+ PCGS. CAC.** This piece is tied numerically with the example in the highest-rated Registry Set, and one of only 20 MS67 representatives awarded a Plus designation at PCGS, with just a two coins numerically finer (10/14). Blended olive-gold and soft rainbow hues surround silvery-iridescent luster in the centers on this frosty, nearly unblemished Superb Gem. NGC ID# 244U, PCGS# 5811
- 3546 1941-D MS67 PCGS. CAC.** The obverse of this Superb Gem exhibits wispy violet and gold toning while the reverse is untuned. Both sides are frosty and highly lustrous. An excellent example that is virtually unobtainable in higher grades. Population: 38 in 67 (9 in 67+), 1 finer (9/14). NGC ID# 244Y, PCGS# 5815

#### 1942 Quarter Near-Flawless Superb Gem

- 3547 1942 MS67+ PCGS. CAC.** It will be hard to improve upon this Superb Gem quarter, which carries the PCGS Plus designation for high-end technical merit and appeal. A bold strike accompanies mark-free surfaces and copious mint luster. A fringe of deep amber toning hugs the rims. Population: 41 in 67 (9 in 67+), 0 finer (9/14). NGC ID# 2452, PCGS# 5817
- 3548 1942-D Doubled Die Obverse, FS-101, AU58 PCGS. CAC.** Very thick letters in the obverse legends confirm this challenging *Guide Book* doubled die variety. The borders display attractive sun-gold, fire-red, and apple-green toning. Lustrous, well struck, and lightly abraded. Population: 12 in 58, 14 finer (9/14). PCGS# 145011
- 3549 1950-S/D FS-601 MS65 PCGS.** The right and bottom curves of a Denver mintmark are obvious within the S. A 1950-D/S variety is also known, which suggests that the two dies were swapped at Philadelphia, independently flagged by a quality inspector, and overmintmarked. Light golden-brown and blue-green toning visits this lustrous, well-preserved, and nicely struck Gem. PCGS# 145639

- 3550 1953-S MS67+ PCGS. CAC.** Mostly brilliant centers blend to lemon-yellow, deep amber, and cherry-red toward the margins, creating spectacular CAC-approved eye appeal. This boldly impressed Superb Gem gleams with frosty luster and only a small graze in the right obverse field is noted. None are certified numerically finer at PCGS (9/14). NGC ID# 2466, PCGS# 5854

## PROOF WASHINGTON QUARTERS

- 3551 1950 PR68 Cameo NGC.** All 1950 proof coins with cameo contrast are major rarities, and those in nearly perfect preservation are the cream of the crop. NGC has certified just 13 examples at this grade level, along with a single PR68 Ultra Cameo (10/14). It is probable that some of the 13 are resubmissions. This fully brilliant Superb Gem has completely mirrored fields and lustrous devices with no toning on either side. NGC ID# 27HW, PCGS# 85982
- 3552 1951 PR68 Cameo NGC.** A well-cameoed example with strong black and white contrast that is undiminished by the presence of any toning. Heavy die polish on the devices is not to be confused with hairline scratches, as this quarter is pristine. Census: 26 in 68 Cameo (1 in 68 ★ Cameo), 0 finer (10/14). NGC ID# 27HX, PCGS# 85983
- 3553 1952 PR68 ★ Cameo NGC.** Icy devices provide blatant contrast with glassy fields. A pristine stone-white specimen of a proof issue infrequently encountered in Cameo format. Census: 2 in 68 ★ Cameo, none finer as Cameo although 2 are 68 Ultra Cameo and 2 are 68 ★ Ultra Cameo (9/14). NGC ID# 248X, PCGS# 85984
- 3554 1953 PR68 White Ultra Cameo NGC.** A fully brilliant high grade quarter that exhibits the intricate strike expected of postwar proofs. Most proofs of the era lack the exemplary white-on-black contrast of the present coin. Essentially unobtainable any finer. Census: 11 in 68 Ultra Cameo, 1 finer (9/14). NGC ID# 248Y, PCGS# 95985
- 3555 1954 PR68 Ultra Cameo NGC.** A beautifully preserved Registry coin, this high-end Superb Gem boasts stark white-on-black contrast and crisp design definition. There are no traces of color on either side. Census: 17 in 68 Ultra Cameo, 6 finer (10/14). NGC ID# 27HY, PCGS# 95986

### 1954 Washington Quarter, PR69 Ultra Cameo None Certified Finer

- 3556 1954 PR69 Ultra Cameo NGC.** A tiny speck of golden color in the left obverse field is the only visible mark on this virtually perfect coin. That is not really a flaw, but it is the closest we can find to one on this magnificent Washington quarter. Add to that the dense mint frost over the devices and the illimitable depth of reflectivity in the fields and the result is a coin of unsurpassable beauty and technical preservation. Census: 6 in 69 Ultra Cameo, 0 finer (10/14). Ex: Long Beach Signature (heritage, 9/2006), lot 1802. NGC ID# 27HY, PCGS# 95986

### 1955 Washington Quarter, PR69 Incredible Ultra Cameo Example

- 3557 1955 PR69 Ultra Cameo NGC.** This magnificent Washington quarter is one tick away from perfection, with fully detailed design elements and rich mint frost that contrasts vividly with the deeply reflective fields. The pristine brilliant surfaces add to the incredible eye appeal. Census: 10 in 69 Ultra Cameo, 0 finer (10/14). NGC ID# 27HZ, PCGS# 95987
- 3558 1956 PR69 Ultra Cameo NGC.** This piece is an important opportunity for the Registry Set collector, as it is tied for the finest-certified Ultra Cameo at NGC (10/14). Traces of pale violet color surround the peripheries, yielding to full brilliance in the centers. Bold white-on-black contrast delivers eye-catching visual appeal. NGC ID# 27J2, PCGS# 95988
- 3559 1957 PR68 Ultra Cameo NGC.** Seemingly infinite depth of mirroring in the fields and heavily frosted devices deliver eye-catching contrast on this brilliant Superb Gem proof. A visually spectacular Registry coin. Census: 23 in 68 Ultra Cameo (1 in 68+ Ultra Cameo), 8 finer (10/14). NGC ID# 27J3, PCGS# 95989

### 1959 Washington Quarter, PR69 Spectacular Ultra Cameo Surfaces

- 3560 1959 PR69 Ultra Cameo NGC.** A virtually perfect specimen of this popular Washington quarter, with razor-sharp definition on all design elements and deeply mirrored brilliant fields that contrast profoundly with the richly frosted devices. Eye appeal is incredible. Census: 6 in 69 Ultra Cameo, 0 finer (10/14). NGC ID# 248Z, PCGS# 95991
- 3561 1960 PR69 White Ultra Cameo NGC.** Ice-white motifs rise in full detail above glassy and brilliant fields. An immaculate specimen certain to delight the specialist. Census: 24 in 69 Ultra Cameo (2 in 69 ★ Ultra Cameo), 0 finer (9/14). NGC ID# 2492, PCGS# 95992

*End of Session One*

# PREMIER SESSION TWO

## COLONIALS

1652 Oak Tree Shilling, Noe-3, ANDO Variety  
Sharply Detailed AU50

- 3562** 1652 Oak Tree Shilling AU50 PCGS. CAC. Noe-3, W-450, Salmon 1-C, R.6. 70.4 grains. Light aqua-blue, rose-pink, and tan toning enrich this pleasing Oak Tree shilling. The devices exhibit sharp definition, notably on the tree, date, and denomination, although detail over the upper-reverse is indistinct from a weakly engraved die. Two linear marks on the obverse are impressions of the edges of the die. Typically found on coins of this issue, each side is slightly misaligned. The only detractor is a dig on the left upright of the A in AN DO, causing a raised, flat area opposite near 3 o'clock. Listed on page 39 of the 2015 *Guide Book*. Population: 14 in 50, 31 finer (10/14).

Ex: FUN Signature (Heritage, 1/2007), lot 707; ANA Signature (Heritage, 8/2007), lot 1504; The Charles G. Wright Family Collection. PCGS# 20

Small Planchet Pine Tree Shilling  
VF30, Noe-17

- 3563** 1652 Pine Tree Shilling, Small Planchet VF30 PCGS. CAC. Noe-17, W-840, Salmon 3-B, R.3. 69.29 gn. A pleasing gunmetal-gray shilling with unmarked surfaces and good centering. The sharpness is consistent except for softness near 7 o'clock on the obverse and opposite at 5 o'clock on the reverse. Small die breaks are evident near the O in DO. Listed on page 39 of the 2015 *Guide Book*. PCGS# 24

1787 New Jersey Copper, MS63 Brown  
Exceptional Maris 46-e Example

- 3564** 1787 New Jersey Copper, No Sprig Above Plow MS63 Brown PCGS. Maris 46-e, W-5245, R.1. Ex: Troy Wiseman Collection. Struck from an advanced state of the dies as evidenced by the lack of detail on the inner curve of the horse's neck and the pronounced bulging of the die in the date area (which still shows full digits). The center of the reverse is weak, from die damage rather than wear, as always seen on this variety. Remarkably well-centered, this piece shows full sawtooth denticles on both sides and the brown patina is glossy with minor planchet porosity. Heavily die clashed with strong evidence of the outline of the shield in the right obverse field. A 1% curved clip at 5:30 is mint-made. One of the finest certified Maris-46e examples. Listed on page 70 of the 2015 *Guide Book*.

Ex: FUN Signature (Heritage, 1/2006), lot 3005; Troy Wiseman Collection, Part Two (Heritage, 1/2007), lot 737; FUN Signature (Heritage, 1/2009), lot 3553, which realized \$6,325. PCGS# 506

1788 Vermont Copper, AU53  
Bust Right, RR-16, W-2120

- 3565** 1788 Vermont Copper, Bust Right AU53 PCGS. RR-16, Bressett 15-S, W-2120, R.1. Mahogany-brown fields contrast with steel-gray high points. An unabraded and satiny example of this Bust Right Vermont type variety. Die polish lines are plain on the obverse field near 12 o'clock, an indication that the coin has received only minimal circulation. The centers are lightly brought up, as made. Listed on page 72 of the 2014 *Guide Book*. PCGS# 563

1787 Fugio Cent, MS64 Brown  
STATES UNITED, 4 Cinquefoils  
N. 13-X, W-6855

- 3566** 1787 Fugio Cent, STATES UNITED, 4 Cinquefoils, Pointed Rays MS64 Brown PCGS. CAC. N. 13-X, W-6855, R.2. This high grade Fugio cent is chocolate-brown overall with glimpses of faded mint red in design recesses. Well struck save for blending on the lower right obverse rim. The rings are clashed on the obverse field, as usual for N. 13-X, a Bank of New York variety. Minor spots noted beneath the 7 in the date and on the UN in UNITED. Listed on page 87 of the 2015 *Guide Book*.  
Ex: Joseph M. Seventko Collection (*Heritage*, 1/2002), lot 5251. PCGS# 883

HALF CENT

1806 Half Cent, MS65 Brown  
No Stems, Small 6, C-1

- 3567** 1806 Small 6, No Stems, C-1, B-3, R.1, MS65 Brown NGC. C-1 is the final die marriage for the "Stemless Reverse," which earlier coined the 1805 C-1 and the 1804 C-12 and C-13 varieties. The usually encountered obverse die state with a crack connecting the tops of LIBERTY, clash marks near the throat and ribbon, and minimal obverse dentilation. A high grade rose-gold Gem. The strike is crisp, and no spots are evident. Mint-made strike-throughs are noted above the A in HALF, which displays contact along its left stand. Our EAC grade MS60. PCGS# 35191

PROOF CLASSIC HEAD HALF CENT

1832 Classic Head Half Cent, PR64 Brown  
C-2, Rarity-7 as a Proof

- 3568** 1832 PR64 Brown PCGS. C-2, B-2, R.7 as a proof. Housed in a first-generation PCGS holder. Only seven or eight proofs of this variety are known, and fewer than 20 proofs of all three varieties exist, according to information in Walter Breen's *Half Cent Encyclopedia*.

This specimen shows several distinct toning characteristics on both sides to help pedigree its place among the few known proofs of the date and variety. The fields are brightly reflective with light cameo contrast. An exquisite example that is sharply struck from perfect dies, this coin displays amazing lime-green, gold, and lilac toning with a hint of violet-blue. An appealing and exquisite rarity. Our EAC grade PR60.

Ex: Long Beach Signature (*Heritage*, 9/2008), lot 132; Los Angeles Signature (*Heritage*, 8/2009), lot 1017. NGC ID# 26YT, PCGS# 1195

## PROOF BRAIDED HAIR HALF CENTS

1846 Second Restrike Half Cent, PR66 Brown  
B-3, Strong Field-Device Contrast

**3569** 1846 Second Restrike B-3, R.6, PR66 Brown PCGS. Mintage figures for the original and restrike proof half cents dated 1846 are unknown, but the two variants are similar in overall availability today, both being exceedingly rare. It is believed that only 18 to 24 examples of the restrike are known, comprising both reverse types. The Second Restrike variety is often referred to as the Reverse of 1856, and is easily identified from the Reverse of 1840 by several sharp die lines protruding from the denticles above RICA in AMERICA.

This Premium Gem representative is among the finest certified of the few known survivors, and displays bold devices set against profoundly deep mirrors. Olive-gold and amber hues encompass much of each side, while the fields showcase deeper hues of aquamarine as well. Our EAC grade PR63. Population: 3 in 66 Brown, 0 finer (9/14). NGC ID# 26ZF, PCGS# 1287

1855 C-1 Half Cent, PR63 Brown

**3570** 1855 PR63 Brown PCGS. CAC. C-1, B-1, R.5 as a Proof. This attractive Select proof half cent has lightly mirrored fields visible through delightful golden-olive and sky-blue toning, with scattered grade-consistent marks on each side. A minuscule rim bruise is evident at 3 o'clock on the obverse, and may point to a past provenance for this piece. Our EAC grade PR60. Population: 3 in 63 Brown, 8 finer (10/14). NGC ID# 26ZW, PCGS# 1326

## LARGE CENTS

1793 Chain Cent, VG Details  
AMERICA, S-3

**3571** 1793 Chain, AMERICA, S-3, B-4, Low R.3 — Rim Damage — PCGS Genuine. VG Details. Breen Die State I. An olive-green and tan-brown cent with glossy and lightly granular surfaces. The date is sharp, and all other legends are readable. An obverse rim flaw between 9 and 10 o'clock appears mint-made, but the obverse has a series of small rim dings between 4:30 and 7 o'clock, and the reverse has a moderate ding at 2 o'clock. Our EAC grade AG3.

1814 S-295 Cent, MS61 Brown  
Plain 4, Smooth Surfaces

**3572** 1814 Plain 4, S-295, B-2, R.1, MS61 Brown NGC. A deep brown example of the final Sheldon variety. Satiny and well defined. The surfaces are pleasing despite a solitary tick on the cheek and a small granular area beneath the wreath stem. The sole Plain 4 die marriage, and very scarce in Mint State. Our EAC grade AU55. PCGS# 36517

1838 Cent, MS66+ Red and Brown  
N-1, Vibrant Luster

- 3573 1838 N-1, R.1, MS66+ Red and Brown PCGS. The peak of the 1 in the date is repunched, as is the I in UNITED and the E in AMERICA. The obverse near 12 o'clock has a rim die break. Splendid brick-red and powder-blue colors alternate across lustrous and unmarked surfaces. The strike is bold except on the uppermost stars. A magnificent Young Head type coin. Our EAC grade MS63. PCGS# 37181

1847 N-2 Cent, MS65 Brown  
Large Over Small 47

- 3574 1847 Large Over Small 47, N-2, R.3, MS65 Brown PCGS. CAC. Grellman Die State a. A lovely example of the early die state with the repunched date boldly visible, struck before the reverse die cracked. This pleasing olive-brown example has full cartwheel luster with satin surfaces and traces of original orange mint color in the protected regions around the devices. Our EAC grade MS60. PCGS# 37367

PROOF FLYING EAGLE CENTS

1856 Snow-3 Flying Eagle Cent  
Proof, AU Details

- 3575 1856 Snow-3 — Cleaning — PCGS Genuine. Proof, AU Details. The Snow-3 variety is associated with the 634 pieces struck in 1856 for distribution to Washington officials. Those coins were business strikes, intended to demonstrate the new small cent denomination. A majority of those pieces were eventually spent by their non-collector recipients. Snow-3 is significantly scarcer than the Snow-9 restrike proofs made circa-1859. In recent years, however, PCGS has certified most 1856 Flying Eagle cents as proofs, regardless of die variety. The present wheat-gold specimen is lightly granular and moderately bright with faint hairlines on both sides. The eagle's breast displays minor wear, and a strike-through (as coined) affects the F in OF. PCGS# 47058

1856 Flying Eagle Cent  
Snow-9 Proof, AU Details

- 3576 1856 Snow-9 — Smoothed — PCGS Genuine. Proof, AU Details. The numismatic hobby was booming in America during the late 1850s. The 1856 Flying Eagle cent was one of the most popular issues among pre-Civil War collectors, and demand exceeded supply. The U.S. Mint responded, and unofficially restruck as many as 2,000 pieces in proof format from Snow-9 dies, distributed via well connected Philadelphia-area dealers. The present tan-gold specimen displays light wear on the breast feathers, perhaps from brief service as a pocket piece. The strike is essentially full, and the surfaces appear unabraded aside from hair-thin marks near a small reverse spot at 1 o'clock. PCGS# 147890

1856 Flying Eagle Cent, PR64  
Popular Snow-9 Variety

- 3577 1856 Snow-9 PR64 NGC. The most plentiful variety of the 1856 Flying Eagle cent, likely produced during the restrike period between late 1857 and 1860. A thin die line in the forward edge of the eagle's left wing confirms the variety. This example is fully struck with slight reflectivity in the fields. No consequential marks or carbon spots are observed. PCGS# 147890

## INDIAN CENTS

**1859 Indian Cent, MS66+  
Spectacular First-Year Type Coin  
Tied for Finest Certified**

**3578 1859 MS66+ PCGS. CAC.** A large mintage of 36.4 million copper-nickel cents was produced in 1859, the first year to employ the Indian design and the only year with the Laurel reverse. This issue is always in demand from type collectors and series enthusiasts alike, but few examples can match the quality and eye appeal of the present coin. This high-end Premium Gem offers sharply detailed design elements and impeccably preserved copper-red surfaces that show prooflike reflectivity in many areas. Eye appeal is simply terrific. This coin is a Registry Set requisite. Population: 25 in 66 (2 in 66+), 0 finer (10/14). NGC ID# 227E, PCGS# 2052

**1860 Pointed Bust Cent, MS66  
Scarce Transitional Variety**

**3579 1860 Pointed Bust, FS-401, MS66 PCGS.** The 1860 Pointed Bust is a challenging transitional variety that combines the bust style of 1859 with the shield reverse of 1860. The present orange and lemon-gold Premium Gem has potent luster and a precise strike. A loupe reveals occasional minute carbon. Population: 7 in 66, 2 finer (10/14). PCGS# 37393

**1862 Indian Cent, MS67  
Superb Type Coin, Tied for Finest Certified**

**3580 1862 MS67 PCGS.** Among copper-nickel Indian cents, the 1862 and 1863 are the most frequently seen for type purposes, with the latter being the most plentiful of the two overall. However, in Premium Gem and finer and condition, the lower-mintage 1862 emerges as the more readily obtainable date, and is ideal for a high-grade type set. That said, PCGS has still only seen 12 examples in this grade, and none finer (9/14). This representative displays satiny bronze-gold luster and nearly perfect surfaces, with sharp motifs on each side. An important opportunity for the advanced type or date collector. NGC ID# 227H, PCGS# 2064

1865 Cent, MS66 Red  
Radiant 'Fancy 5' Example

- 3581 1865 Fancy 5 MS66 Red PCGS.** The use of the Fancy 5 punch in the date, with a curved, "hooked" flag at the top represents a one-year type, since no other date in the series features the Fancy 5 numeral. Lower-grade Mint State examples are fairly plentiful, but fully Red representatives are elusive and those achieving the MS66 grade level are decidedly rare. This example is fully struck, with notable sharpness on the headdress feathers and the wreath, while subtle violet highlights appear over the vibrantly lustrous, tangerine-orange surfaces. A few areas of light die clashing are seen, but the surfaces are free of any distracting marks. Only one or two microscopic carbon flecks are seen with a glass. Population: 10 in 66 Red, 0 finer (9/14). NGC ID# 227N, PCGS# 2084

1887 Cent, Sharp MS66 Red  
Satin Mint Bloom

- 3582 1887 MS66 Red PCGS.** Generous luster shows a range of reds and oranges on this Premium Gem, while the motifs are boldly struck and the surfaces are void of any significant specks. An ideal, high-end representative for either the series enthusiast or advanced type collector. Full Red examples of this mid-series issue are only marginally scarce in lower grades, but are genuinely rare at the MS66 level. Population: 19 in 66 (2 in 66+) Red, 2 finer (9/14). NGC ID# 228F, PCGS# 2159

1891 Indian Head Cent, MS66 Red  
None Certified Finer

- 3583 1891 MS66 Red PCGS. CAC.** This coin may be the very definition of "condition rarity." An impressive 47 million pieces were struck in Philadelphia, yet a mere 10 coins qualify for the MS66 grade at PCGS with none finer. NGC shows just three MS66 coins, again with none finer. In short, there are very few top-graded coins available for the legions of Indian Head cent collectors.

Vibrant mint luster is the most noticeable attribute of the current Premium Gem. The copper-red surfaces are infused with the pervasive mint bloom. As expected, the strike is bold with a full and rounded cheek on the portrait. Considerable mint frost abides among the vanes of the feathers. A handful of microscopic flecks near the reverse wreath bow are secondary to the considerable lustrous appeal of this exceptional coin. Population: 10 in 66 (1 in 66+) Red, 0 finer (10/14). NGC ID# 228K, PCGS# 2180

---

**1895 Indian Cent, MS67 Red  
Tied for Finest Certified**

- 3584 1895 MS67 Red PCGS.** An impressive mintage of more 38 million cents flowed from the presses in 1895, and while high-grade representatives survive in some quantity, full Red Superb Gems are genuinely rare. This piece, one of only four MS67 Red examples at PCGS, is an important opportunity for the Registry Set collector, as none have graded finer (9/14). Blazing coppery-red mint bloom radiates from seemingly pristine surfaces, while the design elements are crisply impressed. A single, faint toning speck is noted below the wreath bow on the reverse, where it is not readily detectable. NGC ID# 228P, PCGS# 2192

---

**PROOF INDIAN CENT**

---

**1862 Indian Cent, PR66  
Distraction-Free Surfaces**

- 3585 1862 PR66 PCGS. CAC.** Sandy-gold fields complement the reddish-brown devices with a couple of small, random hazel-gray areas on the obverse. The surfaces are free of mentionable distractions amid the bold strike and great eye appeal. The business strikes of this date are quite elusive, exerting added pressure on nice high-grade proofs such as this piece, one of 550 proofs reported struck. Population: 26 in 66, 1 finer (9/14). NGC ID# 229C, PCGS# 2259

---

**LINCOLN CENTS**

---

**1909-S VDB Cent, MS66 Red  
Scarce in High Grade and With Full Red**

- 3586 1909-S VDB MS66 Red PCGS. CAC.** Many of the artists associated with the “Renaissance of American Coinage” were themselves first-generation immigrants. Augustus Saint-Gaudens was raised in the United States but was born in Ireland; Adolph Weinman lived half his childhood in Germany; Anthony de Francisci came to America from Italy, and Victor David Brenner, designer of the original Lincoln cent, was born in modern-day Lithuania. The European-born Brenner traveled from America to France for study, and it was in the European tradition that he signed his coinage work, which led to the controversial initials which distinguish the one-year “VDB” Lincoln cent subtype. While there were a high number of survivors in lower grades, few were set aside and remain in both high grade and with fully intact mint red color. This is a splendid example that is problem-free, sharply struck, and showing even red color. NGC ID# 22B2, PCGS# 2428

**1915-S Cent, MS65 Red  
Better San Francisco Issue in Full Red**

**3587 1915-S MS65 Red PCGS.** The 1915-S Lincoln cent is elusive in all Mint State grades, but full Red Gems are rare. This example displays satiny, coppery-pink luster with subtle tinges of orange-red and lilac over each side. The strike is crisp and the surfaces are free of major abrasions. A few stray flecks are seen on each side, primarily restricted to the margins. Population: 28 in 65 (1 in 65+) Red, 5 finer (9/14). NGC ID# 22BM, PCGS# 2485

**1918 Lincoln Cent, MS67+ Red  
Only One Graded Finer at PCGS**

**3588 1918 MS67+ Red PCGS. CAC.** This 1918 Lincoln cent goes even beyond the “mere” Superb Gem Red level to obtain the Plus designation in addition from PCGS, separating it from the couple of dozen such at that service. The end of World War I saw a prodigious mintage for the 1918 cents exceeding 288 million coins, and even today, well-worn examples can be found in bags of circulated Wheat cents. But the emphasis was on quantity and rapid production; PCGS estimates that only 1,200 survivors today are in Gem Red or higher grades.

This piece is one of two MS67+ Red coins at PCGS, and a lone MS68 is finer — but this example is mighty close, showing pristine, carbon-free preservation on uniformly brick-red surfaces that appear *fully struck throughout*. A single small area of deeper reddish-brown toning above (STAT)E(S) on the reverse provides a pedigree marker. CAC does not account for Plus-graded coins in its report, but the CAC green bean further distinguishes this piece. A Registry Set essential. NGC ID# 22BV, PCGS# 2506

**1928-D Cent, MS66 Red  
Among the Finest Certified**

**3589 1928-D MS66 Red PCGS. CAC.** A boldly struck Registry Set candidate, this satiny Premium Gem is tied with just 12 others as the finest certified of the date at PCGS (9/14). Glowing coppery-orange luster illuminates well-preserved surfaces on each side, while only a few faint freckles are noticed upon close examination. NGC ID# 22CS, PCGS# 2590

**1941 Cent, MS66 Red  
FS-102, Doubled Die Obverse**

**3590 1941 Doubled Die Obverse, FS-102, MS66 Red PCGS.** This variety displays broad doubling on IN GOD WE TRUST and on the 4 in the date. Each side of this example exhibits fiery-red coloration with emanating luster throughout. The strike shows strong detail and magnification reveals only a handful of well-hidden marks that do not detract. Population: 19 in 66 (1 in 66+) Red, 0 finer (9/14). PCGS# 37783

**1946 Lincoln Cent, MS67 Red  
Vibrant Red Color**

**3591 1946 MS67 Red PCGS.** Rich coppery-red and rose hues blend across the radiant obverse, while the reverse showcases strong copper-gold luster. Virtually free of carbon and abrasions, this beautiful Superb Gem is tied for the finest certified at PCGS (9/14), and is also numerically equal to the coin represented in the current highest-rated Registry Set. NGC ID# 22EK, PCGS# 2743

**1947 Cent, MS67 Red  
Tied for Finest at Both Services**

- 3592 1947 MS67 Red PCGS. CAC.** Spectacular copper-orange color and radiant mint luster blend over each side to endow this Super Gem with enviable visual appeal, as affirmed by the green CAC label. This well-struck coin shows only a few minute ticks visible with magnification and is one of just 20 examples certified MS67 Red by PCGS, with none finer (9/14). NGC ID# 22EN, PCGS# 2752

**1948 Cent, MS67 Red  
Deep Original Patina**

- 3593 1948 MS67 Red PCGS.** Mercurial mint luster shifts and alters the visual palette of pink, orange, and ruby-red toning for this Superb Gem cent when viewed from different angles, or when rotated under light. A full strike is confirmed by the lofty grade. Just a few light freckles populate the reverse, but this coin is remarkably clean and smooth with undeniable eye appeal. Population: 16 in 67 Red, 0 finer (9/14). NGC ID# 22ES, PCGS# 2761

**1948 Lincoln Cent, MS67 Red  
Lustrous and Beautifully Toned**

- 3594 1948 MS67 Red PCGS.** Intense, frosty mint luster complements sharply struck design elements on this Superb Gem representative. The surfaces are clean and attractively toned, with deep orange-red coloration throughout each side. An important opportunity for the Registry Set collector, as PCGS has seen only 16 examples in this grade, and none finer (9/14). NGC ID# 22ES, PCGS# 2761

**1948 Cent, MS67 Red  
Registry-Quality Representative**

- 3595 1948 MS67 Red PCGS. CAC.** Wisps of lilac and rose accent fiery copper-red mint bloom on each side, while the devices are well-defined and the surfaces are essentially free of abrasions. A couple minute carbon specks are observed with a lens, though the appeal is uninhibited to the unaided eye. Tied with just 16 others as the finest certified at PCGS (9/14). NGC ID# 22ES, PCGS# 2761

**1953 Cent, MS67 Red  
Among the Finest at PCGS and NGC**

- 3596 1953 MS67 Red PCGS.** A prime Registry Set candidate, this full Red Superb Gem ranks with just 13 others as the finest certified at PCGS (9/14), and is a full grade point finer than the example represented in the current highest-rated Registry Set. Vibrant coppery-orange mint bloom illuminates bold design features, while the surfaces are void of any discernable post-minting flaws. A few tiny strike-throughs (as made) are noted on Lincoln's shoulder, as usual. NGC ID# 22F9, PCGS# 2806

**1953 Cent, MS67 Red  
Registry Set Contender**

- 3597 1953 MS67 Red PCGS.** Displaying strong luster and enchanting coppery-peach color, this Superb Gem exhibits exceptional visual appeal. A sharp strike and virtually pristine surfaces add to the desirability. A tiny die line extends northwest from the upper left corner of the E in LIBERTY, and a couple of thin die breaks appear at the upper portion of Lincoln's head as well as the shoulder. Despite a mintage of almost 257 million cents in Philadelphia in 1953, few examples have reached the upper levels of the grading scale. Population: 14 in 67 Red, 0 finer (9/14). NGC ID# 22F9, PCGS# 2806

---

**1953 Lincoln Cent, MS67 Red  
Tied for Finest Certified**

- 3598 1953 MS67 Red PCGS. CAC.** Pale lilac and cherry hues accent satiny orange-gold mint luster on each side of this nearly flawless, well-struck Superb Gem. No signs of carbon are immediately detectable, and the eye appeal is excellent. PCGS has encapsulated only 14 examples in MS67 Red, and none finer (9/14). This piece stands a full grade point finer than the representative housed in the current highest-rated Registry Set, and therefore represents a rare and important opportunity for the advanced specialist. Furthermore, it is one of only three MS67 Red examples endorsed by the Certified Acceptance Corporation. NGC ID# 22F9, PCGS# 2806

---

**1956-D Lincoln Cent, MS67+ Red  
Must-Have Registry Set Candidate**

- 3599 1956-D MS67+ Red PCGS.** This high-end Superb Gem exhibits razor-sharp definition on all design elements, with radiant mint luster on both sides. The original red surfaces are impeccably preserved and eye appeal is terrific. This coin will be a welcome addition to the finest collection or Registry Set. Population: 56 in 67 (2 in 67+) Red, 0 finer (10/14). NGC ID# 22FL, PCGS# 2839

---

**1969-S Doubled Die Cent, FS-101  
Choice XF**

- 3600 1969-S Doubled Die Obverse XF45 ANACS. FS-101.** Much rarer than the famous 1955 doubled die, the FS-101 1969-S also exhibits a broad spread throughout the obverse legends. Desirable in any grade. PCGS states "about 30 known," and there are far more variety collectors in search of an example. Most collectors have never seen one. The present blended mahogany-brown and olive-green cent has pleasing sharpness and is free from any relevant marks. Light wear is apparent on Lincoln's ear, jaw, and shoulder. The key variety to a collection of Memorial Reverse cents. PCGS# 2921
-

## PROOF LINCOLN CENT

1915 Cent, PR66 Red and Brown  
High-End for the Grade

- 3601** 1915 PR66 Red and Brown PCGS. CAC. The business strikes of this year from the Philadelphia Mint are sharp enough that they are often mistaken for proofs, though the incredible, needle-sharp definition seen on every element of this coin leaves no doubt as to its proof origin. Deeply lustrous, coppery-orange hues illuminate the seemingly perfect matte surfaces beneath a thin veil of carbon-free burgundy toning. A magnificent piece in every respect. Population: 19 in 66 (3 in 66+) Red and Brown, 0 finer (10/14). NGC ID# 22KY, PCGS# 3322

## THREE CENT SILVER

1851 Three Cent Silver, Sharp MS67  
Coruscating Mint Frost

- 3602** 1851 MS67 NGC. An exceptional example in every respect, this Superb Gem ranks among the finest in regards to eye appeal, striking quality, and technical grade. Thickly frosted, untuned mint bloom illuminates seemingly flawless surfaces and unusually crisp design definition, particularly on the outer shield and the reverse stars. NGC has certified only nine examples in this lofty grade and none finer; PCGS has seen 14 submissions in MS67 (1 in 67+), also with none finer (10/14). NGC ID# 22YX, PCGS# 3664

1852 Three Cent Silver, MS67  
Uncharacteristically Sharp Centers

- 3603** 1852 MS67 PCGS. CAC. The 1852 silver three cent piece had nearly four times the mintage of its 1851 counterpart (more than 18 million versus less than 5.5 million pieces), but is surprisingly almost identical in high grade rarity. This Superb Gem representative showcases fully impressed motifs and frosty, beautifully preserved mint luster. Shades of russet, champagne, and gunmetal-blue toning grace each side, with the deeper colors seen primarily around the peripheries. Population: 15 in 67, 2 finer (10/14). NGC ID# 22YZ, PCGS# 3666

## PROOF THREE CENT SILVER

1858 Three Cent Silver, PR64  
Popular Type Two Proof Issue

- 3604** 1858 PR68 NGC. Sometimes the greatest gifts come in the smallest packages. Such is the case with this magnificent three cent silver from 1858, the last of the 1854-58 Type Two issues with two lines bordering the star. Although the reported mintage ranges from 60 to 75 "original" pieces in Walter Breen's *Proof Encyclopedia* (1989) to 210 examples in the 2012 *Guide Book*, the correct number is probably somewhere in between, judging from the PCGS and NGC population data.

The same population reports also confirm the rarity of this issue in extraordinary states of preservation. PCGS has graded no examples finer than PR66; the present coin is the sold PR68 certified at NGC (11/11). Steel- and pinkish-gray toning covers the obverse. The reverse has more cobalt-blue color and a slightly golden center that adds heat to the otherwise cool surfaces. The mirrors are as deep as one will ever find on this denomination, and the devices exhibit an appreciable amount of mint frost. The design elements are fully struck, and no areas reveal hints of weakness. Excessive die polishing has removed a couple of small segments of the star outlines in the southwest obverse quadrant, and heavy diagonal die striations appear in the obverse fields. The Type Two three cent silver is undoubtedly one of the most eagerly sought type coins in U.S. numismatics. Its short life span of only five issues for the type, and 1858 is the only year generally found as a proof, making the proof Type Two a perennial favorite of both collectors and investors alike. This pristine piece represents a remarkable opportunity for type collectors.

Ex: FUN Signature (Heritage, 1/2008), lot 2721, which realized \$57,500; FUN Signature (Heritage, 1/2012), lot 3075. NGC ID# 27C5, PCGS# 3705

## THREE CENT NICKEL

1873 Open 3 Three Cent Nickel, MS66  
Tied for Finest Certified at PCGS and NGC

- 3605 1873 Open 3 MS66 PCGS.** Despite having nearly twice the mintage (783,000 versus just 390,000 pieces), the Open 3 1873 three cent nickel is somewhat scarcer than its Closed 3 counterpart in high grades. This Premium Gem example is one of only two so-graded Open 3 coins at PCGS, compared two 10 in this grade of the Closed 3 variant; none have been graded numerically finer of either variety (10/14). This piece displays frosty silver-gray luster with wisps of light golden toning seen when tilted beneath a light. The preservation is consistent with the lofty MS66 grade, and the devices are sharply impressed. PCGS# 3740

## PROOF THREE CENT NICKELS

1865 Three Cent Nickel, PR66 Cameo  
Seldom Seen Finer

- 3606 1865 PR66 Cameo PCGS.** This Premium Gem proof shows mostly untoned surfaces save for a bit of amber-gold color near the lower obverse rim and scattered color flecks on Liberty. As is usual for this first-year issue, struck to the extent of an estimated 500-plus proofs, repunching appears on the tops of the 65 in the date. A bold impression and generous field-device contrast make this a top-notch example of this rare issue, seldom seen finer. Population: 34 in 66 (2 in 66+) Cameo, 2 finer (9/14). PCGS# 83761

1870 Three Cent Nickel, PR66 Deep Cameo  
The Finest PCGS Deep Cameo Proof

- 3607 1870 PR66 Deep Cameo PCGS. CAC.** The combined population data of PCGS and NGC show a total of 693 proof 1870 three cent nickel pieces in all grades. However, only five of those coins are designated as Deep Cameo. Three of those are PCGS coins graded PR64, PR65, and PR66 (10/14). Both sides of this Premium Gem Deep Cameo proof exhibit brilliant, untuned surfaces with excellent contrast between the lustrous devices and deeply mirrored fields. PCGS# 93766

1877 Three Cent Nickel, PR65 Ultra Cameo  
Rare This Strongly Contrasted

- 3608 1877 PR65 Ultra Cameo NGC.** Despite published estimates of 900 coins, the actual mintage figure for this proof-only issue is unknown, as the Mint did not begin recording the sales of minor proof sets until the following year. High-grade survivors become available with some frequency, but pieces exhibiting Ultra Cameo contrast are exceedingly rare in any grade; this is one of just two Ultra Cameo representatives at NGC, with the other being a PR66+ (10/14). The contrast is strong and the devices are well-struck. A couple small grazes on the cheek preclude a finer numeric grade, though the eye appeal is not overly affected. PCGS# 93773

## SHIELD NICKELS

1874 Shield Nickel, MS66  
Splendidly Preserved Example

- 3609 1874 MS66 PCGS. CAC.** This is an impressive high-grade example with noticeably better-than-usual eye appeal for the type. The strike definition is crisp and essentially full throughout, and the remarkably well-preserved surfaces are free of even the smallest mark or blemish. Caramel-gold and light olive toning combine over both sides to further increase the coin's splendid visual appeal. Population: 9 in 66 (2 in 66+), 0 finer (10/14). NGC ID# 22P9, PCGS# 3803

1880 Shield Nickel, AU53  
Elusive Key Issue

- 3610 1880 AU53 PCGS.** The 1880 Shield nickel boasts the lowest business strike mintage of the series (only 16,000 coins), and is a significant key date in all grades. The typical piece is well-worn, and while XF and AU coins are occasionally seen, Mint State pieces are rare. This sharply detailed AU representative displays original golden-gray color and boldly defined motifs. No significant die cracks are observed. Population: 2 in 53, 38 finer (9/14). NGC ID# 276E, PCGS# 3810

1883/2 Shield Nickel, MS65+  
Popular *Guide Book* Variety

- 3611 1883/2 FS-302 MS65+ PCGS.** The undertype 2 is evident to the west of the primary 3 in the date, with the lower curve of the 2 most prominent. Remnants of the secondary digits are also visible inside the loops of both 8s, and a spidery die crack runs through the ball of the shield and the 3, identifying the scarce FS-302 overdate. The 1883, 3 over 2 variety is listed on page 131 of the 2015 *Guide Book*.

The present coin is a high-end Gem, from the last year of the Shield design. The design elements are sharply detailed throughout and the obverse shows an extensive network of interesting die cracks through the fields and the wreath. The mostly brilliant, well-preserved surfaces radiate satiny mint luster and show a few hints of golden-tan toning. Population: 5 in 65 (1 in 65+), 3 finer (10/14). PCGS# 38413

PROOF SHIELD NICKELS

1875 Nickel, Outstanding PR66 Cameo  
Infrequently Found With Cameo Finish

- 3612 1875 PR66 Cameo PCGS. CAC.** Proof 1875 Shield nickels are uncommonly found with a Cameo finish, and no Deep/Ultra Cameo pieces have been certified. The current Premium Gem Cameo is one of the 20 so graded by PCGS and NGC, with a mere two finer. Stunning field-motif contrast is apparent over both sides, each of which exhibits sharply struck design elements. Impeccable preservation throughout further enhances the coin's outstanding eye appeal, appropriately recognized by CAC. Population: 9 in 66 Cameo, 1 finer (9/14). PCGS# 83829

1877 Shield Nickel, PR66  
Outstanding Aesthetic and Technical Appeal

- 3613 1877 PR66 PCGS. CAC.** The published mintage figure for this proof issue of 900 pieces is really just an estimate, as the number of examples sold as part of minor proof sets was not fully recorded. Gem-quality survivors are not prohibitively elusive, but the certified population declines somewhat at the Premium Gem level, and finer pieces are rare. This coin is boldly struck on the stars and wreath leaves, with near-cameo contrast between the mirrored fields and softly frosted relief elements. Traces of ice-blue and pale gold toning grace both sides, complementing the overall appearance. Housed in an old green label holder. Population: 34 in 66, 0 finer (10/14). NGC ID# 276U, PCGS# 3831

1877 Shield Nickel, PR67 Cameo  
Proof-Only Key, One of the Finest-Known

- 3614 1877 PR67 Cameo NGC.** This is a remarkably attractive key-date specimen from the original proof-only mintage of 900 pieces. Full strike definition graces the heavily frosted devices, and dark, deep mirror fields are free of even the smallest imperfection. This impressive example is one of the finest-known, and tied for finest-graded at both services. Census: 6 in 67 Cameo (1 in 67 ★ Cameo), 0 finer (10/14). PCGS# 83831

## LIBERTY NICKELS

### 1885 Liberty Nickel, MS64 Lightly Toned Example of This Rare Issue

**3615 1885 MS64 PCGS.** One of the three key issues to the Liberty nickel series, along with the 1886 and 1912-S, and a coin that is genuinely scarce in all grades and especially challenging in mint condition. This is a lustrous example that shows a light coating of golden-gray patina over each side. Well struck, but not quite full, the only mentionable defect is a thin scratch to the right of the last digit of the date.  
*Ex: Long Beach Signature (Heritage, 9/2004), lot 5767. NGC ID# 2773, PCGS# 3846*

### 1885 Nickel, MS65 Important Low-Mintage Issue

**3616 1885 MS65 PCGS.** The 1885 is a significant key issue in the Liberty nickel series, with a mintage of fewer than 1.5 million coins, and high-grade examples are always in demand among date collectors. This Gem example is unusually well-struck, with just a touch of softness detected on the lower-left wreath leaves and on the upper parts of stars 6 and 7. Satiny lavender-gray toning graces each side, with a few wisps of olive color seen on the obverse. Population: 55 in 65 (3 in 65+), 27 finer (9/14). NGC ID# 2773, PCGS# 3846

### 1896 Nickel, MS66+ Tied With One Other for Finest Certified

**3617 1896 MS66+ PCGS. CAC.** The 1896 Liberty nickel is a slightly scarcer date in Mint State, and it becomes genuinely rare at the Premium Gem grade level. Its scarcity in relation to most other issues from this period is proportionate to its slightly lower mintage of fewer than 9 million pieces, this being the last of three unusually low mintages for the decade. This high-end representative displays unusually frosty, silvery-gray luster with hints of champagne and ice-blue color seen when turned in-hand. The strike is essentially sharp, save for the lower-left portion of the wreath which exhibits some of the typical softness. Surface flaws are undetectable to the unaided eye. Population: 14 in 66 (2 in 66+), 0 finer (9/14). NGC ID# 277B, PCGS# 3857

## PROOF LIBERTY NICKELS

### 1885 Liberty Nickel, PR67 Cameo None Certified Finer in Cameo

- 3618 1885 PR67 Cameo PCGS.** Watery-deep mirrors surround the frosted motifs of this Superb Gem proof, which displays a tiny hint of gold at the rims. The devices are fully struck and razor sharp from Liberty's hair strands to the problematic ear of corn located left of the bow knot. Proofs are more available than high-grade business strikes of this key issue, adding to the demand — particularly at the finest levels to complete an advanced collection — a challenge for which this coin is eminently qualified. Population: 11 in 67 Cameo, 0 finer (10/14). PCGS# 83883

### 1888 Nickel, PR66 Cameo Tied for Finest at PCGS

- 3619 1888 PR66 Cameo PCGS.** This Premium Gem Cameo proof is tied for the finest that PCGS has certified (10/14). There are five numerically finer 1888 Liberty nickels recorded in the PCGS Population Report, although those pieces are undesignated. PCGS has never assigned the Deep Cameo designation to an 1888 Liberty nickel. This lovely light gray example has splashes of gold toning on the obverse. Both sides have lustrous devices contrasting with the deeply mirrored fields to create exceptional eye appeal. Population: 7 in 66 Cameo, 0 finer (10/14). PCGS# 83886

### 1891 Liberty Nickel, PR67+ Cameo The Finest PCGS-Certified Example

- 3620 1891 PR67+ Cameo PCGS. CAC.** This Superb Gem Cameo proof carries the important Plus designation, and ranks as the finest Cameo proof of this issue that PCGS has certified. The sharply defined details are brilliant and lustrous, bordering on Deep Cameo contrast, within a deeply mirrored frame. The finest Deep Cameo examples that PCGS has certified grade PR66, so the present specimen is the finest PCGS-certified piece available. Population: 3 in 67 (1 in 67+) Cameo, 0 finer (10/14). PCGS# 83889

### 1892 Nickel, PR67+ Cameo Sole Finest at PCGS

- 3621 1892 PR67+ Cameo PCGS. CAC.** The 1892 is an available proof issue in an absolute sense, but the date becomes exceedingly rare as high as the Superb Gem grade level. This piece is one of just five so-graded proofs at PCGS, and is the only one to receive a Plus designation (10/14). Bold, fully frosted devices deliver stark contrast with the deeply mirrored fields, while the surfaces are seemingly devoid of any perceptible flaws. A blush of light golden toning adds a degree of warmth to each side. PCGS# 83890

### 1909 Nickel, PR68 Cameo Delicately Toned in Pastel Hues

- 3622 1909 PR68 Cameo NGC.** The Mint struck 4,763 proof nickels in 1909, the spike in production due to increased proof set sales brought about by the introduction of the Lincoln cent type. A number of examples are certified Cameos, but striking quality is sometimes lacking. This high-end Superb Gem exhibits noticeable field-device contrast and seemingly flawless surfaces. Wisps of ice-blue, green-gold, and lavender-orange toning grace each side, with the latter colors most prevalent on the reverse. The strike is full throughout, including the lower-left portion of the wreath. Census: 8 in 68 Cameo (2 in 68 ★ Cameo), 0 finer (9/14). PCGS# 83907

## BUFFALO NICKELS

### 1913-S Type One Nickel, MS67 Only Two Coins Certified Numerically Finer

- 3623 1913-S Type One MS67 PCGS.** The San Francisco is the scarcest of the three Type One issues, and is rare at the Superb Gem grade level. Like many S-mint dates from the period, the 1913-S Type One is also frequently found with varying degrees of striking weakness in the centers. This iridescent, light golden example displays pleasing design definition, with just a touch of incompleteness on the hair above the Indian's braid, and the surfaces are almost perfectly preserved. Population: 23 in 67 (1 in 67+), 1 finer (9/14). NGC ID# 22PY, PCGS# 3917

### 1916-S Nickel, MS66 Uncharacteristically Sharp

- 3624 1916-S MS66 PCGS.** Many 1916-S nickels were struck from worn dies and exhibit varying degrees of weakness in the centers and blurring of the peripheral elements. Sharp examples exist, but are rare in Gem or finer condition. This Premium Gem example is from an early die state, with crisp peripheral elements and only slight striking softness in the centers. Iridescent golden toning warms smooth, satiny luster on each side, giving this piece a high degree of eye appeal. Population: 33 in 66 (1 in 66+), 4 finer (9/14). NGC ID# 22RC, PCGS# 3933

### 1918-S Nickel, MS64 Elusive This Appealing

- 3625 1918-S MS64 PCGS. CAC.** The 1918-S nickel has a reputation for being poorly struck, even with examples coined from fresh dies, pointing to poor die spacing as being the likely cause of the striking weakness. This example shows some slight softness on the hair above the braid and on the bison's shoulder, though the strike is otherwise unusually sharp for the issue. Light clash marks are present, but die erosion is minimal. Each side is illuminated in satiny golden-gray and lavender-blue hues, with no mentionable abrasions on either side. PCGS has certified only 36 numerically finer representatives (9/14). NGC ID# 22RK, PCGS# 3940

### 1923-S Nickel, MS65 Unusually Sharp Throughout

- 3626 1923-S MS65 PCGS.** The 1923-S Buffalo nickel is frequently seen with varying degrees of striking softness, a characteristic that no doubt aids in the scarcity of Gem-quality survivors. This representative is one of only a few that are boldly struck on each side, with limited evidence of die wear seen when closely studied. Iridescent golden-gray toning blankets satiny luster on each side, and the surfaces are free of any noticeable imperfections. Population: 47 in 65 (2 in 65+), 3 finer (9/14). NGC ID# 22RW, PCGS# 3950

### 1924-D Nickel, Toned MS65+ Above-Average Strike

- 3627 1924-D MS65+ PCGS. CAC.** The profound striking softness with which examples of this issue were typically produced contributes to the scarcity of high-grade survivors. The present high-end Gem exhibits a minor degree of weakness on the bison's head and shoulder, as well as on portions of the obverse portrait, though the strike seems above-average for the issue. The Indian's braid, the date, the bison's horn and tail, and the lettering are all sharply defined. Excellent surface preservation firmly substantiates this coin's Gem status. Iridescent champagne, lavender, and ice-blue toning encompasses each side, adding to the eye appeal. Housed in an old green label holder. PCGS has graded just four specimens numerically finer (10/14). NGC ID# 22RY, PCGS# 3952

**1925-D Nickel, MS66**  
None Certified Numerically Finer

- 3628 1925-D MS66 NGC.** The 1925-D is usually seen with a deficient strike and rather insipid luster due largely to heavy die erosion. Branch mint nickels from the 1920s are especially prone to these flaws, as dies were frequently used well beyond their normal life span to conserve production costs. This example is remarkable in that the hair braid and the bison's shoulder show strong definition. Iridescent golden-gray toning blankets smooth, satiny luster on each side, giving this piece a high degree of eye appeal for the issue. Census: 12 in 66 (1 in 66 ★), 0 finer (9/14). NGC ID# 22S3, PCGS# 3955

**1937-D Buffalo Nickel, MS63**  
Highly Regarded Three-Legged Variety

- 3629 1937-D Three-Legged, FS-901, MS63 PCGS.** The 1937-D Three Legged Buffalo nickel is one of the most sought-after varieties of the series. This attractive MS63 specimen exhibits unusually sharp detail on most design elements and satiny mint luster shines through delicate shades of ice-blue and golden-tan toning. Population: 1 in 63, 0 finer (10/14). PCGS# 38475

**1937-D Three-Legged Buffalo Nickel, MS63**  
FS-901, Popular *Guide Book* Variety

- 3630 1937-D Three-Legged, FS-901, MS63 PCGS.** Excessive die polishing was the cause of this highly collectible *Guide Book* variety. This Mint State representative exhibits a bold strike, with iridescent olive-gold, lavender-gray, and ice-blue toning over each side. Minor die erosion is seen in the recesses upon close examination, though the striking sharpness is not overly affected. A few light grazes limit the grade. PCGS# 38475

**1937-D Nickel, MS63+**  
FS-901, Three-Legged Variety

- 3631 1937-D Three-Legged, FS-901, MS63+ NGC. CAC.** An attractive, Plus-graded example of this popular *Guide Book* variety. Tinges of cherry-red and lavender accent warm golden-gray patina on each side. Some minor evidence of die erosion is noted in the recesses, as usual, though the devices remain boldly impressed. This variety is only marginally available in the finer Mint State grades, making this piece an important opportunity for the Buffalo nickel collector. PCGS# 38475

**1937-D Three-Legged Nickel, MS64+**  
Lustrous, Light Gold Toning

- 3632 1937-D Three-Legged, FS-901, MS64+ PCGS.** Perhaps the best known lapped die variety in numismatics, along with the 1922 No D cent. Enthusiastic die polishing at the Mint removed much of the bison's right front leg. The granular back leg, and the trail of minute die lumps beneath the bison's leg, provide further diagnostics for FS-901. The typical example grades XF, but the present coin is a near-Gem with dynamic luster and wisps of straw-gold toning. PCGS# 38475

**PROOF BUFFALO NICKELS**

**1914 Nickel, PR67**  
Bold Design Definition

- 3633 1914 PR67 PCGS. CAC.** A beautifully preserved, needle-sharp proof, this Superb Gem showcases rich satiny luster beneath a blanket of warm champagne and pale lavender toning. The 1914 proof Buffalo nickel had a limited mintage of 1,275 pieces, and is scarce at the Superb Gem grade level. Population: 80 in 67 (4 in 67+), 11 finer (9/14). NGC ID# 278T, PCGS# 3991

**1936 Buffalo Nickel, Satin Finish PR68  
Beautifully Toned and Conditionally Rare**

**3634 1936 Type One — Satin Finish PR68 PCGS. CAC.** This was the first proof Buffalo nickel issue since 1916 and was executed using two distinct finishes: the so-called Satin Finish as well as the Brilliant Finish (also known respectively as Type One and Type Two). PCGS and NGC have combined to grade a total of 60 Satin Finish coins at PR68, with just one piece rated even finer by PCGS at PR69.

This superior example displays remarkably crisp strike definition and clean surfaces that display lovely aquamarine and golden-tan coloration. Encapsulated more than 20 years ago in a first-generation PCGS holder, this outstanding Superb Gem proof will appeal to the savvy collector or investor. Population: 34 in 68, 1 finer (10/14). NGC ID# 278X, PCGS# 3994

**JEFFERSON NICKELS**

**1938-D Nickel, Beautifully Toned MS67+  
Elusive Full Steps Example**

**3635 1938-D MS67+ Full Steps PCGS.** This beautifully toned Superb Gem displays deep brownish-orange peripheral patination imbued with whispers of olive that cedes to soft violet, yellow-gold and orange in the central areas. Sharply struck design elements culminate in Full Steps on Monticello's portico, and lustrous surfaces are marvelously well-preserved. A really wonderful coin to behold. Population: 59 in 67 (4 in 67+) Full Steps, 0 finer (9/14). NGC ID# 22T5, PCGS# 84001

**1947 Nickel, MS67 Full Steps  
Tied for Finest Certified**

**3636 1947 MS67 Full Steps PCGS.** This satiny, beautifully preserved Superb Gem is one of just four so-graded Full Steps 1947 nickels at PCGS (9/14), and is a full grade point finer than the coin in the highest-rated Registry Set. Soft olive-gold toning spreads across the surfaces, while faint lavender and ice-blue accents are seen over each side. NGC ID# 22U5, PCGS# 84031

**1948-S Nickel, Rare MS67 Full Steps  
Tied With Two Others for Finest at PCGS**

**3637 1948-S MS67 Full Steps PCGS.** Essentially brilliant centers yield to warm golden peripheral toning on this boldly struck, well-preserved Superb Gem. PCGS and NGC combined have certified only four Full Steps pieces in this lofty grade (three at PCGS and one at NGC), with none finer (9/14). As one of the finest known of the date, this coin ranks a full grade point finer than the piece represented in the current highest-rated Registry Set. NGC ID# 22UA, PCGS# 84036

---

**1949-D Nickel, MS67 Full Steps  
Rare at This Lofty Grade Level**

- 3638 1949-D MS67 Full Steps PCGS.** A single glance at the population reports shows why this issue is so challenging in the highest grades. PCGS and NGC combined have certified just six examples in MS67 Full Steps and none in a higher numeric grade (9/14). Prospective bidders will be competing with Registry Set enthusiasts for this immaculate Full Steps representative. A whisper of golden translucence covers lustrous, satin-silver surfaces. There are no surface distractions. Population: 4 in 67 Full Steps, 0 finer (9/14). NGC ID# 22UC, PCGS# 84038

---

**1952-D Nickel, MS67 Full Steps  
Nearly Six Complete Steps**

- 3639 1952-D MS67 Full Steps PCGS.** As the numismatic hobby approaches 30 years of third-party certification, the online population data provides a clear indication of the relative rarity for every series, with the understanding that the data is biased toward higher grade and rarer coins. PCGS has certified 850 1952-D Jefferson nickels, with just 100 of those assigned the Full Steps designation. Understanding that a Full Steps example is more likely to be submitted in the first place is important when considering the relative rarity of these coins. This brilliant Superb Gem, with delicate champagne toning over frosty mint luster, just misses six complete steps on the reverse. PCGS has only certified two examples as MS67 Full Steps, with none finer (10/14). NGC ID# 22UL, PCGS# 84047

---

**EARLY HALF DIMES**

---

**1794 Half Dime, Deeply Toned MS62  
Rare V-2, LM-2 Variety**

- 3640 1794 V-2, LM-2, R.5, MS62 PCGS.** Three obverse dies were paired with three reverse dies to create four die marriage varieties for the 1794 half dime, of which LM-2 is the second-rarest, behind only the extremely rare LM-1 variety. All of the 1794-dated half dimes were actually struck in March 1795, and it is believed only 7,756 pieces were produced with these dies. The early Mint did not have the luxury of being able to discard out-dated working dies at the end of the year if they were still serviceable, and it was not uncommon for dies to be employed well into the following year. As a date, the 1794 half dime is many times rarer than the 1795, and its popularity as the first issue of the denomination produced within the early Mint's walls is unsurpassable.

This Mint State representative displays well-struck central devices, with bold borders and a lack of adjustment marks. Deep bluish-gray toning blankets much of each side, though brighter olive-gold hues are seen in the protected regions. The opportunity to acquire any 1794 half dime in Mint State is rare, and an example of this seldom-seen variety is rarer still. PCGS# 38582

---

**1796 V-1, LM-1 Half Dime, MS61  
So-Called 'LIKERTY' Variety**

**3641** 1796 LIKERTY, V-1, LM-1, R.3, MS61 NGC. Not a lick of "LIKERTY" is used to describe the LM-1 variety in the Logan-McCloskey reference, although the well-known label has stuck with the variety over the years. In fact, the late die state showing a broken B in LIBERTY does not resemble a K all that much, and remnants of the closed B are usually visible on most examples. This well-struck example shows a narrow bridge spanning both the upper and lower loops of the B.

A more reliable characteristic of the LM-1 variety is the closeness of LI at the base, which is easily distinct from the scarce second die pair for the date (LM-2), which displays a more normally spaced LIBERTY. A single outer berry beneath the D of UNITED is also diagnostic of LM-1, whereas LM-2 has a second outer berry between NI. Both varieties are rare in any Mint State condition.

This example shows glimpses of pleasing mint luster beneath original patination, with golden accents over the medium-gray surfaces. Bold detail is evident on Liberty's hair strands and the eagle's breast feathers. The only significant marks are from heavy die clash, which is readily apparent on both sides of the coin. Census (LM-1 variety): 2 in 61, 12 finer (10/14). PCGS# 38596

**1803 Half Dime, AU50  
V-1, LM-2, Leaf Joined to C  
Large 8 Variety**

**3642** 1803 Large 8, V-1, LM-2, R.4, AU50 PCGS. While scarce, the LM-2 variety is the second-most available die pair of the date — less common than LM-3 with the leaf distant from the C in AMERICA, but more obtainable than the small 8 LM-1 rarity. This example displays colorful blue and orange-gold highlights over silver-gray surfaces, with ample hints of remaining mint luster. Light wear on the high points does not disturb a sharp strike on the devices. With a comparatively large mintage of 37,850 pieces, the 1803 half dime is a popular date for type collectors needing an example of the Draped Bust/ Heraldic Eagle design. PCGS# 38608

**BUST HALF DIMES**

**1831 Half Dime, V-5, LM-5, MS66  
Frosty Original Luster**

**3643** 1831 V-5, LM-5, R.1, MS66 PCGS. An immensely attractive Premium Gem type coin, this largely untuned representative showcases unabraded, softly frosted devices set against semiprooflike mirroring in the fields. Slight striking softness is noted on the left edge of the shield and IB in PLURIBUS, but the devices are otherwise sharply impressed. The 1831 half dime, with a mintage of more than 1.2 million coins, is a relatively plentiful issue in the context of the series, but its availability declines significantly in Gem and finer grades. Population: 46 in 66 (1 in 66+), 11 finer (10/14). PCGS# 38660

**1832 Half Dime, MS66  
V-5, LM-8.2, Nearly Brilliant**

- 3644** 1832 V-5, LM-8.2, R.3, MS66 PCGS. A wisp of almond-gold toning visits this otherwise brilliant Premium Gem. The strike is bold aside from the BU in PLURIBUS. Essentially unabraded. Coinage of the present die pair was interrupted on at least three occasions, with one die or the other used to strike other varieties before they were reunited. LM-8.2 has a die crack through the E in UNITED, but the upper loop of the first S in STATES is without a break. PCGS# 38671

**1833 Half Dime, Richly Toned MS67  
V-7, LM-1, Undoubtedly the Finest for the Variety**

- 3645** 1833 V-7, LM-1, R.3, MS67 NGC. CAC. Ex: "Col." E.H.R. Green. This scarcer die pairing is most easily attributed by the high final 3 in the date on the obverse, and the small period on the reverse that is the same size as the dentils. This is an early die state as seen by the almost non-existent die cracking on the reverse. The only crack we see is from the lower right corner of the scroll to the top of the eagle's wing. The V-7, LM-1 is also a conditionally challenging variety. The LM reference states: "Examples above EF are difficult to locate." The finest piece cited in their 1998 reference was from a Bowers and Merena auction from 1991, an MS63. This example is undoubtedly the finest known for the variety, and it is tied with two dozen others as finest for the date. Each side is remarkably free from abrasions, and as expected from the coins from the landmark Newman Collection, both obverse and reverse are beautifully toned in shades of blue-gray and rose with powerful underlying mint luster. Census: 16 in 67 (2 in 67 ★), 0 finer (9/14).  
Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$1.75; Eric P. Newman Numismatic Education Society. PCGS# 38686

**1835 V-7, LM-10, Half Dime, MS66+  
Multicolor Patination  
Small Date, Small 5C**

- 3646** 1835 Small Date, Small 5C, V-7, LM-10, R.1, MS66+ NGC. Fire-red, ocean-blue, orange-gold, olive-green, and cream-gray toning endows this sharply struck, coruscating, and undisturbed Premium Gem. An outstanding type representative. The more available of the two Small Date, Small 5C die varieties. A late die state with a filled upper loop on the second S in STATES. PCGS# 38719

**SEATED HALF DIME**

**1849-O Seated Liberty Half Dime, MS65  
Seldom Encountered in Finer Grades**

- 3647** 1849-O MS65 NGC. V-2. Ex: Gardner. The year 1849 holds many fascinations for collectors of U.S. coinage. For only the second time since the start of the U.S. Mint in 1793, every authorized denomination of American coinage was struck (the first occurrence was in 1796), including the new gold dollar denomination. Philadelphia, Charlotte, Denver, and New Orleans were all striking coins, but many of the mintmarked issues are elusive, particularly the 1849-O half dime, which is genuinely rare in any Mint State grade.  
Vibrant mint luster shines through pleasing pastel shades of lavender toning on the well-preserved surfaces of this attractive Gem. The design elements are well-detailed for the issue, and two minor contact marks on Liberty's left (facing) arm are the only visible flaws. Census: 3 in 65 (1 in 65 ★), 3 finer (9/14).  
Long Beach Signature (Heritage, 1/1999), lot 6289. NGC ID# 233E, PCGS# 4344

## EARLY DIME

1800 JR-2 Dime, MS61  
Ex: Green, Newman

- 3648** 1800 JR-2, R.5, MS61 NGC. CAC. Ex: "Col." E.H.R. Green; Eric P. Newman Collection. Only two die varieties of 1800 dimes are known, and JR-2 is slightly rarer than JR-1. There are only five or six Mint State 1800 JR-2 dimes known, including two examples from the Ed Price Collection, and this piece from the Eric P. Newman Collection. Both sides show a few faint hairlines and other trivial marks on the brilliant ivory surfaces with delicate peripheral iridescence. Census (both varieties): 1 in 61, 5 finer (9/14).  
Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$50.00; Eric P. Newman Numismatic Education Society. PCGS# 38755

## BUST DIMES

1834 Large 4 Dime, JR-5, MS65  
Sharp, High-End Example

- 3649** 1834 Large 4, JR-5, R.1, MS65 NGC. Lovely mauve-gray and sea-green patina blanket each side of this well-struck Gem, with rich, satiny underlying mint luster. A lack of relevant signs of contact further heightens the appeal. This is one of the more plentiful varieties, but any 1834 dime achieving the MS65 grade level is seldom encountered.  
Ex: Dallas Signature (Heritage, 11/2005), lot 870. PCGS# 38877

1836 Dime, JR-3, MS64+  
Frosty Original Mint Luster

- 3650** 1836 JR-3, R.3, MS64+ PCGS. CAC. Wide 10 C. Three die marriages were employed for this issue, utilizing three obverse and three reverse dies. JR-3 is one of the two more elusive varieties, but is still obtainable in Mint State. The present example displays full design definition, with heavily frosted luster and subtle olive-gray toning around the margins. Only a few minute surface grazes preclude full Gem status. Clash marks are noted on each side, as is typical for the variety. PCGS has certified only 14 numerically finer 1836 dimes, all varieties included (9/14). PCGS# 38890

## SEATED DIMES

1871 Dime, Rare MS66  
Beautiful Rainbow Toning

- 3651** 1871 MS66 PCGS. CAC. Fortin-102a, R.3. The 1871 proof die pair was retired to produce this business strike variety, explaining the semiprooflike mirroring that illuminates the fields. The strike is crisp throughout, and each side showcases vivid ribbons of rainbow toning overall. Surface flaws are seemingly nonexistent, and the eye appeal is exceptional. Population: 7 in 66, 0 finer (9/14). NGC ID# 23A4, PCGS# 4653

**1872-CC Dime, AU50**  
**Low-Mintage Carson City Issue**  
**Extremely Rare This Nice**

**3652 1872-CC AU50 PCGS. Fortin-101, High R.5 in AU.** Two die pairs were shipped to Carson City for dime coinage in 1872, but only one was ever employed, striking just 35,480 pieces. These circulated extensively, with the result that the issue is scarce in all grades, and distinctly rare finer than VF. Only a few AU coins have been certified, and only a single Mint State piece is known, a PCGS MS63 coin. In any grade, eye-appealing representatives are nearly nonexistent, as many have been cleaned, retoned, or otherwise altered in a fruitless attempt to make them more attractive.

This is a late die state example, with the characteristic crack visible horizontally through the mintmark. The detail is sharp, with only slight friction detected over the devices. Each side displays uniform lavender-gray toning, with faint traces of luster shining through when tilted beneath a light. Population: 1 in 50, 2 finer (9/14). NGC ID# 23A8, PCGS# 4657

**1873-CC Dime, AU Sharpness**  
**Key Carson City Issue**

**3653 1873-CC Arrows — Cleaning — PCGS Genuine. AU Details. Fortin-101.** Only one die variety is known for this rare Carson City issue, struck to the extent of only 18,791 pieces; a thin die crack through the mintmark on the reverse serves as a diagnostic of genuine examples. This piece displays deep gunmetal-blue toning over the obverse, with lighter silvery-gray color on the reverse. PCGS notes evidence of old cleaning, though the specialist will appreciate the bold detail and still-pleasing eye appeal. A satisfactory example of this must-have Seated dime issue.

**1877-CC Dime, MS67**  
**Type Two Reverse, Fortin-105**

**3654 1877-CC MS67 PCGS. CAC. Fortin-105, R.3. Type Two Reverse.** Both sides exhibit numerous peripheral die cracks that allow ready attribution. This fully struck and highly lustrous Superb Gem is brilliant aside from a hint of golden patina. Devoid of contact, although faint clash marks are apparent on both sides. Population: 5 in 67, 0 finer (10/14). Ex: *Long Beach Signature* (Heritage, 9/2002), lot 6230. NGC ID# 23AM, PCGS# 4683

**1891-S Dime, MS66**  
**Vivid Obverse Patina**

**3655 1891-S MS66 PCGS. CAC. Fortin-110, R.2.** Beautiful toning in shades of orange-gold violet, and aquamarine blanket the obverse, while the reverse displays just a blush of light golden color over radiant mint bloom. The strike is well-executed and abrasions are limited to a few faint, grade-consistent luster grazes. The 1891-S was moderately well-saved as a final-year issue, but examples grading as high the Premium Gem level are decidedly rare. Population: 8 in 66, 2 finer (10/14). NGC ID# 23BF, PCGS# 4708

## PROOF SEATED DIMES

1865 Dime, Toned PR66  
Rare High-End Example

- 3656 1865 PR66 PCGS. CAC. Fortin-102, R.4.** Substantial die rust on the figure of Liberty is characteristic of this die pair, which was later employed for regular business strike coinage. As a date, the 1865 proof dime is not overly elusive in the context of the series, but is nonetheless scarce at the Gem grade level and rare any finer. This Premium Gem representative displays glassy mirroring in the fields with sharp definition on the relief elements. Teal and sea-green hues encompass each side, making this piece ideal for the toning enthusiast. Population: 6 in 66, 2 finer (10/14). NGC ID# 23CN, PCGS# 4758

1868 Seated Liberty Dime, PR66  
Elusive Cameo Example

- 3657 1868 PR66 Cameo NGC.** A spectacular Premium Gem proof from a mintage of just 600 pieces, this coin displays sharply detailed frosty design elements that contrast boldly with the deeply mirrored fields. The well-preserved surfaces show a few hints of pale gold toning, adding to the outstanding eye appeal. Census: 5 in 66 Cameo (2 in 66 ★ Cameo), 0 finer (10/14). PCGS# 84761

1872 Dime, PR67 Cameo  
Attractive Peripheral Toning

- 3658 1872 PR67 Cameo PCGS. Fortin-103, R.3.** This proof issue is seldom seen with cameo contrast and is exceedingly rare with such at the Superb Gem grade level. This piece is tied with just one other for the finest graded at PCGS (10/14). Vivid aquamarine and violet peripheral toning surrounds brilliant centers, while the fully frosted devices impart excellent field-motif contrast. The upper-left portion of the wreath is not fully defined, but the strike is otherwise sharp. PCGS# 84765

1880 Seated Liberty Dime, PR68  
Tied for Finest at PCGS

- 3659 1880 PR68 PCGS. CAC. Ex: Simpson.** A generous proof mintage of 1,355 Seated Liberty dimes was achieved in 1880 and this magnificent PR68 specimen is among the finest survivors. This coin offers sharply detailed design elements and deeply mirrored fields, and the impeccably preserved surfaces are blanketed in attractive shades of cerulean-blue and pale gold toning. Population: 2 in 68, 0 finer (10/14). NGC ID# 23D5, PCGS# 4777

## BARBER DIMES

1908-O Barber Dime, MS67  
Resplendent Toning  
Tied for Finest Certified

- 3660 1908-O MS67 NGC. CAC. Ex: Eric P. Newman Collection.** The 1908-O Barber dime is available through near-Gem with a little bit of patience. However, MS65 and finer examples are rare, and in the lofty grade of MS67, NGC and PCGS combined have seen fewer than 10 specimens and none finer. Yellow-gold patina dominates the obverse, with just a touch of violet in the center. The reverse displays the same coloration, but the violet center is much more extensive and confines yellow-gold patina to the margin. The design elements are well-impressed, a typical attribute of the issue. Vibrant luster emanating from the impeccably preserved surfaces further enhances the pleasing eye appeal, aptly recognized by CAC. Census: 4 in 67, 0 finer (10/14). NGC ID# 23F9, PCGS# 4848

---

**1909-O Dime, MS66+  
Bold Original Toning**

- 3661 1909-O MS66+ PCGS.** This eye-catching Premium Gem showcases vibrant cartwheel luster beneath blended shades of russet, amber, green-gold, and aquamarine toning. The strike is razor-sharp and the surfaces are almost flawlessly preserved. This New Orleans issue is scarce across the Mint State spectrum, and is rare finer than MS65. Population: 14 in 66 (3 in 66+), 2 finer (9/14). NGC ID# 23FD, PCGS# 4852

---

## MERCURY DIMES

---

**1917-D Dime, MS65 Full Bands  
Bold Obverse Toning**

- 3662 1917-D MS65 Full Bands PCGS.** The 1917-D Mercury dime is usually seen fairly well-struck, but the availability of Gem Full Bands representatives is stunted by the scarcity of high-grade examples of the date overall. This piece shows vibrant luster and bold design elements. The reverse displays just a light golden tint, though the obverse boasts vivid pine-green, amber-gold, pale olive, ocean-blue, and lavender-gray toning. Population: 42 in 65 Full Bands, 10 finer (10/14). NGC ID# 23H3, PCGS# 4913

---

**1918-D Dime, MS65 Full Bands  
Tack-Sharp Relief Elements**

- 3663 1918-D MS65 Full Bands PCGS.** Like its quarter dollar counterpart, the 1918-D Mercury dime is a notable strike rarity in Gem or finer grades; despite its relatively high war-time mintage (more than 22 million pieces), few well-struck examples survive in any grade, and most of those that do are still a trifle weak on the lower diagonal band on the reverse. This piece is a refreshing exception in that regard, exhibiting full definition throughout the bands and peripheral lettering, as well as on the obverse hair curls and cap feathers. Varying shades of olive and violet toning encompass much of the peripheral recesses, leaving soft silvery-gray luster over the centers, while the underlying surfaces are seemingly undisturbed to the unaided eye. Population: 27 in 65 Full Bands, 3 finer (9/14). NGC ID# 23H6, PCGS# 4919

**1942 Dime, MS68 Full Bands  
Condition Rarity, Tied for Finest Certified**

**3664 1942 MS68 Full Bands PCGS.** The 1942 Mercury dime is a plentiful date through the MS67 grade level, but for the Registry Set collector, a handful of rare Superb coins are certified at the MS68 level, these trading hands only on an extremely limited basis. This example displays a crisp full strike and bright mint frost. Traces of iridescent champagne and ice-blue color grace the outer margins, while the surfaces are seemingly pristine, even upon close examination. Population: 7 in 68 Full Bands, 0 finer (9/14). NGC ID# 23K3, PCGS# 5035

**1942/1-D Dime, Full Bands Near-Gem  
Lightly Toned Key**

**3665 1942/1-D FS-101 MS64 Full Bands PCGS.** The 1942/1-D is not only an overdate but a doubled die made from hubs with different dates, with the effect most plain on IN GOD WE TRUST. This well-struck and impressively preserved near-Gem is brilliant aside from a hint of pale golden toning. A great example of a variety that is conditionally rare any better. Population: 37 in 64 Full Bands, 32 finer (9/14).

*Ex: Dallas Signature (Heritage, 11/2006), lot 599; Central States Signature (Heritage, 2/2012), lot 4150. PCGS# 145476*

**1944 Dime, MS68 Full Bands  
Major Rarity at This Grade Level**

**3666 1944 MS68 Full Bands PCGS.** The 1944 Mercury dime is a common issue in an absolute sense, and circulated pieces are often found in bulk bags of "junk" silver. However, at the Superb Gem grade level with a Full Bands designation, the date suddenly becomes elusive and draws an entirely different group of collectors. The piece here-offered is one of just three MS68 Full Bands coins certified by PCGS and NGC combined (two pieces and one piece, respectively), and none are finer (9/14). Frosty, silvery-white luster graces virtually flawless surfaces, while the design definition is exceptional. Close examination reveals faint die striations in the fields, though these do not detract from the immense visual appeal. NGC ID# 23KB, PCGS# 5051

## PROOF ROOSEVELT DIME

1968 No S Roosevelt Dime, PR68  
Premier Modern Proof Rarity

**3667 1968 No S PR68 PCGS. FS-501.** All proof coin varieties with missing mintmarks are highly sought-after, but the 1968 No S proof Roosevelt dime is one of the rarest of all. During this period, working dies were made in Philadelphia and shipped to the branch mints, where their respective mintmarks were later added before coinage. The 1968 No S proof dime was created when the mintmark was omitted from a proof die. It is apparent that mint personnel quickly realized the error and changed out the die, as few examples of the No S dime are known to exist in any grade. PCGS and NGC combined have certified only 39 pieces (9/14), and even this low figure likely includes a number of resubmissions. In their *100 Greatest U.S. Modern Coins*, where the 1968 No S dime is ranked as high as number three, Scott Schechter and Jeff Garrett suggest as few as 24 examples are in the hands of collectors.

This piece is boldly struck, with deeply mirrored fields and outstanding preservation. A faint blush of light golden toning adds a degree of warmth to each side. Population: 9 in 68, 0 finer (9/14). NGC ID# 27F3, PCGS# 5245

## TWENTY CENT PIECE

1876 Twenty Cent Piece, MS66  
Radiant, Multicolor Surfaces

**3668 1876 MS66 PCGS. CAC.** The Philadelphia Mint produced only two business strike issues in the short-lived twenty cent denomination, the 1875 and 1876. Both experienced fairly low mintages, but the 1876 boasts the lower with a total of only 14,400 coins. The date is the second-rarest in the series overall, behind only the ultra rare 1876-CC, and is many times scarcer in Mint State than is the 1875-S type issue. This Premium Gem example is well-struck on the eagle's legs and talons, as well as on Liberty's head and all obverse stars. Attractively blended sea-green, blue, and lavender-gray hues encompass each side, giving this beautifully preserved coin a high degree of appeal. Population: 15 in 66, 3 finer (9/14). NGC ID# 23R8, PCGS# 5299

## SEATED QUARTERS

### 1838 No Drapery Quarter, MS64 Popular First-Year Issue

- 3669 1838 No Drapery MS64 PCGS. Briggs 1-A.** Ex: Troy Wiseman Collection. A transitional year with the Capped Bust design completed and the Seated Liberty design begun. Although somewhat unevenly struck with several flat stars at the top of the obverse, this is a lovely near-Gem representative of the short-lived No Drapery Seated Liberty design. Both sides are vibrant with frosty silver luster and a splash of champagne toning. Population: 26 in 64 (2 in 64+), 7 finer (9/14).  
Ex: *Long Beach Signature* (Heritage, 9/2006), lot 1512. NGC ID# 23SE, PCGS# 5391

### 1839 No Drapery Quarter, MS63 Open Claws Reverse Late Die State

- 3670 1839 No Drapery MS63 PCGS. Briggs 1-A.** A frost-white coin, untuned with sharp silver luster save for a slight golden tinge at the uppermost obverse. The Open Claws reverse is somewhat more scarce than the Closed Claws varieties (Briggs 2-B and 3-B). This example shows the diagnostic die cracks of the latest die state, with a bold crack from below 1 in the date through the rock to stars 2 and 3 and to the edge. A reverse crack bisects the entire coin from T of UNITED to R of AMERICA. Despite the late state of the dies, this is a sharply struck No Drapery coin with complete star centers and a bold eagle. Population: 12 in 63, 18 finer (10/14). NGC ID# 23SF, PCGS# 5392

### 1840-O Seated Quarter, MS64 Drapery at Elbow, Small O Mintmark

- 3671 1840-O Drapery MS64 PCGS. Briggs 1-B.** Small O mintmark. A mintage of just 43,000 pieces includes both Large and Small mintmark varieties, with the Large mintmark much rarer than the Small one. While this example is the more available variety, it is rare in near-Gem condition. Frosted, silver-gray fields are deeply lustrous and attractive. The strike is bold for a New Orleans issue, with prominent dentils on both sides and hints of rose and smokey-umber toning at the rims. A few wispy field lines do not diminish the substantial appeal. Just two pieces are certified finer at PCGS, and none at NGC. Population: 9 in 64, 2 finer (9/14). NGC ID# 23SJ, PCGS# 5398

### 1843-O Quarter, MS63 Scarce Early O-Mint Issue

- 3672 1843-O MS63 PCGS. Briggs 1-B.** Small O. Despite a moderate mintage of nearly 1 million coins, the 1843-O is just as scarce in high grades as are most other pre-1853 Seated quarter issues. Mint State examples are distinctly rare, but when found, often exhibit remarkably sharp strikes. This Select example is an exceptional coin in that regard, with satiny luster beneath a veil of light golden toning. Semiprooflike fields complement a lack of any significant abrasions. Population: 3 in 63, 1 finer (9/14). NGC ID# 23SS, PCGS# 5405

### 1848 Quarter, Toned MS64 Elusive Early Seated Liberty Issue

- 3673 1848 MS64 NGC. CAC. Briggs 1-A.** This piece represents the scarcer doubled date variety, with all four date numerals widely repunch right. The other variety for this issue exhibits triple punching on the 1 in the date, and double punching on the second 8. No plain date varieties are known. This Choice example displays blended olive-gold and sea-green toning over each side, with satiny underlying mint luster. The eagle's left (facing) leg is slightly soft, though the strike is otherwise well-executed. Census: 3 in 64, 2 finer (10/14). NGC ID# 23SZ, PCGS# 5412

**1849-O Quarter, AU55  
Significant Pre-1853 Rarity**

- 3674 1849-O AU55 NGC. Briggs 1-A.** The 1849-O is a major pre-1853 key date in the Seated quarter series. The mintage figure for this issue was not recorded by the New Orleans Mint, and it is believed about 16,000 of the 412,000 quarters counted in the 1850-O mintage were of the 1849-O date. Whatever the case, the survival rate of this issue was a staggeringly low, a combination of heavy circulation and moderate melting during the height of the California Gold Rush. A few Mint State examples survive, but these are prohibitively rare. This Choice AU representative displays varying shades of battleship and tan-gray toning, with essentially complete detail. A very pleasing example of this sought-after issue. Census: 2 in 55, 8 finer (9/14). NGC ID# 23T3, PCGS# 5414

**1853/53 No Arrows Quarter, MS62  
Seldom Seen in Any Grade**

- 3675 1853/53 No Arrows, Briggs 1-A, FS-301, MS62 NGC.** Ex: S.M. Damon Collection. The 5 and 3 in the date are plainly recut north. As only one die pair is known, this characteristic is present on all No Arrows 1853 quarters, and serves as a diagnostic of genuine representatives. This issue had a limited mintage of only 44,200 coins before the weight change was implemented, and examples are scarce in all grades. This is a fully struck Mint State example with deep original toning in shades of gunmetal-gray and lavender-gold. A lack of major abrasions gives this piece a high degree of eye appeal for the grade. Census: 1 in 62, 19 finer (9/14). PCGS# 395930

**1856-O Seated Liberty Quarter, MS65  
Exceptional Registry Set Candidate**

- 3676 1856-O MS65 PCGS. Briggs 1-A.** Despite the large mintage of 968,000 pieces, the 1856-O Seated Liberty quarter is a major condition rarity in the series today. The 1856-O was well-produced for a New Orleans issue, but the majority of the mintage circulated widely in the regional economy and few examples were saved by contemporary collectors. This delightful Gem has satiny mint luster with considerable silver brilliance, splashed with brilliant gold, pale lavender, and light blue-green toning. The design elements are well-detailed, with just a touch of the usual softness on Liberty's head and the upper stars. One spidery die crack unites most of the stars on the obverse, and another travels through the bottom of the date. The reverse shows the Large O mintmark. This coin should find a home in the finest collection or Registry Set. Population: 3 in 65, 0 finer (9/14).  
Ex: *Central States Signature* (Heritage, 4/2009), lot 393. NGC ID# 23TC, PCGS# 5439

**1857-S Quarter, MS62**  
Rare in Mint State Grades

- 3677 1857-S MS62 NGC. Briggs 1-A.** With a mintage of only 82,000 pieces, the 1857-S quarter is scarce in circulated grades, but can occasionally be found with patience. Mint State pieces are distinctly rare. Larry Briggs makes the comment that when Uncirculated pieces are located, they “usually have a light golden toning over very frosty surfaces.” This piece fits that description as it possesses bright mint frost that is readily apparent even beneath the light layer of patina. The coin is sharply struck in all areas and only minimally abraded. Census: 2 in 62, 4 finer (9/14).  
Ex: Long Beach Signature (Heritage, 9/2003), lot 6660. NGC ID# 23TG, PCGS# 5444

**1858-S Quarter, AU58**  
The Finest Certified at PCGS

- 3678 1858-S AU58 PCGS. Briggs 2-C.** The typically small mintage of this S-mint issue was a mere 121,000 pieces, and all were needed as circulating coinage at that time in the booming towns and cities of Northern California; especially in San Francisco itself. This attractively toned example is the single finest-certified example at PCGS, where none have been graded in Mint State (10/14). In fact, PCGS has certified only seven examples at all numerical levels of AU. The design elements of this piece exhibit sharp definition, and no marks are individually noteworthy or distracting on either side. Deep gunmetal-gray and midnight-blue toning attests to the originality of the surfaces. NGC ID# 23TK, PCGS# 5447

**1859-S Quarter, XF45**  
Distinguished S-Mint Rarity

- 3679 1859-S XF45 PCGS. Briggs 1-A.** The 1859-S, with a limited mintage of 80,000 coins, is scarce in all grades and rare in the XF to AU range. No Mint State examples are known to the certification services. This Choice XF example displays dusky aquamarine toning around the margins, with light golden centers. Wear is minimal and the coin is quite appealing for the grade. It may be a long time before a similar piece is again offered at auction. Population: 8 in 45, 6 finer (9/14). NGC ID# 23TN, PCGS# 5450

**1862-S Quarter, MS63**  
Conditionally Rare S-Mint Issue

- 3680 1862-S MS63 PCGS. CAC.** A frosty silver-gray example with a few wispy toning specks on the reverse. Numerous tiny luster grazes affect the portrait of Liberty and a barely visible planchet streak glances down the obverse just to the left of the figure. The 1862-S is an extremely challenging issue in all grades, being even rarer than its already low mintage of 67,000 pieces would suggest. Likely no more than a couple dozen pieces exist at the Mint State level. Population: 5 in 63, 2 finer (10/14).  
Ex: ANA Signature (Heritage, 7/2005), lot 6019. NGC ID# 23TW, PCGS# 5457

**1869 Quarter, MS65**  
Low-Mintage Philadelphia Rarity

- 3681 1869 MS65 NGC. Briggs 1-A.** The 1869 quarter is a scarce issue in all grades. Only 16,000 pieces were struck, making it the lowest mintage P-mint quarter from the 1860s. This piece is sharply struck throughout and the fields have a bright, semiprooflike gleam that is most attractive through the golden-brown toning that covers each side, with cobalt-blue around the obverse periphery. Census: 4 in 65 (1 in 65+), 1 finer (9/14).  
Ex: Long Beach Signature (Heritage, 9/2002), lot 6496; Central States Signature (Heritage, 5/2004), lot 6956. NGC ID# 23UH, PCGS# 5474

**1872-S Quarter, XF40**  
Rare in All Grades

- 3682 1872-S XF40 NGC. Briggs 1-A.** Ex: Jules Reiver Collection. A low mintage (only 83,000 pieces), combined with heavy attrition of coins in California during this period make the 1872-S quarter an especially scarce issue in all grades. This example displays bright silvery-gray surfaces that are devoid of mentionable abrasions. Advanced Seated quarter collectors and specialists are keenly aware of the difficulty of locating examples of this issue. NGC has encapsulated only 19 pieces in all grades, two of which are in XF40, with 11 finer (9/14).  
Ex: *Jules Reiver Collection (Heritage, 1/2006)*, lot 21161. NGC ID# 23UT, PCGS# 5483

**1874 Arrows Quarter, MS66**  
Tied for the Finest at PCGS

- 3683 1874 Arrows MS66 PCGS.** The With Motto design featuring Arrows at the date appeared only in 1873 and 1874, and examples are elusive in top grades, such as this Premium Gem. For the type, PCGS has certified 46 examples in MS66 (2 in 66+), and five in MS67. NGC adds 29 pieces certified MS66, and 11 graded MS67. The majority of those pieces at both services are 1874-S quarters.  
This lovely piece is brilliant and untuned with semi-reflective fields and scintillating luster. A few stars are soft, but the balance of obverse and reverse details are bold. Light clash marks are noted on both sides. Population: 5 in 66, 0 finer (10/14). NGC ID# 23VX, PCGS# 5494

**1886 Quarter, MS66**  
Only 5,000 Coins Minted

- 3684 1886 MS66 NGC. Briggs 1-A.** The 1886 Seated quarter is an elusive late-series issue, with a low mintage of only 5,000 pieces. A few high-grade Mint State examples, such as the Premium Gem presented here, survive, but are only infrequently offered. This example is well-struck with satiny luster. The reverse is engulfed in sun-gold and aquamarine toning, while the obverse exhibits peripheral hues of the same around golden-gray and lavender centers. Census: 3 in 66, 1 finer (9/14). NGC ID# 23VJ, PCGS# 5518

**1889 Seated Quarter, MS67+**  
Only Two Finer at PCGS

- 3685 1889 MS67+ PCGS.** Both sides of this frosty Superb Gem display brilliant luster beneath lovely gold, violet, turquoise, and blue toning. The strike is bold with full head, star, claw and feather details. The 1889 had a mintage of just 12,000 business strikes as the Philadelphia Mint and its branches continued to concentrate on the production of silver dollars and double eagles. Population: 39 in 67 (7 in 67+), 2 finer (10/14). NGC ID# 23VM, PCGS# 5522

**1890 Quarter Dollar, Vibrant MS67+**

- 3686 1890 MS67+ PCGS. CAC. Briggs 2-B.** The 1890 Seated Liberty quarter typically shows areas of weakness, especially Liberty's head and the star centers. While this piece does show minor softness on the hair atop Liberty's head, the remaining design elements are sharply rendered, including the star centers. The well-preserved surfaces display just a blush of light golden color, with vibrant mint luster on both sides. This piece is well-deserving of the CAC endorsement as well as the PCGS Plus designation. Population: 23 in 67 (3 in 67+), 0 finer (10/14). NGC ID# 23VP, PCGS# 5523

## PROOF SEATED QUARTERS

### 1857 Quarter, PR66 Tied for Finest Certified

**3687 1857 PR66 NGC. Briggs 7-G.** Ex: Gardner. The proofs dated 1857 are approximately twice as rare as those dated 1858. The *Guide Book* lists a proof mintage of 300 pieces for the 1858 and suggests the 1857 proof mintage was 100 to 150 pieces. However, that figure is likely high, since PCGS estimates the number of proof 1857 survivors as 30 to 40 known. NGC has certified three as PR66 with none finer, while PCGS has yet to encapsulate any above the PR65 level (9/14). The other two PR66 NGC specimens have both appeared in recent Heritage auctions, respectively as lot 4229 in our 2013 Central States Signature, and as lot 4177 in our 2014 FUN Signature.

This piece displays autumn-brown and rose-red color in the fields, while the peripheries are forest-green. A precisely struck and exemplary Premium Gem proof. The motifs exhibit slight frost and might have merited a Cameo designation were it not for the rich original patina. The vertical bulge between the right wingtip and the L in DOL is seen on all 1856 and 1857 proofs.

Ex: Fairchild Family Trust (Ira & Larry Goldberg, 5/2001), lot 566; Northeast Numismatics (7/2001); Eugene H. Gardner Collection. NGC ID# 23WJ, PCGS# 5553

### 1872 Seated Quarter, PR68 One of Three Numerically Finest-Graded

**3688 1872 PR68 NGC.** From a mintage of 950 coins, this exemplary proof specimen is one of the three finest-graded examples (one of which is an NGC PR68 Cameo). The magnificent visual appeal of the piece is its most noteworthy attribute, but the highest degree of technical merit is likewise seen on each side. The untuned silvery-gray central motifs are framed on each side by gorgeous layers of deep champagne, gold-brown, and purple peripheral patina. The surfaces are splendidly preserved and free of even minor flaws. Census: 2 in 68, 0 finer (10/14). NGC ID# 23X5, PCGS# 5571

### 1877 Seated Quarter, PR66 Cameo Only Three Finer PCGS Cameo Proofs

**3689 1877 PR66 Cameo PCGS.** A hint of delicate gold toning appears on the obverse of this Premium Gem Cameo proof. The reverse is mostly toned in pale blue and violet, with an area of untuned silver brilliance. Although a plentiful proof issue, the 1877 is elusive in finer grades. Population: 3 in 66 Cameo, 3 finer (9/14). PCGS# 85578

**1879 Quarter, PR66**  
**Exceptional Toning and Contrast**

- 3690 1879 PR66 PCGS. CAC.** Exceptional cobalt-blue and iridescent toning appears over the entire obverse and reverse surface of this highly appealing Premium Gem proof. The boldly detailed devices contrast nicely with the deeply mirrored fields, although the toning prevents a Cameo designation. Population: 15 in 66, 1 finer (9/14). NGC ID# 23XB, PCGS# 5580

**1882 Quarter, PR67**  
**Intense Multicolor Toning**

- 3691 1882 PR67 PCGS. CAC.** Despite a moderately substantial mintage of 1,100 coins, the proof 1882 Seated quarter is scarce above the Gem grade level and becomes genuinely rare in PR67, with or without cameo contrast. This Superb representative showcases incredible multicolor toning, with concentric bands of green-gold, royal-blue, violet, and orange-gold on the obverse, and flashy green-gold peripheral toning around a deep blue center on the reverse. A sharp strike and deep mirroring in the fields only adds to the immense visual appeal. Population: 11 in 67, 0 finer (9/14). NGC ID# 23XE, PCGS# 5583

**1883 Quarter, PR65+ Deep Cameo**  
**Bold Field-Motif Contrast**

- 3692 1883 PR65+ Deep Cameo PCGS. CAC.** Proof 1883 Seated quarters are readily available in an absolute sense, but Cameo representatives are seldom seen, and Deep Cameos are genuinely rare. This piece is the sole finest of just six so-designated examples at PCGS, even if only by the margin of a Plus designation (10/14). Heavily frosted, sharply impressed devices yield to fully mirrored fields, while the surfaces are void of contact marks. A thin ring of light golden toning around the extreme outer peripheries is the only trace of color. PCGS# 95584

**BARBER QUARTERS**

**1892 Quarter, MS67**  
**Type One Reverse**

- 3693 1892 MS67 PCGS.** Type One Reverse. Splendid forest-green, dove-gray, and lavender toning encompasses this lustrous and unabraded high grade Barber type coin. The strike is bold except for blending on the eagle's claws and fletchings. The 1892 was set aside in quantity as the first issue of a new design, but few survivors approach the pristine quality of the present Superb Gem. Population: 29 in 67 (3 in 67+), 3 finer (9/14). NGC ID# 23XT, PCGS# 5601

**1896-S Barber Quarter, AU53**  
**Pleasing Key-Date Example**

- 3694 1896-S AU53 PCGS.** One of three key dates in the Barber quarter series, the 1896-S issue had a low mintage of 188,039 pieces. Mint State examples are rare, and the current AU grade is much more affordable. A nicer AU53 coin would be hard to imagine, as the current coin offers attractive light toning and minimally disturbed surfaces. Population: 4 in 53, 42 finer (10/14). NGC ID# 23Y9, PCGS# 5615

**1897 Quarter Dollar, MS67**  
**Among the Finest Known**

- 3695 1897 MS67 PCGS.** Claiming a mintage in excess of 8 million coins, the 1897 Barber quarter is one of the more plentiful issues of the period from an absolute standpoint, but like most dates in the series, it becomes scarce at the Gem grade level and is rarely seen finer. This piece is tied with just three others as the finest certified at PCGS, and is rivaled only by a single numerically equal example at NGC (10/14). Satiny luster shines through shades of yellow-gold, lavender-gray, and aquamarine toning on each side, with no obvious signs of contact observed upon close examination. The strike is bold throughout, though some minor die lapping is noted in the eagle's feathers around the shield and behind Liberty's ear. NGC ID# 23YA, PCGS# 5616

---

**1901-S Barber Quarter, VG8**  
**Attractive Key-Date Example**

**3696 1901-S VG8 PCGS.** The smooth medium-gray surfaces of this key-date example are well worn but unimpaired by evidence of improper cleaning or other methods of artificial "improvement." The date and peripheral legends are intact, and the major central devices are well-outlined. An affordable example of this issue that is needed by many collectors for a complete date set of business strike Barber quarters. NGC ID# 23YR, PCGS# 5630

---

**1907 Quarter, MS68**  
**Sole Finest Graded**

**3697 1907 MS68 NGC.** This Superb Gem 1907 Barber quarter displays mostly brilliant surfaces with a dash of ice-blue toning and no visible surface flaws. The design elements are sharply detailed throughout. Vibrant mint luster adds to the incredible eye appeal. This abrasion-free coin is the sole MS68 example at either leading grading service, and none are finer (9/14). NGC ID# 23Z8, PCGS# 5645

---

**1913-S Quarter, VF30**  
**Important Key Date**

**3698 1913-S VF30 PCGS.** The 1913-S Barber quarter boasts the lowest business strike mintage of the entire series. Along with the 1901-S and the 1896-S, this is one of the three primary key dates of this popular type. Each side of this midgrade VF specimen displays an even coating of mauve-gray patina. There are no large or distracting marks on either side of the coin, save for a minor dig on the right (facing) wing. NGC ID# 23ZW, PCGS# 5666

---

**1916-D Quarter, MS67**  
**Seemingly Unrivaled Visual Appeal**

**3699 1916-D MS67 PCGS. CAC.** The 1916-D Barber quarter is readily obtainable in grades through MS66, but the advanced specialist will find it challenging to locate an example in MS67. This piece is one of only 14 such coins certified at PCGS, with none finer (9/14). The preservation is seemingly flawless and the strike is crisp, save for star 11 which is not fully defined. Heavily frosted, radiant mint bloom engulfs each side, and the surfaces are essentially untuned, save for a few faint wisps of ice-blue and pale lavender-gold color that are noticed when turned beneath a light. NGC ID# 2426, PCGS# 5674

## PROOF BARBER QUARTERS

1899 Quarter, PR67+ Deep Cameo  
Profoundly Rare This Well-Contrasted  
Tied for Finest Certified at PCGS

**3700 1899 PR67+ Deep Cameo PCGS. CAC.** This Superb Gem proof 1899 Barber quarter offers collectors the best of both worlds: lightly toned on one side, essentially brilliant on the other, and starkly contrasted between fields and devices on both. The obverse sports a veil of light golden toning that transitions to deeper russet, lilac, and steel-blue around the periphery, and spills over onto the extreme outer rims of the reverse. It is difficult to conceive of deeper field-device contrast, however, than that seen on this remarkably well-struck and well-preserved specimen. The proof strike is uniformly full throughout both sides. The proof 1899 quarter is not challenging in an absolute sense, but deeply contrasted examples are extremely rare. Population: 3 in 67 (2 in 67+) Deep Cameo, 0 finer (9/14). PCGS# 95685

1902 Quarter, PR67 Cameo  
Pristinely Preserved

**3701 1902 PR67 Cameo PCGS.** The surfaces on this Superb Gem Cameo 1902 proof quarter are virtually untoned on the obverse save for a hint of copper color near the rim, which broadens out on the reverse into noticeable accents of the same hue. The strike verges on full, and there are no mentionable signs of contact. An attractive Cameo example from the first year the Mint strove to veer away from contrasted proofs. Population: 4 in 67 Cameo, 0 finer (9/14). PCGS# 85688

1907 Barber Quarter, PR68 Cameo  
Elusive Contrasted Proof

**3702 1907 PR68 Cameo NGC. CAC.** By the early 1900s, Cameo contrast on proof coins was a thing of the past, as officials at the new third Philadelphia Mint facility suppressed the appearance of frosted proof coinage. While today's collectors covet Cameo and Deep Cameo proofs, Mint officials found them unattractive.

This amazing Superb Gem features excellent field-to-device contrast. The obverse has swirls of gold and iridescent toning, while the reverse is almost entirely untoned, save for delicate peripheral iridescence. NGC has certified three in PR68 Cameo, one in PR68 Ultra Cameo, and one in PR69 (10/14). PCGS# 85693

---

### 1909 Quarter, Deeply Toned PR67

- 3703 1909 PR67 PCGS. CAC.** With a low mintage of only 650 pieces, the proof 1909 quarter is elusive at the Superb Gem grade level, with or without cameo contrast. This coin displays exceptional preservation and razor-sharp design definition, with subtle field-motif contrast seen on the obverse. Each side is awash in vibrant color, with deep sea-green, bluish-gray, and lavender hues over the obverse, and splashes of champagne, amber, violet, and aquamarine across the reverse. Population: 20 in 67 (1 in 67+), 6 finer (10/14). NGC ID# 242R, PCGS# 5695

---

### 1911 Barber Quarter, PR68 Cameo Remarkable Example

- 3704 1911 PR68 Cameo NGC.** This is a well-produced, low-mintage issue of just 543 pieces. This specimen ranks as one of the finest-known examples, a ranking that is well-deserved. The stunning visual appeal and unsurpassed technical merit of this remarkable coin includes expectedly full strike definition and gorgeous field-to-device contrast between richly frosted motifs and deeply mirrored fields. Census: 12 in 68 Cameo (2 in 68 ★ Cameo), 2 finer (10/14). PCGS# 85697

---

### 1912 Quarter, PR66+ Cameo Well-Contrasted and Lightly Toned

- 3705 1912 PR66+ Cameo PCGS. CAC.** Generous contrast is created by well-frosted devices against the deeply mirrored fields. The surfaces show just a hint of pinkish-copper color on each side. A loupe reveals no mentionable contact, although minor strike weakness shows on the right shield corner and the right claw of the eagle. Population: 7 in 66 (1 in 66+) Cameo, 8 finer (9/14). PCGS# 85698

---

## STANDING LIBERTY QUARTERS

### 1916 Standing Liberty Quarter Luminous MS63 Full Head

- 3706 1916 MS63 Full Head NGC.** The 1916 Standing Liberty quarter's allure stems not only from its low mintage (52,000 coins) and first-year issue status, but also from its scarcity with Full Head detail. The working dies from the 1916-dated hub lacked sharp definition on most of the design features, but since production did not even begin until the final two weeks of December, the problem was only addressed on the new 1917-dated hub. All 1916 quarters, therefore, are highly prized if located with Full Head detail.

This example shows a pleasing level of sharpness for the issue, with broad rims and bold eagle feathers. Light golden-gray toning blankets each side, revealing vibrant underlying luster when tilted beneath a light. NGC ID# 242Y, PCGS# 5705

---

**1918-S Quarter, MS65 Full Head  
Sharp Throughout**

- 3707 1918-S MS65 Full Head NGC.** Production quality at the San Francisco Mint decreased in 1918, and this is reflected in the rather small number of Full Head 1918-S Standing Liberty quarters certified at the Gem grade level. Furthermore, many Full Head examples are still weak in the central regions, and finding a coin that is sharp on the shield, gown folds, and stars is exceedingly difficult. This representative is an exceptional coin in that regard, with bold definition also seen on the date, Liberty's toes, and the leading edge of the eagle's left (facing) wing. Liberty's head is full and the shield is far above-average, with just a touch of softness on rivets 3 and 4. Light golden toning warms both sides, and a faint luster graze on Liberty's thigh is all that precludes an even finer grade. Census: 16 in 65 Full Head, 6 finer (10/14). NGC ID# 2439, PCGS# 5725

**1921 Quarter, MS65 Full Head  
Important Key Date**

- 3708 1921 MS65 Full Head PCGS. CAC.** This low-mintage Philadelphia issue is well-known as a key date in all grades, but Full Head examples are the most highly prized by specialists. The head and shield details on this piece are sharp, and bold definition is also seen on the eagle's breast and wing feathers. The date numerals are weakly defined, however, a characteristic to which this specific issue is unusually prone; the first 1 is barely discernable, but the 921 are readily identifiable, if still flat. Still, there are no singular signs of contact, and the surfaces boast delightful golden-silver toning over splendid luster. Population: 51 in 65 (1 in 65+) Full Head, 20 finer (10/14).  
*Ex: Boston Signature (Heritage, 8/2010), lot 4107.* NGC ID# 243H, PCGS# 5741

**1923-S Quarter, MS66  
Significantly Scarce at This Grade Level**

- 3709 1923-S MS66 PCGS. CAC.** The 1923-S ranks as one of the major series keys all the way down to the lower circulated grades. Examples certified at the MS66 grade level are seldom seen, with or without Full Head detail. The present coin is not quite full on Liberty's head, but is well-struck elsewhere, including bold date numerals. The obverse displays scattered splashes of deep lemon-gold toning, and the reverse is largely covered by the same. Population: 29 in 66 (1 in 66+), 5 finer (10/14). NGC ID# 243K, PCGS# 5744

**1924-D Quarter, MS66 Full Head  
Uncharacteristically Sharp**

- 3710 1924-D MS66 Full Head PCGS. CAC.** The 1924-D quarter is typically quite poorly struck, with little to no head detail, several missing shield rivets, and profound flatness on the upper half of the date due to a excessive die wear. The importance of this offering to the advanced specialist, therefore, cannot be overstated. Liberty's head and the date numerals are bold, and the shield is far above-average, with rivets 3 and 4 weak, but present. The stars are also sharp and the eagle's feathers show better definition than is typically seen. Traces of light golden color grace otherwise brilliant, satiny surfaces. Numerous peripheral die cracks are observed on each side, not uncommon for the issue. Population: 17 in 66 Full Head, 2 finer (10/14). NGC ID# 243M, PCGS# 5749

**1924-S Quarter, MS65 Full Head**  
**Important Strike Rarity**

- 3711 1924-S MS65 Full Head PCGS. CAC.** This Gem displays pale silver-gold patina overall, with subtle arcs of amber-gray also present around the upper obverse and reverse margins. The motifs are notably well-defined for this challenging S-mint issue, with special notice given to Liberty's head, the shield rivets, and the leading edge of the eagle's left (facing) wing, all of which are sharply brought up. The usual die crack is seen through the top half of the date, but the numerals remain bold. Population: 33 in 65 (1 in 65+) Full Head, 10 finer (10/14).  
*Ex: Portland Signature (Heritage, 3/2004), lot 5738; Pittsburgh Signature (Heritage, 8/2004), lot 6058; FUN Signature (Heritage, 1/2009), lot 2687. NGC ID# 243N, PCGS# 5751*

**1925 Quarter, MS67 Full Head**  
**Among the Finest Certified**

- 3712 1925 MS67 Full Head PCGS.** The 1925 is an interesting date in Full Head grades. The certified population data suggests a number of Gem and finer examples are extant, but the issue does not appear at auction as often as it theoretically should. This leads J.H. Cline to question the accuracy of the population figures, suggesting a number of resubmissions are reflected.  
 Of those that do exist, many are sharp enough on Liberty's head to qualify for the appropriate designation, but still show weakness in the central regions, namely the shield rivets and the leading edge of the eagle's left (facing) wing. The specialist will pounce on this example, therefore, not only for its superior numeric grade, but also for its unusually sharp strike. Liberty's head is full and the shield rivets are complete, if still soft around numbers 3 and 4, and the eagle's feathers are well brought up. The reverse displays just a blush of golden toning, while the obverse exhibits vivid rose, gold, and mint-green hues, primarily around the periphery. Population: 9 in 67 (2 in 67+) Full Head, 0 finer (10/14). NGC ID# 243P, PCGS# 5753

## WASHINGTON QUARTERS

1937 Washington Quarter, MS67+  
Tied for the Finest Certified

- 3713** 1937 MS67+ PCGS. CAC. An extraordinary Superb Gem with the coveted PCGS Plus-designation, this beauty exhibits satiny silver luster with delicate powder-blue and champagne toning on both sides. This example is tied with a small number of others for the finest that PCGS or NGC have graded. Population: 81 in 67 (6 in 67+), 0 finer (10/14). NGC ID# 244K, PCGS# 5803

1950-D/S Quarter, FS-601, MS66  
Blazing, Untoned Luster

- 3714** 1950-D/S FS-601 MS66 PCGS. CAC. An elusive *Guide Book* variety, with the D mintmark punched over an errant S. The D is noticeably machine-doubled, as is usually seen. This Premium Gem representative displays radiant frost-white mint bloom and bold design elements. A few faint luster grazes on Washington's jaw and the eagle's feathers are all that preclude an even finer grade. Population: 8 in 66, 2 finer (9/14). PCGS# 145638

1962-D Quarter, MS67  
None Numerically Finer

- 3715** 1962-D MS67 PCGS. Strong silvery-white luster yields to traces of light golden toning around the borders on this nearly pristine Superb Gem. This incredible coin is tied with just eight others at the top of the PCGS population charts (9/14), and ranks nearly half of a grade point finer than the piece represented in the current highest-rated Registry Set. NGC ID# 246R, PCGS# 5873

## EARLY HALF DOLLARS

1794 O-101 Half Dollar, Choice VF  
First Year of Introductory Two-Year Type

- 3716** 1794 O-101, R.4, VF35 PCGS. Close to, but not quite, O-101a, since the die crack between the upper right leaf tip and the second S in STATES appears to be absent. Cracks are evident through the F in OF and between leaves beneath the O in OF. The 1794 is much more elusive than its 1795 Flowing Hair successor, and has added significance as representative of the first year of half dollar production at the First Philadelphia Mint. The present pearl-gray Choice VF example is refreshingly unabraded, although faint mint-made adjustment marks are concealed within Liberty's hair. The wings, tail feathers, and curls display pleasing definition. PCGS# 39200

**1794 Half Dollar, Good 6  
Very Scarce O-106 Variety**

- 3717** 1794 O-106, Low R.6, Good 6 PCGS. Although not as sharply detailed as the Jules Reiver specimen, this is essentially a problem-free example of the variety, which is seldom encountered in any grade. Both sides have pale lilac-gray color, slightly lighter in appearance on the devices. Only a few light faint scratches are noted on each side. Like the Reiver specimen, this is an early die state with no trace of the bisecting obverse die cracks. Most known 1794 half dollars are the O-101 die marriage. Examples of this variety, O-106, are quite rare.  
Ex: *Long Beach Signature* (Heritage, 6/2006), lot 1576. PCGS# 39208

**1795/1795 O-112 Flowing Hair Half  
Dramatic, Double-Punched Date  
Choice VF Example**

- 3718** 1795/1795 2 Leaves VF35 NGC. O-112, R.4. The scarce O-112 die pair showcases one of the most dramatic date-punching blunders in U.S. Mint history — merely calling the spread south “wide” is underselling how incredible it is. A richly toned Choice VF example, the coin shows a range of shadings, from dusky-gold to green and slate-gray. Struck from a late state of the obverse die, the coin also displays one of the most distinctive die cracks of the early half series, with a bold, bisecting die crack that descends from the edge above R in LIBERTY, through the portrait at Liberty’s earlobe, and to the 9 in the date. BE in LIBERTY are broadly recut. Strong detail remains beneath the patina, with a few small marks and small areas of minor roughness. PCGS# 39246

**1806 O-120 Half Dollar, MS64  
Pointed 6, Stem, Fully Struck  
Single Finest Certified**

- 3719** 1806 Pointed 6, Stem, O-120, R.3, MS64 NGC. Light almond-gold and ice-blue toning endows this splendid Draped Bust half. A fully struck near-Gem with dynamic luster and uncommonly smooth surfaces. A brief vertical line on Liberty’s shoulder is mentioned solely as an identifier. A fairly early die state without any evidence of the eventually large die break beneath the horizontal shield lines. Nonetheless, at least four sets of clash marks are prominent above the date, and the left-side stars exhibit die cracks. The sole example certified at the MS64 level by either service as O-120 (10/14).  
Ex: *Bob Bisanz U.S. Type Set* (Heritage, 1/2001), lot 7735. PCGS# 39325

## BUST HALF DOLLARS

### 1812 Large Date Half Dollar O-103, Sharply Defined MS64+

- 3720 1812 Large 8, O-103, R.1, MS64+ PCGS.** The following attribute this variety: stars on left sharp, on right flat; two small dots below I in AMERICA; one dot below U in UNITED; center dot between crossbars 4 and 5 at left. Light golden-tan patina runs over the lustrous surfaces on both sides of this high-end near-Gem, and the design elements are sharply defined, save for the stars along the right border that are always weak in the centers on this variety. Just a few minute marks preclude Gem status. Population for the issue: 64 in 64 (2 in 64+), 24 finer (10/14). PCGS# 39446

### 1825 O-114 Capped Bust Half, MS64+ Likely Condition Census for the Variety

- 3721 1825 O-114, R.1, MS64+ PCGS. CAC.** A combination of accolades separate this coin from other near-Gem examples of the Overton-114 variety, including the important PCGS Plus designation and CAC endorsement for quality and eye appeal. Although two or three Gem coins exist of the die pair, this borderline Gem contender is not far behind in the Condition Census. Lustrous, calico toning is bolstered by a bold strike. Shades of orange, lime-green, aquamarine, and gold intermingle across both sides and there are no mentionable marks or abrasions. PCGS# 39661

### 1826 O-108a Bust Half, MS65 Impressive Eye Appeal

- 3722 1826 O-108a, R.1, MS65 NGC. CAC.** A magnificent Capped Bust type coin. Medium autumn-gold and dove-gray toning graces this smooth and coruscating Gem. Marks are virtually absent, and the strike is sharp except on a few star centers. The pick-up point for Overton-108 is a die line on the drapery above the shoulder curl. The late die state with a delicate crack across UNITED STATES OF. PCGS# 39677

### 1831 Half Dollar, O-109, MS65 Pleasing Original Luster

- 3723 1831 O-109, R.1, MS65 PCGS.** One of the more often seen varieties of this moderately available issue. This example displays vibrant original luster beneath a thin veil of light golden toning. The central obverse is sharp and no signs of the usual die erosion are observed around the periphery, though the border stars are not fully defined. The reverse is also well-struck, though some minor flow lines are noted around the border, as usual. PCGS has certified only seven numerically finer 1831 half dollars in all varieties (9/14). PCGS# 39845

### 1832 O-101a Half Dollar, MS64 Large Letters, Dramatic Die Break

- 3724 1832 Large Letters, O-101a, R.1, MS64 PCGS.** The prominent die break between the branch and left (facing) wing confirms the die marriage. The O-101a crack near the left wingtip is faint but evident. A beautifully toned near-Gem with ocean-blue borders and golden-brown centers. The coruscating surfaces appear unabraded, and the strike is crisp except on the upper left stars and Liberty's forehead. A few tiny spots are noted scattered over the obverse. Ex: *Central States Signature (Heritage, 4/2006)*, lot 1969, which realized \$4,887.50. PCGS# 39886

## REEDED EDGE HALF DOLLARS

### 1837 Reeded Edge Half, MS64 GR-15, Light Golden Toning

- 3725 1837 MS64 NGC. GR-15, R.3.** A fairly scarce die variety interesting for its four cracks on the lower right obverse. A lustrous butter-gold near-Gem. Well struck and uncommonly smooth. A railroad rim is present on the right obverse, likely caused by a slightly misaligned obverse die. 1837 is the only readily collectible issue of the two-year 50 CENTS type, struck with a steam-powered press instead of the screw press used in prior years. Ex: *FUN Signature (Heritage, 1/2004)*, lot 6612. NGC ID# 24G4, PCGS# 6176

**1838 Reeded Edge Half Dollar, MS64  
GR-3, Late Die State**

- 3726** 1838 MS64 PCGS. GR-3, R.2. A diagnostic crack travels from the lower-most olive leaf through the eagle's left (facing) leg and bisects the shield, while another crack connects the top of LF in HALF to confirm the late die state on the reverse. The obverse displays a die crack from the ball of the cap across the top fold and to the rim. This boldly struck coin is a stately example, distinguished by nearly immaculate surfaces and gunbarrel-blue patina. Soft luster shows some tawny olive accents. Population: 54 in 64 (3 in 64+), 10 finer (10/14). NGC ID# 24G5, PCGS# 6177

**SEATED HALF DOLLARS**

**1844-O Half Dollar, AU55  
WB-103, Doubled Date Variety**

- 3727** 1844-O Doubled Date, WB-103, Die Pair 22, R.4, FS-301, AU55 PCGS. One of the most dramatic doubled date varieties of the Seated half dollar series, WB-22 exhibits a widely repunched date north of the primary. This is the only use of both dies, and the variety is in high demand among specialists. This Choice AU example displays light golden toning over bright, steel-gray surfaces. Light high-point wear accounts for the grade. The errant date numerals are plain to the unaided eye. Population: 3 in 55, 3 finer (9/14). PCGS# 145817

**1846 Over Horizontal 6 Half, MS63  
WB-104, FS-301  
Tied for Finest at PCGS**

- 3728** 1846 6 Over Horizontal 6, WB-104, FS-301, MS63 PCGS. CAC. Perhaps the best-known blundered date variety among all Seated halves and, some would argue, in the entire Federal series. This richly toned Select Uncirculated example is attractive and bold despite prominent die cracks throughout the stars and the legends. The die crack above UNITED is particularly bold, but in a state prior to formation of a cud, although two cuds beneath the date are visible. Gunmetal-blue and tan-gold hues cover both sides. As always, the Lazy 6 overdate is sharp and unmistakable. Slight blending at the eagle's left (facing) talons and leg are the only exceptions to a sharp strike. Population: 4 in 63, 0 finer (10/14). PCGS# 409888

**1846-O Tall Date Half, AU55  
WB-106, Sharp and Attractive**

- 3729** 1846-O Tall Date AU55 PCGS. WB-106, Die Pair 27, R.4. Seated half collectors know how challenging the 1846 Tall Date issues can be, both in its Philadelphia Mint and New Orleans Mint varieties. This New Orleans issue is about six times scarcer than its Philadelphia Tall Date counterpart in Choice AU condition. Well-struck with iridescent, pearl-like silver surfaces, the star centers remain bold and luster glimmers beneath partially prooflike fields. Slight wear and a few wispy abrasions do not hinder the appeal of this nice example. NGC ID# 24H9, PCGS# 6256

**1854-O Seated Half, MS65**  
**Frosty Cartwheel Luster**

- 3730 1854-O Arrows MS65 NGC. WB-101, Die Pair 1, R.2.** A rare early state of the dies, with strong machine doubling (quadruple machine doubling, according to Wiley-Bugert) on the obverse — not to be confused with a tripled die. Diagnostic die cracks exist here and there on both the obverse and reverse, but not all the expected cracks are entirely formed as yet on the coin. The strike is bold with just nominal weakness at the eagle's left (facing) talon. Strong mint luster radiates in cartwheels over silver-white surfaces interspersed with areas of amber and russet-gold toning. Census: 13 in 65 (1 in 65+), 10 finer (9/14). NGC ID# 24JM, PCGS# 6280

**1857-O Half Dollar, MS64**  
**Seldom Encountered So Fine**

- 3731 1857-O MS64 NGC. WB-101, Die Pair 7, R.3.** Ex: Eric P. Newman Collection. This Normal Date half dollar had a mintage of 818,000 pieces, but examples are very scarce in Uncirculated grades, especially in MS64 or finer. Only two other pieces have been so graded by NGC, with three finer (9/13). This example shows unusually sharp definition for an O-mint. Both obverse and reverse display dappled multicolored patina. Census: 2 in 64, 1 finer (10/14). NGC ID# 24HT, PCGS# 6291

**1876-CC Large CC Half, MS65**  
**Lustrous and Deeply Toned**

- 3732 1876-CC MS65 NGC. WB-103, Die Pair 2, R.3.** Ex: "Col." Green, Eric P. Newman. A fine example of the WB-2 die pairing. The reverse die crack along the top of (AME)RICA is especially pronounced on this piece, as is the vertical die line behind the eye of Liberty. This Carson City half dollar displays layers of thick gray and faint rose toning overall with a strong presence of blue beneath. The underlying mint luster is especially pronounced and is not subdued by the layers of color. The strike details are complete throughout and there are no noticeable abrasions present on this extraordinary CC half dollar. Census: 12 in 65 (1 in 65+), 4 finer (10/14). NGC ID# 24KH, PCGS# 6353

**PROOF SEATED HALF DOLLARS**

**1859 Half Dollar, Pastel-Toned PR64**  
**Needle-Sharp Strike**

- 3733 1859 PR64 PCGS. CAC.** Pale blushes of pastel ice-blue, gold, ivory, and lavender produce stunning eye appeal on this near-Gem proof half dollar, near the top end of survivors from the 800 proofs originally struck. The needle-sharp strike has resulted in full radials on each star and full details on Liberty's hair and gown. The reverse is similarly sharp, although the bottom portions of the vertical shield stripes are partly effaced due to die lapping. Population: 38 in 64, 10 finer (9/14). NGC ID# 27TJ, PCGS# 6413

**1864 Seated Half, PR65**  
**Low Proof Mintage**

- 3734 1864 PR65 PCGS. WB-101.** Just 470 proofs were struck for the 1864 Philadelphia halves, an issue that is underrated for its scarcity in both business strike and proof formats. Most proofs — including this one — are struck from the obverse die with a bold date and the 64 nearly touching. A few proofs may exist from a different obverse die with a lightly impressed date and the 64 distant. This example displays deep, silver mirrors iridescent and light-gold tones visible when angled in light. The fully struck motifs are frosted and attractive. Population: 15 in 65, 6 finer (10/14). NGC ID# 27TR, PCGS# 6418

**1865 Half Dollar, PR66+  
Beautifully Struck, Target-Toned Proof**

**3735 1865 PR66+ PCGS. CAC. WB-101.** The mirrored fields show remarkably deep reflectivity despite edge-to-edge toning. Deep cerulean-blue and purple tones surround a burst of sunrise-orange shades that surround the frosted, central motifs a bullseye of vivid color. The glittering patina is well-matched from one side of the coin to the other.

A reported mintage of 500 proofs has yielded only a few Premium Gems and this sole example with the PCGS Plus designation. Another PR66+ coin exists in Cameo. A trio of PR67 coins top off the PCGS population, including one each in Cameo and Deep Cameo. It wouldn't take much convincing to call the current coin a Cameo as well. Population: 8 in 66 (1 in 66+), 1 finer (10/14). NGC ID# 27TS, PCGS# 6419

**1867 Seated Half, PR66 Cameo  
None Finer at PCGS**

**3737 1867 PR66 Cameo PCGS. CAC.** This Premium Gem Cameo proof 1867 Seated half dollar offers the best of both worlds, stunning concentric peripheral iridescent toning combined with pristine silver-white untuned centers. The surfaces are essentially distraction-free, even under magnification, and the full strike produces complete star radials and bold definition of the eagle's wings, shield, and claws. Only 625 proofs were struck of the 1867 issue, complementing the business-strike production of 449,300 pieces. PCGS reports only six submissions in PR66 Cameo with none finer (9/14). CAC reports three in this grade with the green approval sticker and none finer. PCGS# 86425

**1867 Half Dollar, Toned PR66  
Sharp Devices**

**3736 1867 PR66 NGC. WB-101.** The 1867 proof half dollar had a mintage of just 625 pieces, and is one of the scarcer proof issues of the period in high grades. This Premium Gem representative displays full sharpness on the design elements and glassy reflectivity in the fields. Rich original toning in shades of blue, lavender, and olive-gold engulfs each side, giving this piece outstanding visual appeal. Census: 6 in 66, 1 finer (10/14). NGC ID# 27U2, PCGS# 6425

**1873 No Arrows Half, PR66+  
Iridescent Toning**

- 3738 1873 No Arrows PR66+ PCGS. CAC.** This attractive 1873 No Arrows Premium Gem proof half dollar is sharply detailed in most areas, but the reverse is softly struck on the banner and the eagle's head. The fields are brightly reflective, showing iridescent shades of champagne-gold and cerulean-blue patina over the deep mirrors. The 1873 No Arrows proof halves were all struck with a Close 3, to the extent of 600 coins versus 500 for their With Arrows proof counterparts. Population: 12 in 66 (1 in 66+), 5 finer (9/14). CAC shows only three PR66 with the green approval sticker, and one PR67 finer. NGC ID# 27U8, PCGS# 6431

**1874 Arrows Seated Half, PR64 Cameo  
Brilliant, Silver-White Contrasted Proof**

- 3739 1874 Arrows PR64 Cameo PCGS. CAC. WB-101.** Small Arrows. While the overall impression of this near-Gem proof is one of an untoned coin, a mere suggestion of chestnut-gold toning at the rims confirms the brilliance of its surfaces and the originality of its silver-white appeal. The strike is uncompromisingly full on both sides of the coin. Proof specimens are the often the only alternative for collectors wanting a high-grade example of the Small Arrows obverse, because business strikes with the feature are rare and often in lower grades. The Small Arrows are noticeably closer to the denticles than the rock, the most noticeable point of difference from Large Arrows examples. Population: 32 in 64 (1 in 64+) Cameo, 5 finer (10/14). PCGS# 86435

**1879 Half Dollar, Richly Toned PR66**

- 3740 1879 PR66 PCGS. CAC.** The year 1879 had reduced business strike half dollar production due to the demands of the Bland-Allison Act which mandated extensive resources be used for coinage of unwanted silver dollars. However, proof production for the denomination remained steady (1,100 coins), and this variant is usually more readily available in high grades for date collectors. This Premium Gem proof displays glassy fields and sharp, satiny devices. Rose-gold, sea-green, blue, and lavender-orange toning encompasses each side, giving this piece a high degree of visual appeal. Population: 13 in 66, 2 finer (9/14). NGC ID# 27UE, PCGS# 6440

**1883 Half, PR67 Cameo**  
**Stunning Contrast on Each Side**

- 3741 1883 PR67 Cameo NGC.** Ex: "Col." E.H.R. Green. The 1883 is among the lowest of the decade-long production of low-mintage half dollars. Only 9,039 total pieces were struck, with 1,039 of that total being proofs. This superlative, fully struck Cameo displays marginal reddish-golden accents with bright, flashy interior portions on each side. The devices have confirmed mint frost that gives the coin its strong field-device contrast.  
 Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$7.50; Eric P. Newman Numismatic Education Society. PCGS# 86444

**1888 Proof Seated Half Dollar**  
**High-End, Premium Gem Cameo**  
**One of Two Coins with the PCGS 'Plus'**

- 3742 1888 PR66+ Cameo PCGS. WB-101.** A slight crescent of rainbow toning hovers over the top-left quadrant of the obverse, matched by a corresponding thin curvature of toning at the lower-left reverse. Otherwise, this splendid, contrasted proof is brilliant-white and deeply mirrored. The strike imparts full details to the frosted devices. The proof mintage of 832 pieces is eagerly collected, both by proof specialists and circulation-strike collectors needing a high-grade example. Population (all proof finishes): 16 in 66 (2 in 66+ Cameo), 3 finer (10/14). PCGS# 86449

**1889 Half Dollar, PR66**  
**Concentric Multicolor Toning**

- 3743 1889 PR66 PCGS. CAC.** From a mintage of 711 pieces, this late-series proof Seated half dollar showcases deeply mirrored fields with concentric toning of ocean-blue, violet, and orange-gold on each side. The devices are lightly frosted, though the beautiful patina precludes a Cameo designation. Still, this is an immensely attractive Premium Gem proof. Population: 14 in 66 (1 in 66+), 3 finer (9/14). NGC ID# 27UR, PCGS# 6450

**1891 Seated Half, PR66+**  
**Beautifully Toned and Well-Struck**

- 3744 1891 PR66+ NGC.** Deep steel-blue and copper-mauve sunset shades congregate over Liberty's head and around her rock and the date, while the central portions remain largely untuned on this beautiful Premium Gem proof. Some minor roughness on the arms and thighs determines the grade, but this is a beautiful and well-struck example of this final-year Seated half dollar issue. Census: 36 in 66 (2 in 66+), 5 finer (9/14). NGC ID# 27UT, PCGS# 6452

**1891 Half Dollar, PR66 Cameo**  
**Vivid Concentric Toning**

- 3745 1891 PR66 Cameo PCGS Secure.** The 1891 proof half dollar is moderately available in the absolute sense, but Cameo representatives are scarce in all grades, and rarely seen above the Gem level. This carefully preserved specimen displays deeply mirrored fields and bold, frosty devices. Vivid peripheral toning in shades of royal-blue, sea-green, and violet surround deep sun-gold centers, giving this piece ample eye appeal. Population: 4 in 66 (1 in 66+) Cameo, 1 finer (10/14). PCGS# 86452

## BARBER HALF DOLLARS

### 1894-S Half Dollar, MS65 Difficult to Locate in Gem Condition

- 3746 1894-S MS65 PCGS.** This date is somewhat more elusive in Mint State than its mintage of more than 4 million coins would suggest. The typical piece is moderately abraded, and Gems are rare. This example shows a well-executed strike, with satiny luster beneath wisps of light golden toning. A small reed mark on the base of the neck truncation precludes a finer grade, but does not draw the attention of the viewer. Population: 9 in 65, 5 finer (10/14). NGC ID# 24LR, PCGS# 6470

### 1907-O Half Dollar, MS66 Rare This Well-Preserved

- 3747 1907-O MS66 PCGS.** Despite a mintage of nearly 4 million coins, the 1907-O Barber half dollar is rare in Gem or finer grades. This Premium Gem example displays frosty luster beneath blended olive, golden-gray, and pale aquamarine toning. The surface preservation is nearly perfect, and the strike is well-executed. Population: 6 in 66 (1 in 66+), 2 finer (9/14). NGC ID# 24N2, PCGS# 6510

### 1908-D Half Dollar, MS66+ Vivid Multicolor Toning

- 3748 1908-D MS66+ NGC. CAC.** Ex: "Col." E.H.R. Green. Vivid shades of burnt-orange, lavender, and amber toning blanket the well-preserved surfaces of this high-end Premium Gem. Vibrant mint luster adds to the outstanding eye appeal. Census: 7 in 66 (1 in 66+, 1 in 66 ★), 2 finer (9/14).  
Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$7.50; Eric P. Newman Numismatic Education Society. NGC ID# 24N5, PCGS# 6513

### 1908-O Barber Half Dollar, MS67 Only One Finer at PCGS

- 3749 1908-O MS67 PCGS. CAC.** As one of the more plentiful New Orleans Barber half dollars, struck in the penultimate year of operation for the Louisiana Mint, the 1908-O is an important type coin for New Orleans collectors. It is also typically well-made, as this Superb Gem illustrates. Both sides have a bold strike and frosty silver luster that shines through lime-green, pale gold, and delicate heather toning. This stunning example is destined for a top-notch type or specialized collection. PCGS and NGC have combined to certified 21 examples in MS67 and two finer. Population: 14 in 67, 1 finer (10/14). NGC ID# 24N6, PCGS# 6514

**1909 Half Dollar, MS66  
Conditional Rarity**

- 3750 1909 MS66 PCGS.** Among 1909-dated Barber halves from the three mints, this Philadelphia issue is the most available in absolute terms with a mintage approaching 2.4 million coins. Nevertheless, examples are scarce in Gem condition and very rare in this lofty grade. In fact, PCGS reports only 14 pieces in MS66 (three in MS66+) and none finer (9/14). This carefully preserved and well-struck representative features delicate russet and purple toning toward the margins, while the centers remain largely brilliant. NGC ID# 24N8, PCGS# 6516

**1909-S Half Dollar, Frosty MS66  
Inverted Mintmark Variety**

- 3751 1909-S Inverted Mintmark, FS-501, MS66 NGC.** A highly popular *Cherrypickers'* variety, with the S mintmark entered into the die in an inverted orientation. The upper loop of the S is somewhat wider than is the bottom, the opposite of the norm. This Premium Gem representative is heavily frosted with vibrant luster and just a blush of light golden toning. The strike is crisp, and a couple minute disruptions in the luster near Liberty's chin are seemingly all that keep this eye-catching coin from an even loftier grade. Census: 6 in 66 (1 in 66+), 0 finer (9/14). PCGS# 390501

**1910-S Half Dollar, Sharply Struck MS66**

- 3752 1910-S MS66 PCGS. CAC.** The 1910-S half dollar mintage approached 2 million pieces. Mint State examples can be located with diligent searching through near-Gem, after which this issue becomes quite challenging. Reddish-brown patination imbued with whispers of bluish-green shows slightly deeper hues on the reverse. Sharply struck design elements and nicely preserved surfaces further enhance the coin's pleasing overall eye appeal. This piece displays the "Type C" mint mark seen on most 1910-S half dollars (see Lawrence, 1991). Population: 15 in 66 (2 in 66+), 4 finer (9/14). NGC ID# 24NC, PCGS# 6520

**PROOF BARBER HALF DOLLARS**

**1892 Half Dollar, PR66 Cameo  
Eye-Catching Contrast**

- 3753 1892 PR66 Cameo NGC.** Heavily frosted luster over the devices provides stark white-on-black contrast with the fully mirrored fields on this Premium Gem proof. A blush of pale champagne color adds a degree of warmth to otherwise brilliant surfaces. The 1892 had the highest proof mintage of the series, and is a favorite among first-year type collectors. However, high-grade examples of this issue are no more plentiful than are those of many later, lower-mintage proof dates. Census: 19 in 66 Cameo (1 in 66 ★ Cameo), 27 finer (10/14). PCGS# 86539

**1894 Barber Half, PR66  
Exceptional Mirrors and Color**

- 3754 1894 PR66 PCGS. CAC.** The deep-mirrored fields contrast boldly with frosted devices, although not to the extent that PCGS granted the Cameo designation. Rather, this exceptional proof stands out for its impressive color and vibrant reflectivity. The patination is reminiscent of a richly toned copper kettle, with green, blue, and purple edges surrounding fire-red and copper-orange surfaces. The reverse is likewise deeply patinated, with golden margins framing a green, violet, and blue center. The coin is boldly detailed except at the right shield corner and wing junction. Population: 27 in 66, 10 finer (10/14). NGC ID# 24NW, PCGS# 6541

**1897 Half Dollar, PR67 Cameo  
Stark Contrast, Incredible Eye Appeal**

- 3755 1897 PR67 Cameo NGC.** With a moderate mintage of 731 coins, the proof 1897 half dollar is not a scarce issue in an absolute sense, but examples displaying Cameo contrast form a distinct minority and are rare at the Superb Gem grade level. This piece showcases exceptional visual appeal with deeply mirrored fields and unblemished, heavily frosted devices. The details are fully struck, and a blush of light golden color warms each side. A seemingly perfect representative, fit for the finest proof Barber half dollar collection or Registry Set. Census: 15 in 67 Cameo (3 in 67 ★ Cameo), 7 finer (10/14). PCGS# 86544

**1897 Half Dollar, PR67 Deep Cameo  
Glassy Fields, Bold Contrast**

- 3756 1897 PR67 Deep Cameo PCGS. CAC.** This beautiful Superb Gem is brilliant save for a hint of cream-gray on the field near Liberty's neck. The upper right shield corner and the eagle's right (facing) shoulder have good definition, and the strike is otherwise exquisite, even on the sometimes indistinct claws and fletchings. The glassy fields appear flawless, and the eye appeal is remarkable. This Superb Gem proof would make a wonderful addition to a silver proof type set, particularly because the 1897 has a lower mintage than many proof dates, yet trades as a type coin. A mere 731 proofs were struck. Population: 19 in 67 (1 in 67+) Deep Cameo, 5 finer (10/14). Ex: Orlando FUN Signature (Heritage, 1/2007), lot 1003. PCGS# 96544

**1900 Barber Half Dollar, PR66  
Impressive Cameo Example**

- 3757 1900 PR66 Cameo PCGS.** The sharply detailed frosty design elements of this spectacular Premium Gem contrast intensely with the deeply mirrored fields, creating a black-on-white cameo flash when the coin is tilted in the light. The well-preserved surfaces show highlights of champagne-gold toning. Population: 21 in 66 (5 in 66+) Cameo, 6 finer (10/14). PCGS# 86547

**1902 Barber Half Dollar, PR66 Cameo  
A Rare Contrasted Proof**

**3758 1902 PR66 Cameo PCGS.** Cameo contrast was suppressed at the Philadelphia Mint beginning in 1902 as operations were underway at the new third mint building. The rarity of these pieces is clearly illustrated through PCGS population data. From 1892 to 1901, 25% of PCGS certified proof Barber half dollars are Cameo or Deep Cameo examples, and from 1902 to 1915, only 10% have contrast.

This brilliant Premium Gem Cameo proof has pristine silver surfaces with satin luster and deep mirrors. A hint of pale violet toning appears on the reverse. An exceptional example. Population: 8 in 66 (1 in 66+) Cameo, 5 finer (10/14). PCGS# 86549

**1909 Half Dollar, Appealing PR66 Cameo**

**3759 1909 PR66 Cameo PCGS.** Based on the population reports, a fair number of 1909 Barber proof half dollars have survived to the present day. That said, higher-grade Cameos are in relatively short supply. The two major services have certified 23 Premium Gem Cameos and 24 Cameos finer (a number of both figures, especially the latter, are likely resubmissions). Strong field-device contrast is evident over both sides of this offering, each of which exhibits sharply struck design features. Only the upper-right shield corner reveals the usually seen softness. This is a wonderfully preserved coin that displays great eye appeal. Population: 16 in 66 Cameo, 9 finer (9/14). PCGS# 86556

**1912 Barber Half, PR67 Cameo  
A Marvelously Toned Example**

**3760 1912 PR67 Cameo PCGS.** Areas of untuned silver-white in the interiors of each side complement the prevailing pastel tones on this Superb Gem Cameo proof 1912 half dollar, pale yellow, mint, and steel-blue on the obverse, with a similar palette that adds pale rose and copper hues on the reverse. Even under magnification no mentionable marks appear, but the hammered strike is confirmed, save for the normal (and here, minimal) weakness on the right shield corner. All the star centers and both of the eagle's claws are fully brought up. A marvelous example for type or date purposes from this issue of 700 proof coins. Population: 2 in 67 Cameo, 1 finer (9/14). PCGS# 86559

**1915 Half Dollar, PR66  
Concentric Rainbow Toning**

**3761 1915 PR66 PCGS.** Lovely concentric rainbow rim toning on each side of this Premium Gem proof Barber half includes steel-blue and amber-gold, with accents of cherry-red and lavender. The centers show untuned silver-white areas, and good eye appeal prevails throughout. No mentionable marks appear on this well-struck piece. NGC ID# 24PK, PCGS# 6562

## WALKING LIBERTY HALF DOLLARS

1916-S Half Dollar, MS66  
Rare This Well-Preserved

**3762 1916-S MS66 NGC.** Small, scattered splashes of red, orange, teal, and yellow-gold toning appear periodically around portions of the outer edges on both sides of this appealing Premium Gem representative. Rich matte luster complements carefully preserved surfaces, while only slight softness is noted on Liberty's leg and branch hand.

The 1916-S had the lowest mintage of the three first-year Walking Liberty half dollar issues (only 508,000 coins), and the date is by far the rarest in high grades. NGC has certified only 13 examples in this grade (1 in 66+), with just one finer (9/14). This coin represents an important opportunity for the advanced Walking Liberty half enthusiast. NGC ID# 24PN, PCGS# 6568

1920-D Half Dollar, MS65  
Old Green Label Holder

**3763 1920-D MS65 PCGS.** The 1920-D half dollar is an elusive issue in Mint State, and is most often seen only in the MS63 to MS64 grade range. Gems are rare on the market, and finer pieces are prohibitively so. Striking quality is usually decent, an unusual characteristic for a branch mint issue of the period, but one that makes a high-grade representative of the 1920-D all the more desirable.

This example displays satiny, iridescent ice-blue and light golden luster, with well-struck motifs. A few minor surface ticks on the figure of Liberty and within the eagle's wing feathers limit the grade, but are hardly discernable to the naked eye. Housed in an old green label holder. Population: 43 in 65, 6 finer (9/14). NGC ID# 24R4, PCGS# 6581

**1921-D Half Dollar, MS64  
Warm Golden Toning**

- 3764 1921-D MS64 PCGS.** The 1921-D boasts the lowest mintage in the Walking Liberty half series (208,000 coins), and is among the rarest issues in high grades, rivaled only by the San Francisco issue of the same year. Striking quality is generally above-average for Denver issues of the period, and the present coin attests to this with partial thumb separation and moderate detail on the central eagle's feathers. Rich, frosty luster underlies original lemon-gold toning on each side, while the surfaces are free of any significant abrasions. Certified at the Choice grade level, this coin ranks as a high-end representative of the issue, as PCGS has seen only 35 numerically finer examples (9/14). NGC ID# 24R7, PCGS# 6584

**1921-S Half Dollar, MS64  
The Rarest Mint State Walker**

- 3765 1921-S MS64 PCGS.** A splendid 1921-S half dollar, representing a conditionally rare issue in the Walking Liberty series. In fact, the average certified grade is less than VF20! PCGS has only certified 121 Mint State 1921-S half dollars, the lowest total of the series. The next closest issue is the 1919-D with 229 PCGS Mint State coins. This Choice Mint State piece has indistinct central details including the gown lines and hand at her waist. However, both sides are highly lustrous with satiny silver surfaces that are untoned, save for delicate champagne on the reverse. NGC ID# 24R8, PCGS# 6585

**1938-D Half Dollar, Lustrous MS67  
Key to Late-Date Walkers**

- 3766 1938-D MS67 PCGS.** This low-mintage issue of fewer than 500,000 pieces is the key to late-date Walkers, with Superb Gems being particularly difficult to locate. A crescent of olive-gold toning runs along the inner obverse margin of this representative, while deeper violet accents are seen closer to the border. Lustrous surfaces are nicely preserved and exhibit well-struck design elements, save for the usual softness in Liberty's branch hand. Population: 40 in 67 (3 in 67+), 0 finer (9/14). NGC ID# 24RV, PCGS# 6605

**1938-D Half Dollar, MS67  
Low-Mintage Key**

- 3767 1938-D MS67 PCGS. CAC.** The 1938-D is the key to the later-date Walkers with an impressively low mintage of less than a half-million coins. This is a lovely Superb Gem with satiny luster and subliminal gold toning. The strike is sharp throughout. This key is tied as the finest certified at the two major services. Population: 40 in 67 (3 in 67+), 0 finer (9/14). Only 14 examples at NGC and PCGS combined have the CAC green sticker of this coin.  
Ex: *Clarke Marie Collection, Part I / Long Beach Signature* (Heritage, 9/2004), lot 6800; *Houston Signature* (Heritage, 12/2009), lot 839. NGC ID# 24RV, PCGS# 6605

**1940-S Half Dollar, Conditionally Rare MS67  
Above-Average Strike**

- 3768 1940-S MS67 NGC.** The 1940-S is the only mintmarked Walker half dollar of the year. With a sizable production exceeding 4.5 million pieces, it is obtainable through MS65 with little trouble. The certified population begins to dwindle at the Premium Gem level, however, and the issue becomes a condition rarity in MS67, the finest grade seen.  
Soft golden-brown toning cascades over the highly lustrous surfaces of this Superb Gem, accented with whispers of reddish-orange and yellow-gold. While this date is plagued by strike weakness, the present coin displays above-average definition, evidenced by nearly complete delineation in the skirt lines, a modicum of detail on Liberty's branch-hand thumb, and strong definition on the eagle's breast and neck feathers. Impeccable preservation rounds out the coin's outstanding eye appeal. Census: 10 in 67, 0 finer (9/14). NGC ID# 24S2, PCGS# 6610

**PROOF WALKING LIBERTY  
HALF DOLLARS**

**1938 Walking Liberty Half Dollar, PR68  
None Certified Finer at PCGS**

- 3769 1938 PR68 PCGS.** Only 8,152 proof Walking Liberty half dollars were struck in 1938, making it the third-rarest proof of the series. The 1938 was a well-produced issue, with typically sharp striking characteristics, but examples in PR68 condition are conditionally rare in today's market.  
The present coin is a magnificent PR68 example, with sharply detailed design elements and impeccably preserved reflective surfaces. Both sides show a crescent of vivid greenish-gold toning at the borders, enhancing the tremendous eye appeal. Population: 13 in 68, 0 finer (9/14). NGC ID# 27V6, PCGS# 6638

**1941 No AW Half Dollar, Pastel-Toned PR68 ★  
Top-Notch Eye Appeal**

- 3770 1941 PR68 ★ NGC. CAC.** No AW. Ex: Stack's 57th St Collection. The AW for designer Adolph A. Weinman is lapped off of the die, as seen on a majority of the 15,412 proofs struck in 1941. Pale pastel yellow, gold, rose, and mint hues occupy this stunning Superb Gem proof, creating top-notch eye appeal. Although NGC and PCGS combine for more than 100 submissions in PR68, CAC has given its green approval sticker to only 19 pieces including this one (9/14). NGC ID# 24SP, PCGS# 6641

## FRANKLIN HALF DOLLARS

1950-D Half Dollar, MS66+ Full Bell Lines  
Vibrant Luster, Attractive Toning

- 3771 1950-D MS66+ Full Bell Lines PCGS.** This issue is readily available with Full Bell Lines in lower Mint State grades, but its availability with such dramatically drops at the Premium Gem grade level; PCGS has certified 74 examples in MS66, but only seven have been awarded a Plus designation, and none are finer (9/14). This piece is tied numerically with the example in the highest-rated Registry Set, and showcases intermingled cherry-red, forest-green, and olive-gold toning over the obverse, while the reverse is primarily untoned, save for a thin ring of rainbow color seen around the periphery. The strike is sharp, and the preservation is in keeping with the numeric grade. NGC ID# 24SX, PCGS# 86657

1952-S Franklin Half Dollar, MS67  
Rare Example With Full Bell Lines

- 3772 1952-S MS67 Full Bell Lines PCGS. CAC.** The 1952-S Franklin half dollar claims a mintage of 5.5 million pieces, a small production total in the context of the series. Unfortunately, the issue was not especially well-produced, and coins with a decent strike and Full Bell Lines are elusive in today's market. The present coin is a dramatic exception to the rule, with well-detailed design elements and Full Bell Lines definition. This spectacular Superb Gem offers impeccably preserved lustrous surfaces under attractive shades of greenish-gold and lavender toning. Eye appeal is terrific. Tied with one other coin for finest certified at either of the leading grading services, this coin should find a home in the finest collection or Registry Set. Population: 2 in 67 Full Bell Lines, 0 finer (10/14). NGC ID# 24T5, PCGS# 86663

---

1957-D Half Dollar, MS67 Full Bell Lines  
Attractively Toned Registry Coin

- 3773 1957-D MS67 Full Bell Lines PCGS.** A must-have item for the Registry Set collector, this fully struck Premium Gem is tied with just 11 others as the finest certified at PCGS (10/14), and also ranks numerically equal to the example in the current highest-rated Registry Set. Iridescent lavender-blue luster encompasses much of each side, though a vivid crescent of deep rainbow colors cuts across the central obverse from 3 to 11 o'clock, and softer hues of the same are seen in the reverse peripheries. NGC ID# 24TF, PCGS# 86673

---

1962-D Franklin Half Dollar, MS66  
Elusive Full Bell Lines Example

- 3774 1962-D MS66 Full Bell Lines PCGS.** This impressive Premium Gem exhibits sharply detailed design elements with Full Bell Lines definition. The well-preserved surfaces radiate vibrant mint luster under vivid shades of apple-green, lavender-gray, and amber toning. Population: 15 in 66 (1 in 66+) Full Bell Lines, 0 finer (10/14). NGC ID# 24TS, PCGS# 86683

---

PROOF FRANKLIN HALF DOLLARS

1950 Franklin Half Dollar, PR65 Deep Cameo  
Key to the Proof Series  
Deep Mirrors and Strong Contrast

- 3775 1950 PR65 Deep Cameo PCGS. CAC.** An obviously well-preserved and brilliant, silver-white Gem, without any of the usually seen problems from handling and Mint packaging often associated with this proof date. The fields are deep, liquid and pristine — there are no distracting hairlines or toning spots, nor is there any evidence of glue residue from the original cellophane compartment.
- Series collectors will particularly value the heavy cameo contrast, seldom seen for the issue. PCGS has seen just one finer Deep Cameo coin (a PR66 piece), and it is difficult to imagine any proof of this date exceeding the visual appeal of the current coin. Population: 2 in 65 Deep Cameo, 1 finer (9/14). NGC ID# 27VA, PCGS# 96691

**1952 Franklin Half, PR66 Ultra Cameo  
Deeply Contrasted, Pale Peripheral Toning**

**3776** 1952 PR66 Ultra Cameo NGC. Deep cameo contrast between fields and devices over silvery surfaces complements the thin ring of intermittent rose-copper color on each side. The deep contrast puts this piece into a distinct minority, but there are few marks for the grade as well. Census: 6 in 66 Ultra Cameo (1 in 66+ Ultra Cameo), 4 finer (9/14). NGC ID# 27VC, PCGS# 96693

**1952 Half, PR66+ Deep Cameo  
Only One Graded Finer at PCGS**

**3777** 1952 PR66+ Deep Cameo PCGS. CAC. An exceptional coin without a doubt, this beautifully preserved, high-end Premium Gem well-deserves the Deep Cameo designation, as the contrast between the frosted devices and the mirrored fields is boldly pronounced. A tiny, faint toning spot appears in Franklin's hair below the B in LIBERTY. The 1952 proof mintage consisted of 81,980 coins, but Deep Cameo examples from this key proof date are rarely encountered. PCGS has assigned the PR66 grade to only eight such examples, this being the sole PR66 piece to receive the Plus designation, with only one finer (9/14). NGC ID# 27VC, PCGS# 96693

**1954 Half Dollar, PR67+ Deep Cameo  
Starkly Contrasted Registry Coin**

**3778** 1954 PR67+ Deep Cameo PCGS. CAC. A beautifully preserved, high-end Superb Gem proof, this Deep Cameo representative showcases seemingly infinite depth of mirroring in the fields and fully struck, heavily frosted devices. The surfaces are void of contact, and close scrutiny is required to detect any grade-limiting imperfections. Population: 36 in 67 (2 in 67+) Deep Cameo, 5 finer (9/14). PCGS# 96695

**1960 Half Dollar, PR68 ★ Ultra Cameo  
Stark White-on-Black Contrast**

**3779** 1960 PR68 ★ Ultra Cameo NGC. Eye-catching frost and incredible reflectivity add up to a highly memorable Ultra Cameo Franklin half. Virtually untuned surfaces and bold design definition more than earn the Star designation. An important offering for the Registry Set collector. Census: 69 in 68 Ultra Cameo (1 in 68 ★ Ultra Cameo), 6 finer (9/14). NGC ID# 24TY, PCGS# 96701

## EARLY DOLLARS

### 1795 Flowing Hair Dollar, Two Leaves, VF30 B-1, BB-21, Deep Old-Time Patina

- 3780** 1795 Flowing Hair, Two Leaves, B-1, BB-21, R.2, VF30 PCGS Secure. Die State I, perfect dies. This is an available variety that frequently comes well-struck and attractive, ideal for type purposes. The present example is lightly circulated but retains all major design elements. An attractive circulation cameo, with pale tan-gray patina over the devices and deeper shades of lavender-gray, gunmetal-blue, and olive-gold toning in the recesses. The dentils are complete on each side, with no discernable adjustment marks. An excellent piece for the collector who appreciates old-time color. PCGS# 39986

### 1795 Flowing Hair Dollar, XF40 B-5, BB-27, Attractive Coloration

- 3781** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, XF40 NGC. Bowers-Borckardt Die State II. Even though the 1795 Flowing Hair, Three Leaves B-5, BB-27 dollar is the most widely available of the early dollars, this piece is in a finer numerical grade than the average certified example, a VF30. Attractive coloration on each side includes steel-gray predominating with olive-green and pinkish accents. A loupe reveals a small patch of pinscratches in the left obverse field, along with field roughness on the lower reverse around the N in UNITED. PCGS# 39977

### 1796 B-4, BB-61 Silver Dollar, VF25 Small Date, Large Letters

- 3782** 1796 Small Date, Large Letters, B-4, BB-61, R.3, VF25 PCGS. Bowers Die State II. There is no adequate accounting of die state rarity, although it is believed that Die State II is rarer than State I or III. The top of the obverse die is lapped. Both sides of this frequently encountered silver dollar variety exhibit intermingled pewter and steel-gray toning over relatively smooth surfaces. PCGS# 40000

### 1797 Small Eagle Dollar, XF45 B-3, BB-71, Large Letters

- 3783** 1797 10x6 Stars, Large Letters, B-3, BB-71, R.2, XF45 NGC. Die State III. A lightly circulated Small Eagle type coin, this Choice XF example exhibits strong detail for the grade, with bright silvery-gray patina that shows a few pale amber accents over the high points. Faint, diagonal adjustment marks cross the reverse from 10 to 4 o'clock. Strong borders add to the overall appeal. PCGS# 40004

### 1797 Large Letters Dollar, AU Sharpness B-1, BB-73 '9x7' Stars

- 3784** 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3 — Cleaning — PCGS Genuine. AU Details. Bowers Die State II. A glass reveals gentle hairlines that determine the net grading, yet this dollar retains considerable eye appeal and sharp detail. Mint luster is barely diminished by the light cleaning and minimal wear from circulation. A handsome ring of almond-gold toning surrounds the margins on both sides, adding to the considerable allure. An opportunity for the perceptive collector. PCGS# 40003

**1797 Draped Bust Dollar, AU53**  
**B-1, BB-73, 9x7 Stars**  
**Large Letters Reverse**

**3785 1797 9x7 Stars, Large Letters, B-1, BB-73, R.3, AU53 PCGS.** Bowers Die State I. The resilient Small Eagle reverse was in service for four years (1795 through 1798), and the Large Letters variant did not fail until after the 1798 Small Eagle, 13 Stars variety was struck. The reverse die is the same as the one used to strike the 1797 BB-73 dollars, suggesting that at least some (or perhaps all) of the 1797-dated pieces were struck in 1798. Several 1797 examples exist that were struck from a terminal state of the dies, yet there are no 1798 Small Eagle coins known in a similar advanced die state.

Population figures indicate many more 1797 dollars were produced than the reported mintage of 7,776 pieces (David Bowers estimates as many as 60,000 pieces). The Mint was not overly concerned about which dates were delivered in a calendar year, and the main focus was to get the maximum use of its dies regardless of date. With the Mint closed for much of 1797 due to Yellow Fever, it makes sense most of the 1797 mintage was struck in 1798.

The present coin represents the earliest state of the dies, with a tapered, fully rounded "peller" die lump beneath star 9. There are no die cracks or die lapping visible that would indicate a more advanced state of the dies. The coin is bright, with silver-white surfaces except for a few dark toning flakes at the margins among the stars and legends. Scattered marks from circulation and light wear define the assigned grade. Traces of original mint luster remain among the devices. Population: 13 in 53, 14 finer (9/14). PCGS# 40003

**1798 Pointed 9 Dollar, XF45**  
**B-21, BB-107 Large Eagle Reverse**  
**Scarce 10 Arrows Variety**

**3786 1798 Large Eagle, Pointed 9, 10 Arrows, B-21, BB-107, R.5, XF45 PCGS.** Bowers Die State II. A distinct die lump between 79 of the date and the bust and 10 arrows plus a headless arrow stick identify the scarce BB-107 variety. This is a well-detailed Choice XF example, with delightful iridescence enhanced by soft luster beneath generous olive and lavender patina. Nicely centered, with crisp denticles and smooth, virtually unmarked surfaces. Seldom seen so nice. PCGS# 40024

**1798 Heraldic Eagle Dollar, AU58**  
**Pointed 9, B-27, BB-113**

**3787 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2, AU58 PCGS.** Bowers Die State II. Cracks are present near the right (facing) wingtip, but there are no cracks near STATES. This partly lustrous Bust dollar is refreshingly unabraded aside from pinpoint marks near the upper right reverse stars. Medium steel-blue and butter-gold toning contributes further to the eye appeal. The strike is generally sharp, although the breast feathers display minor blending. 1798 dollars are always available for a price in VF grades, but examples that approach Mint State are rare relative to demand. PCGS# 40030

1798 Wide Date Dollar, AU50  
B-12, BB-120, Terminal Die State  
Large Eagle, Pointed 9

**3788** 1798 Large Eagle, Pointed 9, Wide Date, B-12, BB-120, R.4, AU50 PCGS. Bowers Die State V. A rare coin in this advanced die state, with obvious die failure above the date at Liberty's lower-most curl and drapery. A corresponding failure on the reverse obliterates most of the field stars and some of the encircling clouds. Multiple die cracks radiate from the edges through the date and stars on the obverse, and a diagnostic crack curls through the denticles above ES OF AM. The coin shows little actual wear and smooth, unblemished fields. Lavender tones visit the iridescent surfaces with nice remaining luster, providing excellent visual appeal. PCGS# 40037

1799/8 Dollar, B-3, BB-141, MS62  
Blundered Reverse  
15 Field Stars

**3789** 1799/8 15 Stars Reverse, B-3, BB-141, R.3, MS62 PCGS. Bowers Die State III. Perhaps the most popular of all the 1799 varieties, with the blatant overdated 8 beneath the final 9 in the date. Numerous engraver lines and die flaws include the renowned blunder of two extra field stars on the reverse, mostly hidden behind clouds 1 and 8, which were greatly oversized to hide the mistake. Tiny tips of the errant stars are readily visible. The B-3, BB-141 variety is the only die pair with this error — the other two 1799/8 overdates show the normal-sized clouds and 13 field stars.

Pearl-white surfaces are softly lustrous and display a sharp strike with perfectly centered obverse and reverse motifs, surrounded by high, deeply denticled rims. A few light abrasions beneath Liberty's chin are the only notable marks on the otherwise smooth, attractive fields and devices. The strike is bold and complete. Few examples of the variety exist any finer, with this MS62 coin near the lower end of the Condition Census for the die pair. Population: 7 in 62, 5 finer (9/14). PCGS# 40064

1799 Silver Dollar, AU53  
B-12, BB-160, Late Die State

- 3790** 1799 7x6 Stars, B-12, BB-160, R.3, AU53 PCGS. Bowers Die State IV. The terminal die state with innumerable obverse cracks. Light to medium stone-gray and wheat-gold toning visits this briefly circulated but problem-free Draped Bust dollar. Refreshingly unabraded, and the strike is consistent aside from softness on the stars opposite the bust tip. PCGS# 40051

1799 Silver Dollar, XF40  
B-17, BB-164

- 3791** 1799 7x6 Stars, B-17, BB-164, R.2, XF40 PCGS. Bowers Die State I. The scarce early die state. The obverse die was used with six different reverse dies, and remains constant in this final marriage with a die crack through stars 10 to 13, and on to the bust. There are no visible reverse die cracks on this dollar. An attractive light gray example, this early dollar is nicely detailed with pleasing surfaces that show only a few trivial handling marks on each side. Advanced dollar collectors will be pleased with this opportunity to acquire an example from the perfect reverse die. PCGS# 40055

1800 Dollar, B-13, BB-193, AU53  
Deep Original Patina

- 3792** 1800 B-13, BB-193, R.4, AU53 NGC. Die State I, perfect reverse die. A scarce variety, but one of the more plentiful of the issue. This example displays nearly complete detail, with deep gunmetal and olive-gray toning over each side. The coin is very evenly struck with complete border dentils and strong stars. The central eagle is also bold, and the surfaces are free of adjustment marks and post-mint circulation scars. This is a highly attractive Heraldic Eagle type coin for the collector who appreciates old-time color. PCGS# 40077

1800 Dollar, B-17, BB-196, AU58  
Scarce Late Die State Example

- 3793** 1800 12 Arrows, B-17, BB-196, R.1, AU58 NGC. Die State IV. BB-196 is most easily recognized by a heavy clash mark on the obverse that gives Liberty the appearance of having a collar, and the presence of only 12 arrows in the eagle's clutch. This is the only use of both dies, creating a very unique and highly collectible variety. Lower-grade circulated examples are sometimes available, but AU coins are seldom seen and the variety is genuinely rare in Mint State. The example here offered is a scarce piece from an extreme late die state, characterized by several obverse cracks and heavy clash marks. High-point friction is slight, and the strike is even and bold, with complete dentils on each side. Substantial luster remains in the recesses, while a light golden hue around the peripheries is the only noticeable color. Census: 2 in 58, 4 finer (10/14). PCGS# 40079

1802/1 Silver Dollar, XF45  
Wide Date, B-2, BB-233

- 3794** 1802/1 Wide Date, B-2, BB-233, R.4, XF45 PCGS. CAC. Bowers Die State I, perfect dies, the only known die state. Light gray coloration appears on the lightly worn high points of this attractive dollar, exhibiting pewter-gray and golden-brown in the fields. Only half a dozen finer examples are recorded in the Notable Specimens section of the Bowers silver dollar encyclopedia. PCGS# 40093

1803 B-1, BB-251 Dollar, XF45  
Intermediate Die State

- 3795** 1803 Small 3, B-1, BB-251, R.4, XF45 NGC. Bowers Die State III, early. The obverse crack through the left side of the R in LIBERTY has a branch crack beginning below that letter, with both cracks extending into the upper hair curls. This Choice XF example just misses the condition census for the variety with only five finer examples recorded among Notable Specimens in the Bowers reference. The obverse has deep gold and steel-blue toning on the light gray surfaces, with hints of blue toning on the reverse. PCGS# 40096

GOBRECHT DOLLARS

1836 Gobrecht Dollar, Deeply Toned Proof  
Judd-60, Die Alignment I, XF Details

- 3796** 1836 Name on Base, Judd-60 Original, Pollock-65, R.1 — Smoothed — Genuine PCGS. XF Details. Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment I (coin turn, center of Liberty's head opposite the DO in DOLLAR). No diagonal die clash mark is present above the eagle's wing. This straight clash mark is a diagnostic of later strikes; therefore, this is one of the first 400 dollars struck. The fields are nicely reflective, but not deeply so. This reflectivity is a definite plus because of the depth of toning, especially on the reverse. The obverse is mostly deep blue, while the reverse is red and blue and several shades deeper than the obverse. Just a bit of high-point definition is missing, and there are no large or detracting marks present.

1836 Gobrecht Dollar, PR35  
Judd-60 Original, Die Alignment I  
Remarkably Attractive Mid-Grade Coin

**3797** 1836 Name on Base, Judd-60 Original, Pollock-65, R.1, PR35 PCGS. Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment I (coin turn, center of Liberty's head opposite the D in DOLLAR). Struck during the early period of Originals, prior to die clashing that produced a diagonal clash mark on the upper reverse. Records indicate that 400 pieces were produced of these early strikings and many were distributed in the channels of commerce. This is an exceptionally attractive coin that shows only light gray patina over each side, not the often-seen deep toning. Slight high-point friction is seen over the devices, but the surfaces are remarkably free from the abrasions that often accompany these coins. PCGS# 11225

1836 Gobrecht Dollar, PR50  
Judd-60, Die Alignment I, First Striking Period

**3798** 1836 Name on Base, Judd-60 Original, Pollock-65, R.1, PR50 PCGS. Silver. Plain Edge. No Stars Obverse, Stars Reverse. Die Alignment I (coin turn, center of Liberty's head opposite the D in DOLLAR). No diagonal die clash mark is present above the eagle's wing, indicating this coin was one of the 400 produced during the first striking period in the last week of December. This is an attractive coin with just the slightest bit of friction over the high points of the design. The fields are remarkably reflective for an 1836, coins that are termed proofs but are more suggestive of a well-produced prooflike Morgan dollar. The strike definition is strong on all the design elements, and there are a number of small but individually insignificant handling marks in the fields. Each side is mostly brilliant with just the slightest accent of golden patina around the margins. PCGS# 11225

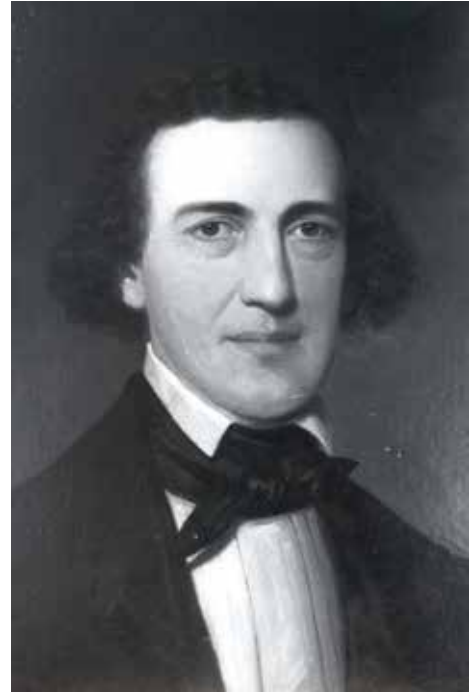

## SEATED DOLLARS

1846 Seated Liberty Dollar, MS64  
Conditionally Very Rare in Finer Grades

**3799** 1846 MS64 PCGS. The Philadelphia Mint produced a large mintage of 110,600 Seated Liberty dollars in 1846, but coin collecting was not yet a widespread hobby at the time and few high-quality examples were saved for future generations. The 1846 is reasonably available in circulated grades today, but examples in MS64 condition are rare and finer specimens are extremely rare. This impressive Choice example offers sharply detailed design elements throughout and the lightly marked surfaces display prooflike reflectivity in most areas. Population: 21 in 64 (2 in 64+), 2 finer (10/14). NGC ID# 24YG, PCGS# 6932

*Mint Director Robert M. Patterson*

1846-O Seated Liberty Dollar, MS64  
Branch Mint Condition Rarity  
None Finer at PCGS

**3800 1846-O MS64 PCGS.** Although the New Orleans Mint opened in 1838, no silver dollars were struck at the southern facility until 1846. In fact, only four issues in the Seated Liberty silver dollar series were struck at the New Orleans Mint : 1846-O, 1850-O, 1859-O, and 1860-O. Of these issues, the earlier two dates are much more difficult to locate than the later two, particularly in Mint State grades.

According to Mint records, only 59,000 Seated Liberty dollars were coined at the New Orleans Mint in 1846. The coins circulated heavily in the regional economy, rather than being used for export or being stockpiled in banks and Treasury vaults. There was little interest in branch mint issues before Augustus Heaton published his treatise on mintmarks in 1893, so few examples of the 1846-O were saved by contemporary collectors. As a result, the 1846-O is reasonably available in lower circulated grades, but the issue is a prime condition rarity at the MS64 grade level. Currently, PCGS has graded four coins with the MS64 designation, and none finer, while NGC has certified a single example in MS64 and a single specimen finer, at MS65 (9/14). We strongly suspect that at least one of the PCGS certification events is a resubmission.

The present coin is a delightful Choice example with remarkably well-preserved surfaces and vibrant mint luster on both sides. The design elements are well-detailed, with a touch of the expected softness on Liberty's head and the upper stars. The surfaces are blanketed in attractive shades of champagne-gold toning, with occasional accents of amber. Eye appeal is outstanding. NGC ID# 24YH, PCGS# 6933

**1850-O Seated Liberty Dollar, MS61  
Elusive Branch Mint Issue in High Grade**

- 3801 1850-O MS61 PCGS.** From a mintage of just 40,000 pieces, the 1850-O Seated Liberty dollar is a rare issue in Mint State grades. Most of the mintage was released into circulation at the time of issue, as silver coins were in great demand for use in the bustling trade in the Mississippi Valley region. Today the 1850-O is in great demand, but the typical example seen grades in the VF-XF levels, and even AU specimens are elusive. This attractive MS61 example offers sharply detailed design elements and the brilliant, lustrous surfaces show a minimum number of minor contact marks for the grade. Population: 2 in 61, 10 finer (10/14). NGC ID# 24YN, PCGS# 6938

**1861 Seated Liberty Dollar, MS64  
Heavily Melted Issue**

- 3802 1861 MS64 PCGS.** A nominal mintage of 77,500 Seated Liberty silver dollars was accomplished in 1861, but a considerable proportion of that production total was later melted for recoinage into subsidiary issues. This attractive MS64 example offers well-detailed design elements and lightly marked surfaces under shades of lavender-gray and golden-tan toning. Population: 24 in 64 (3 in 64+), 5 finer (10/14). NGC ID# 24Z4, PCGS# 6951

**1862 Seated Liberty Dollar, MS64  
Sharply Detailed, Lustrous Example**

- 3803 1862 MS64 PCGS.** The Seated dollars of 1862, from a paltry mintage of 11,540 pieces, are scarce in circulated grades and rare in mint condition. Near-Gems such as the present offering are infrequently seen and finer grades are virtually unobtainable. Lustrous surfaces display hints of light tan color and exhibit sharply struck design elements. Even the hair atop Liberty's head, often weak, is sharp on this coin. A few marks on Liberty's chin and neck, and what may be an unobtrusive vertical indent on the upper-left reverse shield, are only mentioned as possible identification markers. This piece shows great technical quality and aesthetic appeal. Population: 13 in 64 (1 in 64+), 3 finer (10/14). NGC ID# 24Z5, PCGS# 6952

**1870 Seated Dollar, MS63**  
**Attractive, Conditionally Scarce Example**

**3804 1870 MS63 PCGS.** The 1870 Seated dollar mintage was relatively large at 415,000 pieces, but few were saved from circulation for numismatic purposes and Mint State coins like this one are extremely scarce. This example is boldly struck and the lustrous surfaces reveal scattered abrasions consistent with the grade. The peripheries show speckled reddish-russet patina, while the fields and centers are essentially untoned. Population: 24 in 63, 21 finer (10/14). NGC ID# 24ZD, PCGS# 6963

**1871 Silver Dollar, MS64**  
**FS-301, Misplaced Date**

**3805 1871 Misplaced Date, FS-301, MS64 PCGS.** The upper loop of an errant 8 is evident in the dentils below the primary numeral. Satiny luster illuminates minimally abraded fields and well-struck devices, while the outer peripheries show just a suggestion of light golden color around brilliant centers. As a date, the 1871 is one of the most plentiful With Motto issues in Mint State, highly popular among type collectors. Population: 38 in 64 (1 in 64+), 6 finer (10/14). NGC ID# 24ZG, PCGS# 6966

**1872-CC Seated Dollar, XF45**  
**Attractive, Khaki-Gold Surfaces**

**3806 1872-CC XF45 PCGS.** Problem-free examples of this rare, low-mintage Carson City date are seldom seen and command extra attention, especially when originally toned and attractive such as this Choice coin. Thick, khaki-gold patina covers both sides. The strike is soft on the stars and Liberty's head, but nice detail prevails on the eagle. Mint luster remains visible beneath the toning, with flashes of gold and iridescence under a light. Population: 12 in 45, 56 finer (9/14). NGC ID# 24ZK, PCGS# 6969

**1873-CC Seated Dollar, AG3**  
**Rare, Low-Mintage Key Issue**

**3807 1873-CC AG3 PCGS.** The 1873-CC Seated dollar was the final issue of the type and mint, and is also the rarest of the four Seated dollar dates from Carson City. From the low original mintage of 2,300 pieces, only around 100 coins are known to still exist. This problem-free example is well worn with light-gray surfaces that still show the outlines of the major devices. Small abrasions and a few wispy pinscratches are noted on each side. Population: 2 in 3, 79 finer (5/14). NGC ID# 24ZN, PCGS# 6972

**1873-CC Seated Dollar, VG Details**  
**Rare Carson City Issue**

**3808 1873-CC — Mount Removed — PCGS Genuine. VG Details.** Among Seated dollars, only the 1866 No Motto and 1870-S issues are more desired by collectors than the 1873-CC. The present piece shows moderate wear, and the toned surfaces display a few noticeable reeding marks and wispy pinscratches on each side. A pale green area in Liberty's lap and a couple of raised locations on the reverse are likely effects from a removed mount. NGC ID# 24ZN, PCGS# 6972

**1873-CC Seated Dollar, XF45  
Sharp Motifs, Lightly Toned**

**3809 1873-CC XF45 ANACS.** The reported mintage of 2,300 pieces is misleading because more than half of the production may have been melted, as speculated by those who use grading events as an indicator of the actual distribution of an issue. As a result, the 1873-CC dollar is known as the rarest Carson City date of the series, and it is an indisputably challenging acquisition in any grade.

This example displays smooth, minimally marked fields and bold motifs. The well-deserved Choice XF grade is confirmed by a light, silver-gray color with wheat-gold overtones. The semiprooflike surfaces are free of all but a few minor marks, which are muted by the slight wear before being pulled from circulation — no doubt, put aside by a collector who was aware of its considerable rarity even before the turn of the century. NGC ID# 24ZN, PCGS# 6972

**PROOF SEATED DOLLARS**

**1862 Dollar, Rare PR63 Cameo**

**3810 1862 PR63 Cameo PCGS.** Proof silver dollars were distributed in rather limited numbers in 1862; only 550 were struck, and it is a rare occurrence to find a survivor that displays any sort of cameo contrast. This Select representative is an important opportunity for the proof Seated dollar collector, displaying glassy mirroring in the fields and sharp, softly frosted motifs. A faint blush of light golden toning is observed when tilted beneath a light, giving this piece pleasing eye appeal. Population: 6 in 63 (1 in 63+) Cameo, 8 finer (10/14). PCGS# 87005

**1869 Silver Dollar, PR64 Cameo  
Seldom Seen This Well-Contrasted**

**3811 1869 PR64 Cameo PCGS.** Proof silver dollar coinage amounted to only 600 coins in 1869, and extant examples are highly sought-after by date collectors due to the scarcity of their business strike counterparts, which were heavily exported for trade. Cameo examples are the most desirable, but are scarce to rare at all grade levels. This Choice piece boasts profound field-device contrast with full mirroring in the recesses. The strike is crisp and there is just a blush of light golden color over each side. Population: 16 in 64 Cameo, 5 finer (10/14). PCGS# 87017

**Lovely 1870 Dollar, PR64 Cameo**

**3812 1870 PR64 Cameo PCGS.** The 1870 proof Dollar is a curious issue. There were 1,000 pieces struck, but apparently nowhere near that many were sold with the remainder being melted at year's end, making it scarcer than several of the preceding issues even though its mintage is higher. The fields on this piece shimmer with bright, mirror-like intensity and they show only the slightest surface impairments that prevent a full Gem grade. Set against the fields are the frosted white devices which seem even more contrasted because of the sparkling, illimitable depths of reflectivity seen in the recesses. Light golden-hued throughout with just a bit of haziness on the reverse. Population: 17 in 64 Cameo, 14 finer (10/14). Ex: Long Beach Signature (Heritage, 6/2002), lot 6531; Long Beach Signature (Heritage, 2/2003), lot 7999. PCGS# 87018

---

1870 Seated Dollar, PR67 ★ Ultra Cameo  
Single Finest Certified Example

**3813 1870 PR67 ★ Ultra Cameo NGC.** The 1870 proof Seated Liberty dollar claims a generous mintage of 1,000 pieces, but the issue is much more difficult to locate than that figure suggests. The coins were issued with the proof sets, and Q. David Bowers speculates that a number of sets may have gone unsold, and were melted after the end of the year. It is certain that many silver coins were melted after July 10, 1873, when the weight of subsidiary silver coinage was adjusted, but since the silver dollar's composition remained unchanged this may not have been a factor. For whatever reason, proof silver dollars of 1870 are definitely scarcer than proofs of some other dates from that era, some of which claim considerably lower production totals.

The present coin is almost certainly the finest known specimen of this elusive date. For pedigree purposes, we note a small patch of obverse planchet roughness in the field between stars 1 and 2, and a single dark fleck on Liberty's neck. The surfaces are remarkably free of even the smallest signs of post-strike contact, although a few lint marks appear to be remnants of the original proof production. The fields are radiantly mirrored, and liberal, thick mint frost coats the devices front and back. The strike is exacting even if we cannot call it quite full, as we note a small weak area on the eagle's left (facing) leg and claw. The feathers elsewhere, fletchings, star points, and other details, are articulated in a sculptural way that few Seated dollar proofs demonstrate.

The NGC Star designation is reserved for only the finest, most eye-appealing examples, an appellation that this piece richly deserves. A fine coin for the finest collection, and one that we suspect will see spirited bidding. Coins with Deep or Ultra Cameo surfaces are very rare. The NGC *Census Report* shows two PR65 Ultra Cameo examples, a single PR66 Ultra Cameo piece, with this PR67 ★ Ultra Cameo as the sole finest. PCGS shows seven Deep Cameo certification events, with a single PR66 Deep Cameo as their finest certified specimen (9/14).

Ex: FUN Signature (Heritage, 7/2011), lot 3775. PCGS# 97018

**1873 Seated Dollar, Colorful PR64  
Last-Year Proof Issue**

- 3814 1873 PR64 NGC.** The year 1873 was the last for the Seated dollar series, legislated out of existence along with other series by the "Crime of '73." The Seated dollar proofs were struck in the meager amount of 600 pieces. This near-Gem example boasts rich copper-gold color on well-struck surfaces. A few tiny darker toning flecks fail to impair the excellent eye appeal. Census: 50 in 64, 21 finer (10/14). NGC ID# 252V, PCGS# 7021

**TRADE DOLLARS**

**1873-CC Trade Dollar, MS63  
Heavily Exported First-Year Issue**

- 3815 1873-CC MS63 PCGS.** The Carson City Mint struck 124,500 Trade dollars in 1873, the first year of the denomination. Almost all of these coins fulfilled their intended purpose as a medium of exchange in the China trade. There was little interest in branch mint issues at the time, so few were saved by contemporary collectors and even circulated coins are scarce in today's market. This attractive Select specimen exhibits well-detailed design elements with a touch of softness on the eagle's right (facing) claw. The lustrous surfaces are lightly marked and show a few hints of champagne-gold toning. Population: 12 in 63, 5 finer (10/14). NGC ID# 252X, PCGS# 7032

**1875 Trade Dollar, MS64+  
Blended Original Toning**

- 3816 1875 Type Two Reverse MS64+ PCGS. CAC.** The 1875 Trade dollar had a limited mintage of 218,200 pieces, and Mint State survivors are proportionately elusive. This high-end Choice example displays vibrant mint luster beneath original olive-gold, amber, and pale violet toning on each side. The top of Liberty's head is not fully defined, though the strike is otherwise sharp. No major surface abrasions are observed. Population: 21 in 64 (2 in 64+), 4 finer (9/14). PCGS# 40107

**1877-CC Trade Dollar, MS62  
Seldom Available in Mint State**

- 3817 1877-CC MS62 PCGS. CAC.** The Carson City Mint struck 534,000 Trade dollars in 1877, but the date is so scarce today that is likely a significant portion of these were later melted, either at the mint or in China following exportation. This representative displays original, frosty luster beneath a touch of pale amber and milky-gold toning. The design elements are sharply impressed, exhibiting grade-consistent abrasions. Population: 34 in 62 (1 in 62+), 45 finer (10/14). NGC ID# 253D, PCGS# 7045

**1878-S Trade Dollar, MS65  
Final Business-Strike Issue**

- 3818 1878-S MS65 PCGS. CAC.** Luster emerges beneath the patina on this Gem example from the final business strike issue of the Trade dollar series. Contemporary collectors, however, saved few specimens and S-mint coins are quite elusive at the MS65 level. The surfaces reveal hues of sea-green, yellow-gold, red, and peach. Though not fully struck, the design elements reveal a pleasing degree of detail. A few minuscule marks and grazes are present along with a small die lump on Liberty's neck. Once Morgan dollar production began, only proof Trade dollars were minted until the series ended a few years later. Population: 23 in 65 (3 in 65+), 26 finer (9/14). NGC ID# 253G, PCGS# 7048

**PROOF TRADE DOLLARS**

**1879 Trade Dollar, PR64+ Cameo  
Popular Proof-Only Issue**

- 3819 1879 PR64+ Cameo PCGS. CAC.** This high-end Choice specimen exhibits sharply detailed design elements in most areas, with the slightest touch of softness on some star centers. The devices display a rich coat of mint frost, contrasting boldly with the deeply mirrored fields, and the well-preserved surfaces show a few hints of pale gold and amber toning. Population: 43 in 64 (1 in 64+) Cameo, 31 finer (10/14). PCGS# 87059

**1881 Trade Dollar, PR64 Cameo  
Delicate Golden Peripheries**

- 3820 1881 PR64 Cameo PCGS. CAC.** The late date Trade dollar proofs from 1878 to 1883 were struck concurrently with proof Morgan dollars, although mintages are different. The Mint coined 960 proof Trade dollars and 984 proof Morgan dollars in 1881. This Choice Cameo proof has brilliant and deeply mirrored surfaces with satiny, lustrous devices, featuring hints of peripheral gold toning at the borders. Population: 34 in 64 (3 in 64+) Cameo, 38 finer (10/14). PCGS# 87061

**1883 Trade Dollar, Toned PR64+**

- 3821 1883 PR64+ PCGS Secure.** Type Two Obverse and Reverse. Due to the extreme rarity of the 1884 and 1885 issues, the proof 1883 Trade dollar is the final collectible date in the series, and is widely sought throughout the grade spectrum. This high-end Choice example displays sharp motifs and moderate mirroring in the fields. Deep original toning blankets both sides in shades of sun-gold, lavender-gray, and olive-green. NGC ID# 27YV, PCGS# 7063

---

1883 Trade Dollar, PR66  
Vivid Multicolor Patina

- 3822 1883 PR66 PCGS. CAC.** The 1883 Trade dollar was the last regularly issued date of the series, as the 1884 and 1885 dates were clandestinely made in extremely limited quantities. Only 979 proofs were produced. A sharply struck Premium Gem example, this coin exhibits toning on both sides, but the patina on the obverse serves to accentuate the design elements. The colors are also more vivid on that side, including shades of rich orange, red-orange, purple, bright blue, and olive-gray. Population: 17 in 66 (2 in 66+), 5 finer (10/14).  
Ex: FUN Signature (Heritage, 1/2014), lot 4989. NGC ID# 27YV, PCGS# 7063

## MORGAN DOLLARS

---

1878-CC Morgan Dollar, MS67  
The Finest Known VAM-9

- 3823 1878-CC MS67 NGC. VAM-9.** There are currently 22 documented VAM varieties for the 1878-CC dollars, along with five additional die states. Both sides show delicate die cracks, with polishing lines above and left of the tilted mintmark that consists of two closed Cs. A long die scratch from the lower left wreath to the O in ONE is present on this later die state example.  
This stunning Superb Gem Carson City Morgan dollar from the debut issue has frosty silver luster, sharp design definition, and untuned mint brilliance on both sides. This MS67 example of VAM-9 is the finest known for the variety, and tied for the finest certified of the date. Census: 9 in 67, 0 finer (10/14). NGC ID# 253M, PCGS# 7080
-

**1878-S Silver Dollar, Flashy MS67  
Rare This Well-Preserved**

- 3824 1878-S MS67 PCGS.** The 1878-S Morgan dollar had a substantial mintage of nearly 10 million coins, and is readily available in grades through MS66. Only a few examples have been certified at the Superb Gem level, and these are actively sought by advanced specialists and Registry Set collectors. The coin here offered is a remarkable piece, with radiant mint bloom and nearly undisturbed surfaces. Even the most minute design elements are struck to full definition, and the surfaces reveal just a hint of light golden color. Population: 27 in 67 (1 in 67+), 1 finer (9/14). NGC ID# 253R, PCGS# 7082

**1878-S Dollar, MS65 Deep Mirror Prooflike  
Outstanding Contrast**

- 3825 1878-S MS65 Deep Mirror Prooflike NGC.** Writing in *A Guide Book of Morgan Silver Dollars*, Bowers notes: "Some are struck from highly prooflike dies, many just on one side, although these are but a tiny fraction of the existing population." Each side of this Gem Deep Mirror Prooflike coin feature remarkable cameo contrast and well-struck design motifs. Light russet toning surrounds the peripheries encircling brilliant centers. Minor marks are scattered throughout, but they are undistracting. Housed in a former generation holder. Census: 26 in 65 Deep Mirror Prooflike, 3 finer (9/14). NGC ID# 253R, PCGS# 97083

**1879-CC Normal Mintmark Dollar, MS63  
Semiprooflike Fields**

- 3826 1879-CC MS63 PCGS.** Normal Mintmark. Well struck with scintillating luster that glows with semiprooflikeness in the fields and contrasts notably with major design elements that show chalky mint frost overall. Lightly abraded on each side with a few luster grazes in the thick mint frost on the figure of Liberty, an often-seen trait on 1879-CC dollars.  
Ex: *Long Beach Signature* (Heritage, 9/2004), lot 8308. NGC ID# 253T, PCGS# 7086

**1879-CC Silver Dollar, MS64+  
Nearly Prooflike Fields**

- 3827 1879-CC MS64+ PCGS. CAC.** The Carson City issues form a short but heavily collected subset within the Morgan dollar series, and are always in high demand among specialists. Of these, the 1879-CC is one of the more conditionally challenging dates, as it is elusive at the Choice level and scarce any finer. Prooflike coins are in the distinct minority and draw proportionately strong demand at auction. This high-end Choice example is not designated Prooflike by PCGS, but displays substantial reflectivity in the fields with moderate field-motif contrast. The strike is well-executed and the surfaces are void of any noticeable color. A few minor abrasions on Liberty's cheek preclude full Gem status. NGC ID# 253T, PCGS# 7086

---

1879-CC Dollar, MS64 Prooflike  
Pleasing Cameo Contrast

**3828 1879-CC MS64 Prooflike PCGS.** Save for the key-date 1889-CC, the 1879-CC Morgan dollar is the scarcest Carson City issue in the series in high grades. Only limited quantities were dispersed through Treasury in the early 1960s, and even smaller numbers of the date were later found to be among the GSA holdings and in the Redfield Hoard. It is likely that significant quantities of this issue were melted under the terms of the Pittman Act of 1918, perhaps as many as hundreds of thousands of coins.

This representative grades only MS64, but ranks among the few highly sought-after examples that showcase full prooflike mirroring in the fields. The devices are well-defined and contrast nicely with the golden-toned fields. A few minor abrasions are noted, but these are rather minor for the Choice grade level. Population: 81 in 64 (4 in 64+) Prooflike, 9 finer (9/14). NGC ID# 253T, PCGS# 7087

---

---

1879-CC Morgan Dollar, MS64  
Elusive Prooflike Example

**3829 1879-CC MS64 Prooflike PCGS. CAC.** The 1879-CC dollar is among the more elusive Carson City dates during that Mint's first run of operations, particularly in unworn condition. Fully Prooflike pieces pose an even greater challenge. This coin offers clear reflectivity and contrast between faintly toned fields and well-frosted devices. Only a few light, scattered marks keep this near-Gem from an even finer grade. Population: 80 in 64 (4 in 64+) Prooflike, 9 finer (9/14).

*Ex: Long Beach Signature (Heritage, 2/2005), lot 9934; Denver Signature (Heritage, 8/2006), lot 5345; Houston Signature (Heritage, 11/2007), lot 61066. NGC ID# 253T, PCGS# 7087*

---

## GSA DOLLARS

**1879-CC GSA Silver Dollar, MS64**  
**Significant Carson City Condition Rarity**  
**Encapsulated in the Original GSA Holder**

- 3830 1879-CC GSA MS64 PCGS. CAC. VAM-4.** Light chestnut patina visits this key date GSA dollar, while dynamic cartwheel sheen illuminates lightly marked fields and motifs. The strike shows minor inexactness at the centers and on the claws but most of the design is boldly impressed. The mintmark is lightly repunched, described in the VAM reference as "right C doubled on left inside." Die lines down from the base of Liberty's nose provide additional VAM markers. Among Carson City dollars, the 1879-CC ranks among the most coveted, trailing only the key 1889-CC. Many within GSA holders were broken out for certification during the late 20th century, increasing the scarcity of those such as this that remain as issued. No box or certificate accompanies. PCGS# 518848

## MORGAN DOLLARS

**1879-CC 'Capped Die' VAM-3 Morgan, MS62**  
**Untoned and Appealing**

- 3831 1879-CC Capped Die, VAM-3, MS62 PCGS.** A Top 100 Variety. Despite the old-time moniker, this variety is a Large over Small Mintmark reverse die blunder. This example in MS62 offers lustrous surfaces that are largely untuned and quite appealing. A couple of larger marks on Liberty's cheek determine the grade, but most other contact is scattered and minor. A wispy die crack connects the tops of PLURIB. PCGS# 133869

**1879-CC Dollar, MS64**  
**VAM-3, Capped Die Variety**

- 3832 1879-CC Capped Die, VAM-3, MS64 NGC.** A Top 100 Variety. A high-quality representative of the noted Capped Die variety, which constitutes a minority of this key Carson City issue. Die rust surrounds the mintmark, which is nonetheless prominent. Faint gold toning visits the lustrous and impressively smooth surfaces. The centers exhibit faint mint-made roller marks, but these have scant impact upon the eye appeal.  
*Ex: Dallas Signature (Heritage, 11/2006), lot 1185; Pittsburgh Signature (Heritage, 10/2011), lot 4080. PCGS# 133869*

**1879-CC Dollar, MS63 Prooflike**  
**The 'Capped Die' Variety**

- 3833 1879-CC Capped Die, VAM-3, MS63 Prooflike PCGS. CAC.** A Top 100 Variety, the "Capped Die" Morgan exhibits numerous small die chips around the mintmark, believed to be from an attempt to efface an errant underlying small mintmark. This Prooflike representative displays substantial field-device contrast, with grade-consistent abrasions. The hair above Liberty's ear and the eagle's talons are not fully defined, though the strike is otherwise pleasing. Faint traces of pale golden color intrude upon otherwise brilliant surfaces. Population: 23 in 63 Prooflike, 28 finer (9/14). PCGS# 40776

---

**1880-CC Dollar, MS65 Deep Mirror Prooflike  
VAM-5, 8 Over High 7**

- 3834 1880-CC 8 Over High 7, VAM-5, MS65 Deep Mirror Prooflike PCGS.** A Top 100 Variety. Ex: Key West Collection. The second 8 is repunched over a high 7, with the underdigit plainly visible with low-power magnification. The reverse die is easily spotted due to the vertical die line connecting the fletchings with the olive stem above. This bright, silver-white example is untoned and markedly contrasted throughout; a great-looking example of this popular Carson City VAM variety. PCGS# 41134

---

**1880-S Morgan Dollar, MS68  
Only Five Finer Coins at PCGS**

- 3835 1880-S MS68 PCGS. CAC.** Medium S. A virtually perfect Morgan dollar from the storied San Francisco Mint, the design elements are sharply detailed and richly frosted and the surfaces radiate vibrant mint luster on both sides. Close inspection with a loupe reveals no mentionable surface flaws and a few wisps of light gold toning add to the tremendous eye appeal. PCGS has graded five numerically finer examples (9/14). NGC ID# 2544, PCGS# 7118

---

**1881 Silver Dollar, MS67  
Tied for Finest Certified**

- 3836 1881 MS67 PCGS.** The 1881 Morgan dollar had a substantial mintage of more than 9 million coins, and has long been considered a plentiful issue in most grades. However, it's availability declines sharply at the MS66 level, and finer pieces are extremely rare. The present Superb Gem piece is a significantly important find for the patient collector, ranking as one of only four so-graded coins at PCGS (9/14). Frosty, vibrant mint luster illuminates seemingly flawless surfaces, with just a suggestion of light golden color overall. The specialist will also appreciate the bold definition of the devices, as many examples of this date are seen with rather indifferent striking quality. The importance of this bidding opportunity to the Registry Set collector cannot be overstated. NGC ID# 2546, PCGS# 7124

**1883-CC Silver Dollar, MS67**  
Virtually Flawless Surfaces

- 3837 1883-CC MS67 PCGS. CAC.** Both sides of this Superb Gem exhibit delicate peripheral die cracks, with faint obverse clash marks. Likely part of the 1970s GSA sales, this amazing dollar ranks near the top of the population distribution for the issue. Both sides are entirely brilliant with no trace of toning. The strike is sharp, and the eye appeal is first rate. PCGS has only certified five finer examples (10/14). NGC ID# 254H, PCGS# 7144

**1884-S Dollar, MS60**  
Better San Francisco Issue

- 3838 1884-S MS60 PCGS.** The 1884-S Morgan experienced heavy use in commerce following its issuance, and Mint State survivors are scarce. This example is well-struck with bright luster beneath a thin veil of light golden toning. Scattered abrasions contribute to the grade, but none are individually bothersome. NGC ID# 254P, PCGS# 7156

**1885-CC Dollar, MS67**  
Remarkable Carson City Example

- 3839 1885-CC MS67 NGC.** This Carson City issue is extremely popular among collectors, partly due to its excellent production quality. Lower-graded coins are quite available, but Superb Gems are scarce. This marvelous example displays razor-sharp strike definition and impeccably clean surfaces. The reverse is essentially untoned while the obverse reveals a partial band of variegated russet-tan and sea-green peripheral patina. NGC ID# 254S, PCGS# 7160

**1888-O Silver Dollar, MS66+**  
Vibrant Iridescent Toning

- 3840 1888-O MS66+ PCGS.** The toning aficionado will love this Premium Gem 1888-O Morgan dollar that exhibits intermingled gold, russet, sea-green, emerald, cobalt-blue, and violet toning over both surfaces. In addition to the rainbow toning display, it is tied for the finest 1888-O Morgan dollar that PCGS has certified. Only 20 of the 286 MS66 examples have received the Plus designation (10/14). NGC ID# 2556, PCGS# 7184

**1888-O Dollar, MS66+**  
Splendid Multicolor Patina

- 3841 1888-O MS66+ PCGS. CAC.** A range of colors from amber-gold through steel-blue and lavender occupies each side of this splendid MS66+ 1888-O Morgan dollar. The surfaces are distraction-free under the moderate patina. Although PCGS has seen well over 200 submissions in MS66, only 19 of them are in the MS66+ grade of this example, and none are finer (10/14). NGC ID# 2556, PCGS# 7184

**1889-CC Dollar, XF45**  
The King of Carson City Morgans

- 3842 1889-CC XF45 PCGS.** The 1889-CC is one of the major key dates in the Morgan dollar series, and is the most challenging issue in the Carson City subset. This example is lightly circulated, but retains strong detail on each side. Bright, steel-gray color blankets the central regions, while subtle lavender and gold overtones are seen in the peripheral recesses. A few scattered surface scars accompany the grade. NGC ID# 2559, PCGS# 7190

**1889-CC Morgan Dollar**  
Choice AU Example

**3843 1889-CC AU55 PCGS.** The 1889-CC is the most elusive Carson City issue in the Morgan dollar series, and is also one of the major key dates overall. This is a moderately lustrous, Choice AU representative, with light golden-gray toning over still-flashy fields. Light wear is present, but no major consequential abrasions are observed. NGC ID# 2559, PCGS# 7190

**1889-CC Dollar, MS61**  
Exceptionally Clean Surfaces for the Grade

**3844 1889-CC MS61 PCGS.** This Carson City key date boasts a low 350,000-coin mintage, comparable in absolute terms to the 1893-P (378,000 pieces) and 1893-O (300,000 examples) Morgan dollar issues. However, its rarity is the result of mass melting to the extent of an estimated 250,000 to 325,000 coins. This sets the 1889-CC apart from virtually all other dates in the series, especially in such better grades. Only a select group of dates challenge this issue in terms of scarcity, the 1893-S included, ensuring it as a perennial favorite among Morgan dollar enthusiasts. This is a remarkably attractive example that appears much finer than the stated grade. The surfaces are unusually clean for any CC dollar, especially so for an 1889-CC. NGC ID# 2559, PCGS# 7190

**1890 Silver Dollar, MS66**  
Rare This Nice, Tied for Finest Certified

**3845 1890 MS66 PCGS.** The Sherman Silver Purchase Act, passed in July 1890, replaced the Bland-Allison Act as the authorizing legislation for the Morgan silver dollar. The law provided for the purchase of some 54 million troy ounces of silver annually from Western mining interests. As could be expected with such a supply of bullion, silver dollar production in 1890 was substantial throughout the year, with more than 16 million coins ultimately produced. These were paid out gradually over many years, with the final distribution being in the Treasury releases of the early 1960s. Careless preservation, then, ended up being a major factor in the rarity of high-grade examples, as the date is readily available in grades through MS64, but is exceedingly rare at the Premium Gem level.

This representative displays bold design elements and nearly unabraded, frosty surfaces. Faint traces of light golden color accent otherwise brilliant surfaces, giving this piece seemingly unrivaled appeal for the issue. Population: 4 in 66, 0 finer (9/14). NGC ID# 255C, PCGS# 7196

**1890-O Silver Dollar, MS66  
None Numerically Finer**

**3846 1890-O MS66 PCGS.** This New Orleans issue is most often seen in the MS63 to MS64 grade range. Gems can be located with little difficulty, but Premium Gems are genuinely rare. This piece displays radiant, frosty luster beneath blended hues of amber, green-gold, and cherry-lavender. The strike is soft on the eagle's talons and the hair above Liberty's ear, but the beautifully preserved surfaces more than balance the visual appeal. Population: 24 in 66 (1 in 66+), 0 finer (9/14). NGC ID# 255E, PCGS# 7200

**1892-CC Dollar, MS65  
Rarely Seen Finer**

**3847 1892-CC MS65 PCGS. CAC.** Vibrant, frost-white mint bloom and bold design definition are the hallmarks of this Gem representative. The surfaces are void of any significant abrasions, with a few faint luster grazes on the cheek being all that precludes an even finer grade. PCGS has encapsulated only 29 numerically finer examples (9/14). NGC ID# 255M, PCGS# 7214

**1892-S Silver Dollar, AU55  
Low High-Grade Survival Rate**

**3848 1892-S AU55 PCGS.** The 1892 Morgan dollar had a mintage of 1.2 million coins, most of which were quickly distributed into circulation. As a result, lower-grade circulated examples are encountered with frequency, but Mint State pieces are among the scarcest in the series. This Choice About Uncirculated example displays sufficient detail for the grade, with hints of luster remaining in the recesses. Pale golden-gray color blankets each side, while a few amber and aquamarine accents are seen around the borders. NGC ID# 255P, PCGS# 7218

**1893 Silver Dollar, Radiant MS65+  
Unrivaled Eye Appeal for the Grade**

**3849 1893 MS65+ PCGS. CAC.** Although not heralded to the same extent as the San Francisco and Carson City issues of the same year, the 1893 Philadelphia Morgan dollar is itself an important semikey issue. Only a few Mint State bags of the date were among the Treasury releases of the early 1960s, and the issue's rarity above the MS65 grade level is profound. This Plus-graded example is absolutely high-end for the grade, exhibiting heavily frosted, untuned mint bloom and beautifully preserved surfaces. Liberty's cheek is nearly void of flaws, and a few faint disruptions in the frost seem to be all that limits this coin from a technical standpoint. Visually, the piece is remarkable, and will please even the most scrutinizing bidder. Only five coins have been graded numerically finer at PCGS (9/14). NGC ID# 255R, PCGS# 7220

---

1893-CC Dollar, Lightly Toned MS62

- 3850 1893-CC MS62 NGC.** Although not the rarest in an absolute sense, the 1893-CC Morgan dollar is significantly scarcer in Mint State than are Carson City issues from the early 1880s, as almost no representatives of this date were offered in the GSA sales of the early 1970s. The example here offered is better-struck than most, with brilliant, frosty luster over the reverse and pale lavender toning over the obverse. A scattering of minute ticks contributes to the grade. NGC ID# 255S, PCGS# 7222

---

1893-CC Silver Dollar, MS62  
Final Carson City Issue

- 3851 1893-CC MS62 PCGS.** The 1893-CC Morgan is highly popular as the final silver dollar issue from this mint, but is also one of the scarcer Carson City issues in the series. This example shows a blush of light golden color over semiprooflike fields. A deficient strike on the eagle's breast and the hair above Liberty's ear likely contributes to the grade, as the surfaces are only minimally abraded. NGC ID# 255S, PCGS# 7222

---

1893-CC Silver Dollar, MS62  
NGC Certified in Redfield Holder

- 3852 1893-CC MS62 NGC.** Ex: Redfield Collection. Compared to some other MS62 1893-CC dollars in the present sale, this piece will capture the attention of prospective bidders as a particularly nice example for the grade. The surfaces are lightly marked as expected, with delicate peripheral gold toning around brilliant and frosty silver surfaces. The strike is clearly above average for this issue. NGC ID# 255S, PCGS# 7222

---

1893-CC VAM-1 Morgan Dollar, MS62

- 3853 1893-CC MS62 PCGS. VAM-1.** This pleasing final-year CC-dollar has brilliant and untuned silver surfaces with reflective fields and exceptional eye appeal for the grade. As usual for this issue, the obverse has myriad marks and the reverse is clean with only a few scattered marks. NGC ID# 255S, PCGS# 7222

---

1893-CC Morgan Dollar, MS62  
The Usual VAM-1 Variety

- 3854 1893-CC MS62 PCGS. VAM-1.** There are only five VAM varieties of 1893-CC listed at VAMWorld.com. VAM-1 is designated as the Normal Dies, with a large, centered CC mintmark, and most 1893-CC dollars fall under this listing. This example has a typical strike with noticeable central weakness. Myriad bagmarks appear on the lustrous, untuned obverse, while few marks are evident on the similarly untuned reverse. Both sides have reflective fields. NGC ID# 255S, PCGS# 7222

---

1893-CC Silver Dollar, MS62  
Booming Mint Luster

- 3855 1893-CC MS62 NGC. CAC.** A heavily frosted, eye-appealing example of this final-year Carson City issue. A number of small abrasions limit the grade, but are evenly dispersed and not overly detracting. The eagle's breast and the hair above Liberty's ear are lacking in definition, a characteristic not uncommon for this issue. Unlike some other dates from this mint which were represented by the thousands in the GSA sales of the early 1970s, the 1893-CC was represented by just a single coin. NGC ID# 255S, PCGS# 7222

**1893-CC Silver Dollar, MS63**  
Ex: La Vere Redfield

- 3856 1893-CC Morgan Dollar MS65 Paramount (MS63 NGC).** Ex: Redfield Collection. Golden-brown and forest-green toning graces the borders of this lustrous and boldly struck silver dollar. The reverse appears Gem although the obverse shows infrequent moderate contact. La Vere Redfield presumably obtained the present key date Carson City dollar at face value during the 1950s.

**1893-CC Morgan Dollar, MS64**  
Optimum Collecting Grade

- 3857 1893-CC MS64 PCGS.** With a PCGS population of 566 pieces at this grade level, and only 12 finer examples (10/14), MS64 is the optimum collecting grade for this issue, and collectors are advised to seek out a nice quality example for the grade. Although shy of a full strike, this Choice Mint State piece has far above average details. The frosty mint surfaces are highly lustrous, and perhaps most important is the absence of bagmarks on this impressive piece. An arc of gold and sea-green at the right obverse border, and gold around parts of the reverse border, enhance the eye appeal. This piece is a real find for the connoisseur. NGC ID# 255S, PCGS# 7222

**1893-O Dollar, Lustrous MS63**

- 3858 1893-O MS63 PCGS.** The entire 300,000-coin Morgan dollar mintage at the New Orleans Mint in 1893 was produced in the first month of the year, and many pieces were paid out into circulation shortly after. Mint State examples are elusive in proportion to the demand for them in all grades, and those grading finer than this coin are particularly difficult to locate. This example exhibits essentially untoned, satiny luster and a lack of any major abrasions. The strike is deficient in the centers, as is typical of this O-mint issue. NGC ID# 255T, PCGS# 7224

**1893-S Dollar, VF35**  
Choice Original Coloration

- 3859 1893-S VF35 PCGS.** The 1893-S is frequently encountered in heavily worn or damaged condition, but problem-free mid-grade examples are much less often seen. This Choice VF representative exhibits deep gunmetal-gray toning, with smooth surfaces and strong detail. An ideal piece for the collector who appreciates old-time patina. NGC ID# 255U, PCGS# 7226

**1893-S Silver Dollar, XF40**  
Still-Lustrous Morgan Key

- 3860 1893-S XF40 PCGS.** The always-in-demand Morgan dollar key, aside from the 1895 proof. This XF example is lustrous silver-gray, with a little softness from both strike and wear at the centers. An old diagonal mark on Liberty's neck is made less serious by wear, and a few smaller marks appear on the cheek, consistent with the grade. Ex: Long Beach Signature (Heritage, 10/2001), lot 7559; Long Beach Signature (Heritage, 5/2003), lot 7653; Boston Signature (Heritage, 8/2010), lot 5337. NGC ID# 255U, PCGS# 7226

**1894-O Morgan, MS63**  
Above-Average Luster

- 3861 1894-O MS63 PCGS.** Silver dollar production exceeded 1.7 million coins in New Orleans in 1894, all accomplished in the latter half of the year. The coins circulated extensively, with the result that worn examples are easily obtainable, but Mint State coins are seldom seen. This example displays unusually radiant luster for the issue, with light golden toning that deepens toward the borders. The strike is lacking in sharpness on the central regions, as usual. NGC ID# 255W, PCGS# 7230

**1894-O Silver Dollar, MS64**  
Extremely Rare Any Finer

- 3862 1894-O MS64 NGC.** All the Morgan dollar issues from the 1893 to 1895 period are considered key or semikey dates, but the 1894-O is arguably the most difficult to locate with pleasing eye appeal. This piece shows an above-average strike, with only a touch of softness on the eagle's breast and the hair immediately above Liberty's ear. A faint suggestion of light golden color warms otherwise brilliant, deeply satiny surfaces. A few minor luster grazes on the cheek limit the grade, but hardly impede the overall appeal. NGC has certified only eight numerically finer representatives (10/14). NGC ID# 255W, PCGS# 7230

**1894-O Silver Dollar, MS64**  
Vibrant Mint Bloom

- 3863 1894-O MS64 PCGS.** The 1894-O Morgan dollar is plagued by poor strikes and deficient luster, and extensive cherry-picking is needed to locate an attractive representative. This Choice example exhibits the usual weakness on the hair above Liberty's ear and the eagle's breast, but the surfaces display uncharacteristically vibrant, untuned mint bloom so as to fully balance the visual appeal. As only 11 coins have been certified numerically finer at PCGS (9/14), this well-preserved piece represents an important opportunity for the advanced specialist. NGC ID# 255W, PCGS# 7230

**1894-S Dollar, MS65**  
Attractive Multicolor Patina

- 3864 1894-S MS65 PCGS. CAC.** In direct contrast to the New Orleans issue of the same year, the 1894-S Morgan dollar is frequently seen well-struck and vibrantly lustrous. This Gem example is an excellent representative in that regard, and also displays soft multicolor toning in shades of turquoise, sun-gold, sky-blue, and silk-purple. Excellent preservation completes the immense visual appeal. PCGS has certified only 14 numerically finer pieces (9/14). NGC ID# 255X, PCGS# 7232

**1895-S Morgan Dollar, MS63**  
In-Demand Low-Mintage Issue

- 3865 1895-S MS63 PCGS.** Always in demand due to its low mintage of 400,000 pieces, the 1895-S Morgan dollar is seldom seen in high grade because most Mint State examples suffer from excessive surface marks. This attractive MS63 example offers well-detailed design elements and bright satiny mint luster, with a few hints of pale gold toning. NGC ID# 255Z, PCGS# 7238

**1895-S Morgan Dollar, MS64+  
Lightly Toned and Appealing**

- 3866 1895-S MS64+ PCGS. CAC.** Oh so close to a Gem grade, this 1895-S Morgan offers untoned silver areas contrasting against mottled mint, lavender, olive, ochre, and blue hues, more prominent on the obverse and prevailing mostly along the periphery. Liberty's cheek is relatively clean save for a couple of tiny ticks, and the strike is fairly sharp overall, despite some minor weakness at the hair over the ear. The 1895-S is a conditional rarity at the Gem level, and this appealing, lightly toned example is sure to find willing bidders. Population: 41 in 64+, 39 finer (9/14). NGC ID# 255Z, PCGS# 7238

**1896-O Dollar, MS63+  
Rarely Encountered Finer**

- 3867 1896-O MS63+ PCGS.** The 1896-O Morgan dollar is famous for being poorly struck, lackluster, and heavily abraded, three factors that contribute to its profound rarity in grades finer than MS63. This Plus-graded example exhibits only light, grade-consistent surface flaws, with attractive, satiny luster and a trace of golden color. The strike is slightly soft in the centers, but not to the extent seen on many examples. PCGS has certified only 33 numerically finer representatives (9/14). NGC ID# 2563, PCGS# 7242

**1896-S Dollar, Brilliant MS64**

- 3868 1896-S MS64 PCGS.** It is likely that most of the 5 million Morgan dollars manufactured at the San Francisco Mint in 1896 were sent to the melting pot. Choice condition is an ideal grade for the discerning specialist, as this conditionally rare issue becomes out-of-reach for most collectors in Gem grades and higher. Each side is fully brilliant and typically struck with minimal marks. NGC ID# 2564, PCGS# 7244

**1896-S Morgan Dollar, MS64  
Elusive Issue in Finer Grades**

- 3869 1896-S MS64 PCGS.** The 1896-S Morgan dollar was not a well-produced issue and the typical example shows a weak strike, subdued mint luster, and excessive bagmarks. Despite the substantial mintage of 5 million pieces, the 1896-S is an elusive issue above the MS64 grade level. Fortunately, this attractive Choice specimen exhibits a better-than-average strike and lustrous surfaces with a scattering of minor contact marks and a few hints of golden-tan toning. NGC ID# 2564, PCGS# 7244

**1896-S Morgan Dollar, MS65**  
**Prime Condition Rarity in Finer Grades**

**3870 1896-S MS65 PCGS.** Exceptionally vibrant, cartwheel luster swirls over the frosted surfaces of this dazzling-white Gem. The 1896-S Morgan dollar is an important condition rarity in Gem or finer condition. This excellent example has the eye appeal suggestive of an even higher grade, but shows a few too many of the minor bagmarks that often plague this issue.

Minor grazes to the frosty fields and portrait indicate bag storage and the inevitable coin-to-coin contact. Most notable are a few reed marks beneath the wreath on the reverse, and near Liberty's forehead on the obverse. Some central strike weakness is noted above the ear and across the eagle's breast. Population: 71 in 65 (5 in 65+), 4 finer (9/14). NGC ID# 2564, PCGS# 7244

**1898 Morgan Dollar, MS67**  
**High-Quality Type or Registry Set Example**

**3871 1898 MS67 PCGS.** The design elements of this incredible Superb Gem exhibit razor-sharp definition throughout and vibrant mint luster shines through delicate hints of lavender and golden-tan toning. The surfaces are impeccably preserved and eye appeal is tremendous. Population: 79 in 67 (3 in 67+), 0 finer (10/14). NGC ID# 2568, PCGS# 7252

**1898-S Dollar, MS65 Prooflike**  
**Above-Average Strike and Contrast**

**3872 1898-S MS65 Prooflike PCGS. CAC. Ex:** PCGS Tour. Strong reflectivity pierces the rich yellow-green, brownish-gold, and bluish-gray toning that drapes each side. Field-motif contrast is more evident on the present coin than usually seen on Prooflike 1898-S Morgan dollars. This Gem offers decidedly above-average definition through the centers and great eye appeal. Population: 5 in 65 Prooflike, 0 finer (10/14).

*Ex: Long Beach Signature (Heritage, 6/2010, lot 1195. NGC ID# 256A, PCGS# 7257*

**1900-O/CC VAM-11 Dollar, MS66+**  
**Late Die State**

**3873 1900-O/CC VAM-11 MS66+ PCGS.** There is no attribution on the PCGS label. This is a late die state of VAM-11, with a prominent die crack from star 13 to the back hair curls, and a delicate die crack across the lower leaves just above the ribbon knot. Both sides of this Plus-designated Premium Gem are brilliant and untoned, with frosty white luster and excellent aesthetic appeal. For all 1900-O/CC varieties, PCGS has certified 98 in MS66 (3 in 66+), one in MS67, and one in MS67+ (10/14). Only two of the MS66 coins are attributed as VAM-11, and this example would become the finest PCGS VAM-11 if resubmitted for attribution. PCGS# 133963

1901 Silver Dollar, MS63+  
Important Condition Rarity

**3874** 1901 MS63+ PCGS. CAC. The 1901 was the first Morgan dollar issue produced (in part) within the walls of the new Mint building on Spring Garden Street in Philadelphia, which began coinage operations in October 1901. Nearly 7 million coins were struck by the end of the calendar year, but the vast majority of these were paid out early on, with a portion of the remaining pieces being later melted under the terms of the Pittman Act of 1918. No large quantities of the date were present in the Treasury releases of the early 1960s.

Among condition rarities, the 1901 is one of the leaders in the Morgan dollar series, being scarce in all Mint State grades and downright rare finer than MS63. This Plus-graded Select example will be an attractive reward for the patient specialist, exhibiting vibrant, untoned luster and well-struck motifs. Grade-limiting abrasions are minimal, seen primarily in the form of faint luster grazes in the left obverse field. PCGS has certified just 36 numerically finer examples (9/14). NGC ID# 256J, PCGS# 7272

1901 Morgan Dollar, MS61  
Doubled Die Reverse, VAM-3  
Famous 'Shifted Eagle'

**3875** 1901 Doubled Die Reverse, VAM-3, MS61 PCGS. CAC. A Top 100 Variety. Extremely rare in Mint State, the "Shifted Eagle" 1901 VAM-3 is celebrated for its strong die doubling on the tail feathers, arrows, branch, and claws. Other portions of the reverse are also doubled. The spread is directly south, reminiscent of the various 1878 7 over 8 tail feather VAMs. Listed for many years in the *Guide Book*, and missing in most collections of the series. Lightly toned and lustrous with a good strike and no consequential marks. A little-known characteristic of VAM-3 is that Liberty's profile is also lightly die doubled. Population: 2 in 61, 1 in MS62, 1 in MS62+ (9/14). PCGS# 133965

---

1903-S Silver Dollar, MS64  
Seldom Offered at This Grade Level

**3876 1903-S MS64 PCGS.** Many casual collectors opt for an attractive XF or AU example of the 1903-S, as such pieces are encountered with some frequency, but for those whose tastes are a touch more ambitious, this near-Gem offers a tantalizing possibility. Warm luster has a hint of yellow or peach to it, and decently struck devices show few abrasions.

Ex: *ANA Signature (Heritage, 3/2011)*, lot 4187. NGC ID# 256T, PCGS# 7288

---

1903-S Silver Dollar, MS64  
Popular Semikey in Mint State

**3877 1903-S MS64 PCGS. CAC.** The 1903-S is a notable semikey date in Mint State condition, but its availability actually begins to decline as early as the AU grade levels. This Choice example is well-struck, with satiny luster over the devices and semiprooflike mirroring in the fields. The coin is essentially untuned, with few grade-limiting abrasions. NGC ID# 256T, PCGS# 7288

---

1903-S Dollar, MS65+  
Seldom Seen in This High Grade

**3878 1903-S MS65+ PCGS. CAC.** The 1903-S is a long-recognized semikey date in the Morgan dollar series, being particularly scarce in Mint State grades. A number of bags were stored at the San Francisco Mint after striking and were paid out over a long period of time, but supplies were exhausted by the 1960s Treasury releases. With only a little more than 1.2 million coins struck, the 1903-S draws a substantial premium over the common date in all grades.

The example here offered exhibits softly frosted, radiant luster with just a suggestion of light golden color overall. The surfaces are exceptionally well-preserved, and a faint disruption in the luster near Liberty's nose appears to be the only grade-limiting factor. A touch of minor softness is seen on the hair immediately above Liberty's ear, noticed only upon close examination. PCGS has seen only 40 numerically finer examples (9/14). NGC ID# 256T, PCGS# 7288

---

---

### 1904-S Dollar, Flashy MS64

- 3879 1904-S MS64 NGC.** The 1904-S Morgan dollar is similar in Mint State rarity to the 1903-S, despite having nearly twice the mintage (more than 2.3 million coins). This Choice example displays unusually attractive, nearly untuned cartwheel luster, with only a few minute surface ticks that limit the grade. Slight softness is noted on the eagle's breast and the hair above Liberty's ear, but the eye appeal is nonetheless excellent for the issue. NGC has certified only 36 numerically finer representatives (9/14). NGC ID# 256W, PCGS# 7294

---

### 1904-S Silver Dollar, MS64 Better San Francisco Issue in Mint State

- 3880 1904-S MS64 PCGS.** A plentiful date in circulated grades, the 1904-S becomes scarce rapidly beyond the MS64 level. This Choice representative exhibits largely brilliant, satiny surfaces, with faint touches of amber-gold toning around the borders. Slight softness is seen on the eagle's breast and the hair above Liberty's ear, as normal, though it is hardly distracting. NGC ID# 256W, PCGS# 7294

---

## PROOF MORGAN DOLLARS

---

### 1880 Morgan Dollar, PR66 Cameo Bold Contrast, Original Toning

- 3881 1880 PR66 Cameo PCGS.** The proof 1880 Morgan is frequently found sharp with excellent contrast, but many examples show signs of light cleaning. This representative is an exceptional coin, with old-time peripheral toning in shades of blue, violet, and sun-gold, while the fully struck, heavily frosted central devices exhibit just a blush of light champagne color. No contact marks are observed, and the eye appeal is immense. Population: 22 in 66 (2 in 66+) Cameo, 14 finer (9/14). PCGS# 87315

---

### 1882 VAM-10 Morgan, PR65 Doubled 82

- 3882 1882 PR65 PCGS. VAM-10.** Minuscule doubling is evident on the 82 of the date, but nowhere else on the obverse. Both sides of this Gem proof Morgan dollar are fully toned in grayish-heather, sky-blue, and amber, creating exceptional eye appeal. The strike is virtually full. Population: 29 in 65, 37 finer (10/14). NGC ID# 27Z6, PCGS# 7317
-

**1883 Morgan, PR67 Cameo**  
**Pristinely Preserved, Seldom Seen**

- 3883 1883 PR67 Cameo NGC.** The surfaces on this Superb Gem Cameo proof 1883 Morgan dollar are laudable for a noteworthy lack of mentionable marks; the sole exception we find is a small mark on the reverse near the bottom of the eagle's right wing just above the arrowheads. Liberty's cheek and indeed the entire obverse are free of noticeable contact. There is little toning on this piece, which serves to enhance the stark contrast between the frosted devices and ice-white, mirrored fields. But it is the pristine preservation that is this coin's calling card. Morgan dollar proofs dated 1883 are surprisingly elusive in any high grade, regardless of the contrast level. NGC reports seven submissions in PR67 Cameo, with two PR68 Cameo finer (9/14). PCGS# 87318

**1890 Silver Dollar, PR64 Cameo**  
**Lightly Toned Example**

- 3884 1890 PR64 Cameo PCGS. CAC.** The proof 1890 Morgan dollar had a low mintage of only 590 pieces, and is proportionately more elusive than some earlier, higher-mintage dates, especially with full cameo contrast. This Choice example displays deeply mirrored fields and frosty devices. The coin is awash in warm golden toning, while tinges of violet and ocean-blue color are also seen over the lower-right portion of the reverse. A sharp strike completes the eye appeal. Population: 23 in 64 Cameo, 20 finer (9/14). PCGS# 87325

**1892 Silver Dollar, PR65**  
**Vivid Multicolor Toning**

- 3885 1892 PR65 NGC.** The spike in proof dollar production in 1892 was a product of increased silver proof set sales brought about by the introduction of the new Barber type for the smaller denominations. As a result, the issue is fairly plentiful in the context of proof Morgan dollars, but is frequently found lacking terms of strike quality. This Gem example is moderately well-defined, with just a touch of softness on the hair over Liberty's ear. Deep hues of olive-gold, aquamarine, royal-blue, violet, and champagne encompass each side, with the colors somewhat more intense on the obverse. Substantial reflectivity shines through the patina. NGC ID# 272M, PCGS# 7327

**1892 Silver Dollar, PR64 Cameo**  
**Lightly Patinated and Well-Contrasted**

- 3886 1892 PR64 Cameo PCGS.** This better-date Morgan dollar proof is largely free of mentionable marks and offers great field-device contrast on surfaces that are lightly accented with pinkish-gold. Only a few stray hairlines and minor contact evidence in the lower-left reverse field preclude an even finer grade. Generous eye appeal prevails throughout both sides. Population: 24 in 64 (2 in 64+) Cameo, 19 finer (10/14). PCGS# 87327

**1895 Morgan Dollar, PR64 Cameo**  
**Only 880 Proof Examples Struck**  
**No Business Strikes Produced**

**3887 1895 PR64 Cameo PCGS. CAC.** It happened 116 years ago: The June 1898 issue of *The Numismatist* included an article by George W. Rice, titled “Die Varieties of Current United States Standard Dollars.” Q. David Bowers notes the article in his third edition of the Morgan dollar *Guide Book*, calling Rice’s contribution “the first in-depth article on Morgan dollar die varieties.”

Bowers mentions that Rice, in addition to describing some basic differences among various Morgan dollar obverses and reverses, made another lasting contribution: “Significantly, Rice in 1898 stated forthrightly, with no ‘perhaps’ or ‘maybe,’ that in 1895 only Proofs had been struck.”

Despite all the research since — the theories and countertheories, the conjectures concerning the mention of the 12,000 Morgan dollar business strikes for 1895 — the fact that an apparent expert on the series stated conclusively only three years later, without waffling, caveats, or qualifiers, that no 1895 business strikes were struck should carry considerable weight.

Even though Pete Smith’s *American Numismatic Biographies* carries no information on Rice, Bowers gives us more in a footnote at the back of the book:

“George W. Rice today is an unsung hero of numismatic research. He was among the first collectors to take an interest in mintmarked silver coins, joining such figures as W.M. Friesner, John M. Clapp, Edward Goldschmidt, and, of course Augustus G. Heaton. In *The Numismatist*, February 1895, his article ‘Restrikes of U.S. Half Cents’ was published—then an arcane topic that was confusing to even the most experienced dealers. An article in the October 1897 issue of the same magazine, ‘The Unexplained Rarity of Certain U.S. Coins,’ stated that a certain cent reverse die was used in its perfect state with an obverse dated 1803, but in its cracked or later state with an obverse dated 1802. ‘It will thus be seen that it would be possible to have a large coinage recorded without a piece being struck bearing a corresponding date; and the recorded coinage of cents for 1799 may have been largely from dies of 1798 or 1800, and that of 1804 may have been dated 1803 or 1805, or perhaps both.’ Such comments were unusual for the era. His other contributions were numerous and valuable. In the meantime, he enjoyed hoarding 1856 Flying Eagle cents and amassed hundreds of them. In 1918 he died at the age of 66.”

Given Bowers’ biographical snapshot of him, Rice comes across as a studied and thoughtful numismatist. He was certainly an expert on proof coins of the 19th century, as his collection included an unbroken run of silver and minor proof sets from 1859-1896 when it was sold through the St. Louis Stamp & Coin Co. in April of 1906. Lots 931 and 932 of the catalog of that sale were both six-piece 1895 proof sets. Concerning the 1895 “business strike” Morgan dollars, Occam’s Razor seems to apply. The simplest explanation is the best. No examples have ever been seen, because *none were made*.

The present coin is an undoubted proof, with sharply detailed frosty design elements that contrast boldly with the deeply mirrored fields to produce a dramatic cameo effect. The mostly brilliant surfaces show a few hints of pale gold toning and only minor signs of contact. Eye appeal is tremendous. Population: 33 in 64 Cameo, 26 finer (10/14). PCGS# 87330

1896 Dollar, PR63 Deep Cameo  
Bold Field-Motif Contrast

- 3888** 1896 PR63 Deep Cameo PCGS. The proof 1896 is a favorite issue among collectors for its sharp strikes and stark cameo contrast. This example is outstanding in that regard, showing heavily frosted, fully struck devices set against deep mirrors. Traces of light golden color graces each side, masking any grade-limiting hairlines in the fields. Population: 3 in 63 Deep Cameo, 27 finer (9/14). PCGS# 97331

PEACE DOLLARS

1923 Peace Dollar, MS67  
Tied for the Finest Certified

- 3889** 1923 MS67 PCGS. Both sides of this sharply detailed Superb Gem have extraordinary white luster and frosty surfaces. No toning appears on either side. This impressive Peace dollar is tied for the finest that PCGS and NGC have certified, a prize for the advanced collector. Population: 54 in 67, 0 finer (10/14). NGC ID# 257F, PCGS# 7360

1928 Silver Dollar, MS66  
Tied for Finest Certified

- 3890** 1928 MS66 PCGS. The 1928 boasts the lowest mintage in the Peace dollar series, with a total of just 360,649 coins. The issue is widely sought in all grades, but is particularly elusive in Gem and finer condition. Furthermore, when found, the 1928 is frequently lacking in eye appeal; the typical piece is softly struck in the centers and shows rather insipid luster and pale toning. An eye-appealing piece in MS65 or MS66 is a genuine rarity.

This Premium Gem example displays an exceptional degree of sharpness on the hair strands over Liberty's ear and on the eagle's wings. The surfaces are satiny with no major abrasions, and each side exhibits softly blended shades of gold, amber, and sky-blue color. Population: 14 in 66, 0 finer (9/14). NGC ID# 257V, PCGS# 7373

---

**1934-D Peace Dollar**  
**Boldly Struck Premium Gem**

**3891 1934-D MS66 PCGS Secure.** Bright silver luster enlivens the satin-smooth surfaces of this boldly struck Premium Gem dollar. A whisper of almond-gold patina visits the unmarked fields and devices. The Denver Mint put forth a strong effort on this final-year mintage, striking more than 1.5 million coins. Few, however, qualify for this lofty MS66 grade and the issue is virtually unobtainable any finer. Population: 65 in 66 (2 in 66+), 2 finer (10/14). NGC ID# 257Y, PCGS# 7376

---

**1934-S Peace Dollar, MS65**  
**Outstanding Key Date Representative**

**3892 1934-S MS65 PCGS.** The low mintage of this key issue combines with heavy circulation of the 1 million examples struck to result in a small number of Uncirculated survivors; far fewer than the number of collectors who wish to own a Mint State example. This is an absolutely gorgeous Gem that displays outstanding strike definition and shimmering mint luster. The well-preserved surfaces are distraction-free, and reddish-russet peripheral toning increases the overall visual appeal of the piece. NGC ID# 257Z, PCGS# 7377

---

**GOLD DOLLARS**

---

**1850 Gold Dollar, MS65**  
**Excellent Aesthetic Appeal**

**3893 1850 MS65 PCGS.** Despite a mintage of nearly 500,000 coins, the 1850 gold dollar is far and away the scarcest Philadelphia issue in the Type One series (save for the 1849 Closed Wreath variety). Mint State examples are scarce in all grades, and genuinely rare at the Gem level. This well-struck example exhibits radiant yellow-gold luster and beautifully preserved surfaces. Faint die striations are seen in the fields, as is typical of this issue. Population: 18 in 65, 3 finer (9/14). NGC ID# 25BF, PCGS# 7509

---

**1850 Gold Dollar, MS65**  
**Vibrant Mint Bloom**

**3894 1850 MS65 PCGS.** The 1850 gold dollar had the highest attrition rate of all Type One Philadelphia issues, and is genuinely elusive in pleasing Mint State condition. The typical piece grades no finer than MS63, and Gems are decidedly rare. This example displays frosty yellow-gold luster and crisp design definition. A few faint disruptions in the cartwheel affect limit the grade, but leave this coin with uninhibited eye appeal. Population: 18 in 65, 3 finer (10/14). NGC ID# 25BF, PCGS# 7509

**1850-C Gold Dollar, Exceptional MS63  
One of the Three Finest Certified**

**3895 1850-C MS63 PCGS. Variety 1.** The 1850-C has the second lowest mintage figure of any gold dollar struck at the Charlotte Mint (only 6,966 pieces), trailing only the 1859-C with a total of only 5,235 pieces. From the standpoint of overall rarity, it is about tied with the 1859-C as the second rarest gold dollar from this mint, the rarest being the 1849-C Open Wreath issue. The typical piece grades only in the VF to XF range, and properly graded Mint State examples are distinctly rare, with as few as 10 such pieces extant, per Doug Winter.

The present Select example is tied with just two others (both NGC coins) as the finest certified (9/14). Rich orange-gold coloration adorns the lustrous surfaces that exhibit sharply struck design elements. Indeed, these are much better-defined than ordinarily seen, including the hair near the eye and ear and the radial star lines, elements that are often flat. Both sides are minimally marked for the issue and the designated grade. In fact, any specimen relatively free of marks is quite rare. Consequently, this coin displays well above-average eye appeal. NGC ID# 25BG, PCGS# 7510

**1854 Gold Dollar, MS65+  
Transcendent Type One Example**

**3896 1854 Type One MS65+ PCGS.** While earlier Philadelphia dates are somewhat more available than this final-year date for type, the sheer mint-fresh quality of this example transcends most other candidates. The mint luster, quality of strike, and visual appeal are outstanding. Struck from workhorse dies nearing the end of their usefulness, numerous cracks and die clashing are seen (especially on the reverse), but if anything they add interest to the coin. Seldom seen finer — this is the sole Gem example with the PCGS Plus designation. Population: 30 in 65 (1 in 65+), 16 finer (10/14). NGC ID# 25BY, PCGS# 7525

**1855 Gold Dollar, MS63  
Important Type Two Example**

**3897 1855 MS63 PCGS.** The Type Two gold dollar design was only produced for three years, 1854 to 1856, making this an important selection for the type collector. Examples of the 1855 issue, the second-most available of the type, are not rare in lower grades but do become scarce at or finer than MS63. This is a well-defined, lustrous specimen with light natural patina and relatively few surface marks. NGC ID# 25C4, PCGS# 7532

**1855 Type Two Gold Dollar, MS63  
Lustrous and Relatively Unmarked**

**3898 1855 MS63 PCGS.** Many collectors for one reason or another prefer the 1855 to the 1854 Type Two gold dollars for type set purposes, even though the two P-mint issue had statistically identical mintages. The 1855, however, shows the piquant pair of slanted 5s in the date. This Select example shows the near-ubiquitous bold die clashing seen on this short-lived subtype, but elsewhere only a few random, small marks account for the grade. Lively luster on sandy-gold surfaces creates strong eye appeal. The two L's in DOLLAR and the 8 in the date are softly impressed, also a frequent occurrence. NGC ID# 25C4, PCGS# 7532

**1855-C Gold Dollar, AU55**  
**Lightly Circulated Example**

- 3899 1855-C AU55 PCGS. Variety 2.** The 1855-C gold dollars, struck in the amount of 9,803 pieces, are found with two different reverses. Variety 1 shows the final 5 centered under the A in DOLLAR and the 8 in the date weakly struck; on Variety 2, as here, the 5 is a bit farther right and the 8 is well-struck. (This reverse, newly published in Doug Winter's 2008 third edition of *Gold Coins of the Charlotte Mint*, was a discovery of Heritage cataloger Brian Koller.) The 1855-C is always poorly struck on the headdress feathers, although here the forward portion is soft and the rearward plumes show decent detail. The hair above the ear and over the forehead is soft as well, as are some of the letter bottoms around the obverse periphery. Die clashing is evident behind Liberty's head. A thin scrape runs downward from beneath the profile, but other contact marks are minor. Some planchet roughness in the obverse field beneath ST and at CA shows, with darker toning flecks on those areas. The reverse is nicer overall, showing a decent level of detail and few distractions other than some strike softness in the left-side denticles. This piece displays only light circulation wear and possesses more allure than the technical description would imply. Finding a finer-graded example would probably be a long search. Population: 12 in 55, 10 finer (10/14). NGC ID# 25C5, PCGS# 7533

**1855-O Gold Dollar, AU58**  
**The Only Type Two O-Mint Example**

- 3900 1855-O AU58 PCGS. Variety 2.** Each operating Mint in the 1850s produced Type Two gold dollars: Philadelphia in 1854 and 1855; New Orleans, Dahlonega, and Charlotte in 1855; and San Francisco in 1856. The New Orleans Mint coined 55,000 of these diminutive gold coins in 1855. This near-Mint example has brilliant light yellow surfaces, nearly full luster, and faint hairlines. Although the LL in DOLLAR and the 8 in the date are weak, all other design elements are bold. Population: 37 in 58, 34 finer (10/14). NGC ID# 25C7, PCGS# 7535

**1860-S Gold Dollar, MS63**  
**Minutely Doubled Mintmark**

- 3901 1860-S MS63 NGC.** Minuscule doubling appears at the lower left serif of the mintmark. The 1860-S is one of only seven San Francisco Mint gold dollar issues, from a mintage of only 13,000 coins. That mint produced only 90,000 gold dollars throughout its history, and survivors are elusive in all grades. This frosty Mint State piece is exceptional, with brilliant yellow-gold surfaces and sharp design motifs. Few finer examples are certified. Census: 5 in 63, 5 finer (10/14). NGC ID# 25CT, PCGS# 7557

**1884 Gold Dollar, MS68**  
**Seemingly Unmatched Visual Appeal**  
**Recut Date**

- 3902 1884 MS68 PCGS.** All four date numerals are noticeably recut, with the widest spread seen on the 18. This interesting variety is unlisted in the *Cherry-pickers'* reference, and is diagnostic of a proof die for this year. Breen suggested this proof die was retired to business strike production, and the existence of this piece seems to confirm that theory. As a date, the 1884 gold dollar is moderately plentiful in most grades, but is exceedingly rare at the lofty MS68 level. This piece showcases fully defined motifs and beautifully preserved semiprooflike fields. Shades of honey and apricot-gold color emblazon each side. Population: 7 in 68 (1 in 68+), 0 finer (10/14). NGC ID# 25DN, PCGS# 7585

1889 Gold Dollar, MS68  
Tied for Finest Graded

- 3903 1889 MS68 PCGS.** Vibrant mint luster and distraction-free surfaces prevail on this Superb Gem 1889 gold dollar, last year of the denomination. Both of the coinage denominations bearing the Indian Princess motif would disappear in 1889, the one dollar and the three dollar gold. Only 29,900 of the smaller coin were struck, but many nice examples were set aside. The present example is among the top four at PCGS with none finer (9/14). The golden-orange surfaces show a hint of reddish color, and the sharp strike and paucity of marks make this a contender for a nice Registry Set or type set. NGC ID# 25DU, PCGS# 7590

PROOF GOLD DOLLAR

1882 Gold Dollar, PR64 Deep Cameo  
Just 125 Proofs Struck

- 3904 1882 PR64 Deep Cameo PCGS. CAC.** A tiny proof mintage of just 125 pieces provides few survivors of this late-series issue, and most of them are without the bold cameo effect of this Choice coin. Pale yellow-gold mirrors are delightfully smooth, and the boldly struck devices offer ample mint frost. Only minimal, tiny flaws in the fields preclude a finer designation. Population: 4 in 64 Deep Cameo, 7 finer (10/14).  
*Ex: Long Beach Signature (Heritage, 5/2008), lot 2949; Long Beach Signature (Heritage, 2/2009), lot 2399; Long Beach Signature (Heritage, 6/2011), lot 4464. NGC ID# 25ES, PCGS# 97632*

EARLY QUARTER EAGLES

1804 BD-2 Quarter Eagle, AU58  
14 Star Reverse  
Double Denomination Die

- 3905 1804 14 Star Reverse AU58 PCGS. BD-2, R.4.** Bass-Dannreuther Die State a/a, as nearly always for this variety. After producing a couple thousand quarter eagles, the reverse die was combined with an 1804-dated obverse die to produce a similar number of JR-2 dimes. Aside from a few rare patterns, the Draped Bust dimes and quarter eagles were the only coins to share reverse dies between different denominations. When we offered the Ed Price Collection in 2008, we identified seven reverse dies from 1797 to 1807 that were used on both denominations. This near-Mint example has a trivial marks as expected, with satiny light yellow luster and hints of green color. A highly attractive example. Population: 20 in 58, 15 finer (10/14). NGC ID# 25F8, PCGS# 7652

1807 BD-1 Quarter Eagle, AU50  
The Usual Early Die State

- 3906** 1807 AU50 PCGS. BD-1, R.3. Bass-Dannreuther Die State a/b. This is the early die state with no obverse cracks. The reverse die had been used previously for 1805 and 1806 quarter eagles, and reappeared on 1807 dimes. There are no common dates among the early quarter eagles from 1796 to 1807, but this issue is more frequently encountered than any other. Its mintage of 6,812 coins was about one-third the entire mintage for that quarter eagle date range. A hint of green appears on the light yellow surfaces of this example. Trivial handling marks are consistent with the grade, and both sides are devoid of consequential problems. NGC ID# 25FC, PCGS# 7656

1826/5' Quarter Eagle, AU55  
Probably 1826/6, BD-1  
Elusive, Low-Mintage Issue

- 3907** 1826/5 AU55 PCGS. BD-1, High R.5. Bass-Dannreuther Die State b/b. The 1826 Capped Head Left quarter eagle has a reported mintage of just 760 pieces, but some 1826-dated coins may have been struck in 1827. One die variety is known for the date. The 1826 has traditionally been called an overdate, but present-day researchers doubt the overdate status on two counts. First, the undertype digit looks more like a 6 than a 5. Second, the 1826 obverse features large stars around the borders, while the two obverse dies used to strike 1825 quarter eagles both have small stars. If an unused 1825 die was overdated, it should theoretically have small stars, as well. Altogether, it seems more likely that the 6 in the date was recut, rather than struck over a 5. John Dannreuther calls the issue an 1826/6 in *Early U.S. Gold Coin Varieties* and the 2014 *Guide Book* lists it as 1826, 6 over 6. The surviving population numbers only 30-35 examples in all grades.

The 1826 half eagle is very rare in Mint State grades, with only three coins certified in Mint State at PCGS and none at NGC (10/14). The present coin is a delightful Choice AU specimen with bright yellow-gold surfaces that show prooflike reflectivity in many areas. Dramatic clash marks are evident on both sides, especially the reverse. No planchet adjustment marks are present and only minor abrasions can be detected, none worthy of individual mention. The strike is typical for this issue, with sharp definition on the central design elements but some flatness on some star centers. Overall eye appeal is outstanding. Population: 4 in 55, 6 finer (10/14).

Ex: Kennywood Collection (*American Numismatic Rarities*, 1/2005), lot 851. NGC ID# 25FH, PCGS# 7665

## CLASSIC QUARTER EAGLES

1839-C Two and a Half, AU55  
Variety 22, Repunched Date

- 3908 1839-C AU55 PCGS. Breen-6150, Variety 22, R.4. A pleasing caramel-gold Charlotte quarter eagle. The major devices are well struck, and no marks are remotely worthy of comment. The fields are mildly prooflike. Despite a mintage of only 18,140 pieces, three die pairs were used to strike the 1839-C. Variety 22 is the most distinctive, since the 39 is sharply repunched and both sides display lengthy cracks. These cracks are bold on late die state examples, but the present Choice AU example is from a relatively early die state with delicate cracks. NGC ID# 25G4, PCGS# 7699

1839-O Quarter Eagle, AU53  
A Highly Popular Issue

- 3909 1839-O AU53 NGC. CAC. Variety 27, R.3. The High Date, Wide Fraction variety. The numismatic significance of the 1839-O quarter eagle is based on: being the first gold coin produced at the New Orleans Mint; the only Classic Head issue of any denomination from this mint; and the only New Orleans quarter eagle with the mintmark located on the obverse.
- The yellow-gold surfaces of this AU53 example display reddish-orange accents and exhibit well-defined design elements. A few minute circulation marks do not detract in the least from the overall nice eye appeal, affirming the appropriate CAC endorsement. NGC ID# 25G7, PCGS# 7701

## LIBERTY QUARTER EAGLES

1840-O Quarter Eagle, MS62  
First-Year O-Mint Issue

- 3910 1840-O MS62 PCGS. Variety 2. Christian Gobrecht's Liberty Head quarter eagle design was introduced in 1840, being produced at the mints in Philadelphia, Charlotte, Dahlonega, and New Orleans. The mintage figure from New Orleans was the highest with 33,580 examples struck, but this issue has not proven to be a common one. In fact, it should be considered rare, especially in Mint State condition.

This attractive piece is softly struck in the centers, as always, with pleasing luster and greenish-gold toning that turns to deeper apricot color near the borders. A group of russet specks are noted on the upper left obverse. A few wispy marks are seen on each side, mainly in the fields. Among the better-known examples, it is one of seven coins graded MS62 by PCGS, with none finer. NGC has seen five MS62 examples, while grading just one piece even finer at MS63 (9/14). NGC ID# 25GD, PCGS# 7720

**1841-C Quarter Eagle, AU58  
Rare High-End Example**

- 3911 1841-C AU58 NGC. Variety 1.** The 1841-C is one of the scarcest quarter eagle issues from the Charlotte Mint, with only 125 to 175 examples believed extant. The typical piece grades only in the VF to XF range; AU coins are rare, and Mint State pieces are prohibitively so. This near-Mint example displays bright green-gold patina, with tinges of luster remaining in the recesses. The strike is soft on some of the finer details, though the definition is above-average for the issue. Census: 23 in 58 (1 in 58 ★), 6 finer (9/14). NGC ID# 25GE, PCGS# 7721

**1845 Quarter Eagle, MS63  
Among the Finer Known Examples**

- 3912 1845 MS63 PCGS.** Those who collect Liberty quarter eagles by the design type or the decade should find the current offering to be of interest. The 1845 issue saw a great increase from the prior year, and is the most available date of the 1840s. The lustrous antique-gold surfaces of this example display fully struck devices and relatively few marks for the grade. This Select Mint State coin is near the top of the line for graded examples of the date and denomination. Population: 10 in 63, 6 finer (10/14). NGC ID# 25GW, PCGS# 7737

**1846 Quarter Eagle, MS63  
Condition Census Example**

- 3913 1846 MS63 NGC.** The 1846 quarter eagle, with a scant mintage of only 21,500 pieces, is a scarce and seemingly underappreciated issue in all grades. Mint State coins are rare at any level, but are most often seen only in the MS60 to MS61 range. Factor in an unknown number of resubmissions, and this issue appears even rarer in the Mint State level. The present piece is tied with one other as the finest certified at NGC, and is rivaled only by two numerically equal coins at PCGS (10/14). The obverse is remarkably sharp on the stars and Liberty's hair curls, and the reverse shows only a touch of striking weakness on the eagle's left (facing) leg. This piece represents a rare and important opportunity that may not present itself again for quite some time. NGC ID# 25GZ, PCGS# 7740

**1853-D Quarter Eagle, MS61  
Extremely Rare in Mint State**

- 3914 1853-D MS61 PCGS. Variety 17-N.** The 1853-D quarter eagle had a scant mintage of only 3,178 coins, ensuring its rank as one of the scarcer issues in the series, both in high grades and overall. Doug Winter estimates only 85 to 105 examples are extant, with just five or six being in Mint State; PCGS suggests the overall survival to be definitively below the 100-coin mark, and neither they nor NGC have graded any examples finer than MS62.

This lustrous yellow-gold representative is relatively free of major abrasions, exhibiting above-average eye appeal for the grade. The eagle's talons, left (facing) leg, and the hair curls around Liberty's face are not fully defined, though this is characteristic of nearly all 1853-D quarter eagles. The advanced Southern gold specialist will appreciate the importance of this rare offering. Population: 7 in 61, 2 finer (9/14). NGC ID# 25HW, PCGS# 7768

**1854-C Quarter Eagle, AU55  
Elusive Charlotte Issue**

- 3915 1854-C AU55 NGC. Variety 1.** The 1854-C is one of the scarcer quarter eagle issues from the Charlotte Mint, with an estimated survival of only 105 to 145 pieces in all grades. The typical coin grades only in the VF to XF range, and AU or finer examples are rare. This piece displays bright yellow-gold patina, with minimal grade-consistent abrasions. Some striking deficiency is noted on the eagle's neck and leg feathers, not unusual for this poorly produced issue. Census: 21 in 55, 44 finer (10/14). NGC ID# 25HY, PCGS# 7770

**1854-O Quarter Eagle MS62+  
Excellent O-Mint Type Representative**

- 3916 1854-O MS62+ PCGS. CAC. Variety 2.** This variant, one of seven known for the 1854-O, is characterized by the left foot of the 1 in the date positioned above a dentil and the right foot of the 4 slightly above a dentil. This is the finest example of this variety we have offered, second finest being an MS62, also certified by PCGS. As one would expect from the mintage of 153,000 pieces, the 1854-O is among the more available O-mint quarter eagles. However, only a couple of dozen pieces appear to have survived in mint condition. This is an unquestionably original example that displays rich reddish-gold and lilac color. As expected, the obverse is much sharper detailed than the reverse. Minimal abrasions. NGC ID# 25J2, PCGS# 7772

1858-C Quarter Eagle, AU58  
Popular Charlotte Issue

- 3917 1858-C AU58 NGC. **Variety 1.** The 1858-C is one of the more plentiful quarter eagle issues from this Mint, with more than 300 examples believed to survive in all grades. However, its availability is primarily limited to the XF and lower grade levels; AU examples are scarce, and Mint State pieces are rare. This nearly Uncirculated representative displays rich orange-gold patina, with small remnants of luster in the recesses. The eagle's talons and left (facing) leg are not fully defined, though the strike is otherwise pleasing. Census: 33 in 58, 36 finer (9/14). NGC ID# 25JH, PCGS# 7787

1858-C Two and a Half, AU58  
Low-Mintage, Late-Date Charlotte Issue

- 3918 1858-C AU58 NGC. **Variety 1**, the only variety known. The 1858-C quarter eagle had a minuscule production run of only 9,056 pieces, and of that number an estimated 225-325 pieces exist today, most of which are XF or AU. A couple of dozen Mint State examples are known, but they are mighty pricey items. This near-Mint example is a bargain by comparison. The bright, pale reddish-golden surfaces display a confirmed russet outline around the margins. Light abrasions can be found, but none are worthy of singular mention. The strike on the obverse is significantly stronger than the detailing seen on the reverse. NGC ID# 25JH, PCGS# 7787

1879-S Two and a Half, MS64  
Tied for Finest Known

- 3919 1879-S MS64 PCGS. **CAC.** The 1879-S quarter eagle had a sufficient mintage of 43,500 pieces, enough one would think to supply the needs of Western commerce. However, because demand on the West Coast was so strong for gold and silver coins, rather than paper money, mintages such as seen for the 1879-S evaporated into the channels of commerce. Today most survivors are XF or AU (at best), and few nice pieces are known in mint condition. In fact, this is one of only two MS64 pieces certified at PCGS, and NGC has graded only one — neither service has encountered a coin finer than MS64. The mint luster seen here is dazzling, and true to form (Garrett and Guth) the fields are bright and reflective. The strike details are strong but not quite complete, and there are only the smallest abrasions scattered over each side. NGC ID# 25L3, PCGS# 7831

---

**1892 Quarter Eagle, Sharp MS66**

- 3920 1892 MS66 NGC.** The mintage of the 1892 quarter eagle issue is sometimes overlooked in the grand scheme of 19th century gold coinage, but it was a remarkably low 2,440 pieces for circulation — about one-fifth that of the 1891 Philadelphia issue. This makes it the lowest-mintage quarter eagle date since the 1885, which had a mintage of only 800 pieces.

The reasons for the small quarter eagle mintage appear to have been one of benign neglect more than intent: The Sherman Silver Purchase Act of 1890 mandated that even more mint forces be turned to production of Morgan dollars mined from domestic silver, and a wrinkle in the act — that the silver (for which the government drastically overpaid) had to be paid for with paper currency backed by gold — threatened to drastically deplete America's gold reserves. The focus on gold coinage was on half eagles and eagles at the expense of gold dollars and double eagles. This beautiful reddish-orange piece is highly reflective and close to a full strike on minimally abraded surfaces. Census: 2 in 66, 2 finer (10/14). NGC ID# 25LG, PCGS# 7844

---

**1893 Two and a Half, MS66  
Bright, Satiny Surfaces**

- 3921 1893 MS66 PCGS.** The relatively low mintage makes this an attractive coin for type collectors. Plus this date has the charm of a coin struck in the 19th century, always a factor for collectors, even though it is usually unstated. This piece has an unusual finish that adds even more to its appeal. The surfaces are satiny, as expected, but are brighter than normally seen on a P-mint quarter eagle. The color is also distinctive with a bright, even orange-gold hue across each side. Sharply defined throughout. Population: 24 in 66, 1 finer (10/14). NGC ID# 25LH, PCGS# 7845

---

**1901 Quarter Eagle, MS67  
The Perfect 20th Century Type Coin**

- 3922 1901 MS67 PCGS.** The mintage of the 1901 was 91,100 pieces, but few were actually used as currency. Most were set aside as bank reserves, exported to Europe, or otherwise saved over the past 113 years. That being said, only 12 other coins have achieved the lofty status of MS67 and only a single piece is finer at PCGS (10/14). The surfaces are smooth and satiny with strong strike definition throughout. The coin is so clean one could literally count the post-striking defects present (but please don't call and ask us to). NGC ID# 25LS, PCGS# 7853

---

**1905 Quarter Eagle, MS67+  
High-End Type Representative**

- 3923 1905 MS67+ NGC. CAC.** A plentiful late-series date, the 1905 is available in grades through MS67; however, finer examples are extremely rare, making this Plus-graded piece a must-have item for the advanced type or date collector. Heavily frosted green-gold luster blankets each side and the design elements are fully struck. Close examination fails to find any noteworthy surface flaws. NGC has certified only six numerically finer representatives (9/14). NGC ID# 25LW, PCGS# 7857

---

**PROOF LIBERTY QUARTER EAGLES**

---

**1888 Quarter Eagle, PR63  
Pleasing Mid-Grade Proof**

- 3924 1888 PR63 PCGS.** The Mint struck 97 proof quarter eagles in 1888, and as few as half of those are believed known today. The certified population totals count some 69 examples (10/14), but this number is believed to include resubmissions. The present coin displays intermingled honey and apricot-gold hues over deeply reflective fields and fully defined design elements. A few minute contact marks limit the grade. Population: 6 in 63, 14 finer (10/14). NGC ID# 288B, PCGS# 7914

---

1900 Liberty Quarter Eagle, PR68 Deep Cameo  
Turn-of-the-Century Gold Rarity  
None Numerically Finer at PCGS

**3925 1900 PR68 Deep Cameo PCGS. CAC.** The 1900 Liberty quarter eagle claims a generous proof mintage of 205 pieces, second only to the series-high mintage of 223 pieces accomplished the following year. In their *Encyclopedia of U.S. Gold Coins 1795-1932*, Jeff Garrett and Ron Guth estimate more than 100 specimens survive today in all grades. Several coins are included in institutional collections, such as the National Numismatic Collection at the Smithsonian Institution and the collection of the American Numismatic Society. A number of coins are known in impaired condition as well, as proof gold coins were often spent for face value during hard economic times in the 1920s and 1930s.

Examples of the 1900 proof quarter eagle began appearing at auction at an early date. The coin in lot 233 of the David S. Wilson Collection (S.H. Chapman, 3/1907) realized \$4.50, an impressive price in those days, when the coin was only seven years old. Of course, the issue has continued to move up in price and popularity over the years. Recent auction appearances include the spectacular PR68+ Deep Cameo PCGS specimen in lot 1275 of the ANA National Money Show (Stack's Bowers, 5/2013) that realized \$111,625.

The present coin is a magnificent PR68 example, with fully struck design elements and impeccably preserved yellow-gold surfaces. The devices exhibit a rich coat of mint frost that contrasts intensely with the deeply mirrored fields to produce a stunning cameo effect. Tremendous eye appeal complements the high technical grade. This coin should find a home in the finest collection or Registry Set. Population: 2 in 68 (1 in 68+) Deep Cameo, 0 finer (9/14). NGC ID# 288P, PCGS# 97926

---

1902 Quarter Eagle, Sharp PR64

- 3926 1902 PR64 NGC. The orange-gold surfaces on this near-Gem proof boast the expected needle-sharp strike, and only minor signs of contact, including a couple of tiny ticks on Liberty's face, determine the grade. This piece was struck during the year that the Mint went to a no-contrast method of proof manufacturing. An attractive and affordable late-19th century proof Liberty Head quarter eagle. Census: 22 in 64, 20 finer (10/14). NGC ID# 288S, PCGS# 7928

---

1907 Liberty Quarter Eagle, Stunning PR68  
Final Year of This Long-Lived Design

- 3927 1907 PR68 NGC. This issue marks the end of brilliant-mirror proofs for the quarter eagle denomination, as the subsequent sunken-relief Pratt design was made in matte or semibright "Roman Gold" finish, and the two-and-a-half-dollar value has not seen a reprise since 1929. This extremely well-preserved example displays bold canary-gold color and gleaming mirrors. Sharply struck devices are lightly frosted, not to a Cameo level on the obverse but approaching it on the reverse. Neither NGC nor PCGS has graded a PR69 example of this issue within any contrast designation (9/14). NGC ID# 288X, PCGS# 7933

---

INDIAN QUARTER EAGLES

---

1908 Indian Quarter Eagle, MS66  
Only Three Finer at NGC

- 3928 1908 MS66 NGC. The first year of issue for the Indian quarter eagles, the 1908 is a plentiful issue when compared to the next several issues through 1915. This is a popular issue for type collectors who enjoy first-year coinage. Both sides of this Premium Gem have exceptional eye appeal, created through the combination of great luster and sharp design motifs. Census: 61 in 66, 3 finer (10/14). NGC ID# 288Y, PCGS# 7939

---

1910 Quarter Eagle, MS66  
Seemingly Unrivaled Visual Appeal

- 3929 1910 MS66 PCGS. The 1910 Indian quarter eagle is one of the better-struck issues in the early part of the series, frequently seen with rich luster and bold design elements. The challenge comes in finding an example with minimal abrasions, as the typical coin is affected by numerous faint ticks and surface grazes that limit the grade and also the eye appeal. The coin here offered, therefore, will be a refreshing reward for the patient specialist. It ranks as one of only 11 Premium Gems certified by PCGS (1 in 66+), and none are finer (10/14). Frosty, shimmering luster illuminates original orange-gold patina on each side, and the surfaces are incredibly clean. This coin is a joy to look at and would no doubt be an even bigger joy to own. NGC ID# 2892, PCGS# 7941

1911-D Quarter Eagle, MS62  
Pleasing Original Patina

- 3930 1911-D MS62 PCGS. The tiny mintage of 55,680 coins guarantees the key-date supremacy of this Denver issue. This example has a high degree of eye appeal that is enhanced by a mixture of unusual, pleasing mint-green and apricot coloration. The design motifs are boldly produced, if a tad weak on the eagle's shoulder, and the surfaces are free of distracting marks. The all-important mintmark is recognized as a "Strong D" on the PCGS holder. NGC ID# 2894, PCGS# 7943

1911-D Quarter Eagle, MS62  
Attractive Key Date Example

- 3931 1911-D MS62 PCGS. Strong D. The 1911-D is the incontestable key date in the Indian Head quarter eagle series because of its low mintage (only 55,600 coins struck). As a result, it remains ever-popular and perennially in-demand among series specialists. This lustrous rose-gold example exhibits sharp detail and a desirable bold mintmark. The B in LIBERTY shows a small speck of grease that was struck into the coin at the time of manufacture. Additionally, a diagonal mark is seen on the Indian's cheek, and marks are minimally scattered over each side. NGC ID# 2894, PCGS# 7943

1911-D Quarter Eagle, MS62

- 3932 1911-D MS62 NGC. Strong D, and the mintmark is bold and clearly visible without a glass. The attractive surfaces of this important key-date Indian quarter eagle display satiny luster with straw-gold color. Minimal surface marks are strictly consistent with the grade. An important opportunity to start an Indian quarter eagle collection with the only key date in the series. NGC ID# 2894, PCGS# 7943

1911-D Quarter Eagle, MS62  
Strong D, Nice Quality for the Grade

- 3933 1911-D MS62 NGC. The Strong D mintmark and overall bold strike move this example ahead of many coins seen in MS62 holders. A few light marks are expected for the grade, yet none are individually distracting and the coin displays pleasing, lightly textured fields with softly lustrous, orange-gold patina. Always in demand as the low-mintage key to the series, there are never enough representatives to fulfill the want lists of this short, eminently collectible Indian Head series. NGC ID# 2894, PCGS# 7943

1911-D Indian Quarter Eagle, MS63  
Sought-After Series Key

**3934 1911-D MS63 NGC.** The old numismatic saw goes, “Buy the keys first,” but as coin (and precious metals) prices have generally been on an upward slope for quite a number of years, increasing numbers of collectors no longer complete entire sets of a single series.

One novel and new collecting approach comes out in the so-called “Box of 20” style, buying the best — or most beautiful, most costly, most key dates, most rare ... add your own personal attributes — 20 coins a collector can obtain. Or complete your box using another number; 30 or 40 will do fine as well. That is one of the many joys of numismatics: One can collect exactly what one loves, a unique, personalized collection that may be duplicated nowhere else.

The 1911-D quarter eagle is the sole, universally acknowledged key in its series, unlike the conditional rarities 1914 and 1914-D. The 1911-D, struck in the meager amount of 55,680 coins, appeals to many camps, including series completists, buyers of key dates, collectors of rare gold, and other numismatic persuasions. This piece is especially well-suited for completion of an MS63 set of Indian quarter eagles. The mint luster has a soft, frosted quality and the strike is strong throughout, including the mintmark. There are no noticeable abrasions on either side of this lovely Select key issue. NGC ID# 2894, PCGS# 7943

1911-D Quarter Eagle, MS63  
Unusually Appealing for the Issue

**3935 1911-D MS63 PCGS.** Strong D. The popularity of the 1911-D quarter eagle as a key date is unsurpassed by any other issue in the series, and examples of the date in any grade are actively pursued by series completists. For the advanced collector, however, finding an attractive Mint State piece can be a challenge, as most are moderately abraded and frequently exhibit a somewhat lackluster appearance. This piece displays unusually attractive surfaces that are heightened in appeal by a lack of any significant abrasions. The devices are sharply impressed, and the overall appearance is reminiscent of a finer grade, limited only by a faint luster graze in the lower-left obverse field. A high-end coin for the grade, for which the collector should bid accordingly. NGC ID# 2894, PCGS# 7943

1911-D Quarter Eagle, MS63  
Bold Diagnostic Features

- 3936 1911-D MS63 NGC.** The Strong D mintmark is particularly bold on this Select Mint State piece. Other diagnostics of genuine 1911-D quarter eagles are also clearly visible. The wire rim at the upper right obverse extends on this piece from 11 o'clock to 5 o'clock. The faint vertical die line in the space adjacent to the arrow tips is also visible, although a glass is always required to see that feature. Delicate coppery-orange toning appears at the lower left obverse on the satiny and lustrous yellow-gold surfaces, with a few trivial surface marks that are consistent with the grade. NGC ID# 2894, PCGS# 7943

1911-D Two and a Half, MS63+  
Impressive Eye Appeal

- 3937 1911-D MS63+ NGC.** Garrett and Guth write of the 1911-D quarter eagle in the second edition of their *Gold Encyclopedia* that it is "the key to the series in every grade. It boasts not only the lowest mintage (by far), but few examples were saved at the time of issue. Most of the survivors are in lower Mint State grade, and even those often show areas of minor friction on the Indian's cheek." Actually, we believe that what Garrett and Guth mean here is that "most Mint State survivors are in the lower grades thereof," as most of the survivors are actually in some grade level of AU — a level where these coins are still quite attractive and in demand by throngs of collectors. Many of the survivors are just a hair's breadth away from Mint State, on average.

This MS63+ NGC example is far and away finer than those "average" coins, an impression that no more than a lingering glance confirms. The orange-gold surfaces are fine-grained and somewhat mattelike, well-struck throughout and showing a wire rim around the upper obverse. The Indian's cheek and the eagle throughout are notably free of marks, although the brow of the chief shows a small mark that likely precludes an MS64. It is, however, the only singular mark on this coin, a piece with impressive eye appeal. NGC ID# 2894, PCGS# 7943

1911-D Quarter Eagle, MS64  
Sharp Example of This Key Date

**3938 1911-D MS64 NGC.** At Heritage we are privileged to offer a range of 1911-D quarter eagles in varying grades at practically every Signature auction we conduct. This spurred our curiosity to conduct a survey concerning the total number of submissions at each service, and the average grade of those “grading events.” As of March 2014, PCGS has seen 3,286 submissions of the Strong D variety, and there are 5,131 submissions at NGC, together with an average grade of “MS58.7.” Obviously those are not all *separate coins*; the number of duplicates/resubmissions in those nearly 8,000-plus grading events is likely in the hundreds or low thousands. Even so, it becomes clear that large numbers of certified survivors cluster in the AU58 and MS62 grade levels, in particular, concordant with our own experience.

This MS64 NGC example is far finer than the usual survivor, showing original greenish-gold color throughout with the prominent wire rim around the upper obverse. The mintmark is bold and the chieftain’s cheek and brow, as well as the eagle’s forward wing area and other exposed bits, are free of mentionable contact. Both the headdress and wing feathers are well-detailed. A great example of this key date. NGC ID# 2894, PCGS# 7943

1914 Two and a Half, MS65  
Almost Unobtainable Any Finer

**3939 1914 MS65 NGC.** The 1914 is generally considered to be the second scarcest date in the series, as it has such a low mintage (only 240,000 pieces) and small overall number of survivors. The date is fairly plentiful in lower Mint State grades, with many examples appearing at auction each year, though at the Gem level it is decidedly scarce and could even be called rare in the context of the series. Furthermore, Jeff Garrett suggests the certified population figures should be viewed with some skepticism, as this issue’s large price jumps between succeeding grades has made it a favorite of re-submitters. This representative displays satiny yellow-gold luster, with well-struck design elements and a lack of any major abrasions. Census: 44 in 65 (1 in 65+), 3 finer (10/14). NGC ID# 2898, PCGS# 7946

1914-D Quarter Eagle, MS65  
Only One Coin Numerically Finer

**3940 1914-D MS65 PCGS.** At the Gem grade level this high-mintage (448,000 pieces) issue emerges as one of the most elusive dates in the series; it is slightly rarer at this level than even the lower-mintage 1914, and is barely more available than the key-date 1911-D. This example is sharply struck with frosty honey-gold luster. A few minute disturbances in the cartwheel effect limit the grade, but hardly impede the eye appeal. Struck during a late die state, as evidenced by a thin cud above LIB in LIBERTY and a light die crack extending in from the reverse rim near the mintmark. Population: 47 in 65, 0 finer (10/14). NGC ID# 2899, PCGS# 7947

1914-D Quarter Eagle, MS65  
Key to the Series in Gem Condition

**3941 1914-D MS65 PCGS.** The 1914-D quarter eagle is the key to the series in Gem grade, while the 1911-D is the key to the series overall, regardless of grade. There are more high-grade survivors of the low-mintage 1911-D, however, than of the 1914-D, a little-noticed issue for decades within the collecting community. A handful of 1911-Ds are known above MS65 at PCGS, where the Gem grade is the absolute top for the 1914-D. This MS65 PCGS example offers incredibly attractive surfaces that combine a bold strike, pristine preservation, and mellow orange-red color complementing lilac accents. A piece sure to appeal to many potential bidders. Population: 47 in 65, 0 finer (10/14). NGC ID# 2899, PCGS# 7947

**1928 Two and a Half, MS66  
Tied for Finest at PCGS and NGC**

**3942 1928 MS66 PCGS.** Of the five “common” late-series dates from 1925 to 1929, the 1928 is one of the rarest in Premium Gem condition, outpaced only by the final-year 1929. The sunken relief nature of Bela Lyon Pratt’s design, exposing the fields to abrasions from poor handling and stacking, severely limited the survival rate of high-grade examples of any date in the series. The 1928 survives in large enough quantities overall that the occasional Gem is offered at auction, but Premium Gems follow the general pattern for the series: conditional rarity.

The present coin is an especially frosty representative, with wisps of rose and cherry-gold visiting honey-gold surfaces on each side. The strike is bold and only a few minute ticks are observed in unobtrusive locales. Population: 11 in 66, 0 finer (10/14). NGC ID# 289E, PCGS# 7952

**THREE DOLLAR GOLD PIECES**

**1854 Three Dollar Gold, MS63  
One of 11 With CAC Approval**

**3943 1854 MS63 PCGS. CAC.** The 1854 is the first of the great trio of classic type coins to represent the three dollar series, along with the later-struck 1874 and 1878 dates. It is also a first-year and one-year type, given the small DOLLARS on the reverse. This is an eminently respectable representative of the Select Mint State grade level, showing minimal abrasions and good eye appeal on boldly struck medium-golden surfaces with a few flecks of deeper color. CAC to date shows only 11 in MS63 that meet its standards (9/14). NGC ID# 25M3, PCGS# 7969

**1855 Three Dollar Gold, MS64  
Finer Than Normally Seen**

**3944 1855 MS64 PCGS.** The 1855 three dollar gold issue was struck for circulation in the amount of 50,555 pieces, and most of the issue did circulate; the certified population averages nearly Choice AU and no better. This near-Gem sports great luster over honey-gold surfaces that appear quite close to a Gem grade, save for a few small marks on Liberty’s face and a touch of strike softness that is most visible on the bottom of the wreath, in the bowknot area. This early date within the series appears seldom in the higher Mint State grades, making this piece a prime potential acquisition. Population: 24 in 64 (2 in 64+), 3 finer (10/14). NGC ID# 25M6, PCGS# 7972

1856-S Three Dollar, AU55  
Medium S, Rotated Reverse

- 3945 **1856-S AU55 PCGS. CAC.** Medium S. A few scattered contact marks, none singularly mentionable, and a touch of high-point rub account for the grade on this Choice AU 1856-S three. The surfaces are largely orange-gold with a couple of touches of deeper color. This piece is struck from the Medium S reverse die that shows a small, raised die line nearly connecting the bottoms of the L's in DOLLARS. Die lapping effaces portions of the wreath on the left side, and the reverse is rotated about 30 degrees counterclockwise in relation to the obverse. Population: 38 in 55, 41 finer (9/14). NGC ID# 25M9, PCGS# 7975

1856-S Three Dollar Gold, MS61  
Conditionally Rare Branch Mint Issue

- 3946 **1856-SMS61 PCGS.** Medium S. There are many low-mintage dates in the three dollar gold series, but the San Francisco issues are among the rarest in Mint State condition. Gold circulated extensively in the West during and following the Gold Rush, and few representatives of any denomination were set aside for future collectors. Of the four S-mint issues in the series, the 1856-S had the highest mintage (34,500 pieces), and is by extension the most plentiful, but even it is rare at the Mint State level. This representative displays minimally abraded surfaces and soft lemon-gold luster. The wreath bow is not fully defined, as usual, though the strike is otherwise well-executed. A pleasing Mint State example of this elusive San Francisco issue. Population: 4 in 61, 8 finer (9/14). NGC ID# 25M9, PCGS# 7975

---

**1864 Three Dollar Gold, Flashy AU55**

- 3947 1864 AU55 NGC.** The 1864 had a typically low mintage for the series of only 2,630 coins, though high-grade survivors are significantly more elusive than are those of the later, more heavily saved issues of comparable mintages. This Choice AU representative displays primarily orange-gold color with remnants of semiprooflike mirroring in the fields and sharp definition on the devices. Finer representatives are scarce, and are seldom seen in Mint State. NGC ID# 25MK, PCGS# 7985

---

**1866 Three Dollar Gold, MS63  
Only 4,000 Pieces Minted**

- 3948 1866 MS63 PCGS.** The Philadelphia Mint coined 4,000 business strike examples of this denomination following the close of the Civil War, and examples are rarely encountered in any grade today. This Select Mint State piece has excellent eye appeal with satiny yellow-gold surfaces and reflective fields. Population: 8 in 63 (1 in 63+), 10 finer (10/14). NGC ID# 25MM, PCGS# 7987

---

**1872 Three Dollar, MS62  
Prooflike Fields**

- 3949 1872 MS62 PCGS.** An impressive rarity from the three dollar series, the 1872 had a business strike mintage of only 2,000 coins, and examples are rarely found in any grade. This rich orange-gold piece has fully mirrored fields and lustrous devices with scattered, grade-limiting marks. Population: 19 in 62 (1 in 62+), 14 finer (10/14). NGC ID# 25MV, PCGS# 7994

---

**1878 Three Dollar Gold, MS64+  
Attractive Original Luster**

- 3950 1878 MS64+ PCGS.** The 1878 boasts one of the highest mintages in the three dollar gold series (82,304 pieces), and is a favorite among type collectors. Shimmering luster and excellent eye appeal are the norm, and the present coin is no exception. Frosty orange-gold luster illuminates smooth, well-preserved surfaces, while the design elements exhibit sharp definition. Numerically finer pieces are sometimes encountered, but are somewhat more expensive to acquire. NGC ID# 25MZ, PCGS# 8000

---

**1878 Three Dollar, MS65  
Second Highest Mintage**

- 3951 1878 MS65 PCGS. CAC.** The 1878 is one of three issues in the denomination that are considered "common" dates, ideal for type collecting purposes. The 1854 is the only issue with a six-digit mintage, and the 1878 is next with a production of 82,304. Only eight other issues had five-digit mintages.

This example has frosty luster with brilliant orange-gold surfaces and bold design motifs, creating excellent aesthetic appeal. Although PCGS has certified nearly 200 at this grade level, and 75 other finer pieces (10/14), demand is sufficient that these high grade coins rarely appear in the marketplace. NGC ID# 25MZ, PCGS# 8000

---

**1880 Three Dollar, MS64  
Highly Appealing Example**

- 3952 1880 MS64 PCGS.** A paltry mintage of just 1,000 three dollar gold pieces in 1880 prompted the saving of numerous examples by dealers and speculators, with the result that Mint State examples are somewhat more obtainable today than they theoretically should be. Still, high-grade pieces are scarce, and command substantial premiums when offered. This Choice representative exhibits crisp design definition and moderate semiprooflike mirroring in the fields. Yellow and apricot-gold hues encompass each side, giving this coin a shimmering appearance when tilted beneath a light. Population: 57 in 64 (1 in 64+), 22 finer (9/14). NGC ID# 25N3, PCGS# 8002

---

**1883 Three Dollar Gold, MS62  
Challenging Date**

- 3953 1883 MS62 PCGS.** The 1883 three dollar gold issue consisted of a mere 900 coins. This Mint State survivor displays butter-gold surfaces and a sharp strike. Strong luster remains, adding to the overall appeal. A desirable example of one of several challenging late dates for series collectors. Population: 36 in 62, 62 finer (10/14). NGC ID# 25N6, PCGS# 8005

---

**1883 Three Dollar, MS63  
Only 900 Pieces Struck**

- 3954 1883 MS63 PCGS. CAC.** In the later years of the three-dollar gold series, some of the business strike mintages were small enough to sound like proof mintages. This date is a good example of that trend, as a mere 900 business strikes were produced. Boldly struck with intense, shimmering mint luster and pleasing antique-gold toning accompanied by faint accents of rose and peach coloration on both sides. Population: 28 in 63, 34 finer (9/14). NGC ID# 25N6, PCGS# 8005

---

**1885 Three Dollar Gold, MS62  
Highly Appealing for the Grade**

- 3955 1885 MS62 NGC.** The three dollar gold series is replete with low-mintage issues, but the 1885 is one of only three that boast mintages below 1 million pieces (in this case, just 801 coins). Enough Mint State examples were set aside by dealers and speculators that the issue is moderately obtainable today, much to the delight of series collectors. This semiprooflike example displays original orange and green-gold color over each side, with few abrasions for the grade. The bow knot is not fully defined, but the strike is otherwise sharp. Census: 19 in 62 (1 in 62+), 30 finer (9/14). NGC ID# 25N8, PCGS# 8007
-

**1886 Three Dollar Gold, MS63  
Elusive Late-Series Date**

**3956 1886 MS63 PCGS.** Only 1,000 business-strike three dollar gold pieces were struck in 1886, making the date scarce-to-rare in all grades and quite elusive in Mint State. The dies were first used to strike proofs, which are actually more common today than high-quality business strikes. All the circulation-strike coins were delivered after December 10, and S.H. Chapman indicated that some of these pieces were never distributed and melted in later years.

The present coin is an attractive Select specimen with well-detailed design elements and partially prooflike yellow-gold surfaces that show highlights of green. A few minor contact marks on both sides explain the grade. Population: 9 in 63, 6 finer (10/14). NGC ID# 25N9, PCGS# 8008

**1887 Three Dollar, Well-Defined MS63**

**3957 1887 MS63 PCGS.** Despite having the highest mintage of the 1880s (6,000 pieces), the 1887 three dollar gold piece is more difficult to locate than might be expected. Apparently, most of the issue was melted before it left the mint. Nevertheless, About Uncirculated and lower mint condition examples can be obtained with patient searching. The lustrous surfaces of this Select specimen display yellow- and orange-gold patina and well-defined design elements. NGC ID# 25NA, PCGS# 8009

**1887 Three Dollar, MS63  
Bright, Glowing Luster**

**3958 1887 MS63 PCGS.** This minimally abraded three dollar gold piece presents strong eye appeal. The reverse appears closer to Gem quality. Production of three dollar gold coins dwindled from 1879 to 1889, and only 6,000 business strikes were produced in 1887. Minor marks on the chin of this Select Mint State example help identify it from the few other remaining Uncirculated survivors of this date. NGC ID# 25NA, PCGS# 8009

**1887 Three Dollar, MS65  
Boldly Struck With Great Luster**

**3959 1887 MS65 PCGS.** The 1887 three dollar gold pieces saw a production of only 6,000 coins, but many appear to have been saved by the numismatically astute buyers who saw the "writing on the wall" for the soon-to-end series: The certified population averages a bit more than MS61. Gems nonetheless appear seldom, however. This MS65 PCGS example offers stunning luster over khaki-gold surfaces with a problem-free appearance. The profile of Liberty is free of all but the most trivial ticks, and the fields are equally well-preserved. A bold strike is evident. One small dark toning spot appears on the reverse rim at 11 o'clock. Population: 26 in 65, 9 finer (10/14). NGC ID# 25NA, PCGS# 8009

---

1889 Three Dollar Gold, MS64  
Final Three Dollar Issue

3960 **1889 MS64 PCGS.** The final year of issue for the three dollar gold piece with a business strike production of 2,300 coins, and an additional proof mintage of 129 pieces. Apparently few actually entered circulation, and survivors are more readily available in Mint State grades than in circulated grades. PCGS has certified 267 Mint State coins, 108 AU coins, and 11 lower grade pieces. This brilliant example has lustrous light yellow surfaces and above average design details, with scattered marks. NGC ID# 25NC, PCGS# 8011

---

1889 Three Dollar, Orange-Gold MS65  
Sharply Struck and Lustrous

3961 **1889 MS65 PCGS.** The last-year three dollar gold issue, the 1889 was only struck to the extent of 2,300 coins for circulation, but savvy collectors and dealers put back examples at the time of issue. The certified population today averages just a hair over MS60, however, making Gems such as this delightful PCGS-graded example the exception rather than the rule. Deep, engaging luster dominates each side of this orange-gold coin, with minimal scattered ticks and a great deal of eye appeal. The strike is sharp throughout both sides. A super example for a last-year-of-type set. Population: 30 in 65 (1 in 65+), 13 finer (10/14). NGC ID# 25NC, PCGS# 8011

---

PROOF THREE DOLLAR GOLD PIECES

1885 Three Dollar, Sharp PR63  
Remarkably Clean Surfaces

3962 **1885 PR63 PCGS.** The 1885 proof three dollar gold piece saw a production of 109 coins, a fairly large number of which have survived to the present day. The PCGS website estimates that 70 to 80 specimens are known. The two major grading services have certified 138 examples, a figure that is evidently inflated by resubmitted coins.

Beautiful yellow-gold and apricot patination cascades over both sides of this Select offering, each of which displays a degree of field-motif contrast. The design elements are sharply struck, including the plumes and feathers of the headdress and the wreath features, such as the veins of the individual leaves. Close examination reveals no significant marks or spots, unusual for the designated numerical grade. The 3 is noticeably recut, confirming the coin's proof status. Population: 6 in 63, 39 finer (10/14). NGC ID# 28AU, PCGS# 8049

---

**1888 Three Dollar Gold  
Borderline Gem Cameo Proof**

**3963 1888 PR64+ Cameo PCGS.** The grade of this coin — with the Plus designation from PCGS — is just a tick better than the PR64 example in the Smithsonian Institution, which is always a good fact to have in reserve for the successful buyer of this lustrous, borderline Gem. A debatable mintage of 291 pieces seems high for the number of survivors, estimated to be in the neighborhood of between 120 and 150 pieces in all grades.

A full strike accompanies the frosted devices set on deeply mirrored, medium gold fields. Wire rims surround the gleaming surfaces. A few delicate hairlines and an “aura” of microscopic graininess occupy the obverse field, defining the assigned grade. Excellent eye appeal undoubtedly earned the PCGS Plus. Population: 8 in 64 (2 in 64+) Cameo, 14 finer (9/14). NGC ID# 28AX, PCGS# 88052

**1889 Three Dollar, PR62  
Last of the Denomination**

**3964 1889 PR62 PCGS.** The three dollar gold denomination first appeared in 1854, and was struck continuously for 35 years until 1889. This attractive proof represents the end of the denomination. Both sides are fully mirrored with bright yellow surfaces. Faint hairlines limit the grade of this example. NGC ID# 28AY, PCGS# 8053

**EARLY HALF EAGLES**

**1798 Capped Bust Right Five, AU50  
Large Eagle, 13 Star Reverse, BD-2  
Guide Book Variety**

**3965 1798 Large Eagle, Large 8 AU50 NGC. BD-2, R.5.** Bass-Dannreuther Die State d/b. The 1798 Capped Bust Right half eagle claims a mintage of 24,867 pieces, with eight Heraldic Eagle varieties known for the date and a single very rare Small Eagle variety. This coin represents the very scarce BD-2 variety, with a die crack under the date and the first A in AMERICA touching the fourth feather in the eagle's wing. The BD-2 has a surviving population of 50-70 examples in all grades. This was the only use of the reverse die, but the obverse was also used on the famous 1798 Small Eagle variety.

The present coin is an attractive AU example with lightly abraded greenish-gold surfaces that show an extensive network of die cracks and clash marks on both sides. The well-detailed design elements show just a touch of actual wear and the surfaces retain much of their original mint luster. NGC ID# 25NN, PCGS# 8078

**1798 BD-4 Five Dollar, Choice AU  
Large Eagle, 13 Star Reverse**

- 3966** 1798 Large Eagle, Large 8, 13 Star Reverse AU55 PCGS. CAC. BD-4, High R.4. Bass-Dannreuther Die State d/e. A late die state with cracks across the right-side obverse stars and expanded cusps over the ES in STATES and the O in OF. A charming sun-gold representative of this better Heraldic Eagle date. The cheek and bust tip show slight wear, but luster dominates the peripheries, curls, and eagle. A lens reveals only unimportant marks, mostly on the obverse field. The centers display minor inexactness of impression, characteristic of BD-4. The obverse border is lightly strike doubled. NGC ID# 25NN, PCGS# 8078

**1800 BD-4 Half Eagle, AU Details  
Repunched M, Terminal Die State**

- 3967** 1800 — Improperly Cleaned — NCS. AU Details. BD-4, R.4. Bass-Dannreuther Die State d/c, the terminal die state with reverse rim breaks joining the tops of NIT and the first T in STATES. The rim break over NIT formed first, and the rim break on the first T in STATES represents the terminal die state for this die marriage. This AU specimen has trivial surface marks with bright surfaces from an old cleaning. However, it is an attractive greenish yellow-gold example for a specialized collection. NGC ID# 25NW, PCGS# 8082

**1800 BD-5 Five Dollar  
AU Sharpness**

- 3968** 1800 — Improperly Cleaned — NGC Details. AU. BD-5, High R.3. Bass-Dannreuther d/b. BD-5 is a fairly plentiful variety in the context of early half eagles, ideal for type representation. This is the fourth and final use of this obverse die, and the only use of this reverse. This sun-gold example is somewhat bright and displays vertical hairlines. Nonetheless, wear is limited to the high points and the only remotely mentionable mark is a tick on Liberty's jaw. The strike is crisp save for minor blending at the center of the shield. NGC ID# 25NW, PCGS# 8082

**1800 Half Eagle, Unc Sharpness  
BD-5, Terminal Die State**

- 3969** 1800 — Scratch — PCGS Genuine Secure. Unc Details. BD-5, High R.3. Bass-Dannreuther Die State e/c. An early stage of the terminal die state, as the bisecting obverse crack is plain through the hair curls and cap, but does not yet extend all the way to the rims. This is the fourth and final use of this obverse die, and the only use of this reverse. Both were retired shortly after this piece was struck. The coin displays substantial yellow-gold luster and an even strike, with well-defined motifs. A couple faint, short scratches, to the left of the date and near star 11, account for the Details grade from PCGS. NGC ID# 25NW, PCGS# 8082

1800 BD-2 Five Dollar, MS63  
Exemplary Color and Strike

- 3970** 1800 MS63 PCGS. BD-2, High R.3. Bass-Dannreuther Die State b to c. An unlisted intermediate die state with a descending crack between the IB in LIBERTY, but before the dies were lapped. Clash marks are prominent on both sides. BD-2 is attributed by the placement of the E in STATES, partly left of cloud 5. The present sun-gold example is well struck and lacks any consequential marks. The eye appeal is superior for the MS63 level, as well as the Bust Right type. The grade is limited solely by minor obverse hairlines. BD-3 can be located by the patient collector, but is usually encountered in circulated or impaired grades. Quality Uncirculated examples are both rare and desirable. Population: 14 in 63 (2 in 63+), 8 finer (9/14). NGC ID# 25NW, PCGS# 8082

1803/2 Capped Bust Right Five, MS62  
Popular BD-1 Overdate

- 3971** 1803/2 MS62 PCGS. BD-1, R.4. Bass-Dannreuther Die State a/b. Mint records indicate a nominal mintage of 33,506 Capped Bust Right half eagles was accomplished in 1803, with four die varieties known for the date. All four varieties are overdates, employing two unused obverse dies from 1802 with a 3 impressed over the final digit. This coin represents the BD-1 variety, with a reverse star pointing to the upper tip of the eagle's beak. Probably no more than 150-200 examples of the BD-1 survive in all grades, and the variety probably accounted for 7,500-12,500 pieces of the reported mintage.

This attractive MS62 specimen displays lustrous orange-gold surfaces with the minimum number of contact marks for the grade. The design elements are sharply rendered in most areas, with some localized softness on the eagle's claw and arrows. The reverse die was used previously in 1802, and this coin shows some die cracks incurred during that striking. No planchet adjustment marks are evident and eye appeal is quite strong. Population: 50 in 62 (1 in 62+), 39 finer (10/14). NGC ID# 25NY, PCGS# 8084

1805 Five Dollar, Near-Mint  
BD-1, Close Date, Orange Toning

- 3972 1805 AU58 PCGS. CAC. BD-1, High R.3. Bass-Dannreuther Die State a/a. The Close Date obverse. A spike extends from the leaf near the C in AMERICA. Original orange-gold toning enriches this partly lustrous early half eagle. The strike is bold except on the obverse stars. Abrasions are minor overall, though we note a thin line at the base of Liberty's neck and a narrow glossy area on the right obverse field. The old tenor gold coins, struck prior to the Classic series, were typically exported overseas, then melted. Not enough have survived to meet collector type demand. NGC ID# 25P4, PCGS# 8088

1805 BD-1 Half Eagle, MS61  
Ideal Type Candidate

- 3973 1805 MS61 NGC. CAC. BD-1, High R.3. Bass-Dannreuther Die State a/a, with no clash marks, die cracks, or signs of lapping. This variety is the most plentiful of five known die marriages for the date, with an estimated population of about 200 to 250 coins. That survival is approximately equal to the total survival of the other four varieties, combined. Date and type collectors will likely seek an example of BD-1 for their collection. This satiny Mint State piece has light abrasions that are expected for the grade, with reflective fields displaying brilliant yellow mint luster. NGC ID# 25P4, PCGS# 8088

**1807 Bust Right Half Eagle, BD-1, MS62  
Semiprooflike Fields, Bold Strike**

**3974 1807 Bust Right, Small Date, Small Obverse Stars, Small Reverse Stars, MS62 PCGS. BD-1, High R.4.** Bass-Dannreuther Die State b/b. BD-1 is one of the more plentiful varieties of the issue, but it is still itself scarce, with only 80 to 100 examples believed extant. This is the only use of this reverse die, though the obverse was again employed for BD-2. The reverse die was retired following the formation of a cud atop the T in UNITED, which develops in a later die state.

This coin displays a well-centered, bold strike, with notable sharpness seen on the central bust and the eagle's neck feathers, which are sharply delineated. Rich yellow-gold color blankets each side, highlighting substantial semiprooflike mirroring in the fields. A few small, scattered surface ticks limit the grade. Population: 26 in 62, 40 finer (9/14). NGC ID# 25P8, PCGS# 8092

**1807 Capped Bust Left Half Eagle, AU55  
Popular BD-8 Variety**

**3975 1807 Bust Left AU55 NGC. BD-8, R.2.** The feather tip points to the tip of the 5, identifying the BD-8 variety. Ample luster graces the devices of this slightly glossy honey-gold example. Generally smooth aside from a couple of subdued marks near the chin. The obverse is misaligned a few degrees toward 1 o'clock. Clashed from the shield near Liberty's ear.

Ex: Dallas Signature (Heritage, 11/2006), lot 2163; FUN Signature (Heritage, 1/2008), lot 4060. NGC ID# 25P9, PCGS# 8101

**1807 Bust Left Half Eagle, BD-8, MS62  
Excellent Uncirculated Type Coin**

**3976 1807 Bust Left MS62 PCGS. BD-8, R.2.** Bass-Dannreuther Die State c/a. The obverse is clashed from its previous use in striking BD-7, but the late die state crack from the edge near star 13 has not yet formed. The reverse is unclashed, as usual. This is the second and final use of this obverse die, though the reverse was later employed for the first three varieties of 1808. Overall, BD-8 is far and away the more plentiful of the two Bust Left 1807 half eagle varieties, ideal for type representation. This Mint State example displays softly frosted, yellow-gold luster and boldly struck motifs. The borders are free of adjustment marks and the inner surfaces show remarkably few abrasions for the grade. NGC ID# 25P9, PCGS# 8101

1808 BD-4 Half Eagle, AU58  
Wide 5D Reverse

**3977** 1808 Wide 5D AU58 NGC. BD-4, High R.3. Bass-Dannreuther Die State c/a. The obverse die is lapped with faint clash marks visible only between the bust and date, and at Liberty's ear. The reverse die is perfect with no clash marks, die cracks, or lapping. This near-Mint example has mostly lustrous light yellow surfaces with scattered marks that are expected at this grade level. NGC ID# 25PA, PCGS# 8102

1810 BD-4 Five Dollar, MS62  
Large Date, Large 5

**3978** 1810 Large Date, Large 5 MS62 PCGS. BD-4, R.2. Bass-Dannreuther Die State c/b, with a vertical die crack between the 8 and 1 to the low curl and the drapery clasp. The Capped Bust Left design type was produced for six years from 1807 through 1812. There were 15 die varieties minted for the series, and just two of those are frequently encountered. This 1810 BD-4 is one, and the 1807 BD-8 is the other. The two varieties are frequently included in type sets to represent this John Reich design. This pleasing Mint State piece has lustrous lemon-yellow surfaces with excellent eye appeal. NGC ID# 25PG, PCGS# 8108

1812 BD-1 Half Eagle, MS64  
Wide 5 D

**3979** 1812 Wide 5D MS64 PCGS. BD-1, R.3. Bass-Dannreuther Die State a/a. There are no clash marks, die cracks, or lapping on either side, although the reverse has prominent curved die lines in the shield and left wing, and from the right wing to the border, nearly touching the first A in AMERICA. The BD-1, with the widely spaced denominator, is the usually seen variety of 1812. It is an ideal type candidate for this short lived design that was only produced for six years, beginning in 1807. This Choice Mint State piece has excellent design definition, frosty yellow-gold luster, and splashes of light orange toning. A highly attractive example, infrequently seen so fine. Population: 43 in 64 (1 in 64+), 6 finer (10/14). NGC ID# 25PL, PCGS# 8112

1814/3 BD-1 Half Eagle, AU55  
The Only Variety

- 3980** 1814/3 AU55 PCGS. BD-1, High R.4. Bass-Dannreuther Die State b/c. The obverse has a delicate die crack from the 4 toward star 13. The reverse is cracked through the tops of MERI. There are no clash marks or signs of die lapping on either side, and that is unusual as most examples have horizontal lines at Liberty's ear. The dies were apparently slightly misaligned when this piece was struck. The obverse border is full to the left, and indistinct to the right. The reverse border is sharper at the right side of the coin. Attractive coppery-orange patina appears on the distinctive green-gold surfaces of this Choice AU half eagle. Faint adjustment marks are evident at the lower right reverse. Population: 7 in 55, 33 finer (10/14). NGC ID# 25PN, PCGS# 8117

1818 BD-1 Half Eagle, MS62  
13 'Notched Point' Stars

- 3981** 1818 MS62 PCGS. BD-1, R.5. Bass-Dannreuther Die State b with two lengthy reverse cracks through AMERICA and the eagle's neck. Three different marriages of 1818 half eagles are known, and each merits a separate *Guide Book* listing. BD-3 is the 5D over 50 engraver's blunder, BD-2 is the STATESOF layout error, and BD-1 is the "normal" variety. Each is very scarce to rare, although BD-2 shows up more often than either BD-1 or BD-3. BD-1 is distinctive for its die cracks, a clearly repunched E in UNITED, and the inadvertent use of John Reich's "notched point" star punch for all 13 stars. The present example has pleasing butter-gold color. No marks merit singular mention, although clusters of wispy contact are noted near star 11 and the branch stem. Liberty's cheekbone and the left shield border display moderate incompleteness of strike, but the remainder of the design is bold. NGC ID# 25PR, PCGS# 8119

## CLASSIC QUARTER EAGLE

1835 Classic Head Five, MS62+  
Challenging Issue in High Grade

- 3982** 1835 MS62+ PCGS. McCloskey 1-A, R.2. The 1835 Classic Head half eagle claims a substantial mintage of 371,574 pieces, but the issue is surprisingly difficult to locate in high grade. This high-end MS62 example displays sharply detailed design elements and vibrant mint luster throughout, with lightly marked antique-gold surfaces. Population: 19 in 62 (1 in 62+), 30 finer (10/14). NGC ID# 25RV, PCGS# 8173

## LIBERTY HALF EAGLES

1840-O Half Eagle, MS61  
Narrow Mill

- 3983** 1840-O Narrow Mill MS61 NGC. Variety 3. The New Orleans Mint began coinage production in 1838, but the 40,120 half eagles struck there in 1840 were the first of that denomination minted in Louisiana. Two major varieties are known as the Broad Mill and Narrow Mill. This example is the smaller-diameter Narrow Mill, although the difference is less than 1 mm. An impressive Mint State piece, and one of only 26 such pieces certified at NGC and PCGS combined. In all grades, the two services have seen 250 examples of this issue, with an average grade of just 48. This Mint State piece has exceptional eye appeal, with frequent but trivial marks and excellent design definition. Census: 9 in 61, 7 finer (10/14). NGC ID# 25SK, PCGS# 8200

1842-C Half Eagle, XF45  
Small Date Variety  
Charlotte Mint Rarity

- 3984** 1842-C Small Date XF45 NGC. Variety 1. Both Large and Small Date varieties exist for the 1842 Charlotte half eagles, with the Small Date variety struck first with a date logotype size similar to the 1840 and 1841 Charlotte half eagles. Not only is the 1842-C half eagle the rarest Charlotte half eagle, it is also the second rarest of any Charlotte coin of any kind, surpassed only in rarity by the 1849-C Open Wreath gold dollar.

This appealing, apricot-gold example shows a medium amount of abrasions over both sides of the coin. The high-point devices are well-detailed and relatively free of marks due to wear, leaving abrasions to be most noticeable in the fields of the coin. Doug Winter estimates a mintage of just 4,595 pieces for the Small Date variant, with the balance of the total mintage of 27,432 half eagles being the Large Date type. Census: 1 in 45, 17 finer (10/14). NGC ID# 25SV, PCGS# 8208

**1842-C Large Date Half Eagle, MS61**  
**Remarkable, Fully Original Example**  
**Underrated Charlotte Issue**

**3985 1842-C Large Date MS61 NGC. Variety 1.** Somewhat overshadowed by the its rarer Small Date counterpart, the Large Date 1842-C half eagle is itself a significantly elusive date in the Charlotte gold series. The variety comprised most of the 27,432 half eagles struck at that mint in 1842, but only 110 to 140 examples are believed extant in all grades. The typical coin grades only in the VF to XF range, and AU coins are seldom encountered; Mint State pieces are exceedingly rare, with many having been dipped or otherwise brightened.

The present example is a must-have for the Charlotte gold specialist, with satiny luster shining through undeniably original olive-gold toning, with tinges of deeper orange-gold color seen in the recesses. The strike is uncharacteristically bold throughout, and the surfaces are devoid of any obtrusive abrasions. Census: 2 in 61, 8 finer (10/14). NGC ID# 25SW, PCGS# 8209

**1851 Half Eagle, MS63**  
**Rare This Well-Preserved**

**3986 1851 MS63 PCGS.** The 1851 half eagle had a fairly substantial mintage of more than 377,000 pieces, but nearly all experienced light to moderate commercial use, with the result that Mint State survivors are scarce in all grades and genuinely rare above the MS62 level. This Select example displays satiny luster beneath rich apricot-gold patina. The eagle's neck and the arrow feathers are not fully defined, through the strike is otherwise sharp. A single mark on Liberty's cheek limits the grade. Population: 7 in 63, 3 finer (10/14). NGC ID# 25U5, PCGS# 8246

**1852 Half Eagle, MS64**  
**Among the Finest Certified at PCGS**

**3987 1852 MS64 PCGS.** No Motto Liberty half eagles are rarely seen in grades finer than MS63. Even the most plentiful dates are elusive in higher grades. The 1852 is a prime example with a mintage that exceeded a half-million coins, but with only 23 examples certified MS64 at NGC and PCGS combined, and with only three finer NGC coins (9/14). The average certified grade for this issue is less than AU55. This Choice Mint State specimen is boldly defined with nearly full star and hair detail on the obverse and only slight weakness on the claws, arrow feathers, and neck feathers on the reverse. Both sides have brilliant yellow luster with frosty mint surfaces and exceptional eye appeal. Population: 11 in 64 (1 in 64+), 0 finer (9/14). NGC ID# 25UA, PCGS# 8250

**1853-D Five Dollar, MS61**  
**Conditionally Rare Dahlonega Type Coin**

**3988 1853-D Large D MS61 PCGS. Variety 34-Z.** Five die varieties of 1853-D half eagles are known. Among those, Variety 34-Z is probably the rarest, although Variety 34-X is also highly elusive. A Medium D variety was listed for many years but no such pieces are confirmed. This caramel-gold Dahlonega five is surprisingly devoid of marks except for minor contact above the hairbun. The strike shows blending on the lower half of the eagle and the curls near the ear. A drop or two of translucent residue is on the upper left portion of the shield. NGC ID# 25UF, PCGS# 8255

**1868-S Liberty Half Eagle, MS61**  
Tied for Finest at PCGS

**3989 1868-S MS61 PCGS.** The 1868-S Liberty half eagle claims a mintage of 52,000 pieces, a small total in absolute terms, but quite substantial in the context of the series. The mintage circulated widely at the time of issue, however, and few high-quality examples were saved by contemporary collectors. This attractive MS61 example is among the finest survivors. The design elements are well-detailed, with a touch of flatness on the centers, and the pale green and rose-gold surfaces show a scattering of minor contact marks that explain the grade. Population: 2 in 61, 0 finer (10/14). NGC ID# 25W6, PCGS# 8316

**1877-CC Half Eagle, AU50**  
Unabraded for the Issue

**3990 1877-CC AU50 NGC. Variety 1-B,** second C in the mintmark slightly lower than the first, the only confirmed die pairing. This AU50 example of the 1877-CC, despite a few thin field marks, shows far fewer abrasions than is typical for the issue, usually seen well-circulated and heavily abraded. This piece shows a decent strike on attractive golden-orange surfaces. The mintage was a meager 8,680 coins. Census: 11 in 50, 23 finer (10/14). NGC ID# 25X2, PCGS# 8343

**1877-CC Half Eagle, AU55**  
Low-Mintage Carson City Issue  
Rare in This High Grade

**3991 1877-CC AU55 PCGS. CAC. Variety 1-B.** The 1877-CC half eagle, with a mintage of only 8,680 pieces, is a scarce issue in all grades; the leading certification services have encapsulated nearly 200 examples at all levels, though this figure likely includes resubmissions. The typical piece is moderately well-worn, grading only in the VF to lower XF range; AU examples are rare at all levels, and only two coins have been certified as Mint State.

This Choice AU example represents a rare and important opportunity for the Carson City gold collector to acquire a high-end representative of the date. Traces of original luster remain in the recesses amid warm orange-gold patina. Only slight friction is evident over the relief elements, with few consequential abrasions in the fields. Population: 7 in 55, 3 finer (9/14). NGC ID# 25X2, PCGS# 8343

---

**1893-O Half Eagle, MS63**  
**Conditionally Elusive O-Mint Issue**

- 3992 1893-O MS63 NGC. Variety 1.** Following the resumption of coinage operations in 1879, the New Orleans Mint only produced Liberty Head half eagles in 1892, 1893, and 1894. Of these, the 1893-O had the highest mintage (110,000 pieces), and is the most frequently encountered in Mint State. Still, the typical piece is heavily abraded, grading no finer than MS62, and Select or finer examples are rare. This MS63 coin displays a sharp strike and soft yellow-gold luster. Light, scattered abrasions limit the grade, but none are individually detracting. Census: 16 in 63, 3 finer (10/14). NGC ID# 25YC, PCGS# 8385

---

**1901 Half Eagle, MS66**  
**Early 20th Century Type Coin**

- 3993 1901 MS66 PCGS.** The 1901 half eagle is readily obtainable in grades through MS64, but its availability declines significantly at the Gem level, and finer pieces are rare. This Premium Gem example exhibits vibrant yellow-gold luster and sharply struck motifs. A few insignificant ticks in the fields preclude an even finer grade, but hardly inhibit the eye appeal. Population: 13 in 66, 2 finer (10/14). NGC ID# 25YW, PCGS# 8402

---

**1905 Five Dollar, MS66**  
**Just a Single Coin Finer at PCGS**

- 3994 1905 MS66 PCGS.** A mintage of 302,200 coins belies the rarity of this late-date Liberty half eagle issue in high Mint State grades. Representatives are readily obtainable through Gem condition, but Premium Gems are rare. A bold impression characterizes the design elements, while swirling mint frost and attractive tan-gold coloration provide a high degree of visual appeal. Excellent for type purposes. Population: 15 in 66, 1 finer (9/14). NGC ID# 25Z6, PCGS# 8411

---

**INDIAN HALF EAGLES**

---

**1908 Indian Half Eagle, MS65**  
**Ideal Type Candidate**

- 3995 1908 MS65 PCGS.** The 1908 Indian half eagle was widely saved due to its first-year issue status, and is far and away the most plentiful date in Gem and finer grades, outpacing even the available 1909-D. Not surprisingly, then, the issue is ideal for type representation. This Gem example boasts sharp detail and satiny yellow-gold luster. A few minute surface ticks preclude an even finer grade, but are not discernable to the naked eye. PCGS has certified 22 numerically finer representatives (10/14). NGC ID# 28DE, PCGS# 8510

---

**1909-O Half Eagle, XF45**  
**The Only New Orleans Indian Gold Piece**

- 3996 1909-O XF45 PCGS.** Although the mintmark on this Choice XF Indian half eagle is indistinct, it remains completely visible and outlined, and is unmistakable in its identity. This pleasing piece has lightly marked honey-gold surfaces with a splash of pale orange toning at the lower right obverse. An important opportunity to acquire the only Indian half eagle from New Orleans. NGC ID# 25ZK, PCGS# 8515

**1909-O Half Eagle, AU55**  
**One of the Few Keys to the Series**

**3997 1909-O AU55 NGC.** By a substantial margin, the 1909-O and 1929 half eagles are the most challenging dates in the Indian series to locate in any grade — the 1909-O because of its low mintage and the 1929 because of the extensive melting of that issue. Although the populations at NGC and PCGS would suggest that there are plenty of examples to go around, the popularity of this issue places an unusually strong demand on the supply. The level of wear and associated abrasions on this piece are commensurate with NGC's grade.

*Ex: Central States Signature (Heritage, 4/2008), lot 3527. NGC ID# 25ZK, PCGS# 8515*

**1909-O Five Dollar, AU58**  
**Remarkably Appealing for the Issue**

**3998 1909-O AU58 PCGS.** The 1909-O is arguably the most historically significant issue in the Indian half eagle series. Not only is it a low-mintage key date (only 34,200 pieces struck), it also ranks as the final issue of this denomination from the New Orleans Mint, and is the only date of the Indian Head type bearing the O mintmark. The typical piece is moderately well-circulated, with numerous light abrasions and inferior eye appeal. Cleaning is also a problem for the collector seeking a fully original example, as many XF and AU coins have been brightened in an attempt to counter the affects of circulation.

This nearly Mint State example is an exceptional piece in all regards. The strike is boldly impressed and there is just a trace of friction over the high points. Original honey-gold patina blankets unusually smooth surfaces, leaving this coin with uncharacteristically strong aesthetic appeal. The specialist will want to bid accordingly. NGC ID# 25ZK, PCGS# 8515

1909-S Half Eagle, MS63  
Seemingly Underrated Issue

**3999 1909-S MS63 PCGS.** Somewhat overshadowed by the key-date 1909-O, the 1909-S is actually a significant condition rarity in its own right. The date boasts one of the lowest Mint State population totals in the series and is most often found in MS62 or lower grades. At the MS63 level the 1909-S becomes genuinely rare, with finer pieces rarer still. This representative exhibits the crisp, razor-sharp strike that this San Francisco issue is admired for, with satiny golden luster and unusually clean fields for the grade. The collector will be hard-pressed to locate a visually or technically finer example. Population: 28 in 63, 20 finer (9/14). NGC ID# 25ZL, PCGS# 8516

1911-D Half Eagle, MS61  
Seldom Seen in Mint State, CAC-Approved

**4000 1911-D MS61 NGC. CAC.** The 1911-D half eagle, like its quarter eagle and eagle siblings, is a low-mintage key within its Indian Head series — the difference with the half eagle and eagle is that they share key status with other issues, while the smaller-denomination issue is the sole key within that series in all grades. The 1911-D fives saw a production of 72,500 pieces, and today the certified population averages no better than Choice AU. This Mint State example certified by NGC shows a few thin marks on the Indian's profile and in the fields that determine the grade. The mattelike, honey-gold surfaces beam with gentle luster, and the strike overall is impressive. A tiny dot of orange toning appears amid the headdress feathers. This piece is one of only 12 in this grade with the CAC green sticker (10/14). NGC ID# 28DR, PCGS# 8521

**1911-S Half Eagle, MS63+  
Underrated in Mint State**

- 4001 1911-S MS63+ PCGS. CAC.** The 1911-S is an oft-overlooked issue due to its substantial mintage of more than 1.4 million coins. In actuality, the date is seldom seen finer than the MS62 grade level, and is decidedly rare above MS63, with heavy melting likely being the cause of its Mint State scarcity. This Plus-graded piece is boldly struck with original orange and coppery-gold luster over each side. No individually significant abrasions are observed. PCGS has certified only 31 numerically finer representatives (10/14). NGC ID# 25ZM, PCGS# 8522

**1914-S Half Eagle, MS62  
Above-Average Definition**

- 4002 1914-S MS62 NGC.** The 1914-S half eagle is very scarce in the Select level of preservation and extremely rare any finer. Lower-grade Uncirculated specimens typically are heavily abraded and quite often have a very weak S mintmark. The coppery-gold surfaces of this MS62 specimen exhibit well-defined design elements, including the feathers on the eagle's shoulder and the mintmark. A few small marks, more so on the broad, raised fields of the reverse, limit the grade. NGC ID# 28DW, PCGS# 8529

**1914-S Half Eagle, Well-Struck MS62**

- 4003 1914-S MS62 NGC.** The 1914-S half eagle, sporting a mintage of 263,000 pieces, is one of the important condition rarities in the Indian Head series. Most examples are found in About Uncirculated through MS61 grades. The finest most collectors might expect to encounter is MS62, and even these will require a degree of patience. Select specimens are very scarce, with only about 60 pieces seen by NGC and PCGS. Higher-grade coins are exceedingly rare, and unknown above MS65.

Both sides of this MS62 example display orange-gold color. The design features are well-struck, including the eagle's shoulder feathers and the S mintmark, both elements of which are often weak. A few scattered marks determine the grade, but these are less severe than usually seen on this heavily abraded issue. NGC ID# 28DW, PCGS# 8529

**1914-S Five Dollar Indian, MS63  
Rich Patina**

- 4004 1914-S MS63 PCGS.** This is an important opportunity for the advanced collector as this issue is clearly a condition as well as absolute rarity in the Indian half eagle series. Few have been graded at this level, and even fewer have received a higher grade. The mintage of 263,000 coins does not immediately suggest the rarity of the date. However, the number that have survived is limited due to immediate circulation after they were minted. This piece is nicely detailed and fully lustrous with rich honey-gold color and delightful satin surfaces. Population: 46 in 63, 8 finer (9/14). NGC ID# 28DW, PCGS# 8529

**1916-S Half Eagle, MS63  
Gold Production Soon Halted**

- 4005 1916-S MS63 PCGS.** Gold production in the United States was halted after the 1916-S coinage because of the uncertain world political situation in the midst of the war in Europe that was about to become the first World War. The United States government could not prolong the inevitable any longer. The Philadelphia Mint limited gold production to the 1916 and 1917 McKinley gold dollars. Denver ceased production of gold after 1915, and San Francisco halted production after 1916. This Select Mint State piece has faint pink overtones on its frosty yellow surfaces with deep turquoise patina. NGC ID# 28DY, PCGS# 8532

## EARLY EAGLES

**1797 Heraldic Eagle Ten, Near-Mint  
BD-3, Large Beak Variety**

- 4006 1797 Large Eagle AU58 NGC. BD-3, R.5.** Bass-Dannreuther Die State d/b. Dannreuther estimates only 40 to 50 examples of BD-3 are known. The variety is identified by the large beak on the reverse eagle, distinct from the small beak seen on BD-2 and BD-4. BD-1 is the Small Eagle type with a less imposing depiction of the national bird. This BD-3 representative has minimally abraded wheat-gold surfaces. Luster fills the obverse periphery and dominates the reverse. The strike is sharp except on the the obverse border near 4 o'clock and opposite near 2 o'clock on the reverse. The later area retains portions of the planchet surface including parallel adjustment marks, as made. NGC ID# 25ZY, PCGS# 8559

**1799 Eagle, BD-10, AU Sharpness  
Large Stars Obverse**

- 4007 1799 Large Stars Obverse, BD-10, R.3 — Smoothed — PCGS Genuine. AU Details.** Bass-Dannreuther Die State a/a. BD-10 is the most plentiful of the 10 varieties known for the 1799 eagle, with 300 to 400 examples believed extant. As such, it is ideal for date or type representation. This is the second and final use of this obverse, though the reverse die was later employed for the sole 1800 variety, as well as the first 1801 variety (BD-1). The present example displays sharp detail, but unnaturally bright, yellow-gold patina is the result of smoothing in the fields, seen in the form of numerous fine striations on each side. A still-pleasing example, with a bold, even strike.

**1799 Large Stars Obverse Ten, AU53  
BD-10, Late Obverse Die State**

- 4008 1799 Large Stars Obverse AU53 NGC. BD-10, R.3.** Bass-Dannreuther Die State b/a. The Large Stars obverse and the reverse showing a leaf touching the I in AMERICA at its lowest point are sufficient for the attribution, as only two Large Stars varieties are known for 1799, each sharing the same obverse and having different reverses (1 is separate from the leaf on the Large Stars BD-9). This late-state obverse shows a bold die crack arcing from the rim through stars 6 and 7, doubled in the middle. Minor adjustment marks appear above stars 3 and 4 just inside the rim. A rim bump appears on the reverse above the eagle's left (facing) wing, but otherwise this lustrous, lightly circulated coin shows only scattered, minor contact. The deep golden-orange surfaces show compelling eye appeal. NGC ID# 2623, PCGS# 8562

**1800 BD-1 Ten Dollar, AU Details  
Challenging Heraldic Eagle Date**

- 4009 1800 — Damaged — NGC Details. AU. BD-1, High R.3.** Bass-Dannreuther Die State b/c. A die crack connects LIBERTY but no dentil clash is evident near STATES. The only die marriage for the date, which is much scarcer than either the 1799 or 1801. The present butter-gold representative displays many pockets of luster but myriad small marks are noted and the field beneath the branch stem is unobtrusively smoothed.

**1801 BD-2 Eagle, AU58  
Prominent Obverse Spines**

- 4010 1801 AU58 PCGS. BD-2, R.2.** Bass-Dannreuther Die State b/b. The usual die state with nine vertical spines in Liberty's cap that are prominently visible on this example. The source of those spines may have been a set screw that came loose from the press, landing on top of a planchet as the press was cycled. They are clearly not clash marks as so many have suggested. This near-Mint eagle has reflective fields with rich yellow luster. A trace of rub appears on the high points, and faint hairlines are only visible with a loupe. This is an attractive example of a plentiful variety that is frequently the choice of type collectors. NGC ID# 2627, PCGS# 8564

**1803 Eagle, BD-3, AU55**  
**Excellent Date Representative**

- 4011 1803 Small Stars Reverse, BD-3, R.4, AU55 NGC.** Bass-Dannreuther Die State c/d. This is the most available of the six 1803 eagle varieties, but is still moderately scarce, with only 150 to 200 examples believed extant. This obverse die was employed for all six varieties, and apparently never underwent serious failure. This reverse was also a hardy die, as it was previously employed for the BD-2 variety of 1801, where it likely struck between 30,000 and 40,000 coins before being shelved for later usage.

This BD-3 coin displays bright yellow-gold patina, with only slight wear over the high points of the design. Some striking weakness is seen on the eagle's left (facing) talons and the corresponding portion of the obverse (the top of Liberty's cap), but the central motifs are otherwise well-defined. A small cut near star 1 is the only abrasion of note, though numerous adjustment marks are present along the upper-left and lower-right obverse borders. NGC ID# 2628, PCGS# 8565

**LIBERTY EAGLES**

**1839/8 Type of 1838 Eagle, AU50**  
**Scarce in This Grade Level**

- 4012 1839/8 Type of 1838, Large Letters AU50 PCGS.** The first portion of the 1839 ten dollar mintage (25,801 pieces), was accomplished with an overdated 1838 obverse die, featuring the more curved and ornate bust type of that year. The outer loops of the underlying 8 are visible to the right of the 9 in the date. This example is boldly struck with only slight friction over the high points of the design. A small coppery alloy spot is noted on the rim near star 2, while the surfaces are otherwise antique-gold in color. Light, scattered abrasions accompany the grade, the most notable being a small nick in the field near the eagle's left (facing) claws. Population: 11 in 50, 40 finer (9/14). NGC ID# 262E, PCGS# 8576

**1850-O Eagle, AU58**  
**Elusive No Motto O-Mint Issue**

- 4013 1850-O AU58 NGC. Variety 1.** This New Orleans issue experienced moderate circulation and proportionately high attrition. AU examples are scarce at all levels, becoming rare near the upper end of the scale; Mint State coins are prohibitively rare, with only four such pieces showing up on the certified population charts at NGC and PCGS combined. This nearly Uncirculated example shows bright yellow-gold patina, with remnants of semiprooflike mirroring in the fields. Some of the stars and the reverse olive leaves are not fully detailed, more a product of poor striking quality than of actual wear. Census: 14 in 58 (1 in 58+), 4 finer (9/14). NGC ID# 2639, PCGS# 8605

**1852 Liberty Eagle, MS61**  
**Underrated Issue in All Grades**

- 4014 1852 MS61 PCGS.** The 1852 Liberty eagle is much more difficult to locate in all grades than its substantial mintage of 263,106 pieces suggests. This attractive MS61 example offers well-detailed design elements and pleasing orange and rose-gold surfaces that retain flashes of original mint luster. Population: 6 in 61, 5 finer (10/14). NGC ID# 263C, PCGS# 8608

**1852-O Ten Dollar, AU53**  
**Bright Yellow-Gold Color**

- 4015 1852-O AU53 NGC. Variety 1.** Early die state, lacking the die crack immediately to the left of the mintmark. The 1852-O, with a mintage of 18,000 pieces, is scarce in About Uncirculated, and virtually unobtainable in Mint State (only three pieces have been certified by NGC and PCGS). This yellow-gold AU53 example displays sharp definition and relatively few marks for a piece that saw some circulation. NGC ID# 263D, PCGS# 8609

**1853-O Eagle, MS61**  
**Tied for Finest Certified**

- 4016 1853-O MS61 NGC. Variety 1.** The 1853-O eagle had a mintage of 51,000 pieces, and nearly all were dispersed into circulation. Doug Winter estimates 250 to 300 examples survive, enough to make the issue marginally obtainable in lower circulated grades, but leaving it scarce and seemingly underrated in high grades. NGC and PCGS combined report having encapsulated only seven Mint State pieces (all MS61 coins), though it is possible one of more of those are the same coin being resubmitted in hopes of an upgrade.

This example displays unusually sharp detail for the issue, with all obverse stars exhibiting complete radial lines. Rich orange-gold patina blankets semiprooflike fields on each side, and the surfaces are free of any major abrasions. An immensely appealing example of this Southern gold issue. Census: 5 in 61, 0 finer (9/14). NGC ID# 263F, PCGS# 8612

**1859 Ten Dollar, MS62**  
**Notable Philadelphia Rarity in Mint State**

- 4017 1859 MS62 PCGS.** The 1859 eagle, with a mintage of only 16,093 coins, is a scarce date in all grades; examples are most often encountered in XF and lower grades, with AU pieces being rare and Mint State coins exceedingly so. The finest certified is a single MS63 coin at NGC. This MS62 piece is tied with just one other as the finest at PCGS, where only four coins have been graded in Mint State overall (9/14). Each side displays satiny orange-gold luster and minimally abraded surfaces. The central motifs are well-defined, though the peripheral stars are slightly soft. Overall, this is an immensely appealing, high-end example of one of the scarcer Philadelphia issues from this period. NGC ID# 263Z, PCGS# 8628

**1861 Eagle, MS62**  
**Seldom Seen This Nice**

- 4018 1861 MS62 NGC.** The 1861 eagle had the highest mintage of the decade (113,100 coins), but its availability is primarily restricted to circulated grades. A small number of Mint State pieces are known, but the typical example grades no finer than MS61. At the MS62 level, this date becomes distinctly rare. The present coin exhibits a sharp strike and shimmering orange-gold luster. Each side displays faint, scattered surface grazes, but detracting abrasions are nonexistent. Census: 11 in 62 (1 in 62+), 5 finer (10/14). NGC ID# 2647, PCGS# 8633

**1866 Motto Ten Dollar, AU53**  
**Rich Original Patina**

- 4019 1866 AU53 NGC.** A paltry mintage of only 3,780 With Motto gold eagles was accomplished in 1866, and these experienced a high attrition rate; only 75 to 90 pieces are extant in all grades, per the PCGS website estimate, and only five examples have been certified as Mint State (all NGC coins). This AU representative has deep apricot-gold color over fields that show substantial semiprooflike mirroring. Grade-consistent abrasions and high-point friction are present, but hardly impede the eye appeal. Census: 7 in 53, 18 finer (9/14). NGC ID# 264J, PCGS# 8649

**1868 Ten Dollar, AU58**  
**Only One Coin Numerically Finer at PCGS**

- 4020 1868 AU58 PCGS.** Despite being one of the most available ten dollar issues from the 1860s, the 1868, with a low mintage of 10,665 coins, is nonetheless scarce in AU grades. Only six Mint State pieces have been certified, the finest of which grade just MS61 (9/14). This bright, yellow-gold example displays partial semiprooflike mirroring in the fields, a sharp strike, and virtually complete detail. Scattered abrasions accompany the grade, as usual. Population: 13 in 58, 1 finer (9/14). NGC ID# 264N, PCGS# 8653

1882-CC Ten Dollar, MS60  
Rare in Mint State

- 4021 1882-CC MS60 PCGS. Variety 2-A.** The mintage of Liberty eagles declined drastically at the Carson City Mint in 1882, to a meager 6,764 pieces. Probably no more than 125-150 examples survive today in all grades, and Mint State coins are extremely rare. This attractive Mint State specimen exhibits sharply detailed design elements in most areas, with just the slightest softness on the hair above the ear and some star centers. The bright yellow-gold surfaces display vibrant mint luster on both sides, with a scattering of minor contact marks that explain the grade. Population: 1 in 60, 1 finer (10/14). NGC ID# 2663, PCGS# 8696

1882-S Liberty Eagle, MS65  
Tied for Finest Certified

- 4022 1882-S MS65 NGC.** The 1882-S Liberty eagle is an underrated issue from a smallish mintage of 132,000 pieces. The 1882-S was widely used in international finance, and many of the pieces in today's market come from European holdings. These coins tend to be unworn, but they usually show excessive bagmarks, making the date extremely rare at the Gem level.

The present coin is a delightful Gem, with vivid orange and copper-gold surfaces that show a few minor contact marks and alloy spots on the obverse. The design elements exhibit razor-sharp definition throughout, with partially prooflike luster and tremendous eye appeal. This coin is the single-finest certified example at NGC and is tied with one other coin at PCGS for the title of finest certified (9/14)

Ex: Auction '90 (Akers, 8/1990), lot 1923. NGC ID# 2665, PCGS# 8698

**1898 Ten Dollar, MS65  
Superb Eye Appeal**

**4023 1898 MS65 PCGS.** The 1898 eagle is not nearly as plentiful as its high mintage of more than 800,000 coins would suggest. The typical Mint State example is heavily abraded, grading no finer than MS62; in MS63 the date's availability declines significantly, and the issue is genuinely rare at the Gem grade level. This example displays sharp design elements and frosty orange-gold luster. Abrasions are limited to just a few unobtrusive grazes, and the eye appeal is exceptional. Population: 9 in 65, 1 finer (10/14). NGC ID# 267G, PCGS# 8740

**1899 Eagle, Lustrous MS65+  
Fully Struck Example**

**4024 1899 MS65+ PCGS.** The Philadelphia Mint made a series of incredibly well-struck gold coins in the waning years of the 19th century and the first of the 20th. This 1899 eagle is one such, showing a full strike on honey-gold, highly lustrous surfaces with no mentionable marks. A couple of darker toning spots are possibly due to improper alloy mixing, but in any case they are not bothersome. Population: 40 in 65 (5 in 65+), 5 finer (10/14). NGC ID# 267J, PCGS# 8742

**1901-S Ten Dollar, MS66  
Excellent Type Representative**

**4025 1901-S MS66 NGC.** The San Francisco Mint struck over 2.8 million ten dollar gold coins in 1901, many of which survive today in various Uncirculated grades. Thus, the issue is frequently encountered in type collectors' sets. This appealing Premium Gem shows vibrant luster and even reddish-gold color. The strike is sharp overall, and only a handful of unimportant ticks appear over each side. NGC has seen just 20 examples numerically finer (10/14). NGC ID# 267S, PCGS# 8749

**1906-S Eagle, MS64  
Conditionally Elusive**

**4026 1906-S MS64 PCGS. CAC.** Lustrous apricot-gold surfaces provide this sharply struck near-Gem with strong visual appeal. Very few signs of contact appear, leaving this firmly near the upper-end of the assigned grade. An as-made strike-through is present in the right obverse field and a few tiny alloy specks are seen when studied with a loupe. Housed in an old green label holder. Population: 4 in 64, 5 finer (10/14). NGC ID# 2687, PCGS# 8762

**1907 Liberty Head Eagle, Lustrous MS65  
Difficult at This Grade Level**

**4027 1907 MS65 PCGS. CAC.** A large quantity of the 1.2 million Liberty Head ten dollar coins ended up in European vaults where they reposed for decades before returning to America. Consequently, the 1907 is one of the more common dates of the series as seen by the nearly 40,000 examples graded by PCGS and NGC. Collectors will have no difficulty locating the 1907 through near-Gem, but the population then declines precipitously. Slightly more than 100 Gems exist but virtually none finer.

Pleasing luster emanates from the yellow-gold surfaces of this Gem and all the design elements are sharply struck. Occasional light marks are within the parameters of the grade designation. This piece yields very nice eye appeal and will satisfy the most discriminating collector. Population: 24 in 65, 0 finer (10/14). NGC ID# 2688, PCGS# 8763

## INDIAN EAGLES

### 1907 No Periods Eagle, MS64 Appealing Original Surfaces

- 4028 1907 No Periods MS64 PCGS.** The 1907 No Periods Indian eagle was the final product of Charles Barber's tinkering with Saint-Gaudens' design, and is the most readily obtainable 1907 variety. This Choice example displays rich, satiny luster shining through blended hues of sun-gold, apricot, and pale olive, while the strike is sharp and preservation is outstanding. NGC ID# 28GE, PCGS# 8852

### 1907 No Periods Ten, MS65 Generous Luster, Bold Eye Appeal

- 4029 1907 No Periods MS65 PCGS.** The short-lived No Motto type endured only two years, 1907 and 1908. The generous luster that this piece offers would not be out of place on a high-grade Morgan dollar. Beautiful caramel-gold color, a decent strike, and a paucity of mentionable marks complete the bold eye appeal. NGC ID# 28GE, PCGS# 8852

### 1907 No Periods Eagle, MS65 Perennial No Motto Type Favorite

- 4030 1907 No Periods MS65 PCGS.** The 1908 No Motto eagle is much scarcer than the 1907 issue in high grades, making this smooth and lustrous 1907 Gem ten an excellent type selection. Charles Barber's revised design made production simpler but sacrificed aesthetics, a worthwhile trade-off as far as Mint productivity was concerned. As a result, the hair detail around Liberty's ear is soft (per Barber's design, not from strike) and some of the lower headdress feathers lack detail. Still, this example earns high marks for eye appeal, rich medium-gold color, and an absence of any distracting marks. NGC ID# 28GE, PCGS# 8852

### 1907 No Periods Indian Eagle Gorgeous Gem Example

- 4031 1907 No Periods MS65 PCGS. CAC.** The 1907 No Periods is the most plentiful No Motto issue in the Indian Head series, ideal for type representation. This luminous honey and lemon-gold example displays smooth, beautifully preserved surfaces and correspondingly high visual appeal. The strike is razor-sharp, as slight softness on the central hair strands is due only to poor engraving of the die, a problem that was remedied on later issues. NGC ID# 28GE, PCGS# 8852

### 1907 No Periods Ten, MS66 Available and Beautiful First-Year Type

- 4032 1907 No Periods MS66 PCGS.** Honey-gold color and copious luster are blatant on each side of this finely preserved 1907 No Period ten, the third and final issue of this date, reflecting Charles Barber's considerable redo of the Augustus Saint-Gaudens design. It also saw extensive public exposure due to its relatively large mintage of nearly 240,000 pieces, and Mint State examples are available even in Gem and sometimes finer grades. No mentionable contact marks or other impairments blur the desirability of this appealing and beautiful coin, a great acquisition for type-set purposes. PCGS shows only nine numerically finer (10/14). NGC ID# 28GE, PCGS# 8852

**1908 No Motto Eagle, MS64+  
Exceptional Visual Appeal**

- 4033 1908 No Motto MS64+ NGC.** The 1908 No Motto Indian ten dollar had a low mintage of only 33,500 pieces, and is proportionately elusive in high grades. Mint State pieces are sometimes available through MS63, but Choice examples are scarce, and Gem or finer coins are rarely encountered. This Plus-graded near-Gem displays a bold strike and radiant, honey-gold luster. A few faint grazes on Liberty's cheek preclude a finer grade, though the surfaces are seemingly pristine to the unaided eye. Census: 56 in 64 (2 in 64+), 43 finer (9/14). NGC ID# 28GG, PCGS# 8853

**1908-D No Motto Eagle, MS63  
Unusually Smooth Surfaces for the Grade**

- 4034 1908-D No Motto MS63 PCGS.** The 1908-D is the most conditionally challenging No Motto Indian eagles in the series; the date is scarce in the MS63 to MS64 grade range, and finer representatives are rare. This is a sharply struck Select example, with smooth honey-gold surfaces and above-average eye appeal for the grade. Population: 94 in 63 (1 in 63+), 55 finer (9/14). NGC ID# 28GH, PCGS# 8854

**1908-D No Motto Ten, MS63**

- 4035 1908-D No Motto MS63 NGC.** A few small ticks on Liberty's face and the lower hair curls on the obverse determine the grade on this Select 1908-D No Motto eagle. The reverse is free of mentionable abrasions, and the caramel-gold surfaces radiate an ample amount of luster. A nice example of the first D-mint Indian Head eagle issue, suited for date- or type-set purposes. Census: 36 in 63, 49 finer (10/14). NGC ID# 28GH, PCGS# 8854

**1908-D No Motto Eagle, Conditionally Scarce MS63  
A Better Struck Example**

- 4036 1908-D No Motto MS63 PCGS.** Population data shows that the 1908-D No Motto ten dollar is most often seen in About Uncirculated through MS62. Availability drops significantly at the Select and near-Gem levels, where this date becomes scarce. Gem and finer specimens are rare with only 26 examples certified by the two services. The lustrous, orange-gold surfaces of this MS63 coin display apricot accents, and the design elements are better defined than usually seen on this typically flatly struck issue. Some light marks preclude a finer grade. NGC ID# 28GH, PCGS# 8854

**1908-S Ten Dollar, MS62  
First S-Mint Issue of the Type**

- 4037 1908-S MS62 PCGS.** Indian gold eagle dies were not shipped to the San Francisco Mint until after Barber added the motto IN GOD WE TRUST to the design, and by that time a low mintage of just 59,850 coins was all that could be accomplished before the end of the calendar year. This issue is known as one of the more available in higher Mint State grades, but this is only relatively speaking, as high-end pieces are elusive. This piece displays luminous, iridescent, green and rose-gold luster, while the design elements are well-struck, and the surfaces are only minimally abraded. NGC ID# 28GL, PCGS# 8861

**1909 Eagle, Bold MS64  
Underrated Issue**

- 4038 1909 MS64 PCGS.** The 1909 eagle is a quietly underrated rarity within its series, one of the scarcest P-mint issues in the entire set and about as rare as the 1908-S despite a mintage three times as large. This is an extremely attractive example of this issue, showing fine-grained, mattelike honey-gold surfaces with minimal abrasions and a bold strike. Population: 87 in 64 (1 in 64+), 29 finer (10/14). NGC ID# 28GM, PCGS# 8862

1909 Eagle, MS65  
Conditional Rarity

**4039 1909 MS65 NGC.** The 1909 Philadelphia, struck to the extent of 184,789 pieces for circulation, is rarer than all other P-mint Indian Head eagle issues save for only the expensive 1933 and the 1907 Wire Edge and 1907 Rolled Edge varieties. Garrett and Guth call the date “certainly underrated” in the 2008 second edition of their *Gold Encyclopedia*. We have only offered two MS65 NGC examples in the past few years, one realizing \$13,225 in 2010 and an MS65+ realizing \$14,100. This Gem NGC example displays glorious luster on orange-gold surfaces that are quite well-struck on both sides and free of all but minuscule contact marks. The face of Liberty and the eagle are both notably clean. Census: 24 in 65, 7 finer (10/14). NGC ID# 28GM, PCGS# 8862

1909-D Eagle, MS63  
Seldom Seen Finer

**4040 1909-D MS63 NGC.** Trivial ticks and marks on the Indian's face and in the left obverse field determine the grade on this Select Mint State 1909-D eagle. A small alloy spot occurs on the second-lowest feather tip, and a couple of larger marks appear in the motto on the reverse. Glowing orange-gold surfaces nonetheless offer considerable eye appeal. The 1909-D is an underappreciated issue within the series, and finer-graded examples are seldom seen. NGC ID# 28GN, PCGS# 8863

1910 Indian Eagle, MS66  
Impressive High-Grade Example

**4041 1910 MS66 PCGS.** A relatively high number of survivors from this medium-mintage issue have been found in Mint State grades, and examples are available through MS64 without too much trouble. Gems are scarce, however, and MS66 coins like this one are conditionally rare.

The bright yellow-gold surfaces are intensely lustrous and display a beautiful frosty sheen across each side. The fields exhibit a pleasing mattelike texture. Boldly struck and carefully preserved. Close inspection with a loupe verifies the remarkably clean condition of this outstanding Premium Gem example. In terms of sheer eye appeal, it would be difficult to improve upon this splendid piece. Population: 25 in 66 (1 in 66+), 3 finer (10/14). NGC ID# 28GR, PCGS# 8865

**1910-D Eagle, MS65  
High-Mintage Type Issue**

**4042 1910-D MS65 NGC.** The 1910-D eagle is a high-mintage issue of more than 2.3 million pieces that is nonetheless seldom seen in the higher Mint State grades. Some examples such as the present piece, however, appear with good luster and a bold strike. Scattered ticks consistent with the grade are more prominent on the reverse. This would be a great candidate for a mintmarked type set. NGC reports only 48 in finer grades (10/14). NGC ID# 28GS, PCGS# 8866

**1910-S Eagle, MS63  
Series Condition Rarity**

**4044 1910-S MS63 PCGS.** Deep reddish-orange patina amid copious luster is the hallmark of this Select 1910-S eagle, showing some scattered ticks on the profile of Liberty on the reverse and a couple of luster grazes on the reverse that determine the grade. Forget the mintage figure for this issue — most were melted, and it is a condition rarity. PCGS reports only 30 submissions numerically finer (10/14). NGC ID# 268D, PCGS# 8867

**1910-D Indian Eagle, MS66+  
Exceptional High-End Type Coin**

**4043 1910-D MS66+ PCGS. CAC.** The 1910-D eagle has the second-highest mintage in the Saint-Gaudens series, behind only the 1926, and it is the go-to issue for mintmarked type. Like any other Saint-Gaudens ten, though, it is genuinely elusive in MS67 condition, if not strictly rare, and anything finer is an extreme rarity. This apricot-gold Premium Gem offers swirling luster with just a hint of satin paired with a strong cartwheel effect. While the detail on the hair over Liberty's ear is a trifle soft, the all-around visual appeal is excellent and only a few modest blemishes preclude an even finer designation. Population: 40 in 66 (8 in 66+), 2 finer (10/14). NGC ID# 28GS, PCGS# 8866

**1910-S Eagle, MS64  
Melt Rarity, Seldom Seen Finer**

**4045 1910-S MS64 NGC.** The orange-gold surfaces on this 1910-S ten dollar host glowing luster and show only a few small marks that are consistent with the near-Gem grade. Excellent eye appeal is created by the clean surfaces and bountiful luster. The 1910-S, despite the high mintage figure of 811,000 coins — far more than any of the 10 other S-mint issues in the series — is a conditional rarity within the Indian Head eagles, as most were melted a couple of decades after their production. This well-struck coin is one of only 21 submitted at NGC in MS64, and only five are finer (10/14). NGC ID# 268D, PCGS# 8867

### 1911-D Ten Dollar, AU55

- 4046 1911-D AU55 PCGS.** Except for the wire rim and rounded rim patterns that open the Indian eagle series, the 1911-D has the lowest *Guide Book* mintage of the series. Most of the production apparently went into local circulation, since AU55 is the median grade for the issue, and PCGS has certified examples in grades as low as Fine 15. The present wheat-gold representative has good luster but displays light wear on the forehead curls. Minimally marked aside from a small scrape beneath UNUM. NGC ID# 28GU, PCGS# 8869

### 1911-D Eagle, AU58 Key Denver Issue

- 4047 1911-D AU58 NGC.** The Denver Mint produced a number of key and semikey gold issues in 1911, the ten dollar issue being struck to the limited extent of just 30,100 pieces. Mint State examples are scarce in all grades, and are usually affected by heavy abrasions, grading no finer than MS62. This near-Mint State representative exhibits only a touch of friction, and is free of major surface flaws. Original green-gold patina yields to subtle honey-gold hues in the recesses, while the bold strike completes the eye appeal. NGC ID# 28GU, PCGS# 8869

### 1911-D Eagle, MS61 Key Date in the Indian Head Series

- 4048 1911-D MS61 PCGS.** The 1911-D eagle has a lower mintage, at 30,100 coins, than its quarter eagle and half eagle counterparts. It is one of a number of keys within its series, in common with the half eagle and in contradistinction with the quarter eagle. The golden-orange surfaces of this piece show no sign of rub or wear, but scattered contact marks, some severe, appear on each side (mostly the obverse), and small areas of gray and black patina occur in the fields and the high points, these factors together determining the MS61 grade. This piece would fit well into a complete set at a fraction of the cost of an MS63 example. NGC ID# 28GU, PCGS# 8869

### 1912-S Eagle, MS62 Radiant, Original Luster

- 4049 1912-S MS62 PCGS.** The 1912-S Indian eagle is known for being softly struck, with the hair over Liberty's ear and the leading edge of the eagle's wing being typical weak points. This orange-gold Mint State example is slightly above-average for the issue, with only a trifle of softness seen on the highest points of the devices. Scattered abrasions limit the grade, but the coin remains a pleasing example of this conditionally challenging San Francisco issue. NGC ID# 28GX, PCGS# 8872

**1912-S Indian Eagle, MS64+  
Challenging Issue in High Grade**

**4050 1912-S MS64+ PCGS.** The 1912-S Indian eagle enjoyed an adequate mintage of 300,000 pieces, but the issue was not well-produced and the typical specimen seen today exhibits a weak strike, somewhat subdued luster, and numerous surface marks. Altogether, the 1912-S is one of the most challenging issues of the series to find in high grade.

The present coin is a high-end Choice example, with a much-better-than-average strike and lustrous orange and rose-gold surfaces that show only minor signs of contact. Eye appeal is quite strong and we expect intense competition from series specialists when this lot is called. Population: 73 in 64 (22 in 64+), 12 finer (10/14). NGC ID# 28GX, PCGS# 8872

**1913 Indian Eagle, MS66+  
Only One Numerically Finer at PCGS**

**4051 1913 MS66+ PCGS. CAC.** The 1913 Indian Head eagle is occasionally found in quite high grades and is among the best-produced issues in the entire series. Near-Gem examples are quite popular for their eye appeal and good production criteria, and even Gem examples surface occasionally. A Premium Gem such as the present coin, however, is at the top end of certified survivors, a grade level where PCGS has seen only 13 submissions, with a sole MS67 piece finer (9/14). This coin displays abundant eye appeal amid the prevailing golden-orange color, accompanied by a trace of crimson in the recesses of Liberty's headdress. A couple of insignificant facial ticks appear, but the sharp strike and generous mint luster are of impeccable quality. NGC ID# 28GY, PCGS# 8873

**1913-S Indian Ten, MS63  
Clearly Above Average**

- 4052 1913-S MS63 PCGS.** The 1913-S Indian Head ten dollar piece is a popular S-mint issue within the series, owing in part to its mintage of only 66,000 coins, exceptionally low for a 20th century coin. Lustrous surfaces yield deep yellow-gold patination and well-struck design features. A few light marks, including a minute rim bruise at 3 o'clock, are less than what might be expected for an MS63. This piece is clearly finer than the typical certified coin, which has an average grade of AU55, or the average auction appearance with an average grade just under MS60. Population: 27 in 63, 16 finer (10/14). NGC ID# 28GZ, PCGS# 8874

**1914 Eagle, Flashy MS65  
Underrated Series Issue**

- 4053 1914 MS65 NGC.** The honey-gold surfaces on this Gem 1914 ten dollar are flashy and lustrous, showing few mentionable abrasions (other than a few small facial ticks) amid the bold strike and generous eye appeal. The reverse shows a couple of minor ticks on the upper eagle wing and a small luster graze in the right field. The 1914 eagle issue is rare and underrated. Census: 44 in 65, 8 finer (10/14). NGC ID# 28H2, PCGS# 8875

**1914-D Eagle, MS64  
Well-Produced Issue**

- 4054 1914-D MS64 NGC.** The apricot-gold surfaces on this near-Gem are well-struck, sporting flashy luster and good eye appeal. The obverse shows a few minor ticks on the face, but a fair-sized pair of nicks appear on the eagle's wings on the reverse. Other contact is trivial. A nice example of this well-made issue. NGC shows only 59 numerically finer (10/14). NGC ID# 28H3, PCGS# 8876

**1914-D Indian Eagle, MS64+  
Seldom Seen Finer**

- 4055 1914-D MS64+ NGC.** Moderate melting in the mid-1930s had an affect on the availability of this Denver issue; the date is only marginally available in MS63 and MS64 condition, and becomes particularly challenging in finer grades. This Plus-graded near-Gem boasts vibrant honey-gold luster and sharp definition throughout the relief elements. A few tiny surface grazes on Liberty's cheek preclude full Gem status. NGC ID# 28H3, PCGS# 8876

---

**1914-S Indian Eagle, MS62**  
**Popular Mintmark Type Issue**

**4056 1914-S MS62 PCGS.** From a mintage of 208,000 pieces, the 1914-S Indian eagle is reasonably available in lower Mint State grades, but examples in higher grades are elusive. This attractive MS62 piece offers well-detailed design elements and frosty mint luster, with lightly marked yellow and rose-gold surfaces. NGC ID# 28H4, PCGS# 8877

---

**1914-S Ten Dollar, MS63**  
**Elusive in Finer Grades**

**4057 1914-S MS63 NGC.** The 1914-S eagle usually appears in AU55-AU58 condition and is one of the rarest series issues in Gem grade. This Select Mint State example of among 54 such at NGC, and only 43 are finer (10/14). The honey-gold surfaces boast glowing luster and a decent strike, but there are a few too many small contact marks for the near-Gem level. An attractive and rare coin. NGC ID# 28H4, PCGS# 8877

---

**1915 Eagle, MS65**  
**Luminous Original Luster**

**4058 1915 MS65 NGC.** The 1915 is only marginally scarce in MS65 condition, but finer examples are rare. This piece showcases glowing orange-gold mint luster, with razor-sharp design definition over each side. A few insignificant surface ticks preclude a finer grade, though the overall visual appeal is excellent. NGC has certified 28 numerically finer representatives (10/14). NGC ID# 28H5, PCGS# 8878

---

**1915 Indian Eagle, MS65**  
**Conditionally Rare in Finer Grades**

**4059 1915 MS65 PCGS.** The 1915 Indian eagle claims a mintage of 351,000 pieces and the issue is not difficult to locate in grades up to the MS64 level, but attractive Gems, like the present coin, are very scarce. This delightful piece offers well-preserved orange-gold surfaces, with vibrant mint luster and sharply detailed design elements. Population: 48 in 65 (1 in 65+), 9 finer (10/14). NGC ID# 28H5, PCGS# 8878

---

**1915-S Eagle, Minimally Marked AU58**

**4060 1915-S AU58 PCGS.** The 1915-S eagle is very difficult to locate in the better grades of Mint State due to most examples being heavily abraded. A near-Mint specimen such as the present offering is therefore an excellent find. Its orange-gold surfaces retain ample luster in the protected areas and its design elements are well-defined despite high-point wear. Some light circulation marks are fewer and less severe than typically encountered. NGC ID# 28H6, PCGS# 8879

**1915-S Ten Dollar, MS62**  
Well-Preserved for the Grade

- 4061 1915-S MS62 PCGS.** The 1915-S Indian eagle had a low mintage of only 59,000 coins, a factor which contributed to its low survival rate but was not solely responsible. A few examples survived via overseas hoards, but it is believed many examples were eventually melted during the mid-1930s. Significant portions also experienced light circulation in the West, as evidenced by the moderate number of XF and AU coins that are available to collectors. At the Mint State level, the 1915-S is one of the most challenging dates in the series, and is rarely seen finer than the MS62 example here offered. Each side exhibits satiny, honey-gold luster and well-defined motifs. Scattered luster grazes limit the grade, but bothersome abrasions are nonexistent. NGC ID# 28H6, PCGS# 8879

**LIBERTY DOUBLE EAGLES**

**1850 Twenty Dollar, AU58**  
First Regular-Issue in the Series

- 4062 1850 AU58 NGC.** This is a lovely near-Mint example from the first obtainable date in the double eagle series. Olive-gold colors the surfaces, and a significant amount of mint luster emanates from the devices. Essentially imperceptible high-point rub and a number of scattered marks are all that preclude an Uncirculated designation. Sharply detailed overall with a touch of incompleteness on the stars. NGC ID# 268F, PCGS# 8902

**1851-O Liberty Twenty Dollar, AU50**  
Strong Detail Remaining

- 4063 1851-O AU50 NGC. Variety 1.** Though this New Orleans issue claims a reasonably high mintage of 315,000 coins, it is "scarce in About Uncirculated and very rare in full Mint State," according to Garrett and Guth. This AU example is appealing despite the expected number of small surface marks and a somewhat subdued appearance. Only minor high-point wear is seen under low magnification, and the design elements retain strong detail for the grade. NGC ID# 268J, PCGS# 8905

**1851-O Double Eagle, AU58  
Seldom Seen O-Mint Issue**

- 4064 1851-O AU58 NGC. Variety 3.** When the San Francisco Mint began operations in 1854, bullion shipments from California plummeted at the New Orleans facility, as did production of double eagles. As a result, the few issues produced in the early days of the Gold Rush are the only O-mint issues of that denomination that are generally available to collectors, though even these are seldom seen in high grades. The 1851-O, with a mintage of 315,000 pieces, is a likely candidate for the collector seeking a single piece from this mint.

This example displays luminous lemon-gold color, with hints of semiprooflike mirroring in the protected regions. The peripheral stars and legends are softly defined, more a product of die lapping than striking deficiency, while the central devices are sharply detailed. Census: 63 in 58 (1 in 58+), 19 finer (9/14). NGC ID# 268J, PCGS# 8905

**1853 Liberty Head Twenty, AU58  
Blatant Originality**

- 4065 1853 AU58 PCGS. CAC.** The fact that this double eagle survived for more than 160 years — including a brief stretch in circulation — is clearly evident, with a slightly scuffed, orange-gold patina and a measure of dirty-gold naturalness that bespeaks originality. Actual wear is minimal and much luster remains. This Philadelphia issue is rare in Mint State, and without doubt this unfettered, near-Mint example will draw many astute bidders. NGC ID# 268M, PCGS# 8908

**1853 Double Eagle, MS60  
Popular Type One Issue**

- 4066 1853 MS60 PCGS.** An extensive scattering of contact marks, including some larger ones in the central focal points, account for the grade on this lustrous orange-gold Type One twenty, which otherwise shows no sign of rub and retains a good deal of eye appeal. Type One double eagles from Philadelphia in Mint State are a popular entree for many collectors into the series, as their mintmarked counterparts are far more expensive. Population: 2 in 60, 45 finer (9/14). NGC ID# 268M, PCGS# 8908

**1853/2' FS-301 Double Eagle, AU55  
So-Called Overdate**

**4067 1853/2' FS-301 AU55 PCGS.** There is some debate regarding the status of this so-called overdate. PCGS and NGC have both placed the 2 inside single quote marks, suggesting that they disagree with the overdate status. Bill Fivaz and J.T. Stanton write in the *Cherrypickers' Guide* that the "Date on this 1853 Coronet gold \$20 double eagle appears to show a 3 over a 2." Similarly, the *Guide Book* identifies the variety as "3 Over 2" in quotation marks. Others firmly believe it is an overdate. Regardless, it is a scarce variety that is elusive in higher grades. This Choice AU example has considerable luster on its yellow-gold surfaces with scattered, grade-consistent marks. Population: 15 in 55, 19 finer (10/14). PCGS# 145730

**1853-O Double Eagle, AU Details  
Popular Early O-Mint Issue**

**4068 1853-O — Improperly Cleaned — NGC Details. AU. Variety 1.** New Orleans double eagles are among the scarcest and most desirable non-proof gold issues in the Liberty head series, but only a few dates can be termed available for the casual collector. The 1853-O, with a mintage of 71,000 coins, is one of the more often seen issues from this mint, and is highly popular in all grades. This example displays rich bronze-gold color, but is unnaturally glossy due to past cleaning. Only light wear is evident over the high points of the design. NGC ID# 268N, PCGS# 8910

**1854 Large Date Twenty, AU58  
Seldom Seen in Mint State**

**4069 1854 Large Date AU58 NGC.** The date is noticeably larger than the Small Date, but confirmation also appears in the form of an omnipresent die lump on Liberty's neck just before the lowest curl. Mint State examples of this rare variety are few and far between, making this near-Mint example a compelling value proposition. The yellow-gold surfaces show scattered marks on each side, with a trio of reeding marks on Liberty's cheek among the more noticeable ones. There is little more than a trace of rub on this piece, and the surfaces are uniformly well-struck throughout both sides. Census: 19 in 58 (1 in 58+), 11 finer (10/14). PCGS# 98911

**1855-S Twenty, Bright AU55**

- 4070 1855-S AU55 PCGS.** This issue was once a great rarity in high grades, but recent shipwreck discoveries have made AU and Mint State coins more available to serious collectors. This Choice AU example has the arm's-length appearance of an Uncirculated piece, possibly due to longterm immersion in sea water. The bright surfaces display bright orange-gold color, and relatively few small-to-moderate marks are scattered across both sides. NGC ID# 268X, PCGS# 8916

**1856 Double Eagle, AU58  
Only 17 Finer at NGC**

- 4071 1856 AU58 NGC.** The reverse of this near-Mint double eagle has die lines at various angles extending from the border to the letters over ED STATES. Die varieties of the Liberty gold coins is an understudied area in numismatics. Both sides of this 1856 have reflective fields with light yellow surfaces, exhibiting myriad marks that range from trivial to moderate. Census: 52 in 58, 17 finer (10/14). NGC ID# 268Y, PCGS# 8917

**1856-S Liberty Twenty, MS64  
Possible S.S. Central America Survivor**

- 4072 1856-S MS64 PCGS.** Although we cannot say for sure, and this piece is not specifically provenanced to it, most 1856-S double eagles in high grade are a good bet — “better than even money,” as the saying goes — to stem from the shipwreck of the *S.S. Central America*, from whence several hundred examples were later recovered. In any case this piece displays superlative eye appeal with orange-gold, lustrous surfaces that are well-struck and free of singular marks. Type One double eagles in high grade, such as this piece, are numismatic treasures of great aesthetic appeal. Population: 4 in 64 (1 in 64+), 2 finer (9/14).  
Ex: Beverly Hills Signature (Heritage, 11/2011), lot 4435. NGC ID# 2692, PCGS# 8919

**1856-S Double Eagle, AU55  
Ex: S.S. Central America**

- 4073 1856-S No Serif, High Right S, Variety 17N, AU55 PCGS. CAC.** Ex: *S.S. Central America*. SSCA 5574. The *S.S. Central America* treasure coins are known for their incredible preservation and eye appeal, despite years of submersion in harsh seawater. This Choice AU 1856-S double eagle is a prime representative in that regard, with shimmering honey-gold luster and smooth surfaces. Just a touch of high-point friction precludes a Mint State grade, though the appeal is hardly affected. Population: 27 in 55, 36 finer (9/14). PCGS# 70023

**1857 Liberty Twenty, MS62  
Very Rare Any Finer**

**4074 1857 MS62 NGC.** The 1857 Liberty double eagle claims a substantial mintage of 439,375 pieces and the issue is not difficult to locate in circulated grades up to the XF-AU level. Unfortunately, the 1857 Philadelphia issue was not as well-represented in recent shipwreck finds as its San Francisco counterpart, with only two examples recovered from the *S.S. Central America* and 26 coins found in the wreck of the *S.S. Republic*. As a result, the 1857 is rare in MS62 condition, and a prime condition rarity in higher grades.

The present coin is a lustrous peach-gold example, with sharply detailed design elements and surprisingly few contact marks for the grade. Overall eye appeal is outstanding. Census: 14 in 62, 3 finer (9/14). NGC ID# 2693, PCGS# 8920

**1857-S Central America Twenty, AU58  
Scarce Variety 20-D, Bold 7, Faint S**

**4075 1857-S Faint S, Variety 20D, AU58 PCGS. CAC.** Ex: *S.S. Central America*. SSCA 1326. This near-Mint double eagle displays a richer orange-gold coloration than most seawater coins, and it is one of the rarer varieties identified from detailed study of the *S.S. Central America* bounty. The 7 is bold compared to the 185 numerals in the date, and the mintmark is less prominent than normal. A boldly struck example, with excellent eye appeal and just a few stray abrasions that determine the assigned grade. PCGS# 70003

**1857-S Double Eagle, MS61  
Lustrous Type One Example**

**4076 1857-S No Serif, Right S, Variety 20F, MS61 NGC.** The discovery of the *S.S. Central America* yielded over 5,000 1857-S double eagles, and the issue's compelling history earned it a prominent place among Garrett and Guth's *100 Greatest U.S. Coins*. This mint condition Type One example offers strong striking detail. Shimmering mint frost rolls over lightly abraded, peach and sun-gold surfaces, contributing to the strong eye appeal. Only two marks, one below Liberty's eye and another on the eagle's shield, merit mention. PCGS# 70005

**1857-S Spiked Shield Twenty Dollar, MS64  
*S.S. Central America* Shipwreck Recovery Coin**

**4077 1857-S Spiked Shield, Variety 20A, MS64 PCGS.** Ex: *S.S. Central America*. SSCA 1077. This near-Gem piece shows reddish-orange interiors with brighter orange-gold margins. Few signs of mentionable contact appear, but a bit of struck-in die grease shows on the reverse, along with a small black area in the denticles at 1 o'clock. Minor planchet roughness occurs on the obverse. This piece is quite well-struck, showing full details on all star radials. PCGS# 70000

---

**1857-S Double Eagle, MS64**  
**Ex: S.S. Central America**

- 4078** 1857-S Spiked Shield, Variety 20A, MS64 PCGS. Ex: S.S. Central America. SSCA 3542. This is an intensely frosty example from the hoard of 1857-S double eagles that were recovered from the wreck of the S.S. *Central America*. Fully struck with intermingled hues of peach, orange-gold, and mint-green, with splashes of reddish patina on the lower right of the obverse. The obverse also shows a few trivial marks while the reverse is clean. PCGS# 70000

---

**1857-S Double Eagle, MS64**  
**Ex: S.S. Central America**

- 4079** 1857-S Spiked Shield, Variety 20A, MS64 PCGS. CAC. Ex: S.S. Central America. SSCA, 0208. The S.S. *Central America* hoard coins are known for their impeccable preservation and eye-catching luster. This Choice example is no exception, displaying frosty orange-gold mint bloom and boldly defined relief elements. No singularly discernable abrasions are present. PCGS# 70000

---

**1857-S Double Eagle, Appealing MS65**  
**An Excellent Type Coin**

- 4080** 1857-S MS65 PCGS. Variety 20-A, Spiked Shield. The 1857-S double eagle shows a hefty certified population exceeding 7,100 pieces, most of which are concentrated in Mint State. The large number of mint condition 1857-S double eagles resulted from the more than 5,400 Uncirculated examples recovered from the wreck of the S.S. *Central America*, lost in a hurricane in 1857. Consequently, this issue is often collected as a type coin.

Intense luster radiates from the orange-gold surfaces of the present Gem offering and all of its design elements are well-defined. A few minute marks are within the confines of the grade designation and do not detract from the coin's pleasing eye appeal. This is an excellent piece for a high-grade type collection. NGC ID# 2696, PCGS# 8922

---

1857-S Liberty Twenty, MS65  
S.S. Central America  
Popular Spiked Shield Variant

**4081** 1857-S MS65 PCGS. Ex: S.S. Central America. SSCA 0336. 20A Spiked Shield. Like all Type One Liberty double eagles, the 1857-S was extremely rare in Mint State grades before thousands of high-grade examples were recovered from recent shipwreck finds. The 1857-S is now the most popular choice of type collectors seeking an example of the Type One design.

The present coin is a delightful Gem with sharply detailed design elements and vibrant mint luster on both sides. The well-preserved orange-gold surfaces enhance the outstanding eye appeal. Two sharp die lines to the left and penetrating the shield identify the popular Spiked Shield variety. Population: 43 in 65 (2 in 65+), 4 finer (9/14). NGC ID# 2696, PCGS# 8922

1857-S 'Spiked Shield' Twenty, MS65  
Ex: S.S. Central America

**4082** 1857-S Spiked Shield, Variety 20A, MS65 PCGS. CAC. Ex: S.S. Central America. SSCA 4954. The "Spiked Shield" variety, named for two die lines near the left shield border, is associated with high grade examples from the famous "Treasure of Gold" shipwreck. The present orange-gold Gem exhibits dazzling luster and displays only minor contact. Housed in a gold label holder of its original distribution, and accompanied by a signed certificate of authenticity and a faux Ship of Gold book. PCGS# 70000

**1858-O Double Eagle, AU55**  
**Normal Date Obverse**

- 4083 1858-O AU55 PCGS.** The mintage of 1858-O double eagles was limited to only 35,350 coins, and only about 150 to 200 of those survive today. Most are in lower grades, with XF or low AU grades typical. PCGS has certified nine VF coins, 39 XF coins, 60 AU examples, and one Mint State coin. Among those certified AU are 20 pieces graded AU55, and eight graded AU58 (10/14). Walter Breen mentioned a blundered obverse die variety with an extraneous 8 extending down from the lower hair curls. Doug Winter notes that the variety has not been traced. This delicate green-gold example has a small mark on Liberty's cheek, with traces of reflectivity in the fields. Population: 20 in 55, 9 finer (10/14). NGC ID# 2698, PCGS# 8924

**1859-S Double Eagle, Unc Details**  
**Ex: Saddle Ridge Hoard**

- 4084 1859-S — Cleaning — PCGS Genuine. Unc Details.** Ex: Saddle Ridge Hoard. This piece from the recent Saddle Ridge Hoard is housed with the accompanying gold PCGS label. The lightly hairlined surfaces retain full wheat-gold surfaces with minuscule traces of brick-red patina on the reverse. The 1859-S double eagle is elusive in Mint State grades and the present example should prove to be an affordable representative. Like previous ocean treasures, the landlocked Saddle Ridge Hoard will further define the rarity of many gold issues. NGC ID# 269C, PCGS# 8928

**1860-S Double Eagle, AU55**  
**Ex: S.S. Republic**

- 4085 1860-S AU55 NGC.** Ex: S.S. Republic. The 1860-S double eagle was struck in amply quantity (more than 500,000 coins), and experienced extensive circulation in the Western regions. Uncirculated examples are rare in all grades, even after several pieces having been recovered from the S.S. *Brother Jonathan* and S.S. *Republic* shipwrecks. Pedigreed to the S.S. *Republic*, this Choice AU representative displays the bright, shimmering luster that is characteristic of many shipwreck coins, with only a few minor ticks scattered across the surfaces. Slight wear over the high points of the design precludes a Mint State grade. NGC ID# 269F, PCGS# 8931

**1861 Double Eagle, Frosty AU58**  
**Ex: S.S. Republic**

- 4086 1861 AU58 NGC. CAC. Ex: S.S. Republic.** A faint touch of friction over the high points of the motifs accounts for the near-Mint numeric grade from NGC, though it is difficult to discern without magnification. Frosty yellow-gold mint luster engulfs each side, while the strike is sharp and the surfaces exhibit only a few minor, grade-consistent abrasions. Nearly 500 examples of this issue were recovered from the *S.S. Republic* shipwreck, and these are increasingly popular among sunken treasure enthusiasts, as well as gold type collectors. NGC ID# 269G, PCGS# 8932

**1861 Double Eagle, MS61**  
**Exceptional Eye Appeal**

- 4087 1861 MS61 PCGS.** Although well known as a high-mintage type issue, the 1861 twenty is surprisingly scarce in Mint State grades. The current example offers as much eye appeal as one could hope for in a coin graded MS61. The mint luster is full and vibrant, and both sides display rich orange-gold and rose coloration. A surprisingly small number of surface marks make this piece seem conservatively graded. NGC ID# 269G, PCGS# 8932

**1861 Double Eagle, MS61**  
**Boldly Struck Type One Issue**

- 4088 1861 MS61 PCGS.** The surfaces on this piece show deep orange-gold color and a bold strike, producing full detail on all star radials and most of the detail on Liberty's hair and coronet. A mix of small and some larger abrasions on each side determines the grade but does not defeat the considerable eye appeal. The 1861 double eagle issue was the largest of the denomination until 1904. NGC ID# 269G, PCGS# 8932

**1864-S Double Eagle, MS61**

- 4089 1864-S MS61 PCGS.** The date is a trifle right of the usual position, and the lower right serif of the 4 nearly touches a dentil. A delicate die crack joins stars 10 and 11. The left serif of the small S mintmark is centered over the left top of the N in TWENTY. The reverse has several die cracks through the peripheral letters. This attractive Mint State piece has frosty light yellow luster with delicate lemon patina on the rims. Both sides have trivial grade-limiting marks, but none of the heavy marks so often seen on these large gold coins. Population: 21 in 61, 16 finer (10/14). NGC ID# 269T, PCGS# 8942

**1865 Liberty Twenty, Lustrous AU55**

- 4090 1865 AU55 NGC. CAC.** The 1865 double eagle was at one point a rarity in high grades, but its availability in AU and Mint State levels increased somewhat following the recovery of 320 examples from the *S.S. Republic* shipwreck, much to the delight of collectors. This Choice AU representative displays substantial honey-gold luster and nearly complete detail. Light, scattered abrasions accompany the grade, though none are individually noticeable. NGC ID# 269U, PCGS# 8943

**1865 Liberty Twenty, Frosty MS61**  
**Misplaced Date in Denticils**  
**Ex: S.S. Republic**

- 4091 1865 MS61 NGC. CAC. Ex: S.S. Republic.** The shipwreck yielded about 320 examples of this previously elusive Philadelphia issue, with the majority surviving in the Mint State grade range. This is an unusually appealing example for the grade, with frosty yellow-gold luster and bold design definition. A few small ticks Liberty's face limit the grade, but are not overly distracting. As noted by NGC, misplaced date numerals are visible within the underlying denticils. This variety is not yet listed in the *Cherrypickers'* reference. NGC ID# 269U, PCGS# 8943

**1865-S Twenty, AU58**  
**Beautiful Red-Orange Surfaces**

- 4092 1865-S AU58 PCGS.** Small S. Beautiful deep red-orange surface color and a relative paucity of mentionable marks make this S-mint Type One double eagle a standout representative of this abundant issue exceeding 1 million coins. This coin is not specifically provenanced to the S.S. Republic or the S.S. Brother Jonathan, but one of those shipwrecks is almost certainly its source. NGC ID# 269V, PCGS# 8944

**1865-S Double Eagle, MS61**  
**Remarkably Appealing Example**

- 4093 1865-S MS61 PCGS.** Small S. Exceptional eye appeal is the hallmark of this Mint State example from the San Francisco Mint. The strike definition is bold and nearly complete on each side, except for a few of the denticils. Bright sun-gold coloration and deep accents of rose are blended together over obverse and reverse alike. Small abrasions define the grade of this appealing specimen. NGC ID# 269V, PCGS# 8944

**1866 Double Eagle, MS62**  
**Only One Finer Coin at PCGS**

- 4094 1866 MS62 PCGS.** The design of the double eagle was modified in 1866 to include the motto IN GOD WE TRUST, making the issue an important one for type and date collectors. Like most Type Two double eagles, the 1866 is easily found in middle circulated grades, but Mint State examples are rare. This impressive MS62 specimen displays well-detailed design elements, with recutting evident on many stars. The lustrous orange and rose-gold surfaces show the minimum number of minor contact marks for the grade. Overall eye appeal is quite strong. This coin will be a welcome addition to a fine collection or Registry Set. Population: 5 in 62, 1 finer (10/14). NGC ID# 269X, PCGS# 8949

**1868 Twenty Dollar, AU53**  
**Seemingly Underrated P-Mint Issue**

- 4095 1868 AU53 NGC. CAC.** Unlike some other Type Two double eagles which are elusive in Mint State but plentiful in circulated grades, the 1868 is genuinely scarce throughout the grade spectrum, and in Mint State is one of the rarest Philadelphia issues in the series. This well-detailed AU example displays remnants of semiprooflike mirroring in the protected regions of the fields, with warm honey-gold color throughout. Scattered abrasions are present, as is typical at this grade level. NGC ID# 26A3, PCGS# 8953

---

**1869-S Type Two Double Eagle, MS61**  
**Scarce in Mint State**

**4096 1869-S MS61 NGC.** While readily available in circulated grades, this San Francisco issue is like most Type Two double eagles (1866-1876) — plenty minted, few saved. No large hoards were discovered, and even advanced collections often lack a Mint State example.

The current coin is nicely lustrous beneath a fawn-gold patina. Marks are infrequent and of pinprick size, with minimal rim chatter from coin-to-coin contact. The issue comes lightly struck at the centers, although this attractive coin shows only minor blending on the high points of Liberty's hair strands and curls. Census: 36 in 61, 40 finer (10/14). NGC ID# 26A6, PCGS# 8956

---

---

**1870-S Double Eagle, AU58**  
**Conditionally Scarce**

**4097 1870-S AU58 NGC. CAC.** According to Garrett and Guth (2008): "The 1870-S double eagle is very rare in Mint State. Most of the great double eagle collections sold at auction in the past two decades have lacked an Uncirculated example." This near-Mint specimen is held back from a Mint State grade by a somewhat scuffy overall appearance. The coppery-reddish surfaces are moderately abraded, but the strike definition is bold and high-point wear is minimal. NGC ID# 26A9, PCGS# 8959

---

---

1871-S FS-301 Double Eagle, MS64  
The Finest NGC Certified Example

4098 1871-S MS64 NGC. FS-301. Small Narrow S. The *Cherrypickers' Guide* lists this as a misplaced date with the top of a digit in the denticles below the date. This magical misplaced date certainly deserves further study.

San Francisco Mint records report the receipt of 10 obverse dies and eight reverse dies in December 1870, preparatory to the 1871 double eagle coinage. Several varieties should exist, although we are unaware of any detailed study that would likely key on the date position in relation to the border, bust, and designer's initials on the obverse, and the mintmark size and location on the reverse. The J in J.B.L. is slightly right of center over the 8. A slightly curved die line extends into the hair from the bottom right serif of the T in LIBERTY. The small S mintmark is close to the eagle's tailfeathers, and is centered above the right upright of the N in TWENTY. The reverse has a prominent, nearly straight die line through 10 dentils over TAT in STATES.

The San Francisco Mint was the premier agency producing double eagles throughout the Type Two design from 1866 to 1876. In 1871, the California facility struck 928,000 double eagles, and more than 2,000 of those coins have been graded by NGC and PCGS. Of that population, only 194 have earned a grade of MS60 or finer, and just two pieces (one NGC and one PCGS) are graded MS64 (10/14). The late David Akers once wrote that he had never seen a true Gem (MS65 or better), and his observation holds true today.

This Choice Mint State piece has light hairlines and a small scrape near star 11 on the obverse, and trivial field marks on the reverse. The surfaces are brilliant and highly lustrous with lovely lemon toning near the borders. The nearly full strike is clearly above average for this issue. NGC ID# 26AC, PCGS# 8962

**1873-S Closed 3 Twenty, MS62**  
**Outstanding Mint Luster, Rare Any Finer**

**4099 1873-S Closed 3 MS62 NGC.** Small S. Numerous light abrasions dot the surfaces of this sharp, lustrous double eagle, although the outstanding mint bloom trumps the miscellaneous marks in terms of positive eye appeal. Both the Closed 3 and Open 3 varieties of this date are equally desirable despite the Open 3 being slightly less available. The S mintmark on this coin is positioned further right than other examples we have seen. PCGS and NGC combined have certified just five numerically finer coins. NGC Census: 26 in 62, 2 finer (10/14). NGC ID# 26AL, PCGS# 8969

**1874-S Double Eagle, MS62**  
**Conditionally Rare Type Two Issue**

**4101 1874-S MS62 PCGS.** Although more than 1.2 million double eagles were struck in San Francisco in 1874, few have survived in Mint State grades, especially at higher numerical levels. The combined population includes just 88 examples in MS62, and only seven finer pieces. This one is a lovely orange-gold piece, with traces of greenish coloration along the border. The surfaces host trivial, grade-limiting marks. Population: 58 in 62, 4 finer (10/14). NGC ID# 26AR, PCGS# 8972

**1874-CC Twenty Dollar, AU58**  
**Great-Looking Carson City Coin**

**4100 1874-CC AU58 NGC. Variety 3-A.** The 1 is centered over a dentil, the right-bottom serif of the 4 is close to a dentil, and a small die chip appears at Liberty's temple. Only a single reverse is known for the issue, despite the rather generous mintage exceeding 115,000 pieces. The 1874-CC to 1876-CC double eagles form an interesting triumvirate: The 1874-CC is the first Carson City twenty generally available; the 1875-CC is the most common With Motto issue from that mint; and the 1876-CC is the highest-production CC-mint twenty, reflecting the peak production years of the Comstock Lode, 1876-1878. This orange-gold near-Mint example boasts great-looking luster over surfaces that show a good strike and scattered minor marks. NGC ID# 26AP, PCGS# 8971

**1875-CC Double Eagle, Well-Defined AU58**  
**Above-Average Surfaces**

**4102 1875-CC AU58 NGC. CAC. Variety 2-B.** Considerable luster resides in the recessed areas of this near-Mint 1875-CC specimen. Orange-gold surfaces exhibit well-defined devices, including the radial lines in the obverse stars, the reverse shield, and the eagle's feather tips, all areas that are sometimes weak on this issue. Scattered abrasions are visible, but these are fewer and less severe than typically seen on this heavily abraded date. No significant copper spots are noted, an impairment that plagues most 1875-CC twenties. NGC ID# 26AT, PCGS# 8974

---

1875-CC Double Eagle, Well-Struck MS61

**4103 1875-CC MS61 NGC. Variety 6-B.** Large numbers of the more than 111,000 1875-CC double eagles were exported for international commerce, and relatively large numbers eventually returned to America, making it the most available Carson City twenty from the 1870s. Perusal of the NGC and PCGS population data indicates that the two services have certified more than 3,200 examples, mostly in Extremely Fine through MS62. Select pieces are elusive and finer grades virtually unobtainable.

The orange-gold surfaces of this MS61 specimen exhibit well-struck design features, including most of Liberty's hair, the star centers, and the eagle's wing feathers, elements that are sometimes weak on this issue. Scattered abrasions, very common on this date, somewhat impede the luster flow. A few copper spots, also common to the issue, are visible. NGC ID# 26AT, PCGS# 8974

---

---

1875-CC Double Eagle, MS61  
Popular Type Two Issue

**4104 1875-CC MS61 NGC. CAC. Variety 1-B.** Many Carson City dates are extremely challenging to find in Mint State, but the 1875-CC Type Two double eagle is refreshingly available in Uncirculated condition. This attractive, apricot-gold example is lustrous and appealing, with a thick measure of mint frost over the devices. The design elements are well-detailed, although Liberty's hair detail is incomplete in some areas. The expected scattering of minor contact marks — primarily on the obverse — accounts for the grade. This coin is struck from the scarcer Variety 1-B die pair, which features the mintmark shifted right so it is almost over the left serif of T in TWENTY, and a prominent die line exists in the denticles above UNITED. An excellent, CAC-Approved candidate for type. NGC ID# 26AT, PCGS# 8974

---

**1875-CC Type Two Liberty Twenty, MS62**  
**Elusive Issue in Finer Grades**

- 4105 1875-CC MS62 PCGS. Variety 2-A.** Scarce in MS62 and rare any finer, the 1875-CC twenty is a favorite selection for type collectors and Carson City gold specialists. This example appears Mint-fresh and awash in lustrous originality. Orange-gold surfaces display frosted devices and full Mint State brilliance. Scattered abrasions, as expected, are distributed over the surfaces but are not excessive. A couple of scrapes appear on the reverse, which is especially brilliant and lustrous and otherwise unabraded. The obverse is more patinated in luscious-orange hues amid sun-gold luster, with slight weakness on Liberty's hair curls but all details strong elsewhere. PCGS has graded 29 numerically finer examples (9/14). NGC ID# 26AT, PCGS# 8974

**1876-CC Double Eagle, MS60**  
**Popular Centennial Issue**

- 4107 1876-CC MS60 PCGS. Variety 4-A.** The 1876-CC had a fairly substantial mintage for a Carson City double eagle issue (more than 138,000 pieces), and quantities were eventually exported to Europe for trade. Many examples survived and in recent decades have found their way back to American collectors, with the result that a number of XF and AU examples have been certified. Mint State representatives, while obtainable, are in high demand due to their relative scarcity in comparison with those of Philadelphia issues from the same period. This example is well-struck with substantial semiprooflike mirroring in the fields. Scattered abrasions limit the grade, but warm honey-gold patina balances the appeal. NGC ID# 26AW, PCGS# 8977

**1876-CC Double Eagle, AU50**  
**Popular Carson City Issue**

- 4106 1876-CC AU50 NGC. Variety 4-A.** Largely due to the survival of numerous pieces in overseas bank hoards, the 1876-CC is an easily obtainable Carson City double eagle issue, ideal for the collector seeking a single representative from this mint. This AU example exhibits warm honey-gold patina, with faint remnants of luster in the reverse recesses. Scattered abrasions are present, as can be expected at this grade level. NGC ID# 26AW, PCGS# 8977

**1876-S Double Eagle, MS64**  
**Important Condition Rarity**

**4108 1876-S MS64 PCGS.** Despite the production of 1.6 million double eagles at San Francisco in 1876, only 25 examples are certified MS64 at PCGS and NGC, and the two grading services have only certified three finer pieces. The average certified grade is slightly below AU58. This example has the date shifted right, with the J in J.B.L. over the left edge of the 8. The reverse has the mintmark centered over the left edge of the second T in TWENTY, and tilted slightly to the left. The obverse die is perfect and the reverse die is extensively cracked. This Choice Mint State double eagle has frosty yellow-gold luster with trivial grade-limiting marks. Population: 14 in 64 (1 in 64+), 1 finer (10/14). NGC ID# 26AX, PCGS# 8978

**1878 Liberty Double Eagle, MS63**  
**Vivid Color, Vibrant Luster**

**4109 1878 MS63 PCGS.** A reported mintage of 543,625 Liberty double eagles was accomplished at the Philadelphia Mint in 1878. Following the usual pattern for gold coinage of that era, the Philadelphia mintage was less than a third of the output at the San Francisco Mint, but far greater than the 13,180 coins struck at the Carson City facility. The 1878 is not difficult to locate in circulated grades today, and lower Mint State examples are available occasionally, but the issue is elusive at the MS63 grade level, and finer coins are very rare.

The present coin is an attractive Select example, with sharply detailed design elements and vibrant mint luster throughout. The pleasing orange-gold surfaces show a few minor contact marks and luster grazes, none that merit individual mention. Population: 37 in 63 (1 in 63+), 7 finer (10/14). NGC ID# 26B3, PCGS# 8985

**1878-CC Double Eagle, XF45**  
**Challenging Carson City Issue**

- 4110 1878-CC XF45 NGC. Variety 1-A.** Production of twenty dollar gold coins at the Carson City mint dropped to just 13,180 pieces in 1878, making it one of the most elusive dates from the Nevada facility. This partly lustrous Choice XF example displays bright yellow-gold surfaces and crisply impressed design motifs, notably on Liberty's hair and the eagle's feathers. The stars show full radial lines, and the eye appeal is strong despite a number of small abrasions. NGC ID# 26B4, PCGS# 8986

**1879-CC Double Eagle, Well-Defined XF45**  
**A Low-Mintage Issue**

- 4111 1879-CC XF45 PCGS. Variety 1-A.** A single die pair is known. The 1879-CC has one of the lowest mintages (10,708 pieces) for double eagles produced at the Carson City Mint. Mint State examples are very rare and are found no finer than MS62. A hoard of coins discovered in the 1990s increased the population of XF and AU pieces.

The golden-orange surfaces of this Choice XF offering exhibit relatively strong design detail despite high-point wear. While scattered circulation marks are seen on both sides, they are not as excessive or severe as typically encountered on most survivors. Moreover, mint-made copper spots evident on many 1879-CC double eagles, are absent on this piece. NGC ID# 26B7, PCGS# 8989

**1879-S Double Eagle, MS62**  
**Brilliant, Bold Strike**

- 4112 1879-S MS62 PCGS.** Blazing mint luster and a full strike help this sharp example stand out among others at its grade level. Few marks disturb the semiprooflike surfaces, which are uniformly smooth and attractive. A glimpse or two of orange highlights enhance the rich, medium-gold coloration.

For all practical purposes, MS62 is the optimal collectible grade for this San Francisco date. While all Mint State coins are scarce, the value increases dramatically above the MS62 level and high-end examples such as this coin are prized accordingly. PCGS and NGC combined have certified just 13 numerically finer examples (10/14). NGC ID# 26B9, PCGS# 8991

**1883-CC Twenty, AU55**  
**Generous Eye Appeal**

- 4113 1883-CC AU55 NGC. CAC. Variety 2-A,** showing the second C in the mintmark over the D in DOLLARS. At least two distinct die pairs are identified — each monogamous (unshared) — for the moderate mintage approaching 60,000 coins. This Choice AU example is a tad finer than most certified examples, which collectively average AU50. Rich luster remains on reddish-orange surfaces that are boldly struck and show generous eye appeal. NGC ID# 26BH, PCGS# 8999

**1884-CC Twenty, MS60  
Boldly Struck Example**

- 4114 1884-CC MS60 PCGS. Variety 1-A.** The small Nevada branch mint struck just 81,139 double eagles in 1884, though enough examples survived the 1930s gold melts via European exports that the date is moderately obtainable today. This Mint State example displays razor-sharp detail and frosty yellow-gold luster. Moderate abrasions limit the grade, though these are light and evenly distributed over each side. NGC ID# 26BK, PCGS# 9001

**1884-S Double Eagle, MS64  
Only Two Finer at PCGS**

- 4115 1884-S MS64 PCGS.** Struck from perfect obverse and reverse dies with no clash marks, die cracks, or other signs of die wear. This satiny near-Gem has brilliant yellow luster and sharp design motifs, exhibiting delicate traces of pink overtones. The date is well below the bust, slightly closer to the border, and the tall S mintmark is centered between the Y and D, slightly closer to the tailfeathers than the top arc line of the denomination. This is an important condition rarity in the series, an issue with an average certified grade of just MS60. Population: 21 in 64, 2 finer (10/14). NGC ID# 26BL, PCGS# 9002

**1885-S Double Eagle, MS63  
Conditionally Challenging S-Mint Issue**

- 4116 1885-S MS63 PCGS.** A few examples of this date were among the coins comprising the Saddle Ridge Hoard, but these had little affect on the availability of high-grade Mint State coins. The 1885-S double eagle is only marginally available in MS63, and finer pieces are rarely seen. This coin displays sharp motifs amid frosty rose and green-gold hues. Faint, scattered luster grazes limit the grade, but hardly impede the eye appeal. PCGS has seen 35 numerically finer submissions (10/14). NGC ID# 26BP, PCGS# 9005

**1889-CC Twenty, AU58  
Seldom Seen Finer**

- 4117 1889-CC AU58 PCGS. CAC. Variety 1-A.** A single die pair is known for the 1889-CC double eagle, and the issue had a limited mintage of only 30,945 pieces. Mint State survivors are scarce and almost always heavily abraded, making high-end AU examples ideal for the casual date collector. This near-Mint State piece displays sharp detail and pleasantly smooth surfaces. Shimmering yellow-gold luster engulfs each side, contributing to the overall visual appeal. NGC ID# 26BV, PCGS# 9011

**1889-S Double Eagle, MS63+  
Recovered From the Saddle Ridge Hoard**

- 4118 1889-S MS63+ PCGS.** The 1889-S Liberty double eagle was well-represented in the famous Saddle Ridge Hoard. This high-end Select example displays lightly marked yellow-gold surfaces with vibrant mint luster and sharply detailed design elements throughout. Despite the recent Saddle Ridge find, PCGS has graded only 41 numerically finer examples (10/14). NGC ID# 26BW, PCGS# 9012

1889-S Double Eagle, MS64  
Blazing Fresh Luster

**4119 1889-S MS64 NGC.** The 1889-S double eagle was represented by a few hundred coins in the Saddle Ridge Hoard, but the vast majority of these were in the MS62 to MS63 grade range; Choice examples remain scarce on the market, and Gems are rare. Small quantities of this issue have also been recovered from overseas bank hoards, but these pieces are largely plagued by heavy abrasions or slight wear. This Choice example radiates vibrant honey-gold luster, as if freshly dropped from the dies. The strike is bold, and only a few small marks on the cheek preclude full Gem status and a significantly higher value. The eye appeal is seemingly unrivaled for the grade. Census: 38 in 64 (8 in 64+, 1 in 64+ ★), 2 finer (9/14). NGC ID# 26BW, PCGS# 9012

1889-S Double Eagle, MS65  
Ex: Saddle Ridge Hoard

**4120 1889-S Saddle Ridge Hoard MS65 NGC.** Ex: Saddle Ridge Hoard. The upright medium S mintmark on this piece is centered below the eagle's tail, favoring the D in DOLLARS. The recent discovery of the Saddle Ridge Hoard in California has changed the landscape for many certified gold coins. Details of the treasure may be found at [saddleridgehoard.com](http://saddleridgehoard.com).

This 1889-S double eagle is tied for the finest numerically certified, one of five similar pieces found amongst the treasure coins that included 422 examples of this issue. The strike is solid, the surfaces are pristine, and the frosty orange-gold luster is extraordinary. This is the finest example of the 1889-S double eagle that we have offered. Previously, 11 MS64 coins were tied for the finest in our archives. Census: 2 in 65, 0 finer (10/14). PCGS# 109012

1890-CC Double Eagle, MS61+  
Sole Plus-Designated Example in This Grade

- 4121 1890-CC MS61+ NGC. CAC. Variety 1-A.** A late die state example, with some of the eagle's tailfeathers weakened from die lapping. As a date, the 1890-CC is one of the more plentiful double eagle issues from this mint, but its availability is primarily restricted to circulated grades, as Mint State examples are elusive at all levels, and prohibitively rare finer than MS62. This coin ranks as the only MS61 example awarded a Plus designation by either service (9/14), and displays a degree of semiprooflike mirroring beneath a veil of medium green-gold patina. The strike is boldly executed, and grade-limiting abrasions are minor and even dispersed over each side. NGC ID# 26BY, PCGS# 9014

1890-S Liberty Twenty, MS64  
Saddle Ridge Hoard Example

- 4122 1890-S MS64 PCGS.** The famous Saddle Ridge Hoard included nearly 100 examples of the 1890-S Liberty double eagle when it was recently unearthed. Many high-quality examples were recovered, including this spectacular Choice specimen that exhibits razor-sharp definition on all design elements. The well-preserved yellow-gold surfaces radiate vibrant mint luster on the obverse, while the reverse displays prooflike reflectivity throughout. Overall eye appeal is fantastic and the famous Saddle Ridge pedigree is in great demand. Population: 27 in 64 (2 in 64+), 4 finer (10/14). NGC ID# 26BZ, PCGS# 9015

---

**1892-CC Double Eagle, AU58**  
**Flashy Original Surfaces**

- 4123 1892-CC AU58 PCGS. Variety 1-A.** The 1892-CC follows the pattern of many other low-mintage Carson City double eagles, being moderately available in XF and AU grades, but scarce in Mint State. A number of examples have been found in overseas hoards, and these represent many of the high-grade pieces known to collectors. This near-Mint example displays radiant yellow-gold luster with a tinge of semiprooflike mirroring in the fields. The strike is bold, and the surfaces are only minimally abraded. NGC ID# 26C6, PCGS# 9020

---

**1892-S Double Eagle, MS64+**  
**Ex: Saddle Ridge Hoard**

- 4124 1892-S Saddle Ridge Hoard MS64+ PCGS.** A precisely struck and lustrous canary-gold near-Gem from the famous recent-year discovery. The obverse displays refreshingly few marks, and the reverse shows only a pair of small abraded areas near the right (facing) wing. Saddle Ridge Population: 39 in 64 (16 in 64+), 8 finer (10/14). NGC ID# 26C7, PCGS# 9021

---

**1892-S Liberty Twenty, MS65**  
**None Numerically Finer at PCGS**

- 4125 1892-S MS65 PCGS.** The 1892-S Liberty double eagle was produced in large numbers, with a reported mintage of 930,150 pieces. Much of this large production total was used in overseas trade and many pieces have been recovered from European and South American holdings in recent years. The issue is relatively easy to locate in lower Uncirculated grades, but examples in Gem condition are very rare and finer specimens are virtually unobtainable.

The present coin is a spectacular Gem, with razor-sharp definition on all design elements and vibrant mint luster throughout. The well-preserved yellow-gold surfaces add to the outstanding eye appeal. This coin would be a welcome addition to the finest collection or Registry Set. Population: 12 in 65 (1 in 65+), 0 finer (10/14). NGC ID# 26C7, PCGS# 9021

---

1892-S Double Eagle, MS65  
Ex: Saddle Ridge Hoard

**4126 1892-S Saddle Ridge Hoard MS65 NGC.** Ex: Saddle Ridge Hoard. A thin die crack through the top of the second T in STATES identifies this reverse die. Our auction archives, documenting coins that we have handled over the past 21 years, include one MS66 and one MS65 of the 1892-S double eagle. The present piece from the Saddle Ridge Hoard is the second MS65 that we have handled. This example has a bold strike with frosty yellow-gold luster and exceptional eye appeal. Records of the Saddle Ridge Hoard note that 146 1892-S double eagles were found, including eight that grade MS65. Census: 6 in 65, 1 finer (10/14). PCGS# 109021

1893-S Liberty Twenty, MS64  
Only Two Finer Coins at PCGS

**4127 1893-S MS64 PCGS.** The 1893-S Liberty double eagle claims a substantial mintage of nearly 1 million pieces, and many of the coins were used to settle large transactions in foreign trade. A large number of the coins used in overseas transactions have been repatriated in recent times, but those coins tend to show numerous handling marks from rough storage, and few really high-grade examples are extant. The issue is reasonably available in lower Mint State grades, but the 1893-S becomes quite elusive at the MS64 grade level.

The present coin is an attractive Choice example, with well-detailed design elements and vibrant mint luster throughout. The vivid orange-gold surfaces show a few highlights of green, with only minor signs of contact. Overall eye appeal is quite strong. Population: 45 in 64, 2 finer (9/14). NGC ID# 26CA, PCGS# 9024

**1894 Twenty Dollar, MS64**  
**Smooth Surfaces, Original Color**

- 4128 1894 MS64 PCGS.** This Philadelphia issue is readily available in MS63 and lower grades, but becomes scarce at the Choice level, and is exceedingly rare any finer. This near-Gem representative shows satiny orange-gold luster and smooth surfaces. A crisp strike completes the overall appeal. Housed in an old green label holder, with only two pieces certified numerically finer at PCGS (9/14). NGC ID# 26CB, PCGS# 9025

**1894 Double Eagle, MS64+**  
**Only Two Coins Numerically Finer at PCGS**

- 4129 1894 MS64+ PCGS.** The 1894 double eagle had a substantial mintage in excess of 1.3 million coins, but its availability in Mint State declines sharply at the MS64 grade level, and Gem examples are genuinely rare. This Plus-graded Choice representative displays frosty green-gold luster around the margins, with warm rose-gold color in the centers. The strike is bold throughout, and the surfaces are void of any significant abrasions. PCGS has certified only two numerically finer representatives (9/14). NGC ID# 26CB, PCGS# 9025

**1894-S Liberty Twenty, MS64+**  
**Glowing Original Patina**

- 4130 1894-S MS64+ PCGS.** A scarcer issue in Choice condition, the 1894-S is exceedingly rare in finer grades, with only 10 coins so-certified by PCGS and NGC combined (10/14). This Plus-graded example displays vibrant lemon-gold luster and boldly impressed details. No individually significant abrasions are observed, even under magnification. NGC ID# 26CC, PCGS# 9026

**1895 Liberty Twenty, MS64+**  
**Only Two Coins Numerically Finer at PCGS**

- 4131 1895 MS64+ PCGS. CAC.** This high-mintage issue (more than 1.1 million coins) survives in substantial quantities, but most Mint State survivors are only in the MS61 to MS63 grade range. The date's availability declines somewhat in MS64, and Gems are distinctly rare. This Plus-graded Choice example displays bold motifs and radiant orange-gold luster. A few minor grazes on the cheek limit the grade, but are not particularly detracting. PCGS has certified only two numerically finer representatives (9/14). NGC ID# 26CD, PCGS# 9027

**1900 Liberty Double Eagle, MS65**  
**Conditionally Very Rare Any Finer**

- 4132 1900 MS65 PCGS.** The 1900 Liberty double eagle is plentiful in lower Mint State grades, but it is a prime condition rarity above the Gem level. This example displays rich orange-gold and pale mint-green toning and full shimmering luster. It is well struck and has been expertly preserved. PCGS has graded only two numerically finer examples (9/14). NGC ID# 26CP, PCGS# 9037

**1902 Twenty Dollar, MS62**  
**Lustrous and Appealing**

- 4133 1902 MS62 PCGS. CAC.** The golden-orange surfaces on this piece offer much luster and eye appeal, despite a patch of toned-over scrapes on Liberty's lower cheek and jawline. The reverse is relatively unabraded. The 1902 double eagles were a low-mintage issue of 31,140 circulation strikes, a vast contrast with the prodigious coinage of two years later. NGC ID# 26CU, PCGS# 9041

**1902 Double Eagle, MS63**  
**Important, Low-Mintage Issue**  
**Extremely Rare Any Finer**

**4134 1902 MS63 PCGS.** The 1902 double eagle is the lowest-mintage (31,140 pieces) Liberty Head twenty between 1894 and the end of the type in 1907. As can be seen from the certified population data, the issue is scarce in all grades through MS63 and rare any finer. Mint State pieces are heavily concentrated in the MS61 and MS62 range.

The lustrous surfaces of this Select example display wheat-gold patination with whispers of apricot and pale rose. The strike is sharp throughout, including Liberty's hair, the star centers, and most of the eagle's plumage. The few scattered light marks are within the parameters of the grade designation. Population: 75 in 63 (1 in 63+), 9 finer (9/14). NGC ID# 26CU, PCGS# 9041

**1902-S Double Eagle, MS64+**  
**Only Six Coins Numerically Finer**

**4135 1902-S MS64+ PCGS.** The 1902-S follows the general pattern of most Type Three San Francisco double eagle issues, being struck in substantial numbers (in this case, more than 1.7 million coins), with a significant quantity exported to Europe and South America. A number of these have found their way back to the numismatic marketplace in recent decades, with the result that the date is readily obtainable in grades through MS63. Choice examples are distinctly scarce, however, as most of the exported coins acquired moderate abrasions before returning to collector hands. Likewise, Gems are prohibitively rare.

This Plus-graded MS64 coin displays frosty green-gold luster around the margins, with deeper apricot hues in the centers. The strike is bold and only a few minute ticks on Liberty's cheek preclude a full Gem grade assessment from PCGS. Population: 69 in 64 (7 in 64+), 4 finer (10/14). NGC ID# 26CV, PCGS# 9042

**1904 Double Eagle, MS66 ★**  
Only One Finer Coin at NGC

**4136 1904 MS66 ★ NGC.** From a mintage of more than 6 million pieces, the 1904 Liberty double eagle is not too difficult to locate in MS66 condition, but finer examples are virtually unobtainable. The availability of the 1904 in high grade makes it a favorite choice of type collectors, but a specimen at this exalted level will appeal to Registry Set enthusiasts, as well. This coin exhibits needle-sharp definition on all design elements, and the well-preserved peach-gold surfaces radiate vibrant mint luster throughout. Eye appeal is simply stunning. NGC has certified only one coin in higher numeric grade (10/14). NGC ID# 26CY, PCGS# 9045

**1906 Double Eagle, MS62**  
Undeniably Original Patina

**4137 1906 MS62 NGC.** The 1906 double eagle had a limited mintage of only 69,596 pieces, and is one of the more elusive late-series issues in Mint State. This representative is above-average for the grade, with unusually smooth surfaces and bold design definition. Deep coppery overtones attest to the originality of the rich honey-gold luster. Finer examples of this issue will be challenging to locate. NGC ID# 26D4, PCGS# 9049

**1907-D Twenty, MS64+**  
Popular Branch Mint Issue

**4138 1907-D MS64+ PCGS.** Well-saved as a final-year issue, the 1907-D double eagle is ideal for inclusion in a mintmarked type set. This high-end Choice representative possesses radiant golden luster and bold devices. A few light grazes on the cheek limit the grade, but have little affect on the eye appeal. Finer pieces are seldom encountered. NGC ID# 26D8, PCGS# 9053

**1907-D Double Eagle, MS65**  
Beautiful, Lustrous Example

**4139 1907-D MS65 PCGS.** Solid striking definition uniformly brings up the motifs, save for only a tiny bit of weakness on the eagle's head and some of Liberty's hair curls. An impressive frosty sheen enlivens the lovely pastel honey-gold and mint-green surfaces. A couple of small marks on Liberty's cheek, near the mouth, keep it from an even finer grade assessment. PCGS has certified only 18 numerically finer examples (10/14). NGC ID# 26D8, PCGS# 9053

## HIGH RELIEF DOUBLE EAGLES

### MCMVII Saint-Gaudens Twenty, MS61 Bold Wire Rim Representative

**4140** 1907 High Relief, Wire Rim MS61 NGC. Modeled after the high relief of ancient Greek coinage, Saint-Gaudens' High Relief double eagle has long been considered by many to be the most beautiful coin ever issued by the U.S. Mint. Its full bass-relief appearance, however, had to be accomplished with three die impressions, per the research of Roger Burdette, which significantly slowed production efficiency. Not without the encouragement of Chief Engraver Charles Barber, who disliked the high relief concept in its entirety, the decision was made to reduce the relief of the designs to conform to the mechanical requirements of mass production. Only 11,250 examples of the High Relief variant were struck prior to the reduction, and these are among the most sought-after of all U.S. gold issues.

The present coin is a prime example of Saint-Gaudens' majestic depiction of Liberty and the bald eagle, showing full definition and rich, satiny luster. A few light surface grazes on the high points of the design limit the technical grade, though the coin retains profound aesthetic appeal. This piece is ideal for the quality conscious collector. NGC ID# 26F2, PCGS# 9135

### 1907 High Relief Twenty, MS62 Attractive Wire Rim Example

**4141** 1907 High Relief, Wire Rim MS62 NGC. Seen as a striking defect by Mint officials in 1907, the wire rim on this piece almost completely surrounds each side and provides a noticeable frame for the distinctive high relief design. This is a bright, glowing yellow-gold High Relief with no trace of the usual magenta patina seen on most. There are no obvious or detracting marks on either side, just small ones that will require magnification to locate. Strike definition is complete throughout with full separation between UNITED STATES OF AMERICA and the rim above. This is a remarkably well-preserved and attractive example of this perennially popular one-year design. NGC ID# 26F2, PCGS# 9135

**MCMVII High Relief, MS63**  
**Partial Wire Rim, Smooth and Attractive**

- 4142** 1907 High Relief, Wire Rim MS63 ANACS. Most likely a later strike, since the often-seen die polishing lines are mostly invisible on this untroubled High Relief, which displays excellent satin luster over the sharply struck surfaces. Olive-gold overtones visit the yellow-gold coloration. The mintage of 12,367 pieces is misleading, with many survivors cherished as keepsakes from its 1907 mintage. The population is immaterial — buyers are always present, and the coin's status as the centerpiece of any U.S. coin collection remains unquestioned. NGC ID# 26F2, PCGS# 9135

**1907 High Relief Double Eagle, MS64**  
**Scarcer Flat Rim Variant**

- 4143** 1907 High Relief, Flat Rim MS64 PCGS. Although always available for a price, High Relief double eagles are coveted by numismatists for their historical importance, and because they represent the ultimate in artistic achievement for a product of the U.S. Mint. There are two variants generally collected as major varieties: the Flat Rim and the Wire Rim. A total of 12,367 pieces were minted of both varieties combined, with the Flat Rim being several times scarcer. The present near-Gem representative of this always-in-demand issue is unimpaired by any readily noticeable abrasions or other impairments on either side. The luster is unimpeded, and the eye appeal is memorable with rich orange-gold color over sharply brought up features. A very impressive coin with a full three-dimensional appearance.  
*Ex: New York Signature (Heritage, 7/2004), lot 8599. PCGS# 9136*

---

1907 Saint-Gaudens Double Eagle, MS66  
Spectacular High Relief Specimen  
Scarcer Flat Rim Variety

**4144 1907 High Relief, Flat Rim MS66 NGC.** The magnificent three-dimensional, striding figure of Liberty on the 1907 twenty dollar gold piece did not come to Augustus Saint-Gaudens in a momentary flash of inspiration. It was, rather, a product of work all his adult life; beginning at age 13, when he was first apprenticed to the stone cameo-cutter Louis Avet. After three years of periodic verbal abuse from Avet, Saint-Gaudens was apprenticed to another cameo-cutter, and while not working he attended drawing classes at the Cooper Institute. He would draw until late at night, be dragged out of bed by his mother early in the morning, and sent off to work as a cameo-cutter at 7 a.m. But the young Saint-Gaudens knew his destiny. He knew art would be his future. In his autobiography, he wrote of his supreme self-confidence in this period of his life:

“With such an incentive [drawing classes at Cooper] I became a terrific worker, toiling every night until eleven o’clock after the class was over, in the conviction that in me another heaven-born genius had been given to the world. I can remember thinking in public conveyances, that if the men standing on the platform around me could realize how great a genius was rubbing elbows with them in the quiet-looking boy by their side, they would be profoundly impressed.”

This supreme self-confidence of the cameo-cutter dissipated once he was admitted to the École des Beaux-Arts in Paris. There he had true artistic peers. But as self-effacing as the “heaven-born genius” quote above is, Augustus Saint-Gaudens maintained the cameo-cutter’s work ethic his entire life. The result was ever-increasing professionalism in all areas of realistic art: sculpture, bas-relief, and high-relief sculpture. The latter he used on the 1907 High Relief double eagle, a combination of the high relief from his Shaw Memorial and the figure of Victory from his Sherman Memorial, translated into the figure of Liberty for the coinage. But mere adaptation of a previously used design was not enough for Saint-Gaudens, and his high relief design for the double eagle proved very difficult to strike. The Ultra High Relief twenties were an intermediate (and impractical) design that bridged the striding Victory from the Sherman Memorial and the slightly more practical High Relief twenties. These pieces were produced with a raised “fin” around much of each side, a so-called defect that Mint officials feared (correctly) that would render High Reliefs unstackable in banks. The problem of the wire rim or “fin” was addressed by Mint personnel but never fully fixed. The majority of the much scarcer Flat Rim twenties show only a slight extrusion of the metal that created the “fin.”

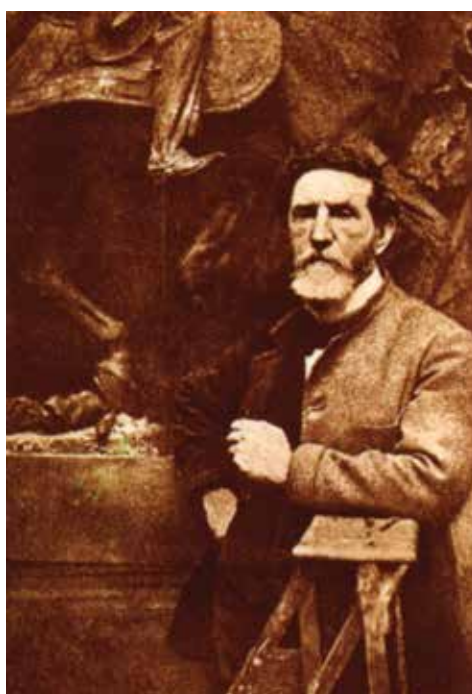

The present coin is a delightful Premium Gem, with the strongly impressed design elements expected of a High Relief twenty. The well-preserved orange-gold surfaces radiate vibrant mint luster and show only the most insignificant signs of contact. Overall visual appeal is tremendous. Census: 64 in 66 (3 in 66+, 1 in 66+★), 26 finer (10/14). PCGS# 9136

## SAINT-GAUDENS DOUBLE EAGLES

1907 Arabic Numerals Twenty, MS66  
Flashy First-Year Type Coin

**4145** 1907 Arabic Numerals MS66 PCGS. Impeccable preservation on the orange-gold surfaces and flashy, flowing luster make this Premium Gem 1907 Arabic Numerals a standout coin, a great selection for a first-year type set in particular. The strike is uniformly bold throughout, and no signs of contact rise above the minuscule level. NGC ID# 26F5, PCGS# 9141

*Saint-Gaudens*

1908 No Motto Double Eagle, MS68  
An Outstanding Wells Fargo Hoard Coin

**4146** 1908 No Motto, Wells Fargo Nevada MS68 NGC. Ex: Wells Fargo Nevada Gold. In the 1990s, a massive hoard of this issue was discovered in a Wells Fargo Bank vault where it had been stored, undisturbed, since 1917. Some 19,900 coins were present, and nearly all in Gem or finer condition. In fact, most of the MS67 or finer 1908 No Motto double eagles known today are from this one hoard. Ten examples were graded as high as the nearly perfect MS69 level, these being the finest Saint-Gaudens double eagles known, save for a couple numerically equal High Reliefs.

The present coin ranks just one step down the proverbial grading ladder at the lofty MS68 level, displaying nearly flawless surfaces and satiny orange-gold luster. The strike is crisp, with Liberty's fingers and the eagle's feathers sharply delineated. NGC has not seen any numerically finer representatives (9/14). PCGS# 99142

---

**1908-S Twenty Dollar, AU58  
Better S-Mint Issue**

- 4147 1908-S AU58 NGC. CAC.** The 1908-S is elusive in all grades, and is particularly scarce in Mint State. This near-Mint example presents the budget-minded collector with a slightly more affordable alternative. Substantial yellow-gold mint luster remains in the recesses, while the strike is well-executed and only slight high-point friction is observed upon close examination. NGC ID# 26FA, PCGS# 9149
- 

**1908-S Twenty, MS62  
Low 22,000-Coin Mintage**

- 4148 1908-S MS62 PCGS.** A pleasing Mint State example, this lustrous yellow-gold double eagle has numerous marks on both sides that limit the grade, although few of those marks are detrimental to its appearance and eye appeal. The 1908-S is one of the few Saint-Gaudens double eagles that frequently appears with wear from circulation. Most Saint-Gaudens pieces found in worn condition are San Francisco products, such as the 1925-S to name one other example. PCGS has certified 81 examples that grade from Fine to XF, 229 pieces that grade AU50 to AU58, and 173 pieces that they grade MS60 or finer. NGC ID# 26FA, PCGS# 9149
- 

---

**1908-S Saint-Gaudens Twenty, MS62**

- 4149 1908-S MS62 NGC.** Considering the rarity, demand, and price levels of higher grades 1908-S double eagles, such as those coins that grade MS64 to MS67, a wise choice for collectors are coins that grade either MS62 or MS63. Typically, an MS62 or 63 example will be virtually as nice as a higher grade MS64, at a substantially lower price. One such coin is this MS62 that has nice luster, attractive yellow color with faint orange overtones, and minimal surface marks. The strike is excellent and the overall eye appeal is strong. Census: 50 in 62, 49 finer (10/14). NGC ID# 26FA, PCGS# 9149
-

**1908-S Double Eagle, MS63**  
**Optimum Collection Grade**

**4150 1908-S MS63 NGC.** The entire 22,000 coin mintage of the 1908-S double eagle was produced late in the year, after the design modification that added the motto IN GOD WE TRUST to the reverse. During the past few decades, substantial quantities of these coins were repatriated after their exportation to European nations where they remained in storage. As a result, surviving examples are mostly in the lower Mint State grades through about MS63. This Select Mint State piece has light yellow-gold luster with minimal marks, and exhibits the copper coloration that is typical for this issue. Census: 23 in 63, 26 finer (10/14). NGC ID# 26FA, PCGS# 9149

**1909-D Double Eagle, MS64**  
**Sharply Detailed and Lustrous**

**4151 1909-D MS64 PCGS.** In its second year of production for the Saint-Gaudens double eagle, the Denver mint delivered only 52,500 coins. This date was once regarded as a major rarity in Mint State, but the emergence of a Central American hoard in 1983 has made the 1909-D generally available in grades up to and including the MS63 level. In Choice and finer grades, however, this issue remains highly elusive. This sharply struck example offers soft, frosty luster that enlivens cyan-tinged wheat-gold surfaces. Only a few light, scattered ticks preclude Gem status. PCGS has graded 23 numerically finer examples (10/14).

*Ex: Central States Signature (Heritage, 5/2004), lot 10397; FUN Signature (Heritage, 1/2009), lot 4177. NGC ID# 26FD, PCGS# 9152*

**1910 Double Eagle, MS65+  
Very Rare any Finer**

- 4152 1910 MS65+ PCGS.** Peach-gold and apple-green compete for territory across this lustrous and suitably struck Gem. On its own, the reverse meets the requirements of an even higher grade, while the obverse exhibits only incidental grazes. A formidable conditional rarity at the MS65+ level. Population: 172 in 65 (2 in 65+), 4 finer (10/14). NGC ID# 26FF, PCGS# 9154

**1910-S Double Eagle, Vibrant MS65**

- 4153 1910-S MS65 PCGS.** A large number of the 1910-S double eagles were melted in the 1930s. Those that did survive resided in foreign banks before returning to America. This date is readily available through near-Gem, after which the population drops in MS65. The latter can be located with diligent searching, but higher-grade examples are quite rare.

Vibrant luster emanates from the yellow-gold surfaces of the present Gem. The design elements are well-impressed except for the upper part of the Capitol building. A few minute marks are within the parameters of the designated grade. PCGS has seen only nine coins finer (10/14). NGC ID# 26FH, PCGS# 9156

**1910-S Double Eagle, MS65  
Well-Preserved Surfaces**

- 4154 1910-S MS65 PCGS.** Flowing luster and glowing honey-gold surfaces are the calling cards of this lovely Gem 1910-S Saint-Gaudens twenty, a coin unencumbered by anything beyond a few minuscule ticks on Liberty's lower gown and in the fields away from the focal points. The reverse is similarly well-preserved but shows a few small dark toning flecks. NGC ID# 26FH, PCGS# 9156

**1911 Double Eagle, MS64  
Immensely Appealing for the Grade**

- 4155 1911 MS64 NGC. CAC.** The 1911 Saint-Gaudens double eagle is moderately available in grades through MS64, but finer pieces are distinctly scarce. This satiny, lemon-gold representative exhibits attractively smooth surfaces and bold design definition, fully worthy of the green CAC label. NGC has certified 63 numerically finer representatives (9/14), though this example will satisfy any collector in regards to eye appeal. NGC ID# 26FJ, PCGS# 9157

**1911-D/D Double Eagle, MS66  
Repunched Mintmark**

- 4156 1911-D/D Repunched Mintmark, FS-501 MS66 PCGS. CAC.** The mintmark is boldly repunched to the left on this interesting *Cherry-pickers'* variety. As a date, the 1911-D double eagle is not particularly scarce at the MS66 grade level, but PCGS has attributed only 36 such pieces with this variety, and none are finer (10/14). Satiny orange-gold luster highlights smooth surfaces and bold design elements. The variety specialist will be hard-pressed to locate a visually superior example of this repunched mintmark variety. PCGS# 145010

**1912 Saint-Gaudens Twenty  
Brilliant and Frosty Borderline Gem**

**4157 1912 MS64+ PCGS.** Reddish highlights enhance the frosty luster of this yellow-gold near-Gem twenty, with the PCGS Plus designation symbolic of high-end quality for the grade. While this Philadelphia issue is undeniably scarce, it does not command much of a premium until it crosses the MS65 threshold, at which time it becomes decidedly more challenging and is valued accordingly. This borderline Gem example offers substantial quality for a lesser financial commitment. PCGS has seen just 42 finer coins of the issue (10/14). NGC ID# 26FM, PCGS# 9160

**1916-S Double Eagle, MS66  
Tied for the Finest at PCGS**

**4160 1916-S MS66 PCGS.** Aside from a few commemorative gold dollars, San Francisco Mint half eagles, eagles, and double eagles were the only gold coins struck during the year, with none produced during the next three years due to World War I. This lovely Premium Gem is an extraordinary example with traces of orange and blue overtones on its vibrant yellow-gold surfaces. This piece is tied for the finest that PCGS has certified (10/14). NGC ID# 26FX, PCGS# 9169

**1913-D Double Eagle, MS65  
Date Collectors' Choice**

**4158 1913-D MS65 PCGS.** Collectors who seek double eagles to represent each year of production typically consider the Denver Mint Saint for 1913. The 393,500 double eagles struck in Denver that year is nearly twice the combined total for Philadelphia and San Francisco. PCGS has only certified five examples that are finer than this brilliant and highly lustrous Gem (10/14). Hints of orange and pale blue appear over the bright yellow surfaces. NGC ID# 26FP, PCGS# 9162

**1920 Double Eagle, MS64+  
Exceedingly Rare Any Finer**

**4161 1920 MS64+ PCGS. CAC.** Jeff Garrett calls this date the "ultimate condition rarity of the series." It is moderately available in grades through MS64, but Gems are extremely rare; only eight coins have been certified at that level by PCGS and NGC combined (one and seven coins, respectively), and finer pieces are unknown (9/14). This Plus-graded Choice example is virtually the finest example that the casual collector can hope to acquire. The devices are well-defined, and the lustrous surfaces display rich apricot and honey-gold hues. A few minute ticks are all that keep this piece from full Gem status and a significantly higher auction value. NGC ID# 26FY, PCGS# 9170

**1913-S Double Eagle, MS64+  
Low Mintage, Rare any Finer**

**4159 1913-S MS64+ PCGS. CAC.** An extremely low-mintage issue in the Saint-Gaudens series, yet a high percentage of survivors makes this date attainable in circulated and low Mint State grades. In Gem or finer condition, however, this San Francisco date remains one of the prime rarities in the 20th Century U.S. gold series. The current borderline Gem coin is one of just 13 pieces in MS64 to receive the PCGS Plus designation for high-end quality and eye appeal. Only 32 coins are graded numerically finer by PCGS and NGC combined (9/14). Radiantly lustrous and nearly mark-free, the coin displays wonderful orange-gold color and an uncompromisingly bold strike. NGC ID# 26FR, PCGS# 9163

---

**1923-D Saint-Gaudens Twenty, MS67  
None Finer at PCGS**

**4162 1923-D MS67 PCGS.** The 1923-D Saint-Gaudens double eagle was a well-produced issue from a huge mintage of 1.7 million pieces. The 1923-D is available in all grades up to the MS65 level today, making it a favorite choice of mintmark type collectors. Even at the MS67 grade level, the 1923-D can only be called very scarce, but finer examples are virtually unobtainable.

The present coin is a magnificent Superb Gem, with razor-sharp definition on all design elements and impeccably preserved orange-gold surfaces that enhance the terrific eye appeal. This coin should find a home in the finest collection or Registry Set. Population: 68 in 67, 0 finer (10/14). NGC ID# 26G6, PCGS# 9176

---

**1924-D Double Eagle, MS63+**

**4163 1924-D MS63+ PCGS.** The 1924-D double eagle was once considered an important rarity in the Saint-Gaudens series, despite a production of more than 3 million coins. Many examples remained in Treasury vaults, until they were melted in the 1930s. This Select Mint State straw-gold example has satin luster with scattered surface marks to prevent a higher grade. NGC ID# 26G8, PCGS# 9178

---

**1924-S Saint-Gaudens Double Eagle  
Impressive, Near-Gem Twenty**

**4164 1924-S MS64 PCGS.** Compared to the nearly mind-boggling populations of many "available-date" double eagles, the steadfast scarcity of the 1924-S issue cannot be ignored. Once considered among the rarest of all gold coins, European hoards have provided a steady stream of newfound survivors, yet most are in lower Mint State grades and PCGS has seen but three Gem coins or finer — two in MS65, and one in MS67 (9/14).

This MS64 near-Gem example is impressive and frosty. Cartwheel luster reflects brilliantly from beneath the frosted surfaces, revealing a flashy, medium-gold patina on the obverse and a deeper, orange-gold coloration on the reverse. Lilac accents add to the appeal. A sharp strike complements the noticeably unmarked surfaces. NGC ID# 26G9, PCGS# 9179

**1925 Double Eagle, MS67  
Important Conditional Rarity**

- 4165 1925 MS67 NGC.** In most Mint State grades, the 1925 is an unremarkable issue in the Saint-Gaudens double eagle series. Tens of thousands of Uncirculated pieces have been graded by NGC and PCGS. The “common date” status ends at the MS66 grade level, however. MS67 coins are elusive, and anything finer is unavailable, at least as far as the two major grading services are concerned. The peach-gold surfaces of this Superb Gem exhibit lovely satin luster and well struck design elements. Both sides of the coin are impressively preserved, with just a few scattered, minute marks. Census: 25 in 67, 0 finer (10/14).  
Ex: *Los Angeles Signature* (Heritage, 7/2009), lot 1351. NGC ID# 26GA, PCGS# 9180

**1925-S Twenty Dollar  
Appealing AU58 Example**

- 4166 1925-S AU58 PCGS.** A seldom seen San Francisco issue; more than 3.7 million pieces were struck, but most ended up being melted in the mid-1930s. This is a lustrous yellow-gold representative, with just a touch of friction precluding a Mint State assessment from PCGS. No significant abrasions are observed, an oddity at this grade level. NGC ID# 26GC, PCGS# 9182

**1926-S Double Eagle, MS63  
Better San Francisco Issue**

- 4167 1926-S MS63 NGC.** Among branch mint issues, the 1926-S is one of the more available post-1924 double eagles, though it is still significantly more difficult to locate than most Philadelphia issues from the 1920s. This example is boldly struck with frosty honey-gold luster. Small, scattered surface ticks limit the grade, but are remarkably not bothersome to the unaided eye. NGC ID# 26GF, PCGS# 9185

**1926-S Double Eagle, MS64+  
Mass-Melted Issue**

- 4168 1926-S MS64+ PCGS.** The mintage of the 1926-S was 2,041,500 pieces, but that became irrelevant once the Treasury's holdings were sent to the smelter. Only a couple of thousand examples escaped that fate, primarily those exported into foreign bank reserves. Those coins eventually returned to America, but the issue remains very scarce in appealing Mint State, especially when compared with the 1922 to 1928 Philadelphia dates. The present lustrous lime-green and orange near-Gem is outstanding from the technical perspective but shows a retained lamination (as made) on the obverse near 3 o'clock. NGC ID# 26GF, PCGS# 9185

**1926-S Twenty  
Sparkling Near-Gem Example  
Bold Strike from a Cracked Die**

- 4169 1926-S MS64 PCGS. CAC.** Obverse die cracks are common on this San Francisco issue, although the current near-Gem example shows a particularly advanced state of the die. A bold crack circles down from 2 o'clock to the Capitol building, with smaller cracks branching off along the way. Still, the strike is remarkably bold and the coin shows virtually no other distractions. Sparkling mint bloom covers smooth, reflective surfaces with lime-green and lilac accents over rich, fiery orange coloration. Fantastic eye appeal. NGC ID# 26GF, PCGS# 9185

---

**1926-S Twenty, MS64+  
Heavily Melted Branch Mint Issue**

**4170 1926-S MS64+ PCGS. CAC.** More than 2 million pieces were struck of this San Francisco double eagle, many of which were melted during the 1933 gold recall. Still, enough survived either in collector hands or in European hoards to make the date relatively available for today's gold specialists.

This lustrous and attractive near-Gem example offers smooth, yellow-gold surfaces and a strong strike. A few tiny marks do little to distract from the considerable visual impact of the gleaming fields and devices. PCGS has certified just 35 numerically finer examples (10/14). NGC ID# 26GF, PCGS# 9185

---

---

**1928 Saint-Gaudens Double Eagle, MS67  
Exceptional Type or Registry Set Example**

**4171 1928 MS67 PCGS.** The 1928 Saint-Gaudens double eagle claims the largest mintage of the series, at more than 8.8 million pieces. The issue was uniformly well-produced, making the 1928 an available date in high grade, and a favorite choice of type collectors. The date is very scarce at the MS67 grade level, however, and finer coins are virtually unobtainable.

This delightful Superb Gem exhibits razor-sharp definition on all design elements and the well-preserved orange-gold surfaces are brightly lustrous throughout. Eye appeal is simply tremendous. This coin will be a credit to the finest collection or Registry Set. Population: 78 in 67 (2 in 67+), 0 finer (10/14). NGC ID# 26GK, PCGS# 9189

---

## COMMEMORATIVE SILVER

### 1893 Isabella Quarter, MS66 Attractively Toned and Lustrous

- 4172 1893 Isabella Quarter MS66 PCGS. CAC.** The 1893 Isabella quarter had a limited distribution of only 24,214 pieces, but enough examples were carefully preserved that high-grade pieces can be found with patience. This is just such a coin, with nearly flawless surfaces and razor-sharp motifs. Each side displays subtle hues of amber, sea-green, and blue, with the colors primarily restricted to the margins. Satiny underlying luster gives this piece a high degree of eye appeal. PCGS has certified only 46 numerically finer coins (9/14). NGC ID# 28HR, PCGS# 9220

### 1893 Isabella Quarter, MS67 Impressive Aesthetic Appeal

- 4173 1893 Isabella Quarter MS67 NGC.** Beautiful original colorations of sea-green, gold, and crimson have accumulated over the years on this exceptionally well-preserved representative. Fully defined, the underlying surfaces are essentially mark-free. A high-end, Superb example of this first commemorative quarter issue. Census: 52 in 67 (8 in 67 ★), 8 finer (10/14).  
*Ex: Dallas Signature (Heritage, 12/2005), lot 2701. NGC ID# 28HR, PCGS# 9220*

### 1893 Isabella Quarter, Sharp MS67+ Radiantly Luminescent

- 4174 1893 Isabella Quarter MS67+ PCGS.** A popular issue for commemorative collectors, the Isabella quarter was struck in concert with the World's Columbian Exposition in Chicago in 1893, and is the only U.S. quarter dollar issue in the classic commemorative series.  
This stunning MS67+ PCGS example is superbly toned across each side in a multicolored display of blended iridescence. The fully struck surfaces show exceptionally crisp delineation of every design element, including each of the beads along the borders, as well as the central figures of Queen Isabella on the obverse and the kneeling female on the reverse, symbolizing women's industry. Flashy cartwheel luster illuminates clean, impeccably preserved surfaces. Population: 40 in 67 (5 in 67+), 6 finer (9/14). NGC ID# 28HR, PCGS# 9220

**1900 Lafayette Dollar  
High-End Choice Example**

- 4175** 1900 Lafayette Dollar MS64+ PCGS. DuVall 2-C. A plentiful variety, ideal for type representation. The Lafayette dollar stands out as the only U.S. coin issue that was technically produced without a date. The reverse inscription ERECTED BY THE YOUTH OF THE UNITED STATES IN HONOR OF GEN LAFAYETTE - PARIS - 1900, refers to the date when the Lafayette Memorial statue was to be erected in Paris. The coins themselves were actually struck in late 1899. This piece is well-struck with radiant luster and wisps of golden toning. A few small abrasions on Washington's face limit the grade. NGC ID# 28N8, PCGS# 9222

**1900 Lafayette Dollar, MS65  
Attractive Multihued Toning**

- 4176** 1900 Lafayette Dollar MS65 PCGS. DuVall 1-B. The Lafayette dollar is widely popular as the first commemorative silver dollar issued by the U.S. Mint, but it is also somewhat elusive in the upper Mint State grades, partly due to its limited distribution of just 36,026 coins. The present example exhibits well-defined motifs and vibrant cartwheel luster. Shades of rose-gold, olive-green, and ocean-blue surround the margins, while the centers show orange-gold and deep violet toning. A highly attractive example in all respects. NGC ID# 28N8, PCGS# 9222

**1900 Lafayette Dollar, MS65  
DuVall 1-B, Brilliant-White Coin**

- 4177** 1900 Lafayette Dollar MS65 PCGS. DuVall 1-B. The often-seen variety with the A of DOLLAR tipped left and lower than the adjacent L — one of five die pairs described by Frank DuVall. Although 50,000 Lafayette dollars were minted (plus 26 Assay Commission coins), just 36,000 pieces were distributed. The rest were stored and unthinkingly converted to bullion in 1945, even though they were worth more than 10 times face value to collectors. This Gem survivor is brilliant-white and frosty, with an occasional mark from casual handling at the Mint. Nice cartwheel luster covers the untuned surfaces. A bold strike adds to the considerable eye appeal. NGC ID# 28N8, PCGS# 9222

**1938 Arkansas Half Dollar, MS67  
Small Distribution Total**

- 4178** 1938 Arkansas MS67 PCGS. CAC. Arkansas was admitted as a state on June 15, 1836, and the Arkansas commemoratives marked the centennial celebration, although the first examples were issued in the 99th year, and the last of the five year series in the 103rd year.

None of the Arkansas half dollars, minted in Philadelphia, Denver, and San Francisco, had significant collector demand, with a total distribution for all 15 issues of just 85,301 coins, or an average of only 5,686 coins per issue. The 1938 Arkansas half dollars had a distribution of only 3,156 coins at each mint (3,155 at Denver). Only the three 1939 issues had lower mintages.

This beautiful Superb Gem has satiny mint luster with faint champagne color, framed by deep gold and steel peripheral toning. A pristine, sharply struck specimen with excellent eye appeal. Population: 15 in 67 (2 in 67+), 0 finer (9/14). NGC ID# 28J7, PCGS# 9245

**1939-S Arkansas Centennial Half, MS67  
No Coins Certified Numerically Finer**

- 4179** 1939-S Arkansas MS67 NGC. The year 1939 had the lowest production figures for the Arkansas Centennial half dollar since its debut in 1935. San Francisco coined only 2,100 pieces (plus five examples for assay purposes), all of which were distributed as part of three-coin sets alongside an example each from Philadelphia and Denver, at a cost of ten dollars per set. As might be expected with such a low mintage, the 1939-S Arkansas half is rare in Superb Gem condition. This example displays thick mint frost beneath pale olive-gold toning that grows deeper toward the margins. The strike is sharp and the obverse portraits are nearly free of the minor marks that typically affect this issue. Census: 6 in 67, 0 finer (10/14). NGC ID# 28JC, PCGS# 9251

**1936 Cincinnati Half Dollar, MS67**  
Among the Finest Certified

**4180 1936 Cincinnati MS67 PCGS.** The Cincinnati Music Center half dollars were struck at all three mints, but were only sold in three-coin sets, of which just 5,000 were distributed. This brilliant, satiny Superb Gem is one of just eight so-graded examples of the Philadelphia issue at PCGS (1 in 67+), and none are finer (9/14). The devices are well-struck and, as is expected at this grade level, the preservation is exceptional. NGC ID# 28JZ, PCGS# 9283

**1892 Columbian Half, MS67**  
Delicately Toned

**4181 1892 Columbian MS67 PCGS.** This first-year commemorative half exhibits a band of multicolor toning around the largely brilliant obverse in shades of sea-green, magenta, and ice-blue. The reverse shows glimpses of rose, orange-brown, and blue color. This satiny Superb Gem is fully struck and nearly pristine. Population: 28 in 67 (5 in 67+), 0 finer (9/14). NGC ID# 26H5, PCGS# 9296

**1892 Columbian Half Dollar, MS67**  
Glimmering Prooflike Fields

**4182 1892 Columbian MS67 PCGS. CAC.** The World's Columbian Exposition, held in Chicago in 1893, prompted the issuance of the United State's first official commemorative coins, although at the time they were viewed more as souvenirs to be sold for the benefit of funding the event. Half dollars depicting Christopher Columbus and his flagship, the *Santa Maria*, were struck in 1892 in anticipation of the opening of the Exposition by the end of the year. However, delays postponed the opening ceremonies until mid-1893, with the result that the half dollars were again issued bearing that date (along with a small production of quarter dollars depicting Queen Isabella and an allegorical figure symbolic of women's industry).

The 1892 half dollar issue had a distribution of only 950,000 coins, compared to more than 1.5 million examples of the 1893 issue. Extant pieces are seldom found well-preserved, and Superb Gems are decidedly rare. The present example was evidently struck from fresh dies, as both sides showcase razor-sharp definition and fully prooflike fields. Tinges of lavender-gold and deep blue peripheral toning surround light champagne centers, giving this piece immense visual appeal. An important opportunity for the advanced classic commemorative specialist. Population: 28 in 67 (5 in 67+), 0 finer (9/14). NGC ID# 26H5, PCGS# 9296

1922 Grant Half Dollar, MS65  
Scarcer With Star Variant

- 4183 1922 Grant With Star MS65 PCGS.** This commemorative issue, struck to recognize the centennial of Ulysses S. Grant's birth year, saw the production of two distinct varieties: the With Star and the No Star. This type, with an incuse star added to the obverse design, directly above the N in GRANT, had a minuscule distribution of 4,256 pieces and is much scarcer than its No Star counterpart, struck to the tune of 67,405 coins. This untoned Gem example is boldly struck and highly lustrous, with typical swirling die polish lines noted in the obverse fields. Both sides are blemish-free. NGC ID# 28KC, PCGS# 9307

1922 Grant With Star Half, MS65  
Original, Satiny Surfaces

- 4184 1922 Grant With Star MS65 NGC.** Just five years after it was minted, this coin was acquired for \$1.50. It is an amazing Gem of the With Star variety with highly lustrous and satiny surfaces beneath entirely original iridescence. While a few hidden marks prevent a higher grade, it is an exceptional specimen. NGC has certified 61 finer examples (9/14).  
Ex: B. Max Mehl (2/20/1927) for \$1.50; Long Beach Signature (Heritage, 2/2009), lot 2120. NGC ID# 28KC, PCGS# 9307

1922 Grant With Star Half, MS65  
Strong Satin Luster

- 4185 1922 Grant With Star MS65 PCGS.** The low distribution of 4,256 pieces destined the With Star variety to have an inherent scarceness from the moment the coins were minted. Many wound up in dealer's hands, who made the most of the perceived rarity, yet they had no control over the Mint's quality or handling, which yielded few high-grade coins. This example is one of the lustrous, attractive few that survive in true Gem condition. Translucent almond-gold toning frames the silver centers. As typical, the strike is a bit weak at Grant's hair above the ear and at the center-most branches over the cabin, but the eye appeal is excellent and there are no significant marks. NGC ID# 28KC, PCGS# 9307

1922 Grant With Star Half Dollar, MS66  
Lustrous and Well-Preserved

- 4186 1922 Grant With Star MS66 PCGS.** Ex: Young Collection. According to Dave Bowers, in *Commemorative Coins of the United States* (1991): "The 1922 Grant 'star' half dollar in Mint State is one of the very rarest pieces of the series simply because the mintage was low and most pieces did not sell to collectors."  
Early in the life of the Grant With Star half dollar obverse die, it clashed, and was then lapped by the press operator. As a result, most examples display prominent obverse die polish lines along with clash marks near the nose and chin. The present high-grade and satiny example is from that die state. Peripherally toned golden-brown, rose-red, and lavender, this Premium Gem specimen is pleasingly lustrous and minimally abraded. Population: 40 in 66 (6 in 66+), 5 finer (9/14). NGC ID# 28KC, PCGS# 9307

**1922 Grant With Star Half, MS66  
Beautifully Toned and Satiny**

- 4187 1922 Grant With Star MS66 NGC.** The With Star Grant Memorial half dollar was coined in rather diminutive numbers; just 5,000 pieces were struck (plus six coins for assay purposes), and 750 were later melted as unsold, with a net distribution of only 4,256 examples, including assay coins. With such a paltry mintage, it is not surprising that this issue is one of the rarest classic commemorative half dollars in Gem and finer condition.

This Premium Gem example showcases bold design definition, with particular notice given to the finer details of the cabin, which are sharply delineated. Pastel rainbow hues grace smooth, satiny surfaces on each side, giving this coin a heightened level of eye appeal. Housed in a prior generation holder. Census: 52 in 66 (1 in 66+, 2 in 66 ★), 9 finer (10/14). NGC ID# 28KC, PCGS# 9307

**1928 Hawaiian Sesquicentennial Half  
Champagne-Toned Premium Gem**

- 4188 1928 Hawaiian MS66 PCGS.** The Hawaiian half dollars represent one of the few success stories among the classic commemorative series. A prudent 10,008-piece mintage was accomplished (including 50 sandblast proofs and eight assay coins) and, more importantly, all were promptly sold. The low mintage and sizeable distribution to the Hawaiian populace mean relatively few survivors today, making the issue elusive in all grades and highly prized. This appealing champagne-toned Premium Gem shows a sharp strike and strong satin luster. The surfaces are devoid of all but the most minor marks, none of which are individually significant. Just two coins are certified numerically finer at PCGS (10/14). NGC ID# 28KE, PCGS# 9309

**1946 Iowa Centennial Half Dollar, MS68+  
Tied for Finest Known at PCGS**

- 4189 1946 Iowa MS68+ PCGS.** A mintage of 100,057 pieces was promptly sold out to a numismatically inclined public, in part because the postwar coin market was booming. Most were distributed in-state by the Iowa Centennial Committee. The Iowa half was an exceptionally well-produced issue by the Mint, and today most survivors are in higher grades. This Superb Gem is at the top of known examples, with radiant, satin mint luster and an exceptional full strike. Vivid rainbow toning visits the margins on both sides of the coin. One of seven MS68 coins to earn the PCGS Plus designation, with none certified finer. Population: 75 in 68 (7 in 68+), 0 finer (10/14). NGC ID# 28KJ, PCGS# 9316

**1925 Lexington Sesquicentennial Half, MS67  
Impressive Preservation**

- 4190 1925 Lexington MS67 PCGS.** The famous 1775 battles of Lexington and Concord were commemorated with the issuance of a special half dollar in 1925. The Sesquicentennial issue had a moderate distribution of more than 160,000 pieces, but only a few survive at the Superb Gem grade level. This example displays a bold strike and nearly flawless surfaces. A faint light golden hue warms otherwise brilliant, satiny luster on each side. Population: 21 in 67 (3 in 67+), 1 finer (9/14). NGC ID# 28KK, PCGS# 9318

**1936-S Oregon Half, MS68 ★  
Bright, Fabulously Toned Surfaces**

- 4191** 1936-S Oregon MS68 ★ NGC. CAC. A fabulously toned Oregon Trail half. The design itself is always worthy of admiration, and when toning such as this is added the coin has even more appeal. The surfaces are brighter than often seen, and that brightness enhances the silver-blue, rose, and golden toning seen over each side. Truly a coin that must be seen to be appreciated.  
Ex: ANA Signature (Heritage, 7-8/2008), lot 2568. NGC ID# 28L4, PCGS# 9346

**1915-S Panama-Pacific Half Dollar, MS67  
None Numerically Finer at NGC**

- 4192** 1915-S Panama-Pacific MS67 NGC. Ex: Pittman. The obverse of this Superb Gem has lilac and gold toning within navy-blue frame, masking the intense satin luster. The reverse is delicate sea-green at the center, with lavender closer to the border, only slightly diminishing the luster on that side. This is an exceptional example that is tied numerically for the finest NGC has certified. Census: 64 in 67 (11 in 67 ★, 2 in 67+★), 0 finer (10/14). NGC ID# 26H7, PCGS# 9357

**1921 Pilgrim Tercentenary Half, MS67+  
Only One Finer at PCGS**

- 4193** 1921 Pilgrim MS67+ PCGS. The original Pilgrim Tercentenary half dollars of 1920 bore the dual date 1620 - 1920 on the reverse, but when production continued the following year, the date 1921 was added to the obverse field. The Mint struck 100,000 examples of the latter issue (plus 53 coins for assay purposes), but 80,000 were left unsold and were later melted. High-grade survivors are widely collected by classic commemorative specialists, and those grading as high as the present coin are decidedly scarce. This piece boasts satiny, virtually undisturbed mint luster and fully defined motifs. Splashes of deep olive, amber, and green-gold encompass portions of each side, though primarily in the margins. Population: 35 in 67 (2 in 67+), 1 finer (9/14). NGC ID# 28LD, PCGS# 9360

**1926 Sesquicentennial Half Dollar, MS66  
None Certified Numerically Finer**

- 4194** 1926 Sesquicentennial MS66 NGC. An uncommonly well-produced example of this conditionally rare half dollar, which is among the most challenging commemoratives to find in Premium Gem condition. The flatness of John R. Sinnock's design at the centers resulted in poor strikes and difficult execution, as did the legends climbing the dished walls of the rims. More than 85% of the 1 million-piece mintage was melted as unsold. This excellent example is both attractive and well-struck for the issue, with light, golden-lilac toning and glimpses of iridescence on the margins. Washington's cheek and hair are brought up, and the Liberty Bell is bold. No numerically finer examples have been seen by either service. Census: 19 in 66 (6 in 66 ★, 1 in 66+★), 0 finer (9/14). NGC ID# 28LM, PCGS# 9374

**1925 Fort Vancouver Half, MS67+  
Exceptional Visual Appeal**

- 4195 1925 Vancouver MS67+ PCGS.** The high-relief obverse portrait of Dr. John McLoughlin (who built Fort Vancouver in Washington state) and the reverse pioneer motif invited marks from handling, resulting in few high-grade survivors of the 14,994-piece mintage. This exceptional example is both unmarked and supremely attractive. The silver centers are pearlescent with exceptional iridescence. The margins display vivid copper-orange toning. Just one piece is graded numerically finer at PCGS. Population: 52 in 67 (8 in 67+), 1 finer (10/14). NGC ID# 28M5, PCGS# 9399

**1947 Booker T. Washington Half, MS67  
None Certified Finer**

- 4197 1947 Booker T. Washington MS67 PCGS. CAC.** The 1947 Booker T. Washington commemorative half dollars were only sold in three-coin sets, with each mint contributing just 6,000 coins. PCGS and NGC combined have encapsulated only 15 examples of the Philadelphia issue in MS67 (seven and eight coins, respectively), and none have been deemed finer (9/14). This representative displays softly frosted, nearly untuned mint luster, with deep orange-gold and olive hues seen in the recesses around the borders. The strike is well-executed, and the surfaces are nearly pristine. NGC ID# 28MA, PCGS# 9408

**1946-D Booker T. Washington Half, MS68 ★  
Incredible Multicolor Toning, Tied for Finest Certified**

- 4196 1946-D Booker T. Washington MS68 ★ NGC.** The Denver Mint struck 50,000 Booker T. Washington half dollars in the first year of production, these being distributed in three-coin sets with an example each from Philadelphia and San Francisco. Examples can be easily found in grades through MS66, and MS67 coins are only marginally scarce. At the MS68 level, the issue becomes exceedingly rare; NGC has certified just five coins in this grade, only three of which have received a Star designation, and none finer, while PCGS has not certified any finer than MS67+ (9/14). Straying from the typically seen brilliant or light golden luster, this high-end piece showcases vibrant multicolor toning in shades of amber, forest-green, olive-gold, and violet. The strike is sharp and any faint surface flaws are well-hidden beneath the rich patina. NGC ID# 28M8, PCGS# 9405

**1953 Washington-Carver Half Dollar, MS67  
None Certified Finer**

- 4198 1953 Washington-Carver MS67 PCGS.** The 1953 Washington-Carver commemorative half dollar has a reported distribution figure of just 8,003 pieces, far less than the 108,020 examples struck at the San Francisco Mint that year. The coins were not well-received by the numismatic community, and complaints about the issue influenced the Treasury Department to oppose any commemorative issues for years to come. On the plus side, these coins have always been inexpensive for such a low-mintage issue.

The present coin is a spectacular Superb Gem, with an unusually sharp strike for the issue and vibrant mint luster on both sides. A few hints of pale gold toning adds to the considerable eye appeal. Population: 5 in 67, 0 finer (9/14). NGC ID# 28MY, PCGS# 9438

1953-D Washington-Carver Half, MS67  
Tied With One Other for Finest Certified

- 4199 1953-D Washington-Carver MS67 PCGS. CAC.** This issue had a mintage of only 8,000 pieces (plus three coins for assay purposes), with relatively few having been certified in the better Mint State grades. This Superb Gem is the single finest seen at PCGS, and is rivaled only by a single numerically equal coin at NGC (9/14). Light amber-gold and lime-green peripheral toning cedes to soft powder-blue in the centers, and the design elements are well-struck. Highly lustrous surfaces reveal a few insignificant ticks. As affirmed by CAC, this piece is vastly superior in technical quality and aesthetic appeal to the majority of this issue which were poorly struck on imperfect planchets and mishandled during the distribution process. NGC ID# 28MZ, PCGS# 9439

COMMEMORATIVE GOLD

1903 Louisiana Purchase/Jefferson Gold Dollar  
Beautifully Preserved Superb Gem Example

- 4200 1903 Louisiana Purchase/Jefferson MS67 PCGS.** The Jefferson and McKinley variants of the Louisiana Purchase commemorative gold dollars are similar in availability throughout the Mint State spectrum, becoming scarce at the Superb Gem level. This example of the Jefferson variety displays vibrant, frosty mint bloom and boldly struck devices. The typical metal flow lines around the peripheries are faint on this immensely attractive representative. None have been certified numerically finer at PCGS (9/14). NGC ID# 26HA, PCGS# 7443

1904 Lewis and Clark Gold Dollar, MS66+

- 4201 1904 Lewis and Clark MS66+ PCGS.** This high-end Premium Gem displays needle sharp definition on all design elements and the impeccably preserved orange-gold surfaces radiate vibrant mint luster on both sides, creating tremendous eye appeal. From a small distribution total of 10,025 pieces. PCGS has graded 19 numerically finer examples (10/14). NGC ID# 26HC, PCGS# 7447

1904 Lewis and Clark Gold Dollar  
MS67 Condition Rarity

- 4202 1904 Lewis and Clark MS67 PCGS. As popular as the two Lewis and Clark gold dollar issues are today, they were poor sellers in their own time; collectors who felt “burned” by the Louisiana Purchase Exposition gold dollars’ rapid price plunge stayed away from the Lewis and Clark pieces, and even the relative few purchasers experienced short-term pain. This Superb Gem, by contrast, will be a great gain for the collector who wins it. Both portraits have marvelous hair detail with a hint of orange supplementing the sun-yellow base color. The preservation is marvelous, and a few apparent long flaws are in the plastic case, not on the coin itself. Population: 18 in 67 (1 in 67+), 1 finer (10/14). NGC ID# 26HC, PCGS# 7447

1904 Lewis and Clark Gold Dollar, MS67  
Conditionally Rare Early Gold Commemorative

- 4203 1904 Lewis and Clark MS67 NGC. CAC. The Lewis and Clark commemorative gold dollars were issued in conjunction with the Lewis and Clark Exposition, held in Portland, Oregon in 1905. The coins were initially struck the year before the Exposition, in 1904, and then again in 1905, creating two different issues. The former was produced to the extent of 25,000 pieces (plus 28 coins for assay purposes), but 15,003 were left unsold following the event, and were subsequently melted.

The pieces that were distributed primarily went to the general public as souvenirs of the Exposition, with the result that a significant portion of the surviving population is affected by careless handling and storage. High-grade examples are significantly scarcer than is often realized.

This representative is a rare Superb Gem example, with nearly flawless preservation and sharply struck motifs. Tinges of deep apricot-gold color accent primarily yellow-gold surfaces, giving this piece exceptional eye appeal. Census: 29 in 67 (3 in 67 ★, 4 in 67+★), 1 finer (9/14). NGC ID# 26HC, PCGS# 7447

1905 Lewis and Clark Gold Dollar  
Flashy Gem Example

- 4204 1905 Lewis and Clark MS65 NGC. The 1905 Lewis and Clark commemorative gold dollar had the same distribution total as its 1904 counterpart (10,000 pieces, plus a small number of additional coins for assay purposes), but is somewhat scarcer in Gem and finer grades. This example boasts sharp motifs and flashy lemon-gold luster. The fields exhibit a degree of semiprooflike mirroring, as is typical of this low-mintage issue. NGC ID# 26HD, PCGS# 7448

1905 Lewis and Clark Gold Dollar, MS65  
Scarcely Seen Finer

- 4205 1905 Lewis and Clark MS65 PCGS. CAC. The 1905 Lewis and Clark Centennial Exposition gold dollar was struck to the extent of 35,000 coins (plus 41 pieces for assay purposes), but 25,000 were left unsold and subsequently melted, with a net distribution of only 10,000 examples. This Gem representative displays satiny yellow-gold luster with subtle apricot overtones. The strike is well-executed, and the surfaces are void of significant handling abrasions. NGC ID# 26HD, PCGS# 7448

1905 Lewis and Clark Gold Dollar, MS66  
Prohibitively Rare Any Finer

- 4206 1905 Lewis and Clark MS66 NGC. The 1905 Lewis and Clark commemorative gold dollar had a higher initial mintage than the 1904 issue with a production of 35,000 pieces (plus 41 coins for assay purposes), but some 25,000 were later melted as unsold. Of the 10,000 pieces distributed, many were poorly preserved, as the 1905 issue is somewhat scarcer than the 1904 in high grades, despite virtually equal distribution totals.

This Premium Gem example displays rich honey-gold luster over satiny surfaces, with almost no sign of the metal flow lines typically seen in the margins. The strike is crisp, and the eye appeal is superb. Census: 59 in 66 (3 in 66+, 1 in 66 ★), 4 finer (9/14). NGC ID# 26HD, PCGS# 7448

**1905 Lewis and Clark Gold Dollar, MS67**  
**Extremely Rare at This Grade Level**  
**Tied for Finest Known**

**4207 1905 Lewis and Clark MS67 NGC.** The 1904 and 1905 Lewis and Clark commemorative gold dollars, struck in conjunction with the Lewis and Clark Exposition, held in Portland, Oregon, in 1905, are the scarcest of all the gold dollar issues in the classic commemorative series. The two dates had virtually identical distributions (about 10,000 coins each), but the 1905 is significantly rarer in high grades. The typical piece shows evidence of improper handling and poor storage, with an unusually high number of AU examples known. Mint State pieces are primarily limited to the lower end of grade range, and the issue's availability begins to decline sharply at the Gem level.

The Superb Gem representative here offered ranks as one of just four so-graded coins at NGC, with none finer; PCGS has likewise seen only three examples in this grade, also with none finer (9/14). The strike is bold, with shimmering luster that is rich in frosty golden color. A wispy vertical die crack that bisects the obverse portrait (Lewis) should not be mistaken for a pinscratch or other post-striking anomaly, as the surfaces are virtually pristine. The sheer rarity of this piece alone demands the undivided attention of the classic commemorative specialist. Census: 4 in 67, 0 finer (9/14). Ex: *Long Beach Signature* (Heritage, 6/2005), lot 7222. NGC ID# 26HD, PCGS# 7448

**1915-S Pan-Pac Dollar, MS67**  
**Superior Example**

**4208 1915-S Panama-Pacific Gold Dollar MS67 NGC.** This Superb Gem 1915-S Pan-Pac gold dollar will be a nice and budget-friendly alternative for the many among us who will never be able to afford a round or octagonal fifty dollar souvenir of this famous exposition. The surfaces show deep, attractive reddish-orange color with no mentionable distractions and great eye appeal. Census: 71 in 67 (2 in 67+, 1 in 67 ★), 0 finer (10/14). NGC ID# 26HE, PCGS# 7449

**1915-S Panama-Pacific Gold Dollar, MS67**  
**Among the Few Finest Graded**

**4209 1915-S Panama-Pacific Gold Dollar MS67 NGC.** The worker on the obverse and the swimming dolphins on the reverse symbolize the great marriage of earth and water that the Panama Canal represented, called by one sage at the time "the greatest liberty ever taken with Nature." This Superb Gem sports delightful honey-gold surfaces with pristine preservation, a full strike, and great eye appeal. Census: 71 in 67 (2 in 67+, 1 in 67 ★), 0 finer (10/14). NGC ID# 26HE, PCGS# 7449

**1915-S Panama-Pacific Quarter Eagle**  
**Attractive Gem Representative**

**4210 1915-S Panama-Pacific Quarter Eagle MS65 PCGS.** The Panama-Pacific commemorative series includes some of the most sought-after issues in the classic commemorative period, and the quarter eagle is a prime example. Only 6,749 pieces were distributed, and Gem or finer examples are in high demand among commemorative enthusiasts. This example is frosty with rich orange-gold patina. The strike is pleasing and no significant abrasions are observed. NGC ID# 26HK, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle  
Frosty, High-End MS66 Example**

- 4211** 1915-S Panama-Pacific Quarter Eagle MS66 NGC. CAC. The 1915-S Panama-Pacific quarter eagle had a mintage of 10,000 coins (plus 17 pieces for assay purposes), but 3,268 examples were melted as unsold, with a net distribution of only 6,749 pieces. Extant representatives are moderately available through the Premium Gem grade level, but finer coins are scarce. This example is sharply struck with frosty golden luster. The surfaces are nearly void of discernable contact. NGC ID# 26HK, PCGS# 7450

**1915-S Panama-Pacific Quarter Eagle, MS66+  
Seldom Encountered Finer**

- 4212** 1915-S Panama-Pacific Quarter Eagle MS66+ PCGS. CAC. The Panama-Pacific quarter eagle had a limited mintage of only 6,749 pieces, and is popular as one of only two quarter eagle issues in the classic commemorative series, the other being the 1926 Sesquicentennial issue. This example is well-struck with swirling golden luster and nearly undisturbed surfaces. PCGS has certified just 35 numerically finer representatives (9/14). NGC ID# 26HK, PCGS# 7450

**1922 No Star Grant Memorial Dollar, MS67  
Old Green Label Holder**

- 4213** 1922 Grant No Star MS67 PCGS. A delicate mix of rich golden-orange and mint-green patina resides on the fully lustrous surfaces of this marvelous Grant No Star dollar. A well-executed strike lends strong definition to the design features, further enhancing the coin's overall eye appeal. Both faces are immaculately preserved. Ex: FUN Signature (Heritage, 7/2007), lot 2149; Dallas Signature (Heritage, 4/2007), lot 1446; FUN Signature (Heritage, 1/2008), lot 2483. NGC ID# 26HJ, PCGS# 7458

**1922 Grant With Star Gold Dollar, MS68  
The Sole Finest at PCGS**

- 4214** 1922 Grant With Star MS68 PCGS. This small Commemorative gold issue is supposed to come nice, as a rule, but this is the finest example that we have ever seen. Under close examination with a 20-power magnifier the surfaces are essentially flawless. Added to the coin's immaculate preservation is the rich mint luster that covers each side, and lovely light peach and yellow-gold patina. The Laura Gardin Fraser design is boldly rendered, with just a hint of typical weakness noted on the tree trunks and roof, on the reverse. An outstanding Superb Gem Grant with Star gold dollar, and a coin of unsurpassed quality. Population: 1 in 68, 0 finer (10/14). Ex: New York Signature (Heritage, 7/2002), lot 5034; Baltimore ANA Sale (Heritage, 7/2008), lot 2149. NGC ID# 26HH, PCGS# 7459

**1926 Sesquicentennial Quarter Eagle  
Sharp Premium Gem Example**

- 4215 1926 Sesquicentennial MS66 PCGS.** The Sesquicentennial commemorative quarter eagle was produced with a rather low relief, and this must be taken into account when evaluating the quality of strike. This Premium Gem example is unusually sharp for the issue, with the sunburst around Independence Hall on the reverse slightly more visible than is typically seen. Shades of honey and green-gold luster grace frosty surfaces on each side, and no consequential abrasions are observed. None have been certified numerically finer at PCGS (10/14). NGC ID# 26HL, PCGS# 7466

**PROOF COMMEMORATIVE GOLD**

**1903 McKinley Gold Dollar, PR63  
Only 100 Examples Struck**

- 4216 1903 Louisiana Purchase, McKinley, PR63 PCGS.** The Louisiana Purchase gold dollars were struck to commemorate the 100th anniversary of the Louisiana Purchase in 1903. Two varieties were produced, one with a portrait of Thomas Jefferson on the obverse and the other with a bust of William McKinley. A special proof issue was produced, with 100 specimens of each design struck and affixed to cards that certified their authenticity and stated the circumstances of their manufacture. Because these proofs were distributed to officials of the Louisiana Purchase Exposition and government insiders, rather than the collecting community, few examples have survived in unimpaired condition.

The present coin is an attractive Select specimen with well-detailed design elements and vibrant mint luster. The vivid orange-gold surfaces display highlights of lilac and show only minor signs of contact. Visual appeal is quite strong. Housed in a green label holder. Population: 6 in 63, 27 finer (10/14).

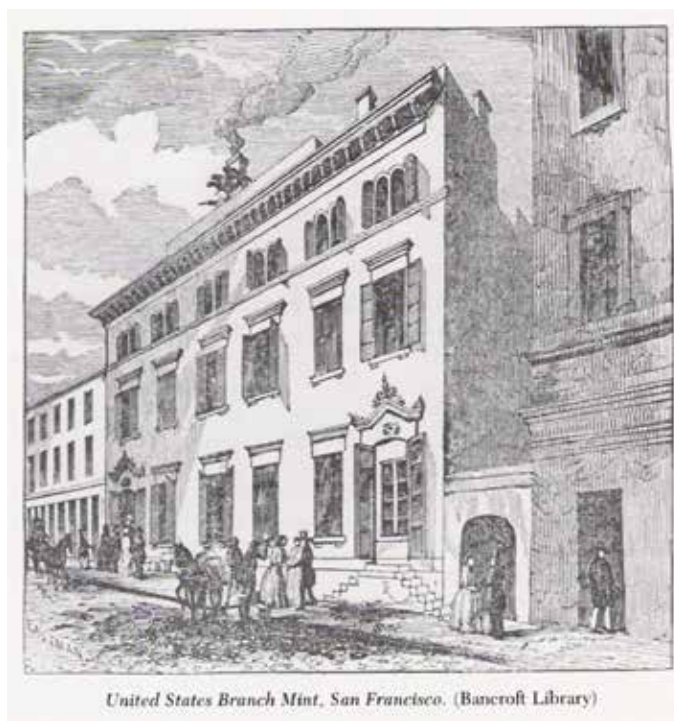

Ex: Los Angeles Signature (Heritage, 8/2009), lot 2195. PCGS# 7483

**TERRITORIAL GOLD**

**1853 Assay Office Twenty, AU Details  
K-18, 900 Thous.  
No Crossbars on A's in AMERICA**

- 4217 1853 Assay Office Twenty Dollar, 900 Thous. — Improperly Cleaned — NGC Details.** AU. K-18, R.2. The Kagan reference mentions an example of this variety without the crossbars on the A's of AMERICA, but has no information on how often it occurs. A quick check of our auction records indicates the A's with crossbars outnumber the examples without crossbars by approximately five to one. The current coin was once-cleaned and now shows areas of blue and violet discoloration over olive-gold surfaces. AU details remain.

**1852 Wass, Molitor & Co. Ten, AU58  
Large Head, Wide Date, K-4**

- 4218 1852 Wass Molitor Ten Dollar, Large Head, Wide Date AU58 NGC. K-4, R.5.** Wass, Molitor & Co. struck both five and ten dollar gold pieces in large numbers in 1852. Mintage figures for the ten dollar coins were not recorded, but contemporary newspaper accounts say the five dollar pieces were struck at the rate of 1,400-1,600 pieces per day (\$7,000-\$8,000 in face value). The design of both denominations resembles that of the federal coinage of the time. Three die varieties are known for the ten dollar coins. This coin represents the Guide Book Large Head variety, with a wide uneven date, designated K-4 in Donald Kagin's *Private Gold Coins and Patterns of the United States*. The Wass, Molitor coins had a high intrinsic value and were widely accepted by merchants and banks throughout California. Most examples were later turned in and melted at the San Francisco Mint, but a number of K-4 examples were recovered from the wreck of the S.S. Central America. The surviving population for the K-4 variety numbers approximately 100 pieces in all grades.

The present coin is a lightly circulated near-Mint example with lustrous yellow-gold surfaces that show highlights of green. The design elements are well-detailed on both sides, an unusual situation for this issue where the typical obverse is about 15 points sharper than the reverse. Both sides show an extensive network of peripheral die cracks. The overall presentation is quite attractive for this popular Territorial gold issue. Listed on page 389 of the 2014 Guide Book. Census: 4 in 58, 5 finer (9/14). PCGS# 10348

**1860 Clark, Gruber Twenty, VF25  
Copper Die Trial, K-4a**

- 4219 1860 Clark, Gruber \$20 Copper Die Trial VF25 PCGS. K-4a, R.5.** Pikes Peak is depicted as a triangle with trees on this Clark, Gruber 1860 twenty dollar copper die trial. On the issued gold twenty, the mountain is instead shaped like a volcano, and trees are relegated to its base. The present copper die trial shows wear on the motifs but the eagle possesses partial plumage. Both sides display a few faded thin marks made by a curious finder. Encapsulated in a first generation holder. PCGS# 10146

**1861 Clark, Gruber Five Dollar  
PR63 Red and Brown  
Copper Die Trial, K-10b**

- 4220 1861 Clark, Gruber \$5 Copper Die Trial PR63 Red and Brown PCGS. K-10b, R.7.** A majority of copper die trials of the 1861 Clark, Gruber five were struck with a collar and show a reeded edge (K-10c). The very rare K-10b was struck from regular obverse and reverse dies, but without a collar die. As a result, the present example is broadstruck and has a plain edge. The obverse dentils between 5 and 11 o'clock have a stretched appearance, while the obverse rim is featureless and irregular between 11 and 5 o'clock. The reverse rim shows similar characteristics, except the featureless part of the rim is between 11 and 1 o'clock. Customary for a broadstrike, the centers are well impressed. The peripheral stars and legends are also sharply struck despite minor metal flow toward the border. Toned predominantly deep brown but mint red outlines the stars and fills the legends. Unabraded and impressively preserved. Housed in a first generation holder. PCGS# 10151

1861 Clark, Gruber Ten Dollar  
Copper Die Trial, K-11b  
PR64 Red and Brown

Copper Die Trial 1861 Clark, Gruber Twenty  
PR58, Kagin-Unlisted Variety

- 4221 1861 Clark, Gruber \$10 Copper Die Trial PR64 Red and Brown PCGS. K-11b, R.7. The classic 1981 Kagin standard reference states (on page 361) that copper trials of the 1861 Clark, Gruber ten dollar were from “regular dies.” However, most that we have encountered are from a different obverse die, with star 10 pointing near the center of the hairbun, such as the Eric P. Newman specimen. In fact, the present die trial is the first we have seen struck from the regular (gold) issue obverse die, which shows star 10 pointing to the upper fold of the hairbun.

Thus, this lot provides a very rare opportunity to obtain a true Kagin-11b, instead of a K-11b variant. The present near-Gem is also noteworthy for its substantial mint red color, although the open fields and high points are toned gunmetal-blue. The strike is razor-sharp, abrasions are absent, and a loupe shows only minor carbon. Certified in a first generation holder. PCGS# 10164

- 4222 1861 Clark, Gruber \$20 Copper Die Trial PR58 PCGS. “K-12e”, R.6. This unlisted die variety is similar to K-12c, but the reverse shows no repunching on the V in DENVER or the second R in GRUBER. The obverse also differs from K-12c, since the stars are further from the rim. An impressive die trial that displays deep chocolate-brown toning. The surfaces are unblemished and retain substantial gloss. The high points show minor blending of detail. Certified in a first generation holder. PCGS# 10153

## CALIFORNIA FRACTIONAL GOLD

1853 Octagonal Liberty Dollar, MS61  
BG-522, Rare Deriberpie Variety

- 4223 1853 Liberty Octagonal 1 Dollar, BG-522, High R.6, MS61 NGC. M. Deriberpie was a Gold Rush engraver in San Francisco, active between 1853 and 1854. During this time he was productive, but a majority of his varieties are rare to very rare. BG-522 has a wide 53 in the date and faint radial die cracks to each of the two hairbun folds. The wheat-gold surfaces are unmarked and the portrait exhibits full detail. A tiny lamination (as made) reaches the R in DERI. The finer of only two examples of BG-522 certified by NGC. Census: 1 in 61, 0 finer (9/14). PCGS# 10499

## COINS OF HAWAII

1883 Hawaii Dime, PR63  
Mintage of 26 Pieces

- 4224 1883 Hawaii Ten Cents PR63 PCGS.** Although just 26 proof Hawaiian dimes were struck at the Philadelphia Mint, the small production occurred over a two-year period. Six pieces were struck in September 1883. The following year, another 20 proofs were coined. Although there were also 250,000 business strikes at the San Francisco Mint, the proof keneta, or Hawaiian dime, is a formidable rarity, especially given its status as a single-year type. The present specimen is pearl-gray save for a blush of powder-blue near the date. The strike is needle-sharp. Both sides display minor hairlines but contact marks are absent. Population: 5 in 63, 6 finer (10/14). PCGS# 10981

1883 Hawaii Eighth-Dollar, PR62  
Only 20 Pieces Struck

- 4225 1883 Hawaii 12 1/2 Cents PR62 PCGS.** The eighth-dollar or hapawalu pattern is the great rarity of Hawaiian coinage. Only 20 proofs were struck, and no business pieces were ever made. The denomination was intended to rid the kingdom of worn-out Spanish-American reales, but was apparently deemed too similar in diameter and value to the U.S. dime and the equivalent Hawaiian keneta. The dies used to strike the proof patterns have survived, and reside in the Hawaiian State Archives, although the obverse dies were defaced in May 1888. The present eighth-dollar specimen is fully struck and displays light silver-gray toning. The fields are flashy and lightly hairlined. A rare opportunity to acquire this rare Hawaiian denomination. PCGS# 10985

1883 Hawaii Quarter, PR62  
Obverse Cameo Contrast  
Rare Proof Issue

**4226 1883 Hawaii Quarter PR62 PCGS.** Golden-brown toning visits the border of the otherwise brilliant obverse. The reverse displays medium to deep cream-gray and gunmetal-blue shades. The frosty portrait exhibits substantial contrast with the glassy obverse field, but PCGS has demurred on a Cameo designation, since the reverse lacks contrast. A precisely struck example of the rare proof hapaha, or Hawaiian quarter. The one-year type has a commercial mintage of 700,000 pieces, but a mere 26 proofs were produced, part of four-piece and five-piece denomination sets possibly distributed personally by King Kalakaua. Population: 3 in 62, 3 finer (10/14). PCGS# 10989

1883 Hawaii Half Dollar, PR63  
Extreme Rarity in Select Proof  
One of 26 Pieces Struck

**4227 1883 Hawaii Half Dollar PR63 PCGS.** As part of the 26 proof sets reportedly issued and dated 1883. Six sets were struck in September, 1883 as four-coin sets (lacking the eighth-dollar coin, the hapawalu) and another 20 five-coin sets were struck in 1884 (dated 1883) for a total of 26 silver proof sets. King Kalakaua himself may have distributed the proof sets. The silver proof half dollar (or hapalua) is particularly rare in Select Proof or finer condition. This originally toned example displays a pinpoint-sharp strike on the portrait and iridescent shades framed by a deeper ring of gunmetal gray and blue tones at the margins. Population: 3 in 63, 1 finer (10/14). PCGS# 10993

**1883 Hawaii Dollar, PR61  
Brilliant Silver Proof  
Few Survive From 26 Pieces Struck**

**4228 1883 Hawaii Dollar PR61 PCGS.** The akahi dala (one dollar) is a perennial collector favorite as a business strike. With 500,000 pieces struck for circulation, the coins were recalled upon Hawaii's status as a U.S. Territory in 1900, and most Hawaiian dollars were subsequently melted.

In silver proof format such as this coin, the Hawaiian dollar is an extreme rarity with few survivors from the 26-piece mintage. This example is brilliant and deeply reflective with a hint of clear, gray-blue patina. As expected, the Philadelphia Mint produced a full strike with exceptional detail on King Kalakaua's hair, beard, and mustache. The Hawaiian coat of arms is equally well-produced on the reverse. Some light roughness in the left obverse field prevents an even higher grade for this attractive, rare proof. Population: 2 in 61, 5 finer (10/14). PCGS# 10997

**PATTERNS**

**1864 Transitional Quarter, PR67  
Finest Known Judd-386**

**4229 1864 Quarter Dollar, Judd-386, Pollock-454, Low R.7, PR67 NGC.** The obverse is a regular dies trial striking, while the reverse has the motto IN GOD WE TRUST above the eagle as adopted in 1866. Struck in silver with a reeded edge. The so-called transitional patterns of 1864, quarter (Judd-386), half dollar (Judd-391), and silver dollar (Judd-396), purportedly bridge the gap between the earlier No Motto coins and the Motto design officially adopted in 1866. According to USPatterns.com, the coins were actually produced for sale to collectors in sets, circa 1869. Approximately a dozen sets were struck in silver and another dozen in copper. Two or three sets were produced in aluminum and at least one in nickel. PCGS has graded a total of four examples of Judd-386 in lesser grades, and NGC has certified only two specimens, with the present coin being the finest known (9/14).

The design elements are sharply impressed on this exceptional Superb Gem, and the flawless surfaces are patinated in vivid shades of cobalt-blue and lavender-gray. The deeply mirrored fields shine through the toning with terrific eye appeal.

Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$30; Eric P. Newman Numismatic Education Society; Newman Collection / Central States Signature (Heritage, 4/2013), lot 3943. PCGS# 60557

1866 Washington Five Cent Pattern in Nickel  
Judd-481, PR66 Cameo

- 4230** 1866 Washington Nickel, Judd-481, Pollock-571, Low R.7, PR66 Cameo PCGS. CAC. A head of Washington faces right on the obverse, with the date below and GOD AND OUR COUNTRY around. The final 6 in the date is much larger than the first 6 and is apparently recut at least once. The reverse has a large 5 within a laurel wreath with UNITED STATES OF AMERICA around. Struck in nickel with a plain edge. Only 10 to 12 examples are believed known in nickel with another five or six known in copper. This is a spectacular example. The obverse has a medal-like appearance, and the fields display the deepest mirroring and provide a "black" background for the frosted devices. PCGS# 522577

1867 Seated Dollar in Brass  
Judd-593, Gem Proof  
Only Five Examples Struck

- 4231** 1867 Seated Dollar, Judd-593, Pollock-657, High R.7, PR65 NGC. CAC. Ex: Samuel Berngard Collection. From regular issue dies with a reeded edge, but struck in brass instead of silver. Early editions of Judd state only five pieces were struck. The combined total certified by NGC and PCGS is only six pieces, a number close to the reported mintage, plus one resubmission. The present specimen is fully struck and displays rich olive-green and peach-gold toning. Moderate carbon near star 12 and on the upper reverse identifies the present specimen.  
Ex: Frank M. Sterling Collection (Heritage, 5/2009), lot 1413; Orlando FUN Signature (Heritage, 7/2010), lot 4480; Samuel J. Berngard Collection (Stack's, 3/2012), lot 4192. PCGS# 60805

**1869 Three Cent Nickel in Aluminum**  
**Judd-679, PR67 ★ Ultra Cameo**  
**The Finest Known Example**

**4232** 1869 Three Cent Nickel, Judd-679, Pollock-758, High R.7, PR67 ★ Ultra Cameo NGC. CAC. Struck from dies of the regular design in aluminum, instead of the usual copper-nickel alloy, with a plain edge. This example and another certified PR64 are the only two that NGC has examined. PCGS has seen five, including one certified PR66 Deep Cameo. The Newman example is the finest known Judd-679.

This is a stunning Superb Gem. Brilliant light gray surfaces with deeply mirrored fields nicely frame the frosty and highly lustrous devices, enhancing their bold design definition. Myriad die polishing lines are noted on both sides.

Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$25; Eric P. Newman Numismatic Education Society; Newman I (Heritage, 4/2013), lot 3970. PCGS# 800015

**1870 Standard Silver Quarter Pattern**  
**Judd-878, PR65 Red and Brown**

**4233** 1870 Standard Silver Quarter Dollar, Judd-878, Pollock-975, R.7, PR65 Red and Brown PCGS. CAC. Ex: Denali Collection. William Barber's Seated Liberty design with a Liberty Pole behind with a Phrygian cap atop and 13 stars around the margin. The reverse has 25 CENTS in the center and is surrounded by a thick agricultural wreath with STANDARD in small letters at the top. Struck in copper with a reeded edge. The chocolate-brown surfaces on this well struck Gem transform to sea-green and plum-red when rotated beneath a light. Smooth aside from faint contact on the right obverse field. Population: 3 in 65 Red and Brown, 0 finer (9/14). PCGS# 71122

1870 Half Dollar Pattern, PR65 Deep Cameo  
Judd-933, Pollock-1039  
Tied for Finest Certified

- 4234** 1870 Half Dollar, Judd-933, Pollock-1039, Low R.7, PR65 Deep Cameo PCGS. William Barber's Seated Liberty design, interesting for its placement of the shield behind Liberty's legs, which is supported with her right hand. An olive branch is held in her left hand. A liberty pole is behind the shield and a scroll crosses the shield and is inscribed LIBERTY in incused letters. The reverse is the type used for regular issue Seated halves. Struck in silver with a reeded edge. This is an exceptional Gem proof with deeply mirrored fields and heavily frosted devices, the contrast between the two is profound. Almost completely brilliant, there is just the faintest trace of golden around the margins. Population: 2 in 65 Deep Cameo, 0 finer (9/14). PCGS# 506603

1870 Aluminum Half Dollar, PR65 Cameo  
Standard Silver Series  
Judd-943, Pollock-1071

- 4235** 1870 Standard Silver Half Dollar, Judd-943, Pollock-1071, High R.7 PR65 Cameo PCGS. CAC. Standard Silver reverse paired with a Liberty cap-and-stars portrait on the obverse. This Pollock subvariety shows the tip of the cap beneath the ES in STATES. Struck in aluminum with a reeded edge. The experts at uspatterns.com suggest "at least 3 known" for this aluminum delicacy. This is the single finest example certified by PCGS (2/13), though of course it has little competition for the title. Well-preserved aluminum surfaces are minimally toned and exhibit excellent contrast. Struck from moderately rotated dies. PCGS# 800032

## EARLY PROOF SET

### 1900 Six-Piece Proof Set, PR64-PR66 All PCGS-Certified

**4236 1900 Six-Piece Proof Set PCGS.** This six-piece proof set is all PCGS-certified and the coins range from PR64 to PR66. Included are:

**1900 cent PR65 Red and Brown.** Medium density brown patina is seen over each side, especially the design elements, while the fields retain much underlying mint red.

**1900 nickel PR66.** Fully struck, as expected for a proof, the fields are deeply reflective. Each side displays light streaks of yellow-golden patina, suggestive of the woodgrain pattern seen on both types of 1909-S cents.

**1900 dime PR64.** The deep blue toning that covers each side shows significant underlying iridescence when closely examined. The fields are nicely mirrored but somewhat subdued by the depth of toning present.

**1900 quarter PR64.** Rich cobalt and rose toning is seen over each side, but is several shades lighter in the reverse fields. That side also shows much brighter reflectivity. The only mark of any note is located just above the eye of Liberty.

**1900 half dollar PR64.** Toned similarly to the quarter, each side shows significant deep blue and rose patina. Unlike the quarter, however, the obverse fields show considerable proof brightness.

**1900 dollar PR64.** Again, each side is replete with deep blue and rose toning. The fields are bright and the reverse fields are especially flashy from die polishing.

All in all, a well-matched and apparently original proof set. (Total: 6 coins)

## CERTIFIED MODERN PROOF SET

### NGC-Certified 1936 Proof Set PR64 to PR67

**4237 Five-Piece 1936 Proof Set NGC.** All five coins are housed in a single large-size NGC holder. The set includes:

**1936 Satin Finish cent PR65 Brown.** Attractive sea-green and plum-mauve patina.

**1936 Satin Finish nickel PR67.** Well-struck, delicate autumn-brown toning.

**1936 dime PR65.** Apple-green and golden-brown outline design elements.

**1936 quarter PR64.** Beautifully toned in antique gold and sea-green.

**1936 half dollar PR65.** Dappled tobacco-brown and blue-green shades in protected regions.

Included with the lot is a clipping of a vintage 1936 four-paragraph newspaper article that covers the resumption of proof set production. Perhaps the article led to the purchase of the present set directly from the Mint. (Total: 5 coins)

*End of Session Two*

# SESSION THREE

## EARLY HALF DOLLARS

1794 Half Dollar, O-101a, VG Details  
Pleasing Lower-End Date Representative

- 4238** 1794 O-101a, R.4 — Cleaning — PCGS Genuine. VG Details. The Overton-101 variety (including its late die state O-101a counterpart), is the only 1794 half dollar variety that is not rare or prohibitively rare, and is therefore ideal for the type or date collector. Still, while it is the most plentiful in relation to the other die marriage varieties of the year, O-101a is very scarce.

All varieties included, only 23,464 half dollars were struck the first year of the denomination, and the collector has few surviving examples from which to choose. This well-circulated piece displays soft battleship-gray color. The reverse border is bold, though the obverse dentils weaken from 1 to 7 o'clock. The eagle is faintly outlined, more a product of die sinking than uneven wear. Overall, this is a pleasing example of the first U.S. half dollar issue. PCGS# 39201

1795 Half Dollar, Fine 15  
Two Leaves, O-102

- 4239** 1795 2 Leaves, O-102, R.4, Fine 15 PCGS. Ocean-blue, olive-gold, and cream-gray toning encompasses this nicely defined Flowing Hair type coin. Liberty's hair displays pleasing detail. No marks are consequential. O-102 and O-131 are distinctive for their berry arrangement (two in and one out) beneath each wing. PCGS# 39215

- 4240** 1795 2 Leaves, O-105a, R.4 — Obverse Scratches — NGC Details. Fine. A few faint vertical hairlines on the portrait are strictly assessed by NGC. A charming caramel-gold and stone-gray example of the popular Flowing Hair type. A pair of moderate adjustment marks (as coined) cross the eagle's legs, and the reverse rim has a small ding at 6:30.  
*Ex: Dr. Raymond Biggs Collection (Heritage, 1/2011), lot 3528.* PCGS# 39221

1795 Half Dollar, Fine 12  
Two Leaves, O-108a

- 4241** 1795 2 Leaves, O-108a, R.4, Fine 12 PCGS. An original Flowing Hair type coin draped in richly blended olive-green and golden-brown toning. The eagle's plumage is worn but ample hair definition is present. Smooth aside from a few brief thin lines near the date. The crack connecting the tops of AMER confirms the later die state Overton subvariety. PCGS# 39226

- 4242** 1795 2 Leaves, O-122, R.5, VG10 PCGS. The cream-gray and wheat-gold portrait contrasts with the deep steel-gray obverse field. The reverse is primarily stone-gray with charcoal toning near the rim. No marks are evident to the unaided eye, although a lens reveals hairlines. PCGS# 39238

- 4243** 1795 2 Leaves, Small Head, O-126a, R.4, VG8 PCGS. CAC. An evenly circulated example of the introductory and briefly coined Flowing Hair type. The centers are mostly stone-white but also exhibit glimpses of tan patina. The borders are ocean-blue. Marks are inconsequential aside from hair-thin lines near the right-side stars. Encapsulated in a green label holder. PCGS# 39248

- 4244** 1803 Large 3, Large Reverse Stars, O-103, R.3, XF40 PCGS. Overton-103 is the sole 1803 die marriage that combines a Large 3 in the date with a Large Stars reverse. An attractive and problem-free steel-gray half dollar. E PLURIBUS UNUM is sharp, and both sides retain glimpses of luster. PCGS# 39273

- 4245** 1806/5 O-103, R.2, VF35 PCGS. CAC. Deep sea-green, mahogany, and gunmetal-gray encompass this moderately circulated and problem-free Draped Bust half. A small edge flaw (as made) at 7 o'clock. A radial die crack is present near obverse star 1, but the O-103a crack between the ST in STATES is absent. PCGS# 39299

- 4246** 1807 Draped Bust, O-105a, R.4, XF40 PCGS. The large die lump between the ED in UNITED identifies the scarce Overton subvariety. Rich sea-green and golden-brown patina embraces this nicely defined and problem-free representative. Glimpses of luster emerge from the borders and curls. PCGS# 39344

## BUST HALF DOLLARS

### 1808/7 O-101 Half Dollar, AU55 Late Die State

**4247** 1808/7 O-101, R.1, AU55 PCGS. Both sides of this late die state exhibit heavy flowlines radiating to the edge, along with prominent peripheral die cracks. Central weakness is typical for the variety. Considerable luster remains, with light silver centers and iridescent peripheral toning. PCGS# 39378

**4248** 1812 Large 8, O-105a, R.2, AU55 PCGS. A dusky wheat-gold and cream-gray representative with distributed tiny russet freckles. Minimally abraded, and luster fills the legends, stars, curls, and eagle. Struck from clashed dies. A late die state example with a break inside the lower loop of the 8 in the date. PCGS# 39450

**4249** 1814 O-103, R.1, AU58 NGC. CAC. Struck two centuries ago, the 1814 Overton-103 variety is readily identified by the prominent linear die defect between the right scroll end and the nearby wing. A late die state steel-gray example with pleasing surfaces. Struck from multiply clashed dies. PCGS# 39477

### 1817 O-103a Half, MS61 Exceptionally Unabraded

**4250** 1817 O-103a, R.3, MS61 NGC. Medium to deep walnut-brown and gunmetal-gray graces this satiny and refreshingly unabraded half dollar. The strike is intricate at the borders, although the vertical shield stripes exhibit blending. The late Overton die state of the Punctuated Date O-103, without the dot "punctuation." PCGS# 39493

### 1818/7 Bust Half, AU58 O-101, Lustrous Calico Toning

**4251** 1818/7 Large 8, O-101, R.1, AU58 PCGS. CAC. The first 8 of the date is distinctly larger than the second 8, where an underdigit 7 shows clearly above the second 8 and the tail of the 7 is sharply visible within the bottom loop. A large gap in the dentils beneath the C of 50C is diagnostic of the die pair. Plentiful luster remains beneath multicolored toning, covering both sides of this calico half with resplendent shades of green, blue, purple, and rustic red-gold. The bold strike is beautifully centered on both sides with complete dentils all around. A favorite *Guide Book* variety. Population: 15 in 58, 17 finer (9/14). PCGS# 39540

### 1820/19 Half Dollar, MS61 O-102, Curl Base 2

**4252** 1820/19 Curl Base 2, O-102, R.1, MS61 PCGS. The underlying 19 is plainly visible beneath the 20 in the date. This overdate exists for the Curl Base 2 and the Square Base 2, though the former is slightly more available to the Overton variety collector. This Mint State representative shows some usual weakness on the left-hand stars, but is otherwise well-struck with satiny luster. Pale olive-gold and lavender-gray toning encompasses much of each side, deepening to amber-orange around the peripheries. A few small toning specks are seen on the reverse. PCGS# 39574

**4253** 1823 O-107, R.2, MS61 PCGS. Liberty's profile is triple struck, as frequently seen on Bust halves of the era. This lustrous and unblemished half dollar has a bold strike and lightly toned centers. The margins offer rose-red and apple-green patina. PCGS# 39611

**4254** 1824 O-115, R.2, MS62 PCGS. An unabraded and attractively toned Capped Bust type coin. The fields and portrait are cream-gray but the margins display golden-brown and the devices are outlined with aquamarine. The Overton marriage with a die lump between the left scroll end and the nearby wing. PCGS# 39637

**4255** 1826 O-108a, R.1, MS61 PCGS. Light rose-gold toning graces the borders, but this lustrous and unmarked half dollar is mostly brilliant. The strike is crisp except on the final two stars. A later die state with prominent clashes and cracks. PCGS# 39677

**4256** 1827 Curl Base 2, O-146, R.2, AU55 PCGS. A brilliant and partly lustrous Choice AU example. Unabraded aside from a slender mark near star 6. The cheek and bust tip display a hint of wear, as do the crests of the wings. O-146 ranks among the most popular 1827 varieties due to its distinctive Curl Base 2. PCGS# 39749

**4257 1827 Curl Base 2, O-146, R.2, AU58 PCGS.** 49 die varieties of 1827 half dollars are known, but only two feature a Curl Base 2. Since O-147 is very scarce, those who collect by Guide Book variety tend to acquire an example of O-146. The present lustrous stone-white representative has a good strike and only a single evident mark, a hair-thin line between the final two stars. PCGS# 39749

**4258 1829 Small Letters, O-103, R.1, AU58 PCGS.** Iridescent ocean-blue centers are framed by orange-gold and lilac-red borders. The coruscating surfaces are smooth aside from a slender line on the right obverse field. The strike is sharp except on the left-side stars. PCGS# 39781

**4259 1829 Small Letters, O-107, R.3, MS62 PCGS.** Parallel die polish lines near the bust tip attribute this scarcer Overton variety. Sea-green and wheat-gold toning is predominant, although portions of the reverse border display lilac patina. Satiny, nicely struck, and smooth aside from a brief line on Liberty's neck. PCGS# 39786

**4260 1830 Large O, O-123, R.1, MS62 ANACS.** Narrow bands of sea-green and autumn-brown toning grace the margins of this coruscating and essentially unabraded Bust half dollar. A fairly late die state with peripheral elements drawn toward the rims. PCGS# 39834

**4261 1832 Small Letters, O-107, R.2, MS63 PCGS.** A dusky golden-brown and sea-green representative whose satiny surfaces are free from any remotely mentionable marks. The strike is crisp at the centers but a few stars are lightly brought up.  
Ex: *Long Beach Signature* (Heritage, 9/2007), lot 1509. PCGS# 39865

**4262 1832 Small Letters, O-115, R.1, MS62 NGC. CAC.** A dusky gunmetal-gray and walnut-brown half dollar that exhibits satin luster and minimal marks. The strike is crisp except on the PL in PLURIBUS and stars 1, 4, and 5. A collectible Overton variety distinguished by fine vertical die lines above the right (facing) claw. PCGS# 39874

**4263 1832 Small Letters, O-122, R.1, MS62 PCGS. CAC.** Ex: Col. Green-Newman. Light to medium golden-tan toning fills the fields, while the high points are stone-gray and the margins display freckles of aqua-green, rose-red, and canary-gold. No abrasions are evident aside from delicate hairlines. PCGS# 39883

**4264 1833 O-109, R.3, MS62 PCGS.** Brilliant and entirely untuned, with bold cartwheel luster. The strike is bold but not sharply detailed, as if the dies had already done much work on their portion of the 5 million-piece mintage. Well-centered with minor weakness at the dentils. PCGS# 39897

#### 1834 O-101 Half Dollar, MS64 Large Date, Large Letters

**4265 1834 Large Date, Large Letters, O-101, R.1, MS64 PCGS. CAC.** Light chestnut-tan toning adorns this lustrous and minimally marked near-Gem. The strike shows selected softness on the stars and the curls near the ear. The upright of the 5 in 50C is repunched. Clashed beneath the right (facing) wing. Incorrectly designated by PCGS as Small Letters. PCGS# 39905

**4266 1834 Small Date, Small Letters, O-114, R.1, MS62+ NGC.** The date is repunched, and so are stars 2, 3, and 4. The drapery clasp has a double outline. A satiny gunmetal-gray, autumn-brown, and olive-gold Capped Bust type coin. No marks are consequential, but the strike shows occasional high point blending. PCGS# 39918

#### 1834 O-116 Bust Half, MS64 Small Date, Small Letters

**4267 1834 Small Date, Small Letters, O-116, R.1, MS64 PCGS.** A pair of twin dentils opposite star 8 and a wavy outline in front of Liberty's bust help identify this Small Date, Small Letters variety. Donald Parsley also mentions the "mouth is open and an ugly curl to the lips" but we believe the distinctive mouth gives Liberty a pensive expression. This attractive, near-Gem half dollar is satiny and lustrous with with bronzelike patina and copper-orange highlights. The coin is boldly struck for the variety, which is always a bit flat at stars 9 through 13 and at the scroll. PCGS# 39921

**4268 1835 O-107, R.1, MS62 NGC.** Lustrous and principally brilliant, although a slender blush of blended forest-green and golden-brown toning is noted near the final two stars. Marks are absent except on the field near the eagle's head. PCGS# 39933

### REEDED EDGE HALF DOLLARS

#### 1836 Reeded Edge Half, GR-1, XF45 Rich Toning

**4269 1836 Reeded Edge XF45 ANACS. GR-1, R.2.** A single die pair produced the 1836 Reeded Edge half, the first issue of the denomination struck on the new steam press at Philadelphia. This example shows light wear but retains sharp detail. Golden-gray hues encompass the centers, yielding to deeper violet and ocean-blue toning around the peripheries. An appealing XF example of this elusive Reeded Edge Capped Bust issue. NGC ID# 2U28, PCGS# 6175

**4270 1837 AU58 PCGS. CAC. GR-20, R.3.** Vivid brassy-gold toning with dusky blue and orange accents covers both sides of this attractive Reeded Edge half. A bit of high-point rub on the portrait and the eagle's head accounts for the grade. Glowing mint luster remains plentiful, with bold details and distinctive, natural eye appeal not often seen for this issue or grade level. CAC-endorsed quality abounds. NGC ID# 24G4, PCGS# 6176

**4271 1837 MS62 PCGS. GR-14, R.1.** Heavy obverse and reverse die cracks match the known cracks of GR-14 on this late die state piece. Both sides have sharp design motifs with ivory luster and iridescent toning. NGC ID# 24G4, PCGS# 6176

**4272 1837 MS62 NGC. GR-22, R.2.** Deep olive and green-gold undertones accent darker gray-gold patina overall, with satiny underlying mint luster. The central details are sharp, though some typical weakness is noted in the top of Liberty's cap and in CEN of CENTS. The surfaces exhibit no outwardly detracting abrasions, and offer an overall pleasing appearance. NGC ID# 24G4, PCGS# 6176

#### 1837 Half Dollar, MS63 GR-20, Late Die State

**4273 1837 MS63 NGC. GR-20, R.3.** This variety is frequently encountered among high-grade examples of the 1837 half dollar, and is ideal for either type or date purposes. The present example is from a late die state; no cracks are observed, though die erosion around the peripheries blurs some of the more minute diagnostics of the variety. However, die lines in Liberty's hair curls and another into the field from right (facing) corner of the shield confirm the die pair. The luster is satiny and undeniably original, with rich lavender-gray peripheral toning surrounding light golden centers. Surface abrasions are minimal for the grade. A few of the left-hand obverse stars are not fully brought up, though the strike is otherwise pleasing. NGC ID# 24G4, PCGS# 6176

#### 1937 Reeded Edge Half, MS63 GR-15, Nice Original Toning

**4274 1837 MS63 PCGS. CAC. GR-15, R.3.** Pearlescent iridescence provides a backdrop for rustic, orange-gold overtones on both sides of this attractive GR-15 variety half dollar. A diagnostic obverse die crack travels through the right-side stars. Sharp details prevail except for a slight area of weakness at the top of Liberty's cap and on the surrounding star centers, which does not diminish the natural, glowing appeal of this Select Reeded Edge half. NGC ID# 24G4, PCGS# 6176

#### 1837 Reeded Edge Half, GR-22, MS64 Popular 50 CENTS Type

**4275 1837 MS64 NGC. GR-22, R.2.** Collectors seeking an example of the Reeded Edge half dollar subtype with the denomination expressed as 50 CENTS usually opt for the 1837 issue, because the 1836 is more elusive and expensive. This sharply detailed Choice example features prooflike surfaces that show only minor signs of contact, under shades of lavender and champagne-gold toning. Census: 95 in 64 (1 in 64+), 56 finer (9/14). NGC ID# 24G4, PCGS# 6176

**4276 1838 AU55 PCGS. Gold CAC. GR-4, R.1.** Cobalt-blue and russet-brown toning embrace the peripheries of this precisely struck Reeded Edge half. Unabraded aside from a few thin marks on the cheek. Awarded the seldom-seen CAC gold label, suggesting the coin deserves a grade of at least one level higher. Ex: Long Beach Signature (Heritage, 6/2011), lot 8227; Chicago CSNS Signature (Heritage, 4/2013), lot 2171. NGC ID# 24G5, PCGS# 6177

#### 1839-O/O GR-1 Half Dollar, AU55 Very Late Die State

**4277 1839-O/O AU55 ANACS. GR-1, R.1.** The late die state with many heavy and interesting cracks on both sides. Lemon-gold and orange toning visits the reverse field and the obverse margin. Powder-blue and aquamarine also enrich the reverse. Although this die pair is the most common of the 1839 New Orleans issue, the multiple die cracks and repunched mintmark always attracts Reeded Edge specialists. NGC ID# 24G7, PCGS# 6181

## SEATED HALF DOLLARS

- 4278 1839 Drapery MS62 PCGS. WB-102.** A pleasing lower-grade Mint State example of the With Drapery variant. Wisps of light golden color accent satiny luster on each side, while the devices are well-struck and grade-limiting abrasions are minimal. Population: 11 in 62, 30 finer (10/14). NGC ID# 24GL, PCGS# 6232

### 1842 Half Dollar, MS64 WB-105, Tripled Date Variety

- 4279 1842 Medium Date MS64 PCGS. WB-105, Tripled Date.** The date is noticeably recut north, with at least three impressions visible. This example displays rich satiny luster with peripheral toning in shades of lemon-gold, amber-red, and pine-green. The eagle's left (facing) leg is slightly soft, though the strike is otherwise pleasing. From a late die state, as evidenced by heavy peripheral die cracks on the reverse, including a tiny rim cud above the first A in AMERICA. As a date, the 1842 half is scarce in all Mint State grades, and genuinely rare finer than the present example. Population: 18 in 64, 3 finer (9/14). NGC ID# 27ST, PCGS# 6239
- 4280 1842 Medium Date, Repunched Date, FS-301, WB-105, MS62 NGC.** The date is repunched south, particularly evident on the 8 and 4. Ocean-blue and chestnut-gold toning invigorates this semiprooflike and well struck Seated half. A loupe is required to locate the moderate field abrasions. PCGS# 413710
- 4281 1842-O Small Date, Small Letters VG10 NGC. WB-101, Die Pair 2, R.5.** Much scarcer than its Large Date, Large Letters 1842-O successor. A moderately abraded stone-gray example. The legends are bold, the stars are well outlined, and partial plumage and drapery detail confirms the designated grade. NGC ID# 24GV, PCGS# 6238

### 1844-O Seated Half, MS63 Ex: Eliasberg

- 4282 1844-O MS63 PCGS. CAC. WB-102, Die Pair 5, R.2. Ex: Eliasberg.** Although not plated in the auction catalog, the description is detailed and identifies this coin as lot 1928 from the 1997 Bowers and Merena Eliasberg sale: "1844-O MS-63, prooflike. A very splendid coin with virtually full Proof surfaces including within the shield stripes...the specimen is a spectacular representative of the date and mint." This coin is indeed prooflike on both sides, with intermittent gold, blue, and umber toning. The strike is bold except on stars 7 and 8. A lustrous and Select coin, with a rich pedigree. Population: 9 in 63, 6 finer (9/14). NGC ID# 24H2, PCGS# 6246

- 4283 1845-O Repunched Date, FS-303, MS63 PCGS. CAC. WB-108, Die Pair 1, R.2.** The date is repunched west. The *Cherrypickers'* variety is undesignated on the PCGS insert. Splashes of rich orange and lilac toning endow this prooflike New Orleans half dollar. A minimally abraded and pleasing example. PCGS# 409886

### 1850-O Half Dollar, MS64+ Full Strike, Well Preserved

- 4284 1850-O MS64+ PCGS. WB-101, Die Pair 7, R.3.** Light caramel-gold and pearl-gray toning visits this lustrous and beautiful near-Gem. Sharply struck and exceptionally free from marks. An early die state without any cracks. An outstanding No Motto New Orleans type coin. Population: 28 in 64 (2 in 64+), 6 finer (10/14). NGC ID# 24HH, PCGS# 6265
- 4285 1857 MS64 PCGS. WB-101.** The 1857 Seated Liberty half dollar is a plentiful issue in circulated grades, but it becomes quite elusive in MS64 condition. This well-preserved Choice example offers well-detailed design elements and prooflike fields under attractive shades of greenish-gold and electric-blue toning. Population: 23 in 64, 7 finer (10/14). NGC ID# 24HS, PCGS# 6290

### 1861 Half Dollar, MS65 Excellent Type Representative

- 4286 1861 MS65 PCGS. WB-101.** The 1861 is one of the more plentiful Seated half issues of the period, partly due to a large mintage of nearly 2.9 million pieces. Mint State examples can be located with little difficulty in grades through MS64, though the date does become elusive in MS65, and is rarely seen finer. This Gem representative displays satiny original luster beneath shades of golden-gray and gunmetal-blue toning. A couple obverse stars a not fully defined, though the strike is otherwise crisp throughout. Population: 22 in 65 (1 in 65+), 16 finer (9/14). NGC ID# 24J7, PCGS# 6302

- 4287 1863-S AU58 PCGS. CAC. WB-102, Die Pair 3, R.3.** Dusky blended jade-green, autumn-brown, and lavender toning embraces satiny and moderately abraded surfaces. Although undesignated as such on the holder, the coin is ex: Eric P. Newman. A collector envelope and an AU58 NGC insert (both pedigreed to Newman) accompany the lot. Population: 22 in 58, 54 finer (10/14). NGC ID# 24JC, PCGS# 6310

**1871-CC Seated Half, XF45  
Semiprooflike Fields, Sharp Motifs**

- 4288 1871-CC XF45 PCGS. WB-101, Die Pair 2, R.4.** Mild gold accents enhance the silver-gray surfaces of this reflective, Choice XF half. The lightly toned devices retain nice detail for the grade. Mint luster remains in protected areas. The down-sloping Large CC mintmark helps identify the die pair for this Carson City issue, which is slightly more available than the surrounding dates from the Mint. Population: 17 in 45, 24 finer (9/14). NGC ID# 24K5, PCGS# 6331

- 4289 1875 MS64 PCGS.** Prominent clash marks appear along the right side of Liberty, and within the shield on this Choice Mint State 1875 half dollar. A trace of peripheral gold toning enhances the eye appeal of this brilliant and lustrous half dollar. Population: 43 in 64, 19 finer (10/14). NGC ID# 24KD, PCGS# 6349

**1875-S Seated Half, MS65  
Sharp and Attractive**

- 4290 1875-S MS65 NGC. WB-101, Die Pair Unlisted.** Very small S mintmark. Shades of gunmetal-blue, russet-red, and gold surround silver centers of this brilliant, frosted San Francisco half. Sharply lustrous and attractive, the strike is bold although the coin was struck from lapped dies, which imparted some weakness to the foot and foot support, the upper eagle's wings and scroll border, and to the tips of the outer olive leaves. Numerous die cracks further suggest a late state of the dies. While the 2009 Wiley-Bugert monograph illustrates 22 die pairs for the 1875-S halves, this example appears to be a 23rd pairing. Census: 30 in 65, 9 finer (9/14). NGC ID# 24KE, PCGS# 6351

**1877-CC Seated Half, MS64  
Bold, Brilliant-White Example**

- 4291 1877-CC MS64 PCGS. WB-104, Die Pair 12, R.3.** One of two repunched date varieties for this popular Carson City date, with the 77 repunched north and east to show the curves of the underdigit 7s beneath the primary numerals. A heavily cracked and clashed reverse die still delivered a bold strike. The obverse is equally bold with particularly well-struck stars and hair strands on Liberty. Brilliant, silver luster cascades across the surfaces in gleaming cartwheels. A small cloudy area near star 11 does not diminish the sharp appeal of this near-Gem half. Population: 45 in 64 (2 in 64+), 22 finer (9/14). NGC ID# 24KL, PCGS# 6356

- 4292 1877-S MS64 PCGS. CAC. WB-104, Unlisted Die Pair.** The pinkish-gray patina and a bold strike combine for great eye appeal on this near-Gem 1877-S half, from the enormous mintage of more than 5.3 million pieces. The mintage of half dollars would plunge in the following year, as San Francisco busied itself striking millions of Morgan dollars. A large amount of prooflike flash visits both sides, which mate the Wiley-Bugert Obverse 2 with Reverse S — unlisted in the 2009 *Register of Liberty Seated Half Dollar Varieties Volume 1* as a die pair. NGC ID# 24KM, PCGS# 6357

- 4293 1878-CC Good 4 PCGS. CAC. WB-101, Die Pair 1, R.4.** Honest wear is the determining factor for the assigned grade, because the surfaces are problem-free and a thick, old-silver patina provides a pleasing, two-tone appearance. The motifs are several shades lighter than the surrounding fields. A much-better Carson City date, scarce in all conditions. NGC ID# 24KP, PCGS# 6359

- 4294 1879 MS64 PCGS. WB-102.** The 1879 was the first of several low-mintage half dollar issues following the implementation of the Bland-Allison Act of 1878, which mandated that significant resources be exhausted in the production of millions of silver dollars annually. Only 4,800 pieces were struck, and Mint State survivors are heavily sought-after by collectors. This Choice example displays substantial semiprooflike mirroring in the fields, with sharp, softly frosted devices. Tinges of olive-gold and lavender-blue toning accent the peripheries, and intrude upon the reverse fields to a lesser degree. NGC ID# 24KS, PCGS# 6361

- 4295 1889 MS64 PCGS. CAC. WB-101.** Scarce in near-Gem condition as a business strike, this example is colorfully patinated and nearly mark-free beneath the toning. A short scrape above the L in HALF is the only notable abrasion. A bold strike complements sky-blue and rose toning. Just 12,000 coins were struck for circulation. Population: 47 in 64, 32 finer (10/14). NGC ID# 24L4, PCGS# 6371

**PROOF SEATED HALF DOLLARS**

- 4296 1859 PR63 PCGS.** Type One Reverse. Proofs with a Type Two Reverse are also known, and can be identified by the wider space between the tops of the LF in HALF. The present Select specimen is fully struck and exhibits light caramel-gold toning. Cameo contrast is noticeable, especially on the reverse, but the coin undesignated as such by PCGS. NGC ID# 27TJ, PCGS# 6413

- 4297 1860 PR63 PCGS.** This proof date saw a mintage of 1,000 pieces, and high-grade survivors are scarce. The current offering presents a sharply struck coin that is fully defined on all elements except for the eagle's left (facing) talons. Lightly toned and free of any mentionable surface distractions. NGC ID# 27TK, PCGS# 6414

**4298 1863 PR63 PCGS.** Shades of greenish-gold and cerulean-blue toning enhance the eye appeal of this sharply detailed Select example, with lightly marked reflective fields. From a small proof mintage of 460 pieces. Population: 52 in 63, 62 finer (10/14). NGC ID# 27TP, PCGS# 6417

**4299 1865 PR63+ Cameo PCGS.** Dramatic contrast between the central motifs and deep-mirrored fields give this attractive, Select proof considerable eye appeal. Cerulean-blue and orange-gold shades cover the rims and margins, framing brilliant, silver-white centers. This proof is fully struck with razor-sharp stars, hair detail, and the eagle's plumage. A few swirling lines define the assigned grade. Just 500 proofs were struck. Population: 14 in 63 (3 in 63+) Cameo, 37 finer (10/14). PCGS# 86419

#### 1866 Motto Half Dollar, PR64 Cameo Reflective and Well-Preserved

**4300 1866 Motto PR64 Cameo PCGS.** The 1866 proofs, struck to the extent of 725 coins, are perennially popular as the first year of the With Motto coinage (the unique No Motto half dollar dated 1866 is not a regular issue). This piece offers generous field reflectivity against frosted grayish devices. A small toning fleck appears in the right obverse field, but there are few signs of contact. Population: 14 in 64 (2 in 64+) Cameo, 8 finer (10/14). PCGS# 86424

**4301 1868 PR63 PCGS.** Warm champagne toning over the central regions deepens to rich orange-gold around the borders on this boldly struck Select proof. Ample mirroring is seen in the fields, though a few faint, parallel roller marks are noted above the eagle upon close examination. Population: 57 in 63, 41 finer (10/14). NGC ID# 27U3, PCGS# 6426

**4302 1873 No Arrows PR62 PCGS.** The strike definition of this example is uniformly razor-sharp throughout. The nicely preserved surfaces reveal few imperfections. All of the No Arrows proof quarters are of the Closed 3 date logotype, with a total mintage of 600 pieces. NGC ID# 27U8, PCGS# 6431

**4303 1876 PR64 PCGS. CAC. WB-101.** Attractive amber-gold patina provides excellent eye appeal for this deeply mirrored, near-Gem proof. Smokey orange accents at the margins add depth to the impressive coloration, and the motifs are fully struck. CAC-endorsed for high quality. Population: 35 in 64, 22 finer (10/14). NGC ID# 27UA, PCGS# 6437

**4304 1878 PR64 Cameo NGC. WB-101.** Watery-deep fields contrast with ivory-white, frosted motifs on this near-Gem Cameo half dollar. A reported mintage of 800 pieces shows fewer grading events than would be expected for the production, confirming that this is an underrated date in the series. Delicate hairlines are mostly invisible without a glass. Boldly struck. Census: 30 in 64 Cameo (1 in 64+ Cameo, 1 in 64 ★ Cameo), 28 finer (10/14). PCGS# 86439

**4305 1879 PR63 PCGS.** Considerable unmentioned field-device contrast is among the lures of this moderately toned Select 1879 proof half dollar, just a few stray contact marks away from a higher grade. Numismatists know that both the proof and business complements were low for the issue — 1,100 proofs and 4,800 business strikes. NGC ID# 27UE, PCGS# 6440

**4306 1883 PR64 Cameo PCGS.** Subtle light gold color is present on this attractive near-Gem displaying a pleasing level of contrast. As-made lintmarks appear at the D in DOLLAR. A popular proof issue, due to the scarcity of high-grade business strike examples. Population: 35 in 64 Cameo, 28 finer (10/14). PCGS# 86444

## BARBER HALF DOLLARS

**4307 1892-O MS64+ NGC.** The 1892-O is an important issue from a New Orleans mintage of only 390,000 first-year Barber half dollars. This Choice Mint State piece has frosty luster beneath gold and steel-blue toning. Census: 29 in 64 (1 in 64+), 19 finer (10/14). NGC ID# 24LG, PCGS# 6462

#### 1892-O Micro O Half, AG3 Missing From Most Collections

**4308 1892-O Micro O, FS-501, AG3 PCGS. CAC.** A nice, collectible example of this highly sought-after Barber half variety, in About Good condition over attractive medium-gray surfaces. As usual for well-circulated examples in this grade, the obverse rims are nearly full, while the reverse rims show much blending, particularly the upper portion. Most of the central details on the reverse and the crucial Micro O mintmark are well-preserved, and most of HALF DOLLAR is legible to full. Population: 10 in 3, 39 finer (9/14). PCGS# 391216

**4309 1893 MS63 PCGS. CAC.** A sharply struck example of this second-year issue, with natural pewter-gray coloration and full satiny mint luster. A group of scratch-like marks on the left reverse field appear to be as struck. Relatively few pieces are graded finer than MS63, at both services. NGC ID# 24LK, PCGS# 6465

**4310 1893 MS64 PCGS.** Satiny luster adds to the eye appeal of this near-Gem specimen. Colorful toning covers large portions of the obverse, with a lesser degree of toning present on the reverse. The colors include several shades of green, red-orange, peach, and cerulean-blue. The strike is sharp overall, adding to the attractiveness. Population: 37 in 64 (2 in 64+), 26 finer (10/14). NGC ID# 24LK, PCGS# 6465

**4311 1893-S — Cleaning — PCGS Genuine. Unc Details.** The 1893-S ranks among the rarest Barber half dollar issues, especially in Uncirculated grades. The present lustrous and nicely struck example displays peripheral russet and forest-green toning. A shallow strike-through is noted near the F in HALF. NGC ID# 24LM, PCGS# 6467

**4312 1895-O MS63 PCGS.** The 1895-O half dollar is a challenging issue in all Mint State grades, and is rarely seen above the MS63 level. This piece displays original golden-gray toning, with splashes of teal and olive also seen in the peripheral recesses. The eagle's right (facing) talons are not fully defined, but the strike is otherwise sharp. A small tick on the cheek near the nose is the only mark of note. Population: 18 in 63, 28 finer (10/14). NGC ID# 24LT, PCGS# 6472

**4313 1895-S MS64 PCGS.** The 1895-S Barber half dollar is a very scarce issue at the MS64 grade level. This sharply detailed Choice example displays lustrous lightly marked surfaces, with a few hints of apple-green and lavender-gray toning. Population: 35 in 64, 15 finer (10/14). NGC ID# 24LU, PCGS# 6473

**4314 1899-S MS62 PCGS.** Struck from a fresh die pair, as evidenced by the bold motifs and semiprooflike mirroring in the fields. Milky-gold toning blankets both sides, attesting to the originality of the surfaces, and the devices are unusually clean for the grade. Population: 9 in 62, 45 finer (9/14). NGC ID# 24M8, PCGS# 6485

**4315 1899-S MS62 PCGS.** Trivial surface marks on each side of this attractive Mint State Barber half dollar limit the grade. The design motifs are bold, and the luster is brilliant on untuned silver surfaces. NGC ID# 24M8, PCGS# 6485

**4316 1904-O MS61 PCGS.** Light chestnut toning graces the margins of this lustrous and refreshingly unabraded better date New Orleans half dollar. The strike is good, although blending is noted on the fletchings and right shield corner. Encased in an old green label holder. NGC ID# 24MN, PCGS# 6499

### 1906-S Half Dollar, MS64 Satin Original Luster

**4317 1906-S MS64 PCGS.** As is a common theme throughout the non-key-date issues in the Barber half dollar series, the 1906-S is marginally available in grades through MS64, but becomes rare at the Gem level. This Choice example displays satiny golden-gray luster over the centers, deepening slightly toward the peripheries. The lower eagle's feathers as well as a couple obverse stars are not fully defined, though the strike is otherwise appealing. No major abrasions are observed. Population: 46 in 64 (2 in 64+), 21 finer (9/14). NGC ID# 24MX, PCGS# 6507

**4318 1906-S MS64 PCGS.** The mostly brilliant, lustrous surfaces of this impressive Choice example are free of mentionable distractions and show a few hints of greenish-gold and pink toning. The design elements are sharply detailed and eye appeal is outstanding. Population: 46 in 64 (2 in 64+), 21 finer (10/14). NGC ID# 24MX, PCGS# 6507

**4319 1907 MS64 PCGS.** The mostly brilliant surfaces of this impressive Choice example display a few hints of pink and golden-tan toning, with vibrant mint luster and well-detailed design elements. Population: 70 in 64, 35 finer (10/14). NGC ID# 24MY, PCGS# 6508

**4320 1907-O MS64 PCGS.** The so-called "mumps" variety is due to the prominent die bulge on Liberty's neck, although "swollen lymph nodes" might be a better description. This Choice Mint State piece has brilliant silver luster with untuned surfaces. Population: 43 in 64 (1 in 64+), 22 finer (10/14). NGC ID# 24N2, PCGS# 6510

**4321 1910 AU55 PCGS.** A slightly better date, with a mintage of only 418,000 coins. This Choice AU example retains nearly complete detail and substantial original luster. Light golden toning accents each side. NGC ID# 24NB, PCGS# 6519

**4322 1910 MS63 PCGS.** Dusky golden-gray luster blankets each side, while the devices are boldly struck and there are no singularly mentionable abrasions. An undeniably original example of this conditionally elusive Philadelphia issue. NGC ID# 24NB, PCGS# 6519

**4323 1912-D MS64 NGC.** A sharply defined Denver Mint half dollar, this Choice Mint State piece has lovely deep gold toning on its lustrous gray surfaces. Plentiful at this grade level, the 1912-D is rare in finer grades. NGC ID# 24NH, PCGS# 6525

**4324 1912-D MS64 PCGS.** This Choice Mint State 1912-D half dollar is highly lustrous with exceptional eye appeal. Both sides have above average design definition, exhibiting brilliant, untuned silver surfaces. NGC ID# 24NH, PCGS# 6525

**4325 1913 MS62 PCGS.** Shades of lavender-gray and sea-green toning blanket the lightly marked surfaces of this MS62 Barber half dollar. The design elements are well-detailed, with just a touch of softness on some stars and the shield point. Population: 12 in 62, 67 finer (10/14). NGC ID# 24NK, PCGS# 6527

**4326 1915 MS63 PCGS.** Shimmering luster illuminates pale gold toning over each side, with a few deeper olive accents also seen in the peripheral recesses. The strike is well-executed and there are no individually bothersome abrasions. Population: 21 in 63, 47 finer (10/14). NGC ID# 24NR, PCGS# 6532

**4327 1915-S MS64 NGC.** The central silver-gray surfaces cede to deeper purplish-brown patina near the rims on each side of this near-Gem half dollar. The strike is bold, even on the pesky right shield corner, and there are few signs of contact. Census: 82 in 64, 52 finer (10/14). NGC ID# 24NT, PCGS# 6534

## PROOF BARBER HALF DOLLARS

### 1892 Barber Half, PR65 Outstanding Preservation and Eye Appeal

**4328 1892 PR65 NGC.** Always important as the first year of the Barber half series, one might expect the 1892 proof issue to have been saved in large numbers. Although more than half of the original mintage (1,245 pieces) has been graded by NGC and PCGS together, surprisingly few exist at the Gem level of preservation or finer.

This is an attractive coin that combines a high degree of technical merit with strong visual appeal. It is fully struck and well-preserved, with minimal surface flaws and essentially untuned surfaces. Census: 44 in 65 (2 in 65 ★), 51 finer (10/14). NGC ID# 24NU, PCGS# 6539

### 1892 Barber Half, PR64+ Deep Cameo Glassy Silver Mirrors, Bold Contrast

**4329 1892 PR64+ Deep Cameo PCGS.** A slight hint of clear, russet-red toning at the margins and a whisper of almond-gold color on Liberty's portrait confirm the originality of this glittering proof half dollar. Strong contrast separates the motifs from the glassy-deep mirrored fields. This coin is extremely close to full Gem quality, a scarce coin as a first-year proof in this grade. Population: 3 in 64 (1 in 64+) Deep Cameo, 15 finer (10/14). PCGS# 96539

- 4330 1893 PR64 Cameo NGC.** This near-Gem specimen has unusual but thoroughly pleasing patina, pale gold-gray overall with slight hazing toward the rims. This toning does not interfere with the coin's remarkable contrast, dimming neither the strong mirrors nor the frosty texture of the devices. Census: 26 in 64 Cameo (1 in 64+ Cameo), 46 finer (10/14).  
Ex: *Houston Signature (Heritage, 12/2009)*, lot 790. PCGS# 86540

**1895 Barber Half, PR65  
Extremely Well Produced**

- 4331 1895 PR65 NGC.** Chalk it up to the vagary of numismatics that this 1895 proof half dollar has the identical mintage to the 1895 Morgan dollar proof issue, yet its value in Gem condition is at least 2,000 times less. A few delicate hairlines are microscopic and non-distracting, and the strike is amazingly full on the eagle. An untoned, brilliant proof — lightly contrasted — of full Gem quality. NGC ID# 24NX, PCGS# 6542

- 4332 1900 PR64 PCGS.** Deep copper and magenta hues occupy both sides of this near-Gem proof, intermingling on the lower obverse with possible signs of an old fingerprint. The details are fully struck up throughout, save for at the right shield corner. Population: 56 in 64, 57 finer (10/14). NGC ID# 24P4, PCGS# 6547

- 4333 1901 PR63 PCGS.** An impressive Select proof, this 1901 represents the first year of the third Mint in Philadelphia. Both sides have bold design motifs that exhibit slight contrast. Faint hairlines prevent a higher grade. NGC ID# 24P5, PCGS# 6548

**1902 Barber Half Dollar, PR66  
Attractive Multicolor Toning**

- 4334 1902 PR66 PCGS.** Attractive shades of lavender, blue, and pale gold toning blanket the well-preserved surfaces of this spectacular Premium Gem. The design elements are sharply detailed and the fields are deeply reflective, under the patina. From a proof mintage of 777 pieces. Population: 28 in 66 (2 in 66+), 6 finer (10/14). NGC ID# 24P6, PCGS# 6549

- 4335 1909 PR64 PCGS.** A limited mintage of 650 proof half dollars was accomplished in 1909, and high-grade survivors are elusive. This Choice example shows pale golden toning over each side, with deeply mirrored underlying fields and boldly impressed devices. NGC ID# 24PD, PCGS# 6556

**1913 Barber Half, Toned PR64**

- 4336 1913 PR64 PCGS.** A strong gold-to-gray overtone graces this late-date proof Barber half, while a few small splashes of teal and lavender are also present. Reflectivity remains beneath the patina, particularly on the reverse, and the strike is crisp throughout. From a mintage of only 627 pieces. Population: 64 in 64 (1 in 64+), 57 finer (9/14). NGC ID# 24PH, PCGS# 6560

**WALKING LIBERTY HALF DOLLARS**

**1916-D Half Dollar, MS66  
Sought-After First-Year Denver Issue**

- 4337 1916-D MS66 PCGS.** The 1916 issues are among the most elusive and sought-after dates in the series in high grades, particular above the Gem level. While the San Francisco issue is the scarcest in these grades, the Denver variant is a firm second. This Premium Gem example displays the shimmering, satiny luster that is characteristic of the 1916 issues, with nearly undisturbed surfaces and unusually sharp definition on the gown stripes and Liberty's branch hand. A faint blush of lavender-gold toning graces each side. Population: 66 in 66 (1 in 66+), 3 finer (9/14). NGC ID# 24PM, PCGS# 6567

- 4338 1916-D/D FS-501 MS61 ANACS.** The mintmark is repunched southwest. Among the more popular Walking Liberty die varieties, although any Uncirculated 1916-D half is desirable, due to its low mintage. A lustrous and well struck stone-white example. Minor grazes are relegated to the right obverse field. PCGS# 145780

- 4339 1916-S MS63 PCGS.** An attractive lower-grade Mint State example of this first-year San Francisco issue. Soft, satiny luster illuminates dusky golden patina over each side, while the surfaces show remarkably few abrasions for the grade. The strike is sharp, with moderate head detail and virtually complete thumb separation. NGC ID# 24PN, PCGS# 6568

- 4340 1917 MS65 PCGS. CAC.** The 1917 half dollar is one of the more plentiful issues from the early part of the Walking Liberty type, but is seldom available in Gem and finer grades. This example displays iridescent golden-blue luster, with deeper russet and olive hues also seen in the border recesses. NGC ID# 24PP, PCGS# 6569

**4341 1917-D Obverse MS64+ NGC.** Most of a split thumb and generous detail on Liberty's head appear on this lightly patinated 1917-D half dollar. A few stray contact marks are in concert with the grade but far from distracting. A nice addition to a complete set of the early dates in this popular series. NGC ID# 24PR, PCGS# 6570

**1917-D Half Dollar, MS64  
Reverse Mintmark Variant**

**4342 1917-D Reverse MS64 PCGS.** Full thumb separation attests to the sharp strike of this Choice example. Pale golden luster delivers a matte-like appearance when turned in-hand, and only a few minor ticks limit the numeric grade. The 1917-D Reverse Mintmark issue is a conditionally elusive date in MS64, and PCGS has certified only 48 numerically finer examples (10/14). NGC ID# 24PS, PCGS# 6571

**1918 Walking Liberty Half, MS65  
Outstanding, Highly Attractive Example**

**4343 1918 MS65 PCGS.** This Gem represents the first year of the Walking Liberty half series to be produced with only the reverse mintmark type, and it is a remarkably attractive specimen of this early date. The strike definition is essentially full on both sides, including Liberty's branch hand, and vibrant mint luster radiates across clean, beautifully preserved surfaces. A partial blanket of speckled golden-brown and olive patina over both obverse and reverse confirms the originality of this outstanding example. NGC ID# 24PV, PCGS# 6574

**1918 Half Dollar, MS65  
Fully Outlined Thumb**

**4344 1918 MS65 PCGS. CAC.** This impressive early Walking Liberty half dollar has brilliant silver surfaces with frosty luster and a sharp strike, including an outlined thumb at the center of the obverse. Iridescent hints add to the eye appeal. PCGS has only certified eight finer examples of this important issue (10/14). NGC ID# 24PV, PCGS# 6574

**4345 1918-D AU58 NGC.** The 1918-D half dollar is frequently found with a poor strike, and this is evident to a certain degree on the present coin, with softness on the eagle's leg and Liberty's thigh. However, substantial original luster and soft golden toning heighten the visual appeal, giving the coin an overall pleasing appearance for the grade. NGC ID# 24PW, PCGS# 6575

**4346 1918-S MS63 PCGS.** A few noticeable marks appear on Liberty's midsection and lower gown and in the right field that determine the grade on this semikey date. Well-frosted surfaces show sprinkles of cinnamon patina around the perimeter with generous eye appeal and a bold strike, including a partial split thumb and ample head detail. NGC ID# 24PX, PCGS# 6576

**1918-S Walking Liberty Half, MS64  
Strike-Challenged Issue, Rare When Finer**

**4347 1918-S MS64 PCGS.** With Gem examples in short supply and higher-graded coins virtually unobtainable, near-Gem representatives of this challenging San Francisco date constitute the preferred grade level for many collectors. Swirling silver luster shines across satiny, minimally marked surfaces of this glowing Walker. The slight weakness of strike at the centers is less severe than often seen, and the coin's bold eye appeal is undeniable. NGC ID# 24PX, PCGS# 6576

**1918-S Half Dollar, MS64  
Optimum Collecting Grade**

**4348 1918-S MS64 PCGS.** Although Choice Mint State 1918-S half dollars are encountered in the marketplace from time to time, finer examples are elusive, with only 35 higher grade PCGS submissions (10/14). For that reason, MS64 is considered the optimum collecting grade for this issue. This example has brilliant silver luster with delicate iridescent toning and strong design motifs. NGC ID# 24PX, PCGS# 6576

**4349 1919-D XF45 PCGS.** Similar to its quarter dollar counterpart, the 1919-D half dollar is an elusive semikey date in the Walking Liberty half series, and is actively collected in all grades. This example displays original battleship-gray patina, with pleasing eye appeal. Slight high-point wear is present, though much of the central weakness is due more to strike deficiency. NGC ID# 24PZ, PCGS# 6578

**4350 1920 MS64 PCGS.** Tinges of blue and violet accent luminous golden-gray luster on each side of this Choice representative. Some minor striking softness is noted on Liberty's head and thigh, but partial thumb separation remains. No detracting abrasions are observed, leaving this piece with substantial eye appeal for the grade. Finer examples are seldom encountered. NGC ID# 24R3, PCGS# 6580

**1920 Half Dollar, MS65**  
**Elusive Philadelphia Issue in High Grades**

- 4351 1920 MS65 PCGS.** Satiny luster illuminates subtle hues of light golden toning on each side, while the surfaces are free of any major abrasions. The central regions exhibit slight striking weakness. The 1920 half dollar can only be considered available in MS64 and lower grades; Gems are scarcely encountered, and finer pieces are rare. PCGS has certified only 24 coins numerically finer than this example (9/14). NGC ID# 24R3, PCGS# 6580

**1921-S Walking Liberty Half, XF40**  
**Smooth, Unmarked Surfaces**

- 4352 1921-S XF40 PCGS.** In one of the quirks of the Walking Liberty series, the 1921-S is less highly valued in conditions up to VF than its Philadelphia or Denver counterparts, but that changes dramatically starting at the XF level. Few examples exist in XF or finer condition to satisfy the legions of Walker enthusiasts. This example displays soft, pearl-gray surfaces and virtually mark-free surfaces. The rims are perfect. NGC ID# 24R8, PCGS# 6585
- 4353 1929-S MS64 PCGS. CAC.** Vibrant mint luster radiates from both sides of this attractive Choice example, with a few specks of amber toning and only minor signs of contact. The design elements are well-detailed and the overall presentation is quite pleasing. NGC ID# 24RD, PCGS# 6590
- 4354 1929-S MS65 PCGS.** This well-struck Gem example displays frosty silvery-gray luster over much of the obverse, with a deep amber and olive-gold crescent around the right-hand margin. The reverse is lightly bathed in pale olive-gold and lavender-brown color. Partial thumb separation is seen on Liberty's branch hand, though the eagle's rear leg is lacking slightly in striking sharpness. PCGS has certified 46 numerically finer representatives (9/14). NGC ID# 24RD, PCGS# 6590
- 4355 1933-S MS64 NGC.** Fully struck design elements are the hallmark of this Choice 1933-S Walker. Original, frosty luster highlights splashes of olive and russet over pale champagne surfaces. No obvious abrasions are observed on either side. NGC ID# 24RE, PCGS# 6591

**1933-S Half Dollar, MS65**  
**Razor-Sharp and Highly Lustrous**

- 4356 1933-S MS65 PCGS.** Half dollar production was suspended after the stock market crash of 1929, and did not resume until 1933 when only the San Francisco Mint struck a small total of just over 1.7 million coins. This is a remarkably lustrous and well-struck representative, justly rewarded with a Gem assessment by PCGS. Slight amounts of light toning adorn the impressively preserved surfaces. NGC ID# 24RE, PCGS# 6591

**1933-S Half Dollar, MS66**  
**Boldly Struck Throughout**

- 4357 1933-S MS66 PCGS.** Flecks of purple-umber patina float on the vibrant silver surfaces of this attractive, boldly struck half. Following a three-year halt after the stock market crash of 1929, half dollar coinage resumed in 1933, but only at the San Francisco mint. Surprisingly, this issuance contained some of the sharpest strikes in this denomination since the beginning of Weinman's Walking Liberty design in 1916. This frosty Premium Gem is a prime example, with full thumb separation, gown lines, and eagle feathers. Dappled blue-gray toning accents pale ice-blue patina on each side, with no significant surface abrasions present. Just 10 examples have graded numerically finer at PCGS (9/14). *Ex: Central States Signature (Heritage, 5/2005), lot 7405.* NGC ID# 24RE, PCGS# 6591
- 4358 1934 MS67 PCGS.** Frosty, well-struck surfaces on this Superb Gem show a full split thumb, generous head detail, and full skirt lines, a coin verging on a full strike. Lovely cinnamon and amber rim patina and a paucity of contact complete the broad eye appeal. PCGS reports only eight numerically finer (10/14). NGC ID# 24RE, PCGS# 6592

**1934 Walker, MS67+  
Exceptional Eye Appeal**

- 4359 1934 MS67+ PCGS. CAC.** Light golden-orange patina encompasses the peripheries, while the remaining surfaces retain their brilliance. Liberty's head, branch hand, and skirt lines show above-average definition, and the eagle's breast and leg feathers are mostly distinct. This lustrous, near-flawless Superb Gem offers exceptional visual appeal. PCGS has seen only eight coins in higher numeric grades (10/14). NGC ID# 24RF, PCGS# 6592

- 4360 1934-D MS66 PCGS.** Small D. A lustrous high grade half dollar with occasional freckles of mahogany-red over otherwise silver-white surfaces. A sharp impression with pleasing definition on Liberty's thumb and skirt lines. PCGS has graded only four pieces as MS67 or better (10/12).  
*Ex: FUN Signature (Heritage, 1/2005), lot 7705, which realized \$2,300. NGC ID# 24RG, PCGS# 6593*

**1934-S Walker, MS65  
Better S-Mint Issue in Mint State**

- 4361 1934-S MS65 PCGS.** This San Francisco issue is not as poorly struck in general as are some previous dates from this mint, but the availability of such pieces at the Gem level is impeded by a limited population of high-grade survivors. This boldly struck representative displays rich satiny luster beneath blended gold and amber hues. A few grade-consistent ticks are observed upon close examination. NGC ID# 24RH, PCGS# 6594

**1934-S Half Dollar, MS65  
Dappled Toning**

- 4362 1934-S MS65 NGC.** Dappled gold, heather, and steel toning appear on both sides of this lovely Gem, with underlying frosty silver luster and a bold strike. The 1934-S is an important issue in the "short set" of Walking Liberty half dollars, including all issues from 1934 to 1947. NGC ID# 24RH, PCGS# 6594

**1934-S Half Dollar, MS66  
Bold Strike**

- 4363 1934-S MS66 PCGS.** This stunning Premium Gem is highly lustrous, displaying brilliant silver surfaces with no evidence of toning on either side. A bold strike adds to the aesthetic appeal of this example. PCGS has only certified seven finer submissions of this scarce issue (10/14). NGC ID# 24RH, PCGS# 6594

- 4364 1935-D MS65 PCGS.** A visually pleasing satiny Gem example from Denver. Deep russet-red and gold-brown toning is prominent over the left side of the obverse, while the remaining surfaces are untuned. The centers are softly struck, while the coin is well-preserved overall and free of all but a few trivial nicks. NGC ID# 24RK, PCGS# 6596

**1935-S Half Dollar, MS66**

- 4365 1935-S MS66 PCGS.** Although quite a number of similar pieces have been submitted to PCGS, finer examples are rarely encountered, with only three higher grade PCGS certified examples (10/14). This beautiful Premium Gem has frosty silver luster and an above average strike, with a few splashes of gold toning. NGC ID# 24RL, PCGS# 6597

- 4366 1937 MS67 PCGS. CAC.** Satiny mint bloom exhibits wisps of light golden color and carefully preserved surfaces on each side of this Superb Gem example. The strike is bold throughout and the corresponding eye appeal is substantial. Only five coins are numerically finer at PCGS (10/14). NGC ID# 24RR, PCGS# 6601

- 4367 1937-D MS66+ PCGS.** The 1937-D is a better date in the Middle series, and this high-end Premium Gem displays well-detailed design elements and brightly lustrous surfaces with no mentionable distractions. PCGS has graded 49 numerically finer examples (10/14). NGC ID# 24RS, PCGS# 6602
- 4368 1937-D MS66+ PCGS. CAC.** Swirling hues of lemon-gold, ice-blue, and silvery-lavender grace richly lustrous surfaces on each side of this high-end Premium Gem example. The strike is bold with substantial thumb separation, and the surfaces are free of any obvious abrasions. PCGS has certified only 49 numerically finer representatives (9/14). NGC ID# 24RS, PCGS# 6602
- 4369 1937-S MS66+ PCGS.** Luminous champagne toning graces frosty, beautifully preserved surfaces on each side of this high-end Premium Gem. The strike is sharp on Liberty's head and branch hand, and the surfaces reveal only a few faint luster grazes on the high points of the design. PCGS has encapsulated 34 numerically finer representatives (10/14). NGC ID# 24RT, PCGS# 6603

**1937-S Half Dollar, Lustrous MS67  
Strike-Challenged Issue  
None Certified Finer**

- 4370 1937-S MS67 PCGS.** Many lustrous and attractive examples of this San Francisco date fail to make the grade due to central weakness of strike. This example, although less than fully struck, is better detailed than most. Wonderfully smooth fields radiate mint bloom and the deep, abiding luster flatters the brilliant-silver surfaces. A few wisps of lemon-gold toning complete the exceptional appeal. Population: 34 in 67 (2 in 67+), 0 finer (10/14). NGC ID# 24RT, PCGS# 6603
- 4371 1938 MS67 NGC.** Bright frosty luster emanates from both sides of this wonderful Superb Gem. Sharply struck design elements include strong definition on Liberty's head, branch hand and skirt lines, and the eagle's breast feathers. Even the eagle's trailing leg displays considerable detail. Nicely preserved throughout. The 1938 is one on the "Middle Date" (1934-1940) Walker issues. Census: 37 in 67, 1 finer (10/14). NGC ID# 24RU, PCGS# 6604
- 4372 1938-D MS65 PCGS.** The 1938-D is an important semikey issue with a mintage of only 491,600 coins. This Gem example boasts frosty golden-gray luster and carefully preserved surfaces. Liberty's head is well-detailed, and partial thumb separation is seen on the branch hand. NGC ID# 24RV, PCGS# 6605
- 4373 1939 MS67+ PCGS. CAC.** A bold strike and exceptional preservation warrant both the Plus designation and the green CAC label for high-end quality. Both sides are uniformly brilliant in the center, with softly blended lemon-gold, olive, and lavender-pink toning around the periphery. PCGS has certified only 24 numerically finer representatives (9/14). NGC ID# 24RW, PCGS# 6606
- 4374 1939-S MS67 PCGS. CAC.** Both sides of this Superb Gem are brilliant, displaying frosty silver luster with no toning. A splendid specimen, tied for the finest certified at PCGS or NGC (10/14). NGC ID# 24RY, PCGS# 6608
- 4375 1940 MS67+ PCGS. CAC.** Vibrant russet-red and burnt-orange toning decorate the peripheries of this sharply struck Superb Gem example. Liberty's thumb displays nearly full separation. Satin luster illuminates clean, well-preserved surfaces. Population: 21 in 67+, 24 finer (10/14). NGC ID# 24RZ, PCGS# 6609

- 4376 1940 MS67+ PCGS. CAC.** The 1940 is one of the more common issues among the "Common Date" Walkers. This high-end Superb Gem displays touches of light golden-tan color on its highly lustrous surfaces. Sharply struck design features and impeccable preservation further contribute to the coin's outstanding eye appeal, aptly recognized by CAC. NGC ID# 24RZ, PCGS# 6609
- 4377 1940-S MS66+ PCGS.** Flashy, well-preserved surfaces yield wisps of lemon-gold toning around the peripheries, giving this Plus-graded piece substantial visual appeal. The strike is sharp, with partial thumb separation on Liberty's branch hand. Only 11 coins are numerically finer at PCGS (10/14). NGC ID# 24S2, PCGS# 6610
- 4378 1940-S MS66+ PCGS. CAC.** An outstanding representative of this San Francisco Mint issue, and conditionally scarce at this elevated grade level. Splendid eye appeal is generated by the intense, shimmering mint luster and gorgeous obverse peripheral toning. Boldly struck and well-preserved. Population: 29 in 66+, 11 finer (10/14). NGC ID# 24S2, PCGS# 6610
- 4379 1941 MS67+ PCGS. CAC.** This gorgeous Walking Liberty half dollar displays delicate champagne and pale blue toning on the obverse. The reverse of this brilliant Superb Gem is untuned. The 1941 is rarely found in finer grades, with just 19 better pieces certified at PCGS. NGC ID# 24S3, PCGS# 6611
- 4380 1942-S MS66+ PCGS. CAC.** Small S. A prooflike and well-preserved wartime Walker that boasts an above average strike on Liberty's head and skirt lines. Dappled golden-brown, ruby-red, and sea-green visit the peripheries. NGC ID# 24S8, PCGS# 6617
- 4381 1946 Doubled Die Reverse, FS-801, MS65 PCGS.** Bold die doubling is seen on the eagle's feathers, branch, and E PLURIBUS UNUM. This is one of the most popular doubled die varieties in the series, as the doubling is visible even to the unaided eye. This Gem example displays a sharp strike, including partial thumb separation, and satiny, well-preserved surfaces. A faint blush of light golden color warms each side. Population: 25 in 65, 10 finer (9/14). PCGS# 145152

**PROOF WALKING LIBERTY  
HALF DOLLARS**

- 4382 1940 PR68 NGC.** A fully struck and flawless specimen with flashy fields and radiant motifs. Light gold, rose, and apple-green toning graces the borders. The designer's monogram was lapped away during die preparation, then entered by hand on the reverse die by a Mint worker, reminiscent of the FS-901 1944-D. *Ex: Dallas Signature (Heritage, 10/2009), lot 791, which realized \$2,875.* NGC ID# 27V8, PCGS# 6640
- 4383 1942 PR67+ PCGS. CAC.** Light contrast is detected between the fields and devices on this brilliant and untuned Superb Gem proof. An outstanding example for a specialized collection or type set. PCGS has only certified 47 submissions in higher grades (10/14). NGC ID# 27V9, PCGS# 6642
- 4384 1942 PR68 NGC.** Brilliant throughout and hairline-free, the surfaces are essentially perfect. Additionally, the devices show just the slightest bit of mint frost which gives the coin a modest cameo effect, not enough to warrant a Cameo designation perhaps, but enough to add to this coin's eye appeal and desirability. NGC ID# 27V9, PCGS# 6642
- 4385 1942 PR68 NGC.** A seemingly pristine, deeply mirrored proof with subtle field-device contrast. The strike is full and the eye appeal is simply immense. No traces of toning are observed on either side. Census: 183 in 68 (1 in 68+, 16 in 68 ★), 4 finer (10/14). NGC ID# 27V9, PCGS# 6642

## FRANKLIN HALF DOLLARS

- 4386 1948-D MS66+ Full Bell Lines PCGS.** This is a Registry-quality Premium Gem with Full Bell Lines and a Plus designation from PCGS. The lightly toned surfaces gleam with booming luster and the devices appear sharply detailed. Between the two major services, only one coin grades higher than the present offering (9/14). NGC ID# 24SS, PCGS# 86652

### 1949-D Franklin Half, MS66 Full Bell Lines Challenging Issue With a Full Strike

- 4387 1949-D MS66 Full Bell Lines PCGS.** This second-year issue from the Denver Mint had one of the lower business strike mintages in the Franklin half dollar series, at just over 4.1 million pieces. This lustrous, carefully preserved example is among the finer-graded pieces, as neither major service has rated any coins finer than MS66, with Full Bell Lines. A sharply struck Premium Gem with minimal surface marks and a slight degree of speckled dark-green and reddish-tan peripheral toning on each side. Population: 48 in 66 (3 in 66+) Full Bell Lines, 0 finer (9/14). NGC ID# 24SU, PCGS# 86654

### 1949-D Half Dollar, Toned MS66 Full Bell Lines

- 4388 1949-D MS66 Full Bell Lines PCGS.** Mint State Full Bell Line 1949-D Franklin half dollars are readily available through the Gem level of preservation, after which the population drops precipitously. The two major services have graded only 53 Premium Gems and none finer. Occasional freckles of russet and olive run over the obverse, while this color palette becomes more extensive on the reverse. Sharply struck and nicely preserved. Population: 48 in 66 (3 in 66+) Full Bell Lines, 0 finer (9/14). NGC ID# 24SU, PCGS# 86654

### 1949-D Franklin Half, MS66 Full Bell Lines None Certified Numerically Finer

- 4389 1949-D MS66 Full Bell Lines PCGS.** The 1949-D Franklin half is not overly elusive in Mint State with Full Bell Lines, but such pieces grading as high as this Premium Gem are. PCGS has certified just 48 examples in MS66 (3 in 66+), and none finer (9/14). This piece shows vibrant, frosty mint bloom, with crisp Full Bell Lines and just a trace of light golden color. A few insignificant grazes preclude an even finer grade, though these are nearly undetectable to the unaided eye. NGC ID# 24SU, PCGS# 86654

- 4390 1950 MS66+ Full Bell Lines PCGS. CAC.** Whispers of attractive reddish-gold, russet, and sky-blue visit the obverse of this high-end Premium Gem, while the reverse takes on soft champagne-gold hues. The sharply struck devices culminate in Full Bell Lines, and lustrous surfaces are nicely preserved. Rick Tomaska (2011) says of the MS66 Full Bell Lines Franklin: "Extremely Scarce. Because Mint sets were not issued in 1950, beautifully toned 1950-P Franklin halves are very rare in MS66 FBL ... and worth a considerable premium." This particular coin fits the bill perfectly. NGC ID# 24SW, PCGS# 86656

- 4391 1950-D MS66 Full Bell Lines PCGS. CAC.** Thickly frosted mint luster resides beneath a warm champagne veil on this Registry-quality Premium Gem example. The strike is bold, and a small mark near the H in HALF appears to be the only grade-limiting surface flaw. Population: 72 in 66 (7 in 66+) Full Bell Lines, 0 finer (10/14). NGC ID# 24SX, PCGS# 86657

- 4392 1952-S MS67 PCGS.** Vivid bands of amber-red, gold, forest-green, and violet toning encompass the reverse and spill over onto the obverse periphery, leaving the remainder of that side with a pale lavender-gold hue. The bell lines are not quite complete, but the strike is otherwise well-executed and the eye appeal is supreme. Population: 9 in 67 (1 in 67+), 0 finer (10/14). NGC ID# 24T5, PCGS# 6663

- 4393 1953-D MS66+ Full Bell Lines PCGS. CAC.** Frosty silvery-gold luster showcases splashes of cherry-pink, amber-orange, olive, and sun-gold toning on the reverse, with faintly dappled olive and maroon over the obverse. The strike is crisp and the preservation is excellent. PCGS has certified only two numerically finer representatives (9/14), making this Plus-graded example an important offering for the Registry Set collector. NGC ID# 24T7, PCGS# 86665

**1953-S Franklin Half Dollar, MS67  
None Numerically Finer at PCGS or NGC**

- 4394 1953-S MS67 PCGS.** A speckling of olive-gold toning covers the satin-smooth surfaces of this appealing Superb Gem Franklin half. Marks are limited to a few tiny ticks on the portrait and some minor grazes elsewhere on the coin, but the strike is bold and the overall quality is excellent for this low-mintage San Francisco issue. Population: 11 in 67, 0 finer (10/14). NGC ID# 24T8, PCGS# 6666

**1953-S Franklin Half  
Lustrous, Satin-Smooth Superb Gem**

- 4395 1953-S MS67 PCGS.** The fact that neither PCGS nor NGC have certified a numerically finer Franklin half from this San Francisco mintage is more a commentary on strike than surface quality or eye appeal. The 1953-S is known for weak strikes. The current MS67 coin is a gleaming, ivory-white example with abundant cartwheel luster and exceptionally smooth, satiny surfaces. The strike is far above average for the issue. Population: 11 in 67, 0 finer (10/14). NGC ID# 24T8, PCGS# 6666

**1954-D Half Dollar, MS66+ Full Bell Lines  
Few are Certified Finer**

- 4396 1954-D MS66+ Full Bell Lines PCGS. CAC.** A colorful iridescence accompanies olive-steel toning over the smooth, well-impressed surfaces of this lustrous Premium Gem half. As indicated by its Full Bell Lines designation, the strike is bold. Only an occasional minor mark visits the unbothered surfaces. A high-end coin, as indicated by the PCGS Plus designation and CAC approval. Just five coins are rated numerically finer by PCGS and NGC combined (10/14). NGC ID# 24TA, PCGS# 86668

- 4397 1954-S MS66 Full Bell Lines PCGS. CAC.** This piece represents an important opportunity for the Registry Set specialist, as PCGS has only certified one numerically finer example (9/14). Faint tinges of ice-blue and pale lavender color accent frosty mint luster on each side, while a deeper amber-gold crescent surrounds the obverse periphery from 7 to 2 o'clock. The strike is well-executed, with complete definition of the lower bell lines. NGC ID# 24TB, PCGS# 86669

- 4398 1955 MS66+ Full Bell Lines PCGS.** Dappled olive and amber-gold toning blankets both sides of this boldly struck Premium Gem. PCGS has awarded the Plus designation to just six MS66 examples, and a higher numeric grade to only two (9/14). NGC ID# 24TC, PCGS# 86670

**1955 Half Dollar, MS66+ Full Bell Lines  
Warm, Luminous Toning**

- 4399 1955 MS66+ Full Bell Lines PCGS. CAC.** Magnificently toned with mottled shades of copper-orange, cobalt-blue, and cherry-red. Vibrant cartwheel luster flows over well-preserved and sharply struck surfaces, affirming the CAC designation. PCGS has seen only two numerically finer Full Bell Lines examples (9/14). NGC ID# 24TC, PCGS# 86670

**1956 Franklin Half, MS67 Full Bell Lines  
Bold, Impressive Strike and Patina**

- 4400 1956 MS67 Full Bell Lines PCGS.** A vivid swath of orange toning ripples across the obverse of this dramatically patinated Franklin half. Sky-blue and amber-gold shades are less compelling but equally attractive. The reverse color complements the obverse, and a strong strike supports the Full Bell Lines designation by PCGS. Population: 18 in 67 (1 in 67+) Full Bell Lines, 0 finer (10/14). NGC ID# 24TD, PCGS# 86671

- 4401 1958-D MS67 Full Bell Lines PCGS. CAC.** Beautiful sky-blue and pale lavender hues encompass the central regions, while the peripheries exhibit bands of forest-green, amber-orange, and sun-gold toning. Radiant, frosty luster illuminates the patina on each side. This piece represents an important opportunity for the Registry Set specialist, as it is tied for the finest certified Full Bell Lines example at PCGS (9/14). NGC ID# 24TH, PCGS# 86675

**1959 Type Two Half Dollar  
MS66+ Full Bell Lines  
Attractive Border Toning**

**4402 1959 MS66+ Full Bell Lines PCGS. CAC.** Type Two Reverse. Magnificent cherry-red, lemon-gold, and apple-green toning adorns the margins of this lustrous high grade half dollar. The strike is bold and no marks are remotely consequential. Ideal for the competitive Registry Set. Population: 43 in 66 (3 in 66+) Full Bell Lines, 0 finer (10/14). NGC ID# 24TJ, PCGS# 86676

**4403 1961 MS65 Full Bell Lines PCGS.** A highly challenging Philadelphia issue with Full Bell Lines. This Gem example is boldly struck, with lightly dappled olive-green and lavender-gold toning. No marks of consequence are observed on either side. PCGS has certified only six numerically finer representatives (10/14). NGC ID# 24TN, PCGS# 86680

## PROOF FRANKLIN HALF DOLLARS

**1950 Franklin Half, PR67  
None Numerically Finer at PCGS**

**4404 1950 PR67 PCGS. CAC.** Medium-deep mirrors provide slight contrast with the minimally frosted motifs of this technically Superb Gem proof half. A few tiny glimpses of gold toning go virtually unnoticed amid the gleaming untuned, silver surfaces. CAC-endorsed for eye appeal and quality. Population: 41 in 67 (1 in 67+), 0 finer (10/14). NGC ID# 27VA, PCGS# 86691

**1950 Franklin Half Dollar, PR66 Cameo  
Elusive Contrasted Proof**

**4405 1950 PR66 Cameo NGC.** Hints of champagne toning reside at the borders of this impressive Premium Gem Cameo proof half dollar. The proof coins of 1950 are infrequently found with contrast, and these coins are in high demand. This example has fully mirrored fields that frame the lustrous devices. Census: 51 in 66 Cameo (1 in 66+ Cameo), 1 in 66 ★ Cameo, 13 finer (10/14). NGC ID# 27VA, PCGS# 86691

**1950 Franklin Half, PR66 Cameo  
Conditionally Scarce First-Year Proof**

**4406 1950 PR66 Cameo PCGS. CAC.** This was the first year of proof coinage since 1942, and half dollar production amounted to a meager 51,386 coins. Understandably, examples are scarce at all grade levels and those at the Premium Gem Cameo level are rare.

This razor-sharp specimen displays brilliant, flawlessly preserved surfaces that exhibit pleasing, mild contrast between lightly frosted devices and jet-black mirrored fields. Population: 34 in 66 Cameo, 9 finer (10/14). NGC ID# 27VA, PCGS# 86691

**1951 Half Dollar, PR67 Cameo  
Tied for the Finest Certified**

**4407 1951 PR67 Cameo NGC.** Early proof Franklins are rarely found with contrast, and this Superb Gem is tied for the finest certified 1951 Cameo proof. Both sides have exceptional field-to-device contrast with brilliant silver surfaces showing no toning. The strike is bold and the eye appeal is grand. Census: 24 in 67 Cameo (1 in 67 ★ Cameo), 0 finer (10/14). NGC ID# 27VB, PCGS# 86692

**4408 1953 PR67+ Cameo PCGS. CAC.** A starkly contrasted, Registry-quality Cameo, this Plus-grade Superb Gem displays thick mint frost over sharp, unmarked devices. Even upon close scrutiny it is difficult to find any technical or aesthetic flaws of any sort. PCGS has certified only seven numerically finer Cameos (10/14). NGC ID# 27VD, PCGS# 86694

**4409 1953 PR68 Cameo NGC.** The snow-white surfaces appear completely pristine on this Superb Gem, with deep field-device contrast, seemingly on the verge of an Ultra Cameo designation. One of the finest at either service. Census: 32 in 68 Cameo (1 in 68 ★ Cameo), 0 finer (10/14). NGC ID# 27VD, PCGS# 86694

**4410 1954 PR67 Ultra Cameo NGC.** Obvious contrast between the frosted devices and the darkly reflective fields confirms the Ultra Cameo designation. This Superb Gem has a lovely appearance, exhibiting a few small lint marks, as made. Census: 24 in 67 Ultra Cameo, 11 finer (10/14). PCGS# 96695

**4411 1955 PR68 Ultra Cameo NGC.** An impressive Superb Gem Ultra Cameo proof, this 1955 Franklin half dollar has splendid eye appeal. The deeply mirrored fields and brilliant, lustrous devices create black-and-white contrast. Census: 37 in 68 Ultra Cameo (3 in 68 ★ Ultra Cameo), 7 finer (10/14). NGC ID# 27VE, PCGS# 96696

**4412 1956 Type One, FS-901, PR68 Cameo PCGS.** The Type One reverse shows indistinct plumage on the small eagle on the reverse. A definite minority of 1956 proofs were struck from this reverse. This is an all-white, starkly contrasted cameo proof with deeply reflective fields. Population: 37 in 68 Cameo, 0 finer (10/14). PCGS# 510120

**4413 1956 Type One, FS-901, PR68 Cameo NGC.** Only about 5% of all proof 1956 half dollars are the Type One variety with low relief feathers on the eagle. These feathers were often lapped away during die preparation; the likely reason for the introduction of the Type Two design. The present Type One specimen is well struck, brilliant, and immaculate. PCGS# 510120

**4414 1956 Type Two PR69 Ultra Cameo NGC.** The ultimate grade for any proof Franklin half dollar. This impressive black-and-white proof has highly lustrous devices and deeply mirrored fields with extraordinary eye appeal. Census: 83 in 69 Ultra Cameo, 0 finer (10/14). NGC ID# 24TW, PCGS# 96697

---

**1957 Franklin Half, PR69 ★ Cameo  
Stark Field-Device Contrast**

**4415 1957 PR69 ★ Cameo NGC.** A pristine, snow-white specimen with impressive distinction between the frosted devices and the deeply reflective fields. 1957 proofs are plentiful if any specimen will do, but few are obtainable in the highest grades with evident contrast. Census: 27 in 69 Cameo (8 in 69 ★ Cameo), 0 finer (10/14). NGC ID# 24TX, PCGS# 86698

---

**1958 Ultra Cameo Half, PR68  
Challenging Date**

**4416 1958 PR68 Ultra Cameo NGC.** A stunning 1958 proof Franklin half dollar with fully brilliant, silver surfaces that are completely devoid of toning. Both sides have deeply mirrored fields that seem unending, serving as a nice frame for the extraordinary, highly lustrous devices. Census: 12 in 68 Ultra Cameo (2 in 68 ★ Ultra Cameo), 2 finer (10/14).  
Ex: FUN Signature (Heritage, 1/2009), lot 6074; Long Beach Signature (Heritage, 9/2009), lot 887. NGC ID# 27VH, PCGS# 96699

---

**1959 Half Dollar, PR68 ★ Cameo  
Tied for the Finest CAC Approved**

**4417 1959 PR68 ★ Cameo NGC. CAC.** Although NGC has certified five finer examples (10/14), this amazing Superb Gem Cameo proof is the finest to earn a CAC sticker. Both sides of this brilliant and untuned proof exhibit lustrous devices over fully mirrored fields with pristine surfaces. NGC ID# 27VJ, PCGS# 86700

**4418 1961 PR68 ★ Ultra Cameo NGC.** A brilliant and pristine specimen. Frosty devices and prominently mirrored fields ensure ideal eye appeal. Few 1961 proof halves exhibit comparable contrast. Census: 4 in 68 ★ Ultra Cameo, 5 finer (9/14). NGC ID# 24TZ, PCGS# 96702

---

**1962 Franklin Half, PR69 Ultra Cameo  
Among the Finest Certified**

**4419 1962 PR69 Ultra Cameo NGC.** This incredible Franklin half dollar is just one tick away from technical perfection, with richly frosted design elements that seem to float on the deeply mirrored liquid fields. The surfaces are flawless and completely brilliant, with stunning eye appeal. Census: 26 in 69 Ultra Cameo, 0 finer (10/14). NGC ID# 27VK, PCGS# 96703

**4420 1963 PR68+ Deep Cameo PCGS. CAC.** This amazing final-year Franklin half dollar has extraordinary field-to-device contrast with frosty and highly lustrous devices over deeply mirrored fields, resulting in a stunning black-and-white appearance. This is the only example of the grade to earn the PCGS Plus designation, with only 17 finer PR69 Deep Cameo coins (10/14). NGC ID# 27VL, PCGS# 96704

**1963 Franklin Half Dollar  
PR69 Ultra Cameo**

- 4421** 1963 PR69 Ultra Cameo NGC. This virtually perfect Ultra Cameo proof is tied for the finest certified, as no PR70 coins have ever been submitted to NGC or PCGS. Both sides are brilliant with amazing mirrored fields and highly lustrous devices. Census: 10 in 69 Ultra Cameo (1 in 69 ★ Ultra Cameo), 0 finer (10/14). NGC ID# 27VL, PCGS# 96704

**KENNEDY HALF DOLLAR**

- 4422** 1977 MS67+ PCGS. A must-have item for the Registry Set collector, this Superb Gem is one of just 40 MS67 examples certified at PCGS, and is one of only three to receive a Plus designation, with none finer (10/14). Warm golden toning complements radiant nickel-gray luster on each side, while the devices are bold and the surfaces are free of detectable abrasions. This piece also ranks nearly half of a grade point finer than the example in the current highest-rated Registry Set. NGC ID# 24UM, PCGS# 6731

**EARLY DOLLARS**

**1795 Flowing Hair Dollar, Fine 12  
Three Leaves, B-7, BB-18**

- 4423** 1795 Flowing Hair, Three Leaves, B-7, BB-18, R.3, Fine 12 PCGS. This moderately worn light gray silver dollar is an ideal type representative from a plentiful die pair. The obverse has a few splashes of deep steel toning, and both sides exhibit scattered, inconsequential marks that are consistent with the grade. PCGS# 39973

- 4424** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, PCGS Genuine. The PCGS number ending in .92 suggests cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VG specimen that has been cleaned. The pearl-gray surfaces are hairlined but lack noticeable abrasions. The wreath, stars, and legends are distinct, and the left wing displays considerable plumage definition. PCGS# 39977

**1795 Flowing Hair Dollar, Fine 15  
B-5, BB-27, Three Leaves Reverse**

- 4425** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1, Fine 15 NGC. Head of '95. By far the most plentiful Flowing Hair dollar variety with the signature "bar" in the left obverse field opposite star 5, near the uppermost hair curl. Bronzelike toning covers the surfaces, with the motifs several shades lighter for a two-tone patina. All of the devices are clear including the date and most of the dentils, except where the rims narrow due to a slightly off-center strike. A small planchet flaw (as made) is seen at 6 o'clock on the reverse. PCGS# 39977

**1795 Flowing Hair Dollar, VF Details  
Three Leaves, B-5, BB-27**

- 4426** 1795 Flowing Hair, Three Leaves, B-5, BB-27, R.1 — Environmental Damage — PCGS Genuine. VF Details. Bowers Die State II. Any early dollar specialist can attribute BB-27 upon first glance, due to the prominent "bar" or die line behind the highest neck curl. The present charcoal-gray representative displays minor granularity northwest of the eagle's head. The only mentionable abrasion is a slender mark near star 6. Nicely defined, particularly on the left (facing) wing. PCGS# 39977

- 4427** 1795 Draped Bust, Off-Center, B-14, BB-51, R.2 — Tooled — PCGS Genuine. VG Details. Bowers Die State I. The field near Liberty's nose appears smoothed, and the deep gunmetal-gray surfaces display a few pinscratches and scattered small abrasions. A couple of drops of residue are noted near star 12. A collectible example of the introductory Draped Bust variety. PCGS# 39996

- 4428** 1795 Draped Bust, Centered, B-15, BB-52, R.2 — Cleaned — ANACS. Fine 12 Details. Bowers Die State III. Apricot-gold and ice-blue shades adorn this early Draped Bust dollar. The eagle's wings display partial plumage definition, and Liberty's curls also show some inner detail. A minor flan flaw is noted near 4:30, and both sides are hairlined. PCGS# 39995

- 4429** 1798 Large Eagle, Pointed 9, Wide Date, B-20, BB-102, R.5, Fine 15 PCGS. Bowers Die State IV. A distinctive Bolender variety, due to the small die break above the date, and the much larger breaks through the RI in AMERICA and on the dentils below the tail. The cream-gray surfaces are lightly abraded and display minor obverse translucent residue. PCGS# 40019

- 4430** 1798 Large Eagle, Pointed 9, Wide Date, B-23, BB-105, R.3 — Scratch — PCGS Genuine. VF Details. Bowers Die State II. The date is wide with the 8 joined to the bust. A pleasing silver-gray example despite a few light pinscratches, one of which crosses the portrait at Liberty's neck. A small amount of mottled, deep gray toning sits among the right-side stars and around the date. PCGS# 40022

**4431** 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2 — **Cleaning** — PCGS Genuine. XF Details. Close Date, High 8. Silver-gray surfaces show light hairlines from the cleaning, yet a few hints of mint luster remain at the margins and among the protected areas of the central motifs. Stray abrasions and microscopic roughness dot the surfaces. Nice detail remains except for some weakness at the field stars. PCGS# 40030

1798 Draped Bust Dollar, XF40  
B-27, BB-113  
Large Eagle, Pointed 9, Close Date

**4432** 1798 Large Eagle, Pointed 9, Close Date, B-27, BB-113, R.2, XF40 PCGS. Bowers Die State II. The high 8 in the date leans to the right, one of seven uses of this obverse die for the date but a useful characteristic when paired with this fourth and final use of the reverse die, where the leaf tip points between the R and I of AMERICA. This is a two-tone dollar, with milky olive-bronze fields enlivened with lustrous gold accents on and around the devices. Sharp detail remains on both sides of the coin. Sharp-eyed observers will notice some hardened, clear residue above the reverse arrows near the lower left shield edge, but it does not detract from this attractive early dollar. PCGS# 40030

1798 Heraldic Eagle Dollar, XF40  
B-26, BB-114, Pointed 9

**4433** 1798 Large Eagle, Pointed 9, Close Date, B-26, BB-114, R.5, XF40 NGC. Bowers Die State V. A very scarce Bolender variety noteworthy for its lengthy reverse die cracks. Lavender, powder-blue, and stone-gray encompass the obverse while the reverse is olive-gold, golden-brown, and lilac. There are no marks of any import. The strike is sharp except on the eagle's neck and the central reverse stars. PCGS# 40031

**4434** 1798 Large Eagle, Pointed 9, Close Date, B-30, BB-116, R.5 — **Damage** — PCGS Genuine. VF Details. Bowers Die State IV. Rated as an R.5 variety in the 2013 Bowers *Encyclopedia* of early dollars. Deeply iridescent toning partially covers the margins on the obverse and entirely encircles the reverse with gunmetal blue and orange-gold shades. Nice detail remains on the motifs. Three or four isolated, worn pits and digs are seen on the portrait but they are in somewhat inconspicuous locations to account for the "Damage" noted on the holder. In addition, a few light scratches are seen below Liberty's chin and within the hair. Some mint luster remains. PCGS# 40033

**4435** 1798 Large Eagle, Pointed 9, Close Date, B-9, BB-121, R.4, VF30 PCGS. Bowers Die State II. Autumn-brown toning fills the borders and overlies portions of the stone-gray centers. A midgrade example of this scarcer variety Heraldic Eagle dollar. A strike-through (as made) is noted near the arrowheads, and a pair of adjustment marks (as coined) are present beneath Liberty's ear. A loupe confirms a small dig near obverse star 10 and a few minor rim dings. PCGS# 40038

1798 Heraldic Eagle Dollar, XF  
Pointed 9, B-9, BB-121

**4436** 1798 Large Eagle, Pointed 9, Close Date, B-9, BB-121, R.4, XF40 NGC. Bowers Die State II. Orange-red, lilac, and navy-blue toning encompass the obverse field. The portrait high points are stone-gray. The reverse displays hints of golden patina in design recesses. Abrasions are trivial aside from a minor reverse rim bump at 2:30. The lower reverse margin displays faint adjustment marks, as made. PCGS# 40038

1798 Dollar, VF25  
B-14, BB-122 Die Pair  
Claw Touches 'A'

**4437** 1798 Large Eagle, Pointed 9, B-14, BB-122, R.3, VF25 PCGS. Bowers Die State II. The BB-122 variety is the only 1798 die pair where the eagle's claw touches the second A of AMERICA. This nice VF example is one of several circulated early dollars from this consignor, and each has outstanding eye appeal for the collector of mid-grade Draped Bust dollars by date or variety. Despite moderate wear, mint luster shines in protected areas of the coin. Nice detail remains for the grade, and there are no large abrasions, marks, or rim problems. PCGS# 40039

**4438** 1799/8 13 Stars Reverse, B-1, BB-142, R.4, Good 6 PCGS. Bowers Die State III. Readily attributed by the obvious overdate, combined with an advanced die break near the I in AMERICA. This glossy silver dollar is mostly wheat-gold but has a forest-green streak across the lower obverse. Close inspection reveals occasional slight rim dings. PCGS# 40065

**4439** 1799/8 13 Stars Reverse, B-1, BB-142, R.4 — **Scratches** — NGC Details. VF. Bowers Die State III. A stone gray example of this scarce *Guide Book* variety. Pinscratches are noted near the right end of the eagle's banner, and to a lesser extent on the shield. A pair of faded vertical pinscratches is present on the field near the profile. The numbers "117" are lightly entered on the bust truncation. An edge flaw near 6 o'clock is of mint origin. PCGS# 40065

- 4440** 1799 7x6 Stars, B-7, BB-156, R.4, VG10 PCGS. Bowers Die State II. Most abrasions and marks are smoothed by normal wear throughout the surfaces of this silver-gray early dollar. A few deeper areas of charcoal gray appear at the margins and among the field stars. A well-centered example with adequate detail for the grade and no real distractions. A scarce, R.4 variety. PCGS# 40048

**1799 B-5, BB-157 Silver Dollar, XF40  
Late Die State**

- 4441** 1799 7x6 Stars, B-5, BB-157, R.2, XF40 PCGS. Bowers Die State IV. This is the scarce late die state with several reverse die cracks, including a vertical crack through the upright of the first T in STATES. An attractive example with heather-gray toning and ivory devices. Traces of luster remain with trivial hairlines and handling marks. PCGS# 40049

- 4442** 1799 7x6 Stars, B-5, BB-157, R.2 — Rim Damage — PCGS Genuine. XF Details. Bowers Die State III. A minor mint-made edge flaws is noted on the obverse at 6:30. A small rim ding is at 4:30 on the obverse, and the reverse border is moderately abraded at 3 o'clock. An intermittent diagonal scratch extends across the lower shield through the C in AMERICA. Otherwise, a pleasing cream-gray, powder-blue, and tan-gold example. PCGS# 40049

- 4443** 1799 7x6 Stars, B-12, BB-160, R.3, VF25 PCGS. Bowers Die State I, and very scarce as such. The obverse is cream-gray aside from a vertical streak of pearl-white from the 7 in the date to the R in LIBERTY. The reverse is deep steel-gray aside from lighter stone-white high points. Unblemished and impressive for the designated grade. PCGS# 40051

- 4444** 1799 7x6 Stars, B-12, BB-160, R.3 — Scratches — NGC Details. XF. Die State IV. The well-struck design elements exhibit only light wear, with strong detail remaining in Liberty's hair and the eagle's feathers. Pale lavender-gray toning encompasses much of each side, with deeper gunmetal-gray hues seen in the recesses. A few old pinscratches piercing the back of Liberty's head account for the Details grade from NGC. PCGS# 40051

- 4445** 1799 7x6 Stars, B-11, BB-161, R.3, VF25 ANACS. Bowers Die State III. A dusky cream-gray and almond-gold early dollar. Lightly abraded except for a rim ding above the B in LIBERTY. An unusually late (and unlisted) die state with a break below the eagle's beak. PCGS# 40052

- 4446** 1799 7x6 Stars, B-6, BB-162, R.4, Fine 12 PCGS. Bowers Die State IV. Deep lavender, steel-gray, and forest-green envelop this better variety Heraldic Eagle dollar. The glossy surfaces are smooth except for a brief horizontal line in front of the mouth and a faded pinscratch above the arrows. PCGS# 40053

- 4447** 1799 7x6 Stars, B-17, BB-164, R.2, VF25 PCGS. Bowers Die State II. Dusky walnut-brown and dove-gray toning encompasses this surprisingly unabraded Heraldic Eagle dollar. A streak of gunmetal patina is noted at 12:30 on the reverse. PCGS# 40055

- 4448** 1799 7x6 Stars, B-17, BB-164, R.2, VF30 PCGS. Bowers Die State II-III. Deep orange, lavender, and cobalt-blue toning embraces this attractively defined and lightly abraded early dollar. A fairly early die state with reverse cracks limited to UNITED S. PCGS# 40055

**1800 Dollar B-16, BB-187  
Light, Natural-Silver Toning, XF40**

- 4449** 1800 B-16, BB-187, R.2, XF40 NGC. Bowers Die State III. A delicate, curving die crack crosses Liberty's neck and touches the chin before continuing to star 10 and the edge, while the die state is confirmed by a strong break and a small, round cud at the edge between E and S in STATES. Battleship-gray color changes to apricot hues when the piece is rotated under a light. Surprising detail remains with E PLURIBUS UNUM bold, and glimpses of luster emerge from the eagle's wings. Light, mint-made adjustment marks journey across the obverse center to star 13, but they are barely noticeable without a glass. A visible pinscratch is noted above the hair ribbon; otherwise, this coin is very clean for the grade. Ex: Palm Beach FL Signature (Heritage, 11/2004), lot 7572. PCGS# 40073

- 4450** 1800 B-8, BB-188, R.4 — Tooled — PCGS Genuine. VF Details. Bowers Die State IV. The BB-188 die pair need only be identified by a die dot within the lower part of R in LIBERTY paired with a reverse where the top right trio of field stars do not touch the clouds. A thin skin of gold toning deepens at the margins to include blue accents (especially on the reverse). Some light smoothing at Liberty's neck and bust and on the reverse motifs define the assigned grade. PCGS# 40074

- 4451** 1800 B-5, BB-189, R.5, VG10 PCGS. Bowers Die State II. A better Bolender variety, identified by a small die lump within the R in LIBERTY. Cream-gray high points contrast with deep gunmetal fields. Abrasions are minor overall, although we note a tick on the upper neck and a faded diagonal mark on the field near the chin. PCGS# 40075

- 4452** 1800 B-5, BB-189, R.5 — Cleaning — PCGS Genuine. VF Details. Bowers Die State III. A rare die pair, confirmed by a die dot at the lower inside of R in LIBERTY, and the point of the adjacent field star deep within the eagle's mouth. Sharp detail accompanies this dollar, but much of it is obscured by patchy toning as a result of improper cleaning. Areas of unnaturally bright silver surface interrupt the original orange and olive shades. PCGS# 40075

**1800 AMERICA! Dollar, VF20  
B-19, BB-192, Rare Early Die State**

- 4453** 1800 AMERICA!, B-19, BB-192, R.2, VF20 NGC. Bowers Die State I. The popular *Guide Book* variety with a distinctive "I" die scratch beneath the eagle's claw. The rare initial die state without clash marks above the date. Principally stone-gray but golden-brown and powder-blue cling to design crevices. All letters in E PLURIBUS UNUM are at least partly readable. Devoid of mentionable abrasions. PCGS# 40082

**1800 Dollar, VF35  
B-19, BB-192 'AMERICA!' Variety**

- 4454** 1800 AMERICA!, B-19, BB-192, R.2, VF35 PCGS. Bowers Die State II. Multiple areas of die clashing are seen on the obverse, with the wavelike clashes near the date typical of both the die state and the variety. Very few distractions exist on this attractive, Choice VF example, which displays a rich olive and blue patina with orange-gold highlights. Traces of mint luster remain at the margins. The "AMERICA!" reverse is so-named because of a stray, vertical die line that resembles (somewhat) an extra "I" after the legend, one of two die pairs with the popular feature. PCGS# 40082

- 4455** 1801 B-2, BB-212, R.3 — Cleaning — PCGS Genuine. VF Details. Bowers Die State III. The cleaning is light, with some hairlines over the silvery surfaces. Touches of amber-gold reach among the stars and reverse legends. Two dark toning spots occupy the end of the eagle's left (facing) wing. Despite the problems, this is an acceptable example of this scarce early dollar with more positive attributes than distractions. PCGS# 40084

- 4456** 1801 B-4, BB-214, R.4 — Cleaning — PCGS Genuine. VF Details. Bowers Die State III. This Draped Bust dollar approaches XF sharpness, but the silver-blue surfaces are granular and hairlined. Nonetheless, an opportunity to acquire the scarcest 1801 business strike Bolender variety. PCGS# 40086

- 4457** 1802/1 Wide Date, B-2, BB-233, R.4 — Damage — PCGS Genuine. VF Details. Pearl-gray high points contrast with gunmetal fields. All letters in E PLURIBUS UNUM are at least partially present, although PLU is weak. A few thin marks near the arrowheads and fletchings account for the PCGS designation, along with minor reverse rim nicks at 2, 4, and 8 o'clock. PCGS# 40093

- 4458** 1802 Narrow Date, B-6, BB-241, R.1 — Scratch — PCGS Genuine. VF Details. Bowers Die State III. The sole use of this obverse die, which features a close, perfect date (some call it the Narrow Date) with a wide space between the 8 and 0. The 2 is distant from the bust. Numerous small marks pepper the surfaces of this readily available variety, among them a few noticeable scratches in the left obverse field that account for the net grade. Areas of blue and gold toning are strongest at the margins. PCGS# 40088

**1803 B-5, BB-252 Dollar, XF40  
Small 3, Fully Toned**

- 4459** 1803 Small 3, B-5, BB-252, R.3, XF40 ANACS. Recognized by a small, high 3 in the date and a tiny spur from the right side of the D in UNITED. Tan-brown and steel-blue shades dominate the glossy and minimally abraded surfaces. Parallel adjustment marks (as coined) angle down the top half of the reverse. Ex: Steve Glenn Collection (*Heritage*, 4/2006), lot 2159. PCGS# 40097

- 4460** 1803 Small 3, B-4, BB-254, R.3, PCGS Genuine. The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an XF specimen that has been cleaned. Although the tan and stone-gray surfaces are mildly subdued, no marks merit mention aside from a small rim ding near the CA in AMERICA. PCGS# 40099

- 4461** 1803 Large 3, B-6, BB-255, R.2, VG10 NGC. CAC. Die State II. A deep stone-gray and lavender Draped Bust type coin. Although well circulated, the surfaces are free from any relevant abrasions or rim imperfections. Traces of dirt in protected regions confirm the originality. PCGS# 40101

**1803 Large 3 Dollar, VF30  
B-6, BB-255, Late Die State**

- 4462** 1803 Large 3, B-6, BB-255, R.2, VF30 PCGS. Bowers Die State III. Streaky pastel olive-gold and powder-blue toning embraces the obverse. The reverse possesses straw-gold and steel-blue shades. Traces of luster remain in the curls, plumage, and clouds. A thin line is noted at Liberty's jawline, and a minor lamination is east of the 3 in the date. PCGS# 40101

## SEATED DOLLARS

### 1843 Silver Dollar, MS62 Elusive in Mint State

**4463 1843 MS62 PCGS.** The 1843 is one of the more plentiful No Motto Seated dollar issues, and is frequently encountered in type specialists' cabinets. This Mint State representative is especially appealing due to substantial semiprooflike mirroring in the fields, and a moderately sharp strike that reveals only a touch of softness on a couple of the right-hand obverse stars. Varying shades of amber-gold toning blanket each side, and the surfaces are free of any major abrasions. Population: 14 in 62, 21 finer (9/14). NGC ID# 24YD, PCGS# 6929

**4464 1844 AU53 NGC.** A lightly circulated example with pastel sky-blue and caramel-gold toning. No marks are of singular consequence. Liberty's shield is nicely die doubled, as always on business strikes of this low mintage date. On the central reverse, die lines are prevalent near the eagle's outline. NGC ID# 24YE, PCGS# 6930

**4465 1845 AU55 PCGS.** The 1845 Seated dollar is scarce in all grades because of its low mintage (just 24,500 coins struck). This Choice AU example displays bright golden-gray surfaces with radiant luster remaining in the recesses. The details are crisp, and abrasions are minimally distracting. Population: 28 in 55, 23 finer (10/14). NGC ID# 24YF, PCGS# 6931

**4466 1846 MS61 NGC.** The mostly brilliant surfaces of this attractive MS61 specimen show a few hints of golden-tan toning, with a scattering of minor contact marks and prooflike reflectivity in sheltered areas. Census: 21 in 61, 57 finer (10/14). NGC ID# 24YG, PCGS# 6932

**4467 1848 — Cleaned — ANACS. AU50 Details.** The better date 1848 has a mintage of only 15,000 pieces. The present briefly circulated representative is bright from a thorough wipe and displays vertical hairlines on both sides. NGC ID# 24YK, PCGS# 6935

**4468 1850 — Cleaning — PCGS Genuine. AU Details.** The 1850 has a tiny business mintage of 7,500 pieces. The base of the 0 is repunched. The present silver-gray example has minimal wear but exhibits coarse parallel hairlines across both sides. NGC ID# 24YM, PCGS# 6937

### 1855 Seated Dollar, PCGS Genuine

**4469 1855 PCGS Genuine.** The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an XF40 specimen that has been cleaned. From a mintage of only 26,000 coins, this issue was intended for export and many were melted. Subsequently, locating acceptable examples can be difficult. This is a bright, silver-gray piece that exhibits signs of light circulation. Scattered hairlines, a result of the noted cleaning, are not overly distracting.

**4470 1856 — Improperly Cleaned — NGC Details. AU.** Although more than twice the number of 1856-dated dollars were struck (63,500 pieces) as compared to the 1855 issue, both are roughly equal in terms of availability. This piece shows bright silver surface coloration and a sharp strike, with an area of incompleteness over the lower-portion of the eagle. Marks are evenly scattered throughout. NGC ID# 24YV, PCGS# 6944

**4471 1857 — Cleaning — PCGS Genuine. Unc Details.** Navy-blue and tobacco-brown toning visits the borders of this nicely struck and semiprooflike silver dollar. No marks are readily evident, but the both fields display delicate hairlines. Just 94,000 pieces were struck, and most of the mintage was exported. NGC ID# 24YW, PCGS# 6945

**4472 1859 XF45 PCGS.** This example is well-struck and lightly worn, with relatively few abrasions and faint hairlines found on the smooth surfaces. Somewhat murky dark-green patina covers each side of this scarce Seated dollar, but the sharp motifs and problem-free, wide rims add considerable appeal. NGC ID# 24YX, PCGS# 6946

**4473 1859-O — Improperly Cleaned — NGC Details. Unc.** This New Orleans No Motto type coin retains noticeable cartwheel sheen despite moderately bright surfaces from a wipe. Although the 1859-O is usually encountered heavily bagmarked, the present example has relatively few field abrasions. NGC ID# 24YY, PCGS# 6947

**4474 1859-O MS61 PCGS.** One of the more plentiful No Motto Seated dollar issues, ideal for type representation. This Mint State example displays bright, untuned luster and well-struck design elements. Scattered abrasions define the grade. NGC ID# 24YY, PCGS# 6947

**1859-S Silver Dollar, AU50**  
Scarce, Early San Francisco Issue

**4475 1859-S AU50 PCGS.** The 1859-S was the first silver dollar produced at the San Francisco Mint, and production was limited to only 20,000 coins. It is believed the vast majority of these were shipped to the Orient for trade, and subsequently melted. The Western-most branch mint did not coin the denomination again until 1870, but by this time the silver dollar had lost much popularity in the Orient, and production totals were even more limited. Although scarce in all grades, the 1859-S is actually one of the more readily obtainable San Francisco issues in the Seated dollar series.

This AU representative displays pale gunmetal and golden-gray toning, with strong detail and minimal surface flaws. Faint hints of luster remain in the recesses on each side. Population: 20 in 50, 59 finer (9/14). NGC ID# 24YZ, PCGS# 6948

**1859-S Seated Dollar, AU53**  
Refreshingly Original Patina

**4476 1859-S AU53 NGC.** Just 20,000 pieces were struck of this enigmatic San Francisco dollar, and by most accounts the entire mintage was exported to China and the Far East, where presumably most of the coins were melted for their bullion value. The population figures do not entirely support the theory, however, and more than 300 grading events suggest at least some of the mintage circulated domestically. The present example offers ample evidence of circulation and a refreshingly original, deep gray patina with soft luster remaining beneath the rustic tones. A few light marks define the grade. Census: 12 in 53, 59 finer (10/14). NGC ID# 24YZ, PCGS# 6948

**4477 1860-O MS62 NGC.** Lower-Mint State 1860-O Seated dollars survive in greater numbers today than in earlier decades due to the discovery of a couple of bags of them during the great Treasury releases of (mostly) Morgan dollars. This lightly toned MS62 piece shows a scattering light marks that determine the grade on surfaces with good luster and bold strike. NGC ID# 24Z3, PCGS# 6950

**1862 Seated Dollar, XF40**  
Scarce Civil War Issue

**4478 1862 XF40 PCGS.** An impressive example for the grade, this Seated dollar exhibits light silver-gray surfaces with hints of peripheral gold toning. Both sides are pleasing with trivial, grade-limiting marks. An exceptional example of the scarce Civil War-era dollar from a mintage of just 11,540 coins. NGC ID# 24Z5, PCGS# 6952

**4479 1862 — Harshly Cleaned — NGC Details. AU.** The 1862 has the lowest mintage of any Seated dollar issue from its decade. Just 11,540 business strikes and 550 proofs were produced. The present well struck and untuned business representative has little if any wear from circulation, but the fields are thickly hairlined. NGC ID# 24Z5, PCGS# 6952

**1871-CC Seated Dollar**  
PCGS Genuine

**4480 1871-CC — Holed and Plugged — PCGS Genuine.** The PCGS number ending in .84 suggests that the coin has been Holed and Plugged as a reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of a VF specimen that has been holed and plugged. The lightly marked surfaces are light silver-gray, showing evidence of the plugged hole at 1 o'clock. Details are re-engraved, and the surfaces are tooled. NGC ID# 24ZH, PCGS# 6967

**1871-CC Dollar, Fine Details  
Good Value for the Grade**

- 4481 1871-CC — Cleaned, Rim Filing — NGC Details. Fine.** One of the easily recognized Carson City dollar rarities, this is an issue with a paltry mintage of 1,376 pieces. We urge collectors to take a close look at this “problem” coin. The surfaces are a little bright, but not obviously cleaned. A close look with a loupe reveals very light hairlining in the right obverse field, but this is well concealed by the light gray patina that covers each side. Regarding the rim filing, sorry, but we just don’t see it. But here’s the disclaimer: It may well have filed rims, but the two catalogers who examined the coin couldn’t see evidence of it. Collectors, give this coin a chance. You may like it more than you think.

**1872-CC Seated Dollar, VG10  
Rare Key Issue**

- 4482 1872-CC VG10 PCGS.** All four of the Carson City Seated dollar issues are low-mintage and scarce, making this an extremely challenging type for collectors. This reddish-gray example is well-detailed and offers an attractive overall appearance. On the scroll across the shield, the R is partially visible and TY is nearly complete. Several moderate marks appear on the lower obverse, and one of them impacts the upper border of the 2 in the date. Housed in a green label holder. NGC ID# 24ZK, PCGS# 6969
- 4483 1872-CC — Improperly Cleaned — NGC Details. Fine.** An evenly circulated stone-gray representative of this rare Carson City issue. Moderately glossy but only lightly abraded for the Fine level. The obverse rim has a minor ding at 1:30 and a small mint-made flaw at 3 o’clock. A mere 3,150 pieces were struck. NGC ID# 24ZK, PCGS# 6969

**1872-CC Silver Dollar  
Sharp XF Details**

- 4484 1872-CC — Repaired — NGC Details. XF.** Although not quite as rare as the 1871-CC and 1873-CC, the 1872-CC Seated dollar is a significant key issue from the Carson City Mint, and is always in widespread demand in all grades. This lightly circulated representative exhibits pale battleship-gray color and strong detail for the XF level. Inspection under a loupe reveals some microscopic, swirling brush marks in the fields (primarily on the obverse), a product of minor repairs made to the design, most notably around Liberty’s right (facing) arm. However, the unaided eye finds few noticeable flaws. NGC ID# 24ZK, PCGS# 6969

**1873-CC Silver Dollar, VF Details  
Rarest Carson City Silver Dollar**

- 4485 1873-CC — Mount Removed, Damaged, Tooled, Re-Engraved — ANACS. VF Details.** Although a number of indignities were perpetrated on this net-graded Carson City rarity, little can diminish the interest this piece is sure to inspire when it crosses the auction block. Joined at one time to a jewelry clasp, the coin was removed and evidence of the mount was minimized. Tooling is widespread in the fields, the eagle’s neck was re-engraved, and other areas may have been strengthened with a graver’s tool. Small marks remain on the coin, most notably at the 3 in the date and a small gouge on the rim near star 6. A light cleaning and an unnatural glossiness covers the silver-gray surfaces. Still, this is the rarest of all Carson City silver dollars and it is sure to find a place of honor in a circulated set.

**PROOF SEATED DOLLAR**

- 4486 1868 PR61 PCGS.** Deep gunmetal-gray color covers both sides of this medium-reflective proof dollar. Blue and rose-red accents appear on the mirrored fields when the coin is viewed at an angle. A sharply detailed example, with a small rim bump at 3 o’clock on the reverse. NGC ID# 252P, PCGS# 7016

## TRADE DOLLARS

- 4487 1874-CC Chop Mark MS61 PCGS.** Micro CC. Period after FINE. Two chopmarks are entered on the reverse, one on the arrow shafts and the other over the CA in AMERICA. A lustrous and well struck Carson City example with peripheral chestnut-gold and sea-green toning. The centers are cream-gray. PCGS# 87035
- 4488 1874-CC AU53 NGC. CAC. Breen-5786.** Ex: "Col." E.H.R. Green, Eric P. Newman. Micro CC. Period after FINE. A dappled gunmetal-gray and pearl-white Carson City type coin. No marks are consequential, and the high points display only light wear. NGC ID# 2532, PCGS# 7035
- 4489 1874-CC AU55 PCGS.** Tall CC. Period after FINE. Light honey-gold toning visits this partially lustrous and lightly abraded Choice AU Carson City Trade dollar. Minor roller marks (as coined) cross the reverse between the R in AMERICA and the D in DOLLAR. NGC ID# 2532, PCGS# 7035

### 1874-CC Trade Dollar, MS61 Appealing for the Grade

- 4490 1874-CC MS61 PCGS.** Type One Obverse and Reverse. In the context of the series, the 1874-CC Trade dollar is quite elusive in Mint State, though it is one of the more readily obtainable of the Carson City issues. This example shows essentially untuned, softly frosted luster, with light, grade-consistent abrasions, primarily on the obverse. The top of Liberty's head is not fully defined, though the strike is otherwise well-executed. Missing detail in the wheat stalks is from die lapping, rather than poor striking pressure. Housed in an old green label holder. NGC ID# 2532, PCGS# 7035
- 4491 1874-S MS63 PCGS.** Scattered abrasions on each side are accompanied by some patches of luster grazes on the reverse, together accounting for the grade. This piece is largely silver-white and shimmers with frosty luster and good eye appeal. A nice coin to represent the Trade dollar type. Population: 59 in 63 (1 in 63+), 28 finer (10/14). NGC ID# 2533, PCGS# 7036

### 1875-S Trade Dollar, Near-Gem Type Two Reverse, Large S

- 4492 1875-S Type Two Reverse MS64 PCGS. CAC.** Large S. An attractively toned Choice Trade dollar. The obverse is dusky caramel-gold. The reverse displays peach, lavender, and ocean-blue shades. Vibrant cartwheel luster sweeps well struck surfaces. Impressively unabraded despite a slender graze on the right obverse field. The reverse is lightly die doubled, most noticeably on the crossbar of the final A in AMERICA. PCGS# 510102

### 1876-CC Trade Dollar, AU58 Doubled Die Reverse

- 4493 1876-CC FS-801, Doubled Die Reverse AU58 PCGS.** Type One Obverse and Reverse, Tall CC. Bold die doubling is seen on all reverse design elements, but is most notable on the olive branch, where the spread is especially wide. This near-Mint example displays traces of light golden color over bright, silvery-gray surfaces, with remnants of semiprooflike mirroring seen in the fields. The strike is sharp and, save for slight high-point friction, the details are complete. PCGS# 145815

- 4494 1876-S Type One Obverse, Type Two Reverse, MS63 PCGS.** Minute S. A lustrous and well preserved cream-gray silver type coin. The typical strike allows retention of several mint-made parallel roller marks, and portions of the rims are granular, also as made. PCGS# 40115

- 4495 1878-S MS63 PCGS.** Type Two Obverse and Reverse. The final business strike issue of the series, ideal for date representation. This piece displays crisp design definition with moderate mirroring in the fields. Mottled shades of amber-gold, champagne, and pale blue blanket each side. NGC ID# 253G, PCGS# 7048

## PROOF TRADE DOLLARS

### 1876 Trade Dollar, PR63 Cameo Elusive With Field-Motif Contrast

- 4496 1876 PR63 Cameo PCGS.** Type One Obverse, Type Two Reverse. Proof sets of 1876 were sold at the Mint booth at the Centennial Exposition in Philadelphia, accounting for above-average mintages. Nonetheless, cameo specimens are elusive. This is a well-struck Select example with faint tan-gold toning and good field reflectivity. Die lapping has removed portions of the eagle's plumage, as coined. Ex: *Chicago Signature* (Heritage, 8/2011), lot 4391. PCGS# 87056

- 4497 1878 PR62 PCGS.** Well struck with light golden color on the frosted devices and sea-green toning in the watery fields. Grade-limiting hairlines are noted in the obverse and reverse fields. From a proof-only issue with an original mintage of 900 pieces. Ex: *Central States (CSNS) Signature* (Heritage, 4/2004), lot 2233. NGC ID# 27YP, PCGS# 7058

**1880 Trade Dollar, PR64  
Beautiful Original Toning**

- 4498 1880 PR64 PCGS. CAC.** Type Two Obverse and Reverse. The proof 1880 Trade dollar is a fairly plentiful late-series proof issue, as aided by a moderate mintage of 1,987 pieces, but is nonetheless in demand from date collectors as no business strike Trade dollars were produced this year. This Choice example displays highly reflective fields beneath deep original toning in shades of sea-green, blue, lavender, and gunmetal-gray. The devices are boldly impressed, and any grade-limiting hairlines in the fields are well-masked by the rich patina. The eye appeal of this coin will please even the most discerning collector. NGC ID# 27YS, PCGS# 7060

**1883 Trade Dollar, Lightly Toned PR63**

- 4499 1883 PR63 PCGS.** Type Two Obverse and Reverse. Save for a handful of 1884 and 1885-dated pieces, Trade dollar production ended in 1883, with a mintage of 979 proofs. This Select example exhibits deep mirroring in the fields and satiny luster over the devices. A thin veil of light golden toning warms each side, masking any grade-limiting hairlines. An attractive piece for this grade level. NGC ID# 27YV, PCGS# 7063

**1883 Trade Dollar, PR64  
Rich Natural Toning**

- 4500 1883 PR64 PCGS.** Discounting the clandestine 1884 and 1885 issues, Trade dollars were struck for the last time in 1883, with a moderate proof-only mintage of 979 pieces. This impressive Choice example is sharply detailed throughout, with deeply mirrored fields under vivid shades of cobalt-blue and champagne-gold toning. NGC ID# 27YV, PCGS# 7063

**MORGAN DOLLARS**

- 4501 1878 8TF Lines in LIB, VAM-2, MS65 NGC.** The scarcer eight tailfeathers variant, this Gem 1878 Morgan dollar displays substantial semiprooflike mirroring in the fields, with thick mint frost over the obverse portrait. A few light luster grazes on the cheek limit the grade. NGC has certified only 25 numerically finer examples (10/14). PCGS# 133785

- 4502 1878 8TF Diagonal In 8, VAM-17, MS65 NGC.** LIBERTY is lightly die doubled, as is UNITED and ONE. A lustrous and well struck Gem with hints of gold toning over predominantly brilliant surfaces. Minor grazes on the cheek determine the grade. PCGS# 133818

- 4503 1878 8TF Doubled Date, VAM-19, MS65 NGC.** The date is strongly doubled, as are the obverse stars, LIBERTY, and the upper arrowhead. The obverse is semiprooflike, usual for a high grade VAM-19. Brilliant and lustrous with smooth fields and a few shallow strike-throughs (as made) on the portrait. PCGS# 133820

- 4504 1878 7/8TF Strong, VAM-37, MS65 PCGS.** One of the more plentiful 7/8 tailfeathers varieties. This example displays frosty, brilliant luster and well-defined motifs. A few light grazes on the cheek limit the grade. Population: 6 in 65, 0 finer (10/14). PCGS# 134034

- 4505 1878 7TF Reverse of 1879 MS65 PCGS.** The slanting top arrow feather identifies the Reverse of 1879. The well-preserved lustrous surfaces of this delightful Premium Gem displays attractive shades of lavender and golden-brown toning. Eye appeal is outstanding. PCGS has graded 17 numerically finer examples (10/14). NGC ID# 253L, PCGS# 7076

- 4506 1878 7TF Reverse of 1879 MS65 PCGS.** A sharply detailed Gem from the first year of the Morgan design, this coin offers vibrant mint luster and well-preserved, brilliant surfaces throughout. The slanted arrow feather identifies the more elusive Reverse of 1879. PCGS has graded 17 numerically finer examples (10/14). NGC ID# 253L, PCGS# 7076

- 4507 1878 7TF Reverse of 1879 MS65 PCGS.** The Reverse of 1879 variant is somewhat scarcer overall than the Reverse of 1878, and is rarely encountered above the Gem grade level. This piece displays frosty, well-preserved surfaces and bold design elements. A few faint traces of light golden color are seen when turned in-hand, though the overall eye appeal imparts the impression of full brilliance. PCGS has encapsulated just 17 numerically finer representatives (10/14). NGC ID# 253L, PCGS# 7076

**1878 7TF Reverse of 1879, MS65+  
Attractive and High-End for the Grade**

- 4508 1878 7TF Reverse of 1879 MS65+ PCGS.** This is a lovely Gem example with excellent definition on both sides, including the central elements, and attractive antique-gray coloration combined with undertones of pastel lavender. Surface marks are minimal, and this piece may represent a good upgrade possibility. Population: 25 in 65+, 17 finer (10/14). NGC ID# 253L, PCGS# 7076

**4509 1878-CC MS65 PCGS.** A beautifully toned Gem example of this first Carson City Morgan dollar issue, this piece displays rich sky-blue and violet peripheral toning around warm orange-gold centers, with radiant underlying luster. The devices are fully struck, and only a few small ticks on the cheek preclude an even finer grade. NGC ID# 253M, PCGS# 7080

**4510 1878-CC MS65 PCGS.** A lightly toned and lustrous Carson City Gem from the introductory year of the type. Sharply struck except for the claws. The obverse field is particularly smooth. Certified in a green label holder. NGC ID# 253M, PCGS# 7080

**4511 1878-CC MS65 PCGS. CAC.** This stunning Gem exhibits vibrant lavender, gold, and blue toning on the obverse, and lighter gold and turquoise toning on the reverse. Both sides have exceptional surfaces that display brilliant underlying luster. NGC ID# 253M, PCGS# 7080

**4512 1878-CC Lines in Wing, VAM-11, MS65 PCGS.** A Top 100 Variety. Heavy die lines in the eagle's wings confirm this popular VAM variety. This example boasts radiant luster beneath a thin veil of light golden toning. Save for the eagle's right (facing) talons, the strike is sharp and the surfaces are devoid of any noticeable abrasions. Population: 15 in 65, 3 finer (10/14). PCGS# 133843

**4513 1878-CC MS64+ Prooflike PCGS.** Fully mirrored fields frame frosty, starkly contrasted devices on this brilliant near-Gem example. The devices are impressed to full definition and the eye appeal is superb for the grade. Only a few minute grazes on the cheek limit the numeric grade from PCGS. NGC ID# 253M, PCGS# 7081

**4514 1878-S MS66+ PCGS.** A high-end example of this moderately available San Francisco issue, this frosty Premium Gem boasts carefully preserved, vibrant surfaces and well-defined central devices. PCGS has only encapsulated 29 numerically finer examples (10/14). NGC ID# 253R, PCGS# 7082

**4515 1878-S MS66+ PCGS. CAC. VAM-5.** A Top 30 1878-S Variety, per VAMworld.com. LIBERTY and the eyelid are die doubled south. The lips and chin are also die doubled. The R in TRUST is broken. Only a wisp of almond-gold toning visits lustrous and splendidly smooth surfaces. An outstanding first-year Morgan dollar. NGC ID# 253R, PCGS# 7082

**4516 1878-S MS66+ PCGS. CAC.** Lavish colors on each side fail to defeat the generous luster peeking through mint, teal, and lavender patina on this well-struck and delightful piece, a treat for the Morgan dollar aficionados. Population: 49 in 66+, 29 finer (10/14). NGC ID# 253R, PCGS# 7082

**4517 1879 MS66 PCGS.** The 1879 Morgan is elusive at this lofty grade level, and finer pieces are extremely rare. This example is deeply toned in shades of sea-green, lemon-gold, and olive, with radiant underlying mint luster. Slight softness on the eagle's breast and the hair above Liberty's ear is not immediately obvious. PCGS has certified four numerically finer coins (9/14). NGC ID# 253S, PCGS# 7084

**4518 1879 MS66 PCGS.** Light gold peripheral toning surrounds the gray-brilliant centers. The strike is sharp overall, except for the usually seen weakness in the obverse center. A few minute obverse marks are noted, and a speck of grease was struck into the left reverse field. Population: 154 in 66 (9 in 66+), 4 finer (10/14). Ex: *Long Beach Signature* (Heritage, 2/2010), lot 513; *Central States Signature* (Heritage, 4/2010), lot 1288. NGC ID# 253S, PCGS# 7084

**4519 1879-CC XF45 PCGS. CAC.** From one of the more elusive Carson City issues in the Morgan dollar series, this Choice XF coin displays original golden-gray toning over lightly circulated surfaces, with hints of mint luster remaining in the recesses. The eye appeal is outstanding for the grade. NGC ID# 253T, PCGS# 7086

### 1879-CC Dollar, AU55 Premium Quality Example

**4520 1879-CC AU55 PCGS.** Normal Mintmark. Well struck and showing minimal evidence of high-point friction, this is an attractive Choice AU. Scattered abrasions are noted, along with sharp strike definition and light amounts of speckled russet toning. A pinscratch to the left of the eagle's head is the only noteworthy detractor. NGC ID# 253T, PCGS# 7086

### 1879-CC Dollar, AU58 Undeniably Original Surfaces

**4521 1879-CC AU58 PCGS. CAC.** The 1879-CC is the second-scarcest Carson City issue in the Morgan dollar series, yielding first place to the key-date 1889-CC, and is exceedingly difficult to locate in the finer Mint State grades. This near-Mint example offers a sharply detailed, slightly more affordable alternative for the casual date collector. Traces of golden-gray toning accent original, frosty luster, giving this piece a high degree of eye appeal for the grade. NGC ID# 253T, PCGS# 7086

### 1879-O Silver Dollar, MS65 Difficult to Find This Appealing

**4522 1879-O MS65 PCGS.** The 1879-O Morgan is available in Mint State, but most examples are moderately abraded. Gems are scarce, and finer coins are decidedly rare. This representative displays vibrant, frosty mint bloom and unusually sharp design definition. A few small luster grazes on the cheek preclude an even finer grade, though the patient series specialist will find this coin to be a pleasing reward. PCGS has certified only 16 numerically finer examples (9/14). NGC ID# 253V, PCGS# 7090

**4523 1879-O MS64 Prooflike PCGS. CAC.** Glimpses of gold and orange toning visit the rims of this otherwise brilliant Choice Prooflike Morgan. Well struck with booming luster, clean fields, and minor facial grazes. Housed in a green label holder. Population: 40 in 64 (3 in 64+) Prooflike, 2 finer (10/14). NGC ID# 253V, PCGS# 7091

**4524 1879-S Reverse of 1878 MS64 PCGS.** The 1879-S Morgan dollar with the Reverse of 1878 (parallel arrow feather) is much more elusive than the other reverse variety. This sharply detailed Choice example displays a mix of satiny luster and semiprooflike reflectivity, with traces of gold patina on both sides. NGC ID# 253W, PCGS# 7094

**4525 1880 MS66 PCGS.** This impressive Premium Gem exhibits razor-sharp definition on all design elements and shows a few interesting clash marks on the reverse. The well-preserved lustrous surfaces display a few hints of gold and pink toning. PCGS has graded no numerically finer examples (10/14). NGC ID# 253Y, PCGS# 7096

**4526 1880 MS66 PCGS.** The design elements of this impressive Premium Gem are well-detailed, with just a touch of softness on the hair above the ear, and the pristine brilliant surfaces radiate vibrant mint luster. PCGS has graded no coins in higher numeric grades (10/14). NGC ID# 253Y, PCGS# 7096

**4527 1880 MS66 PCGS.** An impressive Premium Gem, this 1880 Morgan dollar is tied for the finest that PCGS or NGC have certified (10/14). Both sides are brilliant and untuned with frosty silver luster and excellent design definition. NGC ID# 253Y, PCGS# 7096

**4528 1880-CC 8 Over Low 7, VAM-6, MS65 Prooflike PCGS. CAC.** A Top 100 Variety. The remnants of an underdigit 7 are obvious within both loops of the second 8. That 8 also exhibits "ear" and "dash" remnants of the 7. This well struck Gem has prominently mirrored fields and shows moderate cameo contrast. A desirable Carson City Morgan. PCGS# 41135

**4529 1880-CC MS65 PCGS.** Blushes of lavender and greenish-gold toning enhance the well-preserved lustrous surfaces of this impressive Gem, with most of the color on the obverse. The design elements are sharply detailed and eye appeal is outstanding. NGC ID# 2542, PCGS# 7100

**4530 1880-CC MS65 PCGS. CAC. VAM-8.** Gold, violet, and blue toning appear along the upper-left obverse and lower-left reverse of this Gem representative. A small bar is noted below the second 8 with tiny die chips inside both letters of the mintmark, diagnostic of the VAM-8 die variety. NGC ID# 2542, PCGS# 7100

#### 1880-CC Morgan, MS66+ Thick, Frosty Luster

**4531 1880-CC MS66+ PCGS.** The 1880-CC Morgan is a slightly better date in the Carson City subset, especially at or above the Premium Gem grade level. This Plus-graded representative exhibits thick mint frost and virtually flawless surfaces, with just a few faint traces of light golden color overall. The strike is slightly soft on the eagle's breast and the hair above Liberty's ear, though the eye appeal is hardly affected. PCGS has certified only 30 numerically finer examples (9/14). NGC ID# 2542, PCGS# 7100

#### 1880-CC Morgan Dollar, MS66+ Well-Preserved, High-End Example

**4532 1880-CC MS66+ PCGS. CAC.** This is a beautiful, essentially brilliant Carson City example with remarkably clean surfaces that display scintillating mint frost and sharply struck design elements throughout. This issue is popular for type purposes, as there are so many high-grade survivors from the original mintage of 591,000 coins; but examples grading finer than MS66 are rare, and this example is definitely high-end for the grade. Population: 63 in 66+, 30 finer (10/14). NGC ID# 2542, PCGS# 7100

#### 1880-CC Silver Dollar, MS66+ Heavily Frosted Mint Bloom

**4533 1880-CC MS66+ PCGS. CAC.** Faint traces of light golden color accent thick mint frost over each side of this nearly unabraded Premium Gem. The hair above Liberty's ear is not fully defined, but the strike is otherwise sharp, and the eye appeal is immense. The 1880-CC is one of the more challenging Carson City issues in high grades, as PCGS has certified only 30 examples numerically finer than this coin (9/14). NGC ID# 2542, PCGS# 7100

**4534 1880-O MS64+ NGC. VAM-11A.** Small or Micro O. VAMworld.com states John Roberts discovered the present VAM in 2003. It is interesting primarily for its clashed letters. This lustrous jade-green and russet-brown near-Gem has a good strike and only unobtrusive contact. NGC ID# 2543, PCGS# 7114

#### 1880-O Silver Dollar, MS64 Prooflike Elusive With Field-Device Contrast

**4535 1880-O MS64 Prooflike NGC.** The 1880-O Morgan dollar is a two-fold condition rarity. It is elusive in MS64 or finer grades, and it is also hard to locate with any degree of prooflike mirroring. This piece is fully brilliant with excellent mirroring in the fields that surround the frosty and highly lustrous obverse and reverse devices. Census: 13 in 64 Prooflike, 1 finer (9/14).  
Ex: Central States Signature (Heritage, 4/2008), lot 2624; Long Beach Signature (Heritage, 9/2008), lot 2632. NGC ID# 2543, PCGS# 7115

- 4536 1880-O Hangnail, VAM-48, MS64 NGC.** A Top 100 Variety. Small or Micro O. The "Hangnail" feature is undesignated on the NGC insert, but is obvious within the leftmost tail feather. Lustrous and nicely struck with a brilliant reverse and rich peach-gold obverse toning. PCGS# 133879
- 4537 1880-S MS66 PCGS. CAC.** Medium S. Spectacular cherry-red, lemon-gold, powder-blue, peach, and aquamarine colors alternate across the obverse. The reverse has an orange border and a brilliant center. NGC ID# 2544, PCGS# 7118
- 4538 1880-S MS67 PCGS.** A superb type candidate, this high-end 1880-S Morgan displays vivid orange-gold, violet-red, and lemon-yellow toning over the entire obverse, while the reverse shows just a blush of pale champagne color. The strike is razor-sharp and the clean surfaces are equally as appealing. NGC ID# 2544, PCGS# 7118
- 4539 1880-S MS67+ PCGS.** Large S. Dramatic violet-red, lemon-gold, and powder-blue toning consumes the reverse. The obverse has only a hint of tan toning. Precisely struck and lustrous with outstanding preservation. NGC ID# 2544, PCGS# 7118
- 4540 1880-S MS67 PCGS. CAC.** The type collector will take quick notice of this eye-catching coin, which displays semiprooflike mirroring on both sides and bold central devices. Both sides display pale golden color, while the upper obverse also shows a blend of soft rainbow hues. NGC ID# 2544, PCGS# 7118
- 4541 1880-S MS67+ PCGS. CAC.** Large S, about equal in scarcity relative to its Medium S counterpart. A brilliant, thoroughly lustrous, and nicely struck Superb Gem. A magnificently preserved Morgan dollar; ideal for a high quality silver type set. NGC ID# 2544, PCGS# 7118
- 4542 1880-S MS67+ PCGS. CAC.** Large S. A high grade silver type coin with dynamic luster and an intricate strike. The cheek is virtually pristine, and the brilliant surfaces display only minimal contact. NGC ID# 2544, PCGS# 7118
- 4543 1880-S MS67+ PCGS. CAC.** Medium S. A brilliant and flashy Superb Gem. The cheek is pristine, the strike is bold, and the fields are exceptionally smooth. Ideal for an advanced silver type set. NGC ID# 2544, PCGS# 7118
- 4544 1880-S MS67 Prooflike NGC. CAC.** Medium S. Light mauve and sea-green shades encompass the peripheries of this flashy and magnificently unabraded Superb Gem. The strike is good although slightly incomplete at the centers. Encased in a former generation holder. NGC ID# 2544, PCGS# 7119
- 4546 1880/9-S VAM-11 MS66 Prooflike PCGS. CAC.** A Hot 50 Variety. Die polish marks inside the 0 in the date attribute this *Guide Book* variety. The fields are highly reflective, and the well struck surfaces are brilliant. Virtually pristine aside from a single slender mark above the R in DOLLAR. PCGS# 41507
- 4547 1881 MS66 PCGS.** Unlike the San Francisco issue of the same year, which is readily available for type purposes, the 1881 Morgan is scarce at the Premium Gem grade level, and finer pieces are genuinely rare. This example is well-struck with fully prooflike fields on the obverse, and thick mint frost over the reverse. Essentially untuned with excellent surface preservation. PCGS has certified only four numerically finer representatives (9/14). NGC ID# 2546, PCGS# 7124
- 4548 1881 MS66 PCGS.** Although the Philadelphia Mint produced more than 9 million Morgan dollars, this issue is scarce in Premium Gem condition and rare any finer. This is a brilliant-white MS66 example with vibrant luster and a sharp strike. Only a few tiny marks are present. Just eight numerically higher examples are certified by PCGS and NGC combined (10/14). NGC ID# 2546, PCGS# 7124
- 4549 1881-CC MS66 PCGS.** Thick, essentially untuned mint frost blankets each side of this beautifully preserved Premium Gem example. The strike is razor-sharp, and the corresponding eye appeal is exceptional. Finer representatives are only infrequently encountered. NGC ID# 2547, PCGS# 7126
- 4550 1881-CC MS66 PCGS.** This better-date Premium Gem Morgan dollar is a completely untuned silver-white example sporting lavish luster over surfaces that are free of mentionable abrasions and quite well-struck. Some wispy die cracks encircle portions of the peripheries. The 1881-CC is much more expensive and far more elusive at the next grade level, making this an optimal acquisition for many collectors. NGC ID# 2547, PCGS# 7126
- 4551 1881-CC MS66+ PCGS. VAM-2.** A whisper of olive-gray toning accompanies this low mintage Carson City dollar. Precisely struck and thoroughly lustrous with a high grade reverse and only wispy obverse grazes. NGC ID# 2547, PCGS# 7126
- 4552 1881-CC MS66+ PCGS. CAC. VAM-2.** An intricately struck Premium Gem. The lustrous surfaces are virtually stone-white, and only minor grazes are present on the cheek and fields. Among Carson City Morgan issues, only the 1885-CC has a lower mintage. NGC ID# 2547, PCGS# 7126
- 4553 1881-CC MS66+ PCGS. CAC. VAM-2.** A lightly toned Premium Gem with exceptionally smooth surfaces. A razor-sharp strike and dynamic cartwheel luster contribute further to the exemplary eye appeal. Low mintage and perennially popular. NGC ID# 2547, PCGS# 7126
- 4554 1881-CC MS65 Prooflike PCGS.** A carefully preserved Prooflike example with strong field-device contrast and well-struck design elements. Traces of light golden color are observed when tilted beneath a light. Housed in an old green label holder. Only 36 Prooflike pieces are numerically finer at PCGS (10/14). NGC ID# 2547, PCGS# 7127

**1880/79-S Dollar, MS67 Prooflike  
VAM-8, Medium S**

- 4545 1880/79-S 80/79, Medium S, VAM-8, MS67 Prooflike PCGS. CAC.** A Top 100 Variety. This VAM variety exhibits slight doubling on the lower edges of the 18 in the date. The second 8 also exhibits an area of raised metal within its upper loop, which is believed to be the remnant of an underlying 7. This obverse die was also paired with another reverse, creating the VAM-9 variety, the two being differentiated by the size of the mintmark on the reverse.

The present coin displays brilliant, frosty devices set against deeply mirrored fields with strong cameo contrast. The strike is full and the surfaces are void of any significant flaws. An immensely eye-appealing example. This is one of only two Prooflike pieces certified at the MS67 grade level, with none numerically finer (9/14). PCGS# 41501

---

**1881-CC Dollar, MS66 Prooflike  
Exceptional High-Grade Example**

**4555 1881-CC MS66 Prooflike PCGS.** This is a remarkable Carson City dollar showing thickly frosted devices and jet-black, highly reflective fields. The strike definition is razor-sharp, and the surface preservation is outstanding. These multiple attributes combine for splendid eye appeal and exceptional technical quality. A conditionally rare specimen, with no Prooflikes graded numerically finer at PCGS. Population: 36 in 66 (2 in 66+) Prooflike, 0 finer (10/14). NGC ID# 2547, PCGS# 7127

**4556 1881-O MS65 PCGS.** A highly lustrous example with satiny luster and brilliant, snow-white surfaces. This New Orleans Mint issue becomes extremely scarce in grades higher than MS65, and PCGS has seen only 26 coins finer the present coin. NGC ID# 2548, PCGS# 7128

**4557 1881-O MS65 PCGS.** Tinges of olive and lavender accent dusky golden-gray toning over each side of this Gem representative. The 1881-O is one of the better-struck Morgan dollars from the New Orleans Mint, and this piece exhibits this above-average definition beautifully. Only 26 numerically finer coins have been certified by PCGS (10/14). NGC ID# 2548, PCGS# 7128

**4558 1881-O MS65 NGC.** A lovely Gem, this piece exhibits nearly brilliant surfaces on both sides with just a suggestion of faint pinkish-gold hues. Minor contact marks held this well-struck example from a higher grade. NGC has seen only nine numerically finer submissions (10/14). NGC ID# 2548, PCGS# 7128

**4559 1881-S MS67+ PCGS. CAC.** Substantial semiprooflike mirroring adorns the fields of this fully struck Superb Gem, nearly worthy of a Prooflike designation. Faint traces of pale champagne color are observed when turned in-hand, though the beautifully preserved surfaces appear brilliant upon first glance. NGC ID# 2549, PCGS# 7130

**4560 1881-S MS67+ PCGS. CAC.** A technically and aesthetically impressive type coin, this Plus-graded Superb Gem showcases bright semiprooflike fields around bold, satiny devices. Both sides display peripheral rings of ocean-blue and orange-gold toning, giving this carefully preserved 1881-S Morgan supreme eye appeal. NGC ID# 2549, PCGS# 7130

**4561 1882 MS66 PCGS.** This sharply detailed Premium Gem offers well-preserved surfaces with vibrant mint luster and vivid shades of golden-brown and lavender toning. Eye appeal is outstanding. PCGS has graded eight numerically finer examples (10/14). NGC ID# 254A, PCGS# 7132

**4562 1882 MS65 Prooflike PCGS.** The 1882 Morgan dollar is an elusive find at the Gem Prooflike grade level, where PCGS reports only 32 submissions (including this piece) and a sole MS66 Prooflike finer (10/14). This untuned silver-white Gem displays generous contrast amid a few light grazes that determine the grade. NGC ID# 254B, PCGS# 7133

**4563 1882 MS66 Prooflike NGC.** Frosty silver devices are untuned and show minor luster grazes rather than mentionable marks, providing deep contrast against the brightly mirrored fields, a perceptible silver-on-black appearance. A small scrape appears behind the cap in the obverse field. A great-looking example of this date, and the sole Prooflike at NGC (10/14). NGC ID# 254B, PCGS# 7133

**4564 1882-CC MS66 Prooflike PCGS.** A splendid Premium Gem of this popular Carson City issue showing mirrored fields and satin devices. This boldly struck piece exhibits excellent contrast. Both sides are brilliant and untuned. Population: 91 in 66 (5 in 66+) Prooflike, 1 finer (10/14). NGC ID# 254B, PCGS# 7135

**4565 1882-CC MS65 Deep Mirror Prooflike PCGS.** A dazzling Carson City Gem. Well struck and impressively smooth. Generally brilliant, although dabs of tan toning near Liberty's mouth, the right wreath stem, and the left (facing) wingtip. Housed in a green label holder. NGC ID# 254B, PCGS# 97135

**4566 1882-CC Counter Clash Lip, VAM-2C2, MS66 PCGS.** A Hit List 40 Variety. Liberty's upper lip is doubled due to a counter clash. A small die break is present on the lower right portion of Liberty's cap. A sharply struck and highly lustrous Premium Gem. The obverse is brilliant, as is the upper reverse. An arc of autumn-brown, powder-blue, and olive-green toning endows the lower reverse periphery. PCGS# 413031

**4567 1882-O MS65+ PCGS.** A few minute ticks on Liberty's cheek are all the kept this piece from an even finer grade. Faint traces of light golden color accent radiant cartwheel luster, while the devices show uncharacteristically sharp definition for this New Orleans issue. With only 40 numerically finer examples certified by PCGS (10/14), this Plus-graded Gem is must-have for the serious date collector. NGC ID# 254C, PCGS# 7136

**4568 1882-O MS65 Prooflike PCGS. CAC.** Areas of golden-brown toning appear on both sides of this Prooflike Gem. The reverse displays an array of colors covering approximately forty percent. The shades include bright green, yellow, red, fuchsia, and orange. Population: 39 in 65 Prooflike, 2 finer (10/14). NGC ID# 254C, PCGS# 7137

**4569 1882-S MS67 PCGS. CAC.** The 1882-S is one of the most eye-appealing issues in the series, frequently found with booming luster and remarkable striking definition. This Superb Gem example is an excellent coin in that regard, but also boasts vivid swaths of rainbow toning over much of the reverse, with light golden and amber hues over the remainder of each side. An immensely attractive type coin with a high degree of "pop." NGC ID# 254F, PCGS# 7140

---

**1883 Silver Dollar, MS67  
Frosted Cartwheel Luster**

**4570 1883 MS67 PCGS. CAC.** With a mintage in excess of 12 million coins, the 1883 Morgan is one of the more plentiful issues overall from the 1880s, but its availability declines sharply at the MS67 grade level, and finer pieces are prohibitively rare. This virtually pristine example will please even the most discerning of collectors, with thick, frosty mint luster and untuned surfaces. The hair immediately above Liberty's ear is trifle soft, though the coin has so much "pop" that the eye appeal is uninhibited. PCGS has seen only three numerically finer submissions (9/14). NGC ID# 254G, PCGS# 7142

**4571 1883 MS65 Deep Mirror Prooflike PCGS.** Heavily frosted devices and correspondingly bold cameo contrast give this deeply mirrored Gem incredible visual appeal. Moderate die rust is observed on the eagle's feathers, though both sides are distinctly sharp throughout. Only nine Deep Mirror Prooflike coins are numerically finer at PCGS (10/14). NGC ID# 254G, PCGS# 97143

**4572 1883-CC MS66+ PCGS. CAC. VAM-4.** Dramatic cherry-red, apple-green, orange-gold, and lilac patina endows the upper two-thirds of the obverse. The reverse is comparatively brilliant. A lustrous Carson City type coin. VAM-4 is primarily of interest for its repunched date. NGC ID# 254H, PCGS# 7144

#### 1883-CC Silver Dollar, MS67 Heavily Frosted Mint Bloom

**4573 1883-CC MS67 PCGS.** One of the more available Carson City issues in high grades, well-represented in the GSA sales of the early 1970s. Still, pieces grading finer than this example are rare. Thick mint frost illuminates carefully preserved luster and sharply defined central devices. A few wisps of pale champagne color are seen when tilted beneath a light, but leave this piece with a largely brilliant appearance. PCGS has certified only five numerically finer representatives (10/14). NGC ID# 254H, PCGS# 7144

**4574 1883-CC MS66 Prooflike PCGS.** This Premium Gem Prooflike Carson City dollar is untuned silver-white with sparkling, stark contrast and excellent eye appeal. Liberty's cheek and the surfaces overall are free of mentionable marks, making this a top-notch survivor of this popular issue. NGC ID# 254H, PCGS# 7145

**4575 1883-CC MS66 Prooflike PCGS.** Copious luster and generous field-device contrast make this Premium Gem Prooflike 1883-CC a keeper. The grade determinant is largely a few tiny luster grazes rather than mentionable contact marks. Some roller marks, as made, show on Liberty's cheek. PCGS shows only eight Prooflike submissions finer (10/14). NGC ID# 254H, PCGS# 7145

**4576 1883-CC MS66 Prooflike PCGS.** An exuberant, well-contrasted Premium Gem example with Prooflike surfaces as designated by PCGS, untuned and sharply struck with minimal distractions and no trace of toning. PCGS has seen only eight Prooflike examples finer (10/14). NGC ID# 254H, PCGS# 7145

**4577 1883-S MS61 PCGS.** Vibrant, untuned cartwheel luster is the hallmark of this well-struck example. Scattered abrasions implement a strict grade from PCGS, but none are singularly detracting. The 1883-S Morgan experienced moderate circulation and is always sought-after in Mint State condition. NGC ID# 254K, PCGS# 7148

**4578 1883-S MS62 PCGS.** This is an appealing example of the 1883-S Morgan, an issue that becomes scarcer-than-expected in higher Mint State grades despite the original mintage figure of 6.2 million coins. This piece is well-struck and lustrous with the expected number of small abrasions for the MS62 grade level. NGC ID# 254K, PCGS# 7148

**4579 1883-S MS62 NGC.** The 1883-S is a slightly better S-mint issue in Mint State grades. This example is essentially brilliant, with sharp design definition. Light, scattered abrasions limit the grade, but do detract from the radiant luster. NGC ID# 254K, PCGS# 7148

**4580 1883-S MS62 NGC.** This brilliant Mint State Morgan dollar has untuned silver surfaces with satiny, somewhat reflective surfaces, the appearance that was once called "semi-prooflike." NGC ID# 254K, PCGS# 7148

#### 1883-S Dollar, MS63 Unparalleled Visual Appeal for the Grade

**4581 1883-S MS63 PCGS.** Dazzling cartwheel luster engulfs each side of this boldly struck 1883-S Morgan, illuminating bright, semiprooflike fields and frosted devices. A peripheral ring of orange-gold color beautifully frames each side, and the surfaces are only minimally abraded. The 1883-S is a slightly better date in Mint State grades, and becomes genuinely rare at the Gem level. NGC ID# 254K, PCGS# 7148

**4582 1883-S MS63 PCGS.** Small patches of orange-gold color visit the margins, while the rest of this shining Select coin has light silvery-gray patina. Well-struck for the issue but slightly soft on the hair over Liberty's ear.  
*Ex: Central States Signature (Heritage, 4/2010), lot 1327.* NGC ID# 254K, PCGS# 7148

**4583 1884-CC MS66 PCGS. CAC. VAM-2.** Fire-red, powder-blue, and sun-gold dominate the obverse. The reverse is brilliant aside from a slender arc of toning along the lower margin. Well struck and coruscating with exemplary surfaces. VAM-2 is one of several minor but interesting repunched date varieties for this popular issue, which emerged in quantity from the GSA holdings. NGC ID# 254M, PCGS# 7152

**4584 1884-CC MS66+ PCGS. CAC.** Like many Carson City issues in the Morgan dollar series, the 1884-CC is frequently found with heavily frosted, booming luster and sharp design definition. This Plus-graded Premium Gem is an excellent coin in that regard, and is also void of any significant surface flaws. An eye-appealing silver dollar that will please even the most discerning collector. NGC ID# 254M, PCGS# 7152

**4585 1884-CC MS66+ PCGS. CAC.** Booming mint frost and razor-sharp definition are among the assets of this snow-white Premium Gem example. Minuscule luster grazes are too superficial to distract the unaided eye. An obviously high-end specimen for the grade. NGC ID# 254M, PCGS# 7152

**4586 1884-CC MS66+ PCGS. CAC.** The reflective fields of this semi-prooflike Premium Gem contrast nicely with the frosty, highly lustrous devices. The obverse has faint gold toning on the border, while the reverse has peripheral lavender toning. Almost certainly from the GSA release four decades ago, this piece has few peers. NGC ID# 254M, PCGS# 7152

**4587 1884-CC MS66+ PCGS. CAC.** Exceptionally clean surfaces, especially for a CC dollar. Each side is snow-white and sharply struck. Definitely deserving of both the Plus and CAC designation. NGC ID# 254M, PCGS# 7152

**1884-CC Morgan Dollar, MS67  
Interestingly Toned**

- 4588 1884-CC MS67 NGC.** A spectacular band of multicolor iridescence blankets the left obverse and lower-left reverse of this immaculately preserved Superb Gem representative. The devices are generally sharp with minimal softness in the centers. A large number of 1884-CC dollars were stored in vaults and made available during the Treasury release of the early 1960s, making the date suitable for type purposes. Still, NGC has certified only a single coin numerically finer (10/14). NGC ID# 254M, PCGS# 7152

**1884-CC Silver Dollar, MS67  
Only Four Finer**

- 4589 1884-CC MS67 PCGS.** A satiny Superb Gem that exhibits extraordinary eye appeal, this dollar is almost entirely brilliant with delicate gold, violet, and blue toning along parts of the obverse border. The reverse is untuned, and both sides exhibit excellent design definition. Population: 92 in 67 (1 in 67+), 3 finer (9/14). NGC ID# 254M, PCGS# 7152

- 4590 1884-CC MS65 Deep Mirror Prooflike PCGS. VAM-7.** The 18 in the date is repunched. This fully struck Gem is a business strike but has every appearance of a deep cameo proof, aside from incidental field contact. The eagle exhibits die rust, as coined. NGC ID# 254M, PCGS# 97153

- 4591 1884-CC MS65 Deep Mirror Prooflike PCGS. VAM-4.** This nearly brilliant Gem is sharply detailed in most areas, with just a touch of the usual softness on the hair above the ear. The carefully preserved surfaces are deeply reflective and eye appeal is outstanding. NGC ID# 254M, PCGS# 97153

- 4592 1884-O MS67 NGC.** The obverse of this almost perfectly preserved Superb Gem is deeply toned in shades of silver-pink, olive-gold, and pale aquamarine. The reverse is somewhat brighter, with just a blush of light golden color. Vibrant, frosty luster illuminates both sides, giving impressive eye appeal. NGC has certified only one numerically finer representative (9/14). NGC ID# 254N, PCGS# 7154

- 4593 1884-S AU58 NGC.** The 1884-S Morgan is somewhat elusive in Mint State, making high-end AU examples ideal for the casual date collector. This nearly Uncirculated representative retains substantial original luster, with just the faintest suggestion of light golden color. NGC ID# 254P, PCGS# 7156

- 4594 1884-S AU58 PCGS.** An important condition rarity in the Morgan dollar series, with Mint State pieces infrequently located. This brilliant silver near-Mint example has fully lustrous silver surfaces and lacks toning on either side. NGC ID# 254P, PCGS# 7156

- 4595 1885 MS67 PCGS.** Snow-like mint luster blankets each side of this Superb Gem in brilliant radiance. The hair immediately above Liberty's ear is lacking slightly in definition, but the beautifully preserved surfaces are the chief draw on the viewer's eye. Only two coins are numerically finer at PCGS (10/14). NGC ID# 254R, PCGS# 7158

- 4596 1885-CC MS66 PCGS.** Despite being well-represented in the GSA sales of the early 1970s, the 1885-CC Morgan remains incredibly popular for its outstanding eye appeal and Carson City origin. This untuned piece displays sharp, frosty devices set against radiant, semiprooflike fields, with near-cameo contrast. A few light luster grazes on the cheek are all that preclude an even finer grade. NGC ID# 254S, PCGS# 7160

- 4597 1885-CC MS66 PCGS.** Lustrous surfaces are toned on the obverse in deep shades of orange, aqua-green, electric-blue and russet, while wisps of golden-brown and ocean-green visit the reverse. Well-struck design elements, including the hair above Liberty's ear and the eagle's breast feathers, further enhance the coin's eye appeal. A few minute marks are consistent with the grade level. A popular Carson City issue. NGC ID# 254S, PCGS# 7160

- 4598 1885-CC MS66 NGC.** Untuned silver-white surfaces beam with frosty luster on this better-date Morgan dollar, relatively unabraded save for a small patch of unobtrusive reeding marks just behind the rear of Liberty's lower cap. Some roller marks appear above the ear and on the lower cheek, but the strike and overall appeal are quite high. NGC ID# 254S, PCGS# 7160

- 4599 1885-CC MS66 PCGS.** This is an attractive, high-end example of this popular Carson City issue, with vibrant, frosty luster and pleasantly clean fields. Some minor lightness of strike is noted on the eagle's talons and the hair above Liberty's ear, though the eye appeal is not consequently impeded. Numerically finer representatives of this issue are seldom available. NGC ID# 254S, PCGS# 7160

- 4600 1885-CC MS66 PCGS.** A crescent of tan-gold color around the lower-right reverse border is the only area of noticeable toning on this carefully preserved example. The strike is well-executed and the surfaces display the radiant, frosty luster that is characteristic of this Carson City issue. Numerically finer examples are seldom encountered. NGC ID# 254S, PCGS# 7160

**1885-CC Silver Dollar, MS66+  
Coruscating Mint Brilliance**

- 4601 1885-CC MS66+ PCGS. CAC.** A popular date in the Carson City subset, the 1885-CC Morgan dollar is frequently found with vibrant luster and exceptional eye appeal, but seldom above the MS66 grade level. This Plus-graded Premium Gem displays thick, untuned mint frost and nearly pristine surfaces. The strike is a trifle soft on the eagle's breast and the hair above Liberty's ear, though the eye is too preoccupied with the radiant luster to notice. NGC ID# 254S, PCGS# 7160

**4602 1885-O MS67 PCGS.** The 1885-O Morgan is a plentiful date through MS67, but is prohibitively rare any finer. This radiant, frost-white example displays brilliant, well-preserved surfaces and unusually bold design elements. PCGS has certified none numerically finer (9/14). NGC ID# 254T, PCGS# 7162

**4603 1885-S MS65 PCGS.** Lavender and golden-gray patination imbue this frosty S-mint Gem with excellent eye appeal. The devices are well-detailed save for moderate central softness. The surfaces lack all but a few trivial ticks. PCGS has seen just 41 numerically finer pieces (10/14). NGC ID# 254U, PCGS# 7164

**4604 1885-S MS65 NGC.** Brilliant, frosty mint bloom illuminates bold devices on this Gem representative. A couple microscopic ticks on the cheek appear to be all that limit the grade. The 1885-S Morgan is only marginally scarce in MS65, but finer examples are rarely seen, as NGC has certified only 14 such pieces (9/14). NGC ID# 254U, PCGS# 7164

**4605 1886-O MS62 NGC.** This is an unusually well-struck example of this New Orleans issue, with satiny cartwheel luster illuminating faint traces of light golden toning. Scattered abrasions on the obverse limit the grade. NGC ID# 254W, PCGS# 7168

#### 1886-O Morgan Dollar, MS62 VAM-1A, 'Clashed E' Variety

**4606 1886-O VAM-1A, Clashed E, MS62 NGC. CAC.** A Top 100 Variety. The 'Double Clash' variant. Although not attributed on the holder, this piece represents the "Clashed E" VAM variety, with BER of LIBERTY clashed into the reverse field below the eagle's tailfeathers. This variety is highly popular among VAM specialists, but is also highly scarce in Mint State. Of those pieces certified and attributed by NGC, none have been found finer than MS62 (10/14). This example boasts a sharp strike and satiny golden-gray luster. Surprisingly few abrasions are observed, considering the grade. An important opportunity for the VAM specialist to acquire this must-have variety. Census: 8 in 62 (1 in 62+), 0 finer (10/14). PCGS# 133905

**4607 1886-S MS65 PCGS.** Boldly toned violet, blue, and green on the obverse with only a few faint suggestions of the last two hues at the bottom of an otherwise brilliant reverse. Strong cartwheel luster illuminates the patina, and only a touch of striking weakness is seen on the hair above Liberty's ear. PCGS has certified only 47 numerically finer examples of this conditionally elusive San Francisco issue (9/14). NGC ID# 254X, PCGS# 7170

**4608 1886-S MS65 PCGS.** The 1886-S Morgan is only marginally available in Gem condition, and finer examples are rarely encountered. This piece is boldly struck, with radiant cartwheel luster and well-preserved surfaces. The central obverse and much of the reverse display warm tan-gold toning, while the obverse periphery shows deeper blue-gray colors and a crescent of vivid amber-orange graces the lower reverse border. PCGS has certified 48 numerically finer coins (10/14). NGC ID# 254X, PCGS# 7170

#### 1886-S Dollar, MS65 Appealing Lilac and Gold Toning

**4609 1886-S MS65 PCGS. CAC.** A distinctive patina of lilac and lemon-gold shades covers both sides of this boldly struck Gem dollar. Cartwheel luster abounds. This low-mintage San Francisco issue is scarce with just 750,000 pieces produced. The MS65 level is the highest available grade before the value increases four-fold. PCGS has seen fewer than 50 finer examples (10/14). NGC ID# 254X, PCGS# 7170

**4610 1887 MS67 PCGS.** A lustrous, sharply struck Superb Gem representative, this piece is largely brilliant and untuned save for portions of the outer edges. The toning includes hues of golden-orange, teal, yellow, and hints of red. PCGS as certified just a single submission finer (10/14). NGC ID# 254Y, PCGS# 7172

**4611 1887/6 VAM-2 MS65 PCGS.** A Top 100 Variety. A sliver of the curved base of an underdigit 6 is evident on both sides of the bottom of the 7 in the date. A nicely struck and lustrous Gem with exceptional eye appeal. The brilliant surfaces are smooth and well preserved. PCGS# 133908

**4612 1887/6 VAM-2 MS64 Prooflike PCGS.** A Top 100 Variety. This brilliant near-Gem, at the confluence of Morgan dollar overdates and the incredible number of collectors of Prooflike and Deep Mirror Prooflike series coins, is sure to be crowd-pleaser via its unabraded surfaces and generous eye appeal. Population: 55 in 64 (1 in 64+) Prooflike, 22 finer (10/14). PCGS# 42842

**4613 1887/6 VAM-2 MS65 Prooflike NGC.** A Top 100 Variety. A brilliant and lustrous Gem. Nicely struck and exceptionally unabraded. A few small strike-throughs, as issued, are near the base of Liberty's neck. The bottom curve of the underdigit 2 bookends the 7 in the date. PCGS# 42842

#### 1887/6 Morgan Dollar, MS65 Prooflike Sought-After VAM-2 Variety

**4614 1887/6 VAM-2 MS65 Prooflike PCGS. CAC.** A Top 100 Variety. This popular overdate is listed in the *Guide Book* and is considered to be part of the regular Morgan dollar series by many collectors. The present coin is a well-detailed Gem, with frosty devices and reflective prooflike fields. The remnants of a 6 are visible to the lower right of the final digit in the date. Population: 3 in 65 Prooflike, 0 finer (10/14).  
Ex: Long Beach Signature (*Heritage*, 6/2011), lot 3997. PCGS# 42842

- 4615 1887/6-O VAM-3 MS62 PCGS.** A Top 100 Variety. Delicate chestnut toning visits the thoroughly lustrous surfaces of this overdated New Orleans dollar. The reverse is well preserved, and the obverse lacks any individually mentionable abrasions. PCGS# 133912
- 4616 1887/6-O VAM-3 MS62 PCGS.** A Top 100 Variety. A nearly brilliant representative of this popular O-mint overdate. Lustrous with an unmarked reverse and the central inexactness of strike customary for the *Guide Book* variety. The obverse displays grazes consistent with the grade. PCGS# 133912
- 4617 1887/6-O VAM-3 MS62 NGC.** A Top 100 Variety. Splendid golden-brown and forest-green patination embraces the margins of this lustrous overdated dollar. Marks are surprisingly few for the MS62 level. The eagle's breast and the hair above the ear show softness consistent with a New Orleans Mint origin. PCGS# 133912
- 4618 1887/6-O VAM-3 MS63 PCGS.** A Top 100 Variety. The curve of the base of a 6 is apparent at the bottom of the 7 in the date. Lustrous and lightly toned with a smooth reverse and a typical central strike. Distributed minor obverse marks correspond to the grade. PCGS# 133912

**1887/6-O Dollar, MS64  
Upper-End for the Grade**

- 4619 1887/6-O VAM-3 MS64 PCGS.** A Top 100 Variety, with the base of an underlying 6 evident to the right of the primary 7 in the date. This variety is elusive in Mint State, and is usually only seen in MS63 and lower grades. Choice examples are scarce, and Gems are notably rare. This representative displays frosty luster beneath traces of light golden color. At first glance, the surfaces appear a full grade point finer, though some faint luster grazes on Liberty's cheek are revealed when the coin is tilted beneath a light. Slightly softness is noted on the hair above Liberty's ear, as usual. PCGS has certified only one numerically finer representative (9/14). PCGS# 133912
- 4620 1888 MS66+ PCGS.** This high-end Premium Gem offers well-preserved lustrous surfaces, with sharply detailed design elements throughout. The obverse exhibits a brilliant center, with vivid rings of greenish-gold and lavender toning at the peripheries, while the reverse remains mostly brilliant. NGC ID# 2555, PCGS# 7182
- 4621 1888 MS66+ PCGS. CAC.** This frosty Premium Gem has tinges of gold toning along the borders of the otherwise brilliant and untuned silver surfaces. An attractive example that is rarely found finer, with only 29 higher grade PCGS submissions (10/14). NGC ID# 2555, PCGS# 7182
- 4622 1888 MS65 Deep Mirror Prooflike PCGS.** Bold white-on-black contrast and deep mirrors are the hallmarks of this Gem cameo. The devices are sharply brought up, and there are no singularly mentionable surface flaws. The 1888 Morgan is a plentiful issue in the absolute sense, but is seldom available with a Deep Mirror Prooflike designation. Population: 49 in 65 Deep Mirror Prooflike, 9 finer (10/14). NGC ID# 2555, PCGS# 97183

- 4623 1888-O MS66 PCGS.** The availability of the 1888-O Morgan dollar declines significantly at the MS66 grade level, and finer pieces are nearly unknown. This example displays frosty mint bloom beneath wisps of light golden color. The strike is above-average for the issue, and the surfaces are attractively well-preserved. None have been certified numerically finer at PCGS (10/14). NGC ID# 2556, PCGS# 7184
- 4624 1888-S MS64+ PCGS.** This high-end Choice Morgan dollar displays vibrant frosty mint luster and well-detailed design elements. The 1888-S claims a low mintage of 657,000 pieces, and examples in higher grades are quite scarce. NGC ID# 2557, PCGS# 7186

**1888-S Morgan Dollar, MS65  
Low-Mintage Issue, Rare Any Grade**

- 4625 1888-S MS65 PCGS.** Only 657,000 Morgan dollars were struck at the San Francisco Mint in 1888, a small mintage in the context of the series. This attractive Gem exhibits sharply detailed design elements and vibrant mint luster, with outstanding eye appeal. The well-preserved surfaces show just a hint of lavender toning. PCGS has graded 28 numerically finer examples (10/14). NGC ID# 2557, PCGS# 7186
- 4626 1888-S MS64 Prooflike PCGS.** An attractive near-Gem of this difficult-date S-mint, well-mirrored and showing few marks for the grade. The 1888-S is seldom seen in Prooflike and seldom seen in finer grades with Prooflike surfaces. Population: 70 in 64 (1 in 64+) Prooflike, 4 finer (10/14). NGC ID# 2557, PCGS# 7187
- 4627 1889-CC VF25 NGC.** Even wear is seen over the high points of the design and there are no abrasions worthy of mention on either side. The light gray patina is lightly tinged with pale rose and lilac. A very nice circulated example of this Carson City key. NGC ID# 2559, PCGS# 7190
- 4628 1889-CC VF35 NGC.** The 1889-CC is the most challenging Carson City Morgan dollar issue, and is a significant key date in the series. This Choice VF example displays remnants of luster in the recesses, with bright golden-gray patina overall. A few grade consistent abrasions accompany light wear. NGC ID# 2559, PCGS# 7190
- 4629 1889-CC — Improperly Cleaned — NGC Details. XF.** A mildly glossy but nonetheless pleasing pearl-gray and almond-gold example of the famous Carson City key. There are no mentionable marks, and luster illuminates the borders, wings, and curls. NGC ID# 2559, PCGS# 7190
- 4630 1889-CC XF40 ANACS.** Blue and orange-gold toning is strongest at the margins, where mint luster remains among the stars and legends. Numerous minor abrasions appear mostly on the obverse, where a nick by the ear and another on the 9 of the date are the most noticeable marks. The reverse is comparatively less abraded, with a small dig beneath the eagle's right (facing) wing. Just 350,000 pieces were struck — a key issue in the Carson City series and in the larger Morgan series as well. NGC ID# 2559, PCGS# 7190
- 4631 1889-CC XF40 NGC.** The 1889-CC is the king of Carson City Morgan dollars, and is widely sought in all grades. This piece is only lightly circulated, with pale golden-gray patina overall and hints of luster in the recesses. No significant circulation scars are observed on either side. NGC ID# 2559, PCGS# 7190

- 4632 1889-CC — Cleaned — ANACS. XF45 Details.** A cream-gray key date Carson City Morgan with traces of luster in design recesses. Relatively free from abrasions given its moderate Old West circulation. A mild cleaning cannot deny the eye appeal. NGC ID# 2559, PCGS# 7190

**1889-CC Morgan Dollar  
In-Demand, Choice XF Key Issue**

- 4633 1889-CC XF45 PCGS.** A lightly circulated specimen of this important Carson City key that retains most of its original detail and mint luster. Just a trace of wear is evident on the highest areas of the design, like the hair over the ear, and the silver-gray surfaces display a few hints of gold and lavender patina.  
*Ex: Pittsburgh Signature (Heritage, 10/2011), lot 4213.* NGC ID# 2559, PCGS# 7190

- 4634 1889-CC — Whizzed — NGC Details. AU.** The 1889-CC is the rarest Carson City Morgan issue, and is typically encountered in VF or XF grades. The present example has only light wear, but both sides are whizzed throughout.

- 4635 1889-CC — Graffiti — PCGS Genuine. AU Details.** A blanket of deep stone-gray and caramel-gold toning diminishes the impact of several obverse pinscratches. The reverse appears problem-free. A lightly worn example of the Carson City Morgan key. NGC ID# 2559, PCGS# 7190

- 4636 1889-CC — Improperly Cleaned — NGC Details. AU.** A lightly cleaned but nonetheless pleasing key date Carson City Morgan. The caramel-gold and cream-gray displays luster in design recesses. No marks are remotely consequential.

- 4637 1889-CC — Improperly Cleaned — NGC Details. AU.** A briefly circulated example of the well-known CC-mint key date. The surfaces display partial luster and a mere wisp of wheat-gold toning. Marks are confined to a minor reed impression on Liberty's upper jaw and a small die ejection scrape atop the eagle's head.

**1889-O Morgan Dollar, MS65  
Impressive, Conditionally Rare Example**

- 4638 1889-O MS65 PCGS.** Despite its huge mintage of nearly 12 million coins, this New Orleans issue is conditionally scarce at the Gem grade level, at least partly due to production deficiencies resulting in unsatisfactory striking sharpness. This boldly struck specimen exhibits coppery-mauve toning and sea-green border accents. Few surface marks are evident to the unaided eye. Only 10 examples are graded finer by PCGS (10/14). NGC ID# 255A, PCGS# 7192

**1889-O Silver Dollar, MS65  
Brilliant, Semiprooflike Surfaces**

- 4639 1889-O MS65 PCGS.** One of the condition rarities of the Morgan dollar series, with a mintage of nearly 12 million coins, many of which were stored by the Treasury and later released by the bagful throughout the 1930s into the mid-1960s. Most were lower-grade Mint State coins, however, and Gems are scarce. This brilliant-white coin shows a few light marks on the reflective fields from coin-to-coin contact but is sharply struck for the issue and Liberty's cheek is clean and frosted. PCGS and NGC combined have certified just 17 numerically finer pieces (10/14). NGC ID# 255A, PCGS# 7192

- 4640 1889-S MS65 PCGS.** Mint, amber, wine, and rose hues appear on the obverse of this well-preserved coin, while the reverse is untuned silver-white. Only a couple of trivial ticks appear on the profile of Liberty, along with a pair of reeding marks on the reverse. A decently struck piece overall, this Gem nonetheless shows some expected softness over the ear. An elusive issue in the next grade level. NGC ID# 255B, PCGS# 7194

- 4641 1889-S MS65 PCGS.** The 1889-S Morgan is only marginally elusive in Gem condition, but finer examples are distinctly scarce. This representative displays substantial semiprooflike mirroring in the fields, with just a tinge of light golden color over otherwise brilliant, satiny surfaces. Some minor lightness of strike is noted on the eagle's breast and the hair immediately above Liberty's ear. NGC ID# 255B, PCGS# 7194

- 4642 1889-S MS65 PCGS. CAC.** Vibrant cartwheel luster engulfs each side of this Gem example in gold-tinted brilliance, revealing few signs of contact overall. The hair above Liberty's ear is not fully defined, though the strike is otherwise pleasing. Seldom seen finer. NGC ID# 255B, PCGS# 7194

- 4643 1889-S MS65+ PCGS. CAC.** Brilliant surfaces exhibit relatively well-struck design elements and show some contrast, especially on the reverse. A few light scuffs are within the parameters of the grade designation. The 1889-S is one of the few Morgan dollars with a mintage less than 1 million pieces (700,000 coins), and is very popular as such. NGC ID# 255B, PCGS# 7194

- 4644 1889-S MS64 Prooflike PCGS.** A flashy Choice scarcer date dollar. The strike is good, and the glimpses of peach-gold toning are confined to the margins. The fields appear pristine, and the cheek exhibits only wispy marks. Housed in a green label holder. NGC ID# 255B, PCGS# 7195

- 4645 1890 MS65 PCGS.** The 1890 Morgan is a conditionally elusive issue in Gem grades, and exceedingly rare any finer. Frosty luster illuminates crisp devices on this lightly toned representative, which shows a blush of light golden color over the reverse and along the right obverse periphery. PCGS has certified only four numerically finer examples (10/14). NGC ID# 255C, PCGS# 7196

- 4646 1890 MS65 PCGS.** A beautiful cinnamon, orange, and amber-colored Gem example of this conditionally elusive issue, sporting radiant luster and top-tier eye appeal. Some minor lightness of strike is noted on the eagle's talons and the hair above Liberty's ear, though the coin is otherwise well-struck. Only four coins are numerically finer at PCGS (10/14). NGC ID# 255C, PCGS# 7196

- 4647 1890 MS65 PCGS.** Faint honey toning drapes lustrous and uncommonly clean surfaces. A bold strike save for slight softness on the eagle's breast and the hair above the ear. Despite a prolific mintage, the 1890 is nearly unobtainable finer. NGC ID# 255C, PCGS# 7196

**1890 Silver Dollar, MS65+  
Appealing High-End Example**

- 4648 1890 MS65+ PCGS.** The 1890 Morgan is a conditionally challenging issue; Gem examples are encountered with some frequency, but numerically finer pieces are extremely rare, with only four such coins certified by PCGS (9/14). This Plus-graded representative, therefore, is an important opportunity for the advanced series collector. Faint wisps of ice-blue and pale champagne color grace otherwise brilliant, frosty surfaces. The strike is pleasing and a few small luster grazes on the cheek are all that preclude an even finer grade and a significantly higher value. NGC ID# 255C, PCGS# 7196

- 4649 1890-CC MS64 PCGS. VAM-3.** The 90 in the date is repunched. Light honey-gold and pearl-gray toning graces this nicely struck and lustrous near-Gem. Marks are refreshingly few. A scarcer Carson City issue. NGC ID# 255D, PCGS# 7198

- 4650 1890-CC MS64 Prooflike PCGS. CAC.** Stark field-device contrast beautifully accentuates the sharp strike on this Choice Prooflike example. No individually significant abrasions are noted. A streak of deep olive toning graces the reverse to the left of the eagle, but no other color is observed. PCGS has encapsulated only 14 numerically finer Prooflike examples (10/14). NGC ID# 255D, PCGS# 7199

- 4651 1890-O MS65 PCGS.** Blended shades of lavender-gray, sea-green, and amber-gold encompass each side, effectively masking any grade-limiting surface flaws. Sharply struck design elements further increase the desirability of this Gem New Orleans dollar. Only 24 pieces are numerically finer at PCGS (10/14). NGC ID# 255E, PCGS# 7200

- 4652 1890-O MS65 PCGS.** This O-mint Gem possesses a radiant sheen and displays just a wisp or two of gold color under close examination. Sharply struck, except for the usual softness in the centers. A few unimportant, grade-consistent marks do not detract. Difficult to locate numerically finer, with only 24 such pieces certified by PCGS (10/14).  
*Ex: Long Beach Signature (Heritage, 5/2009), lot 1131.* NGC ID# 255E, PCGS# 7200

**1890-O Dollar, MS65  
Vivid Multihued Toning**

- 4653 1890-O MS65 PCGS. CAC.** Unusual and appealing swaths of midnight-gray, aquamarine, and golden-red toning consume both sides of this Gem representative. The central devices are not fully brought up, though the details are well-defined elsewhere and the surfaces are free of any major abrasions. The 1890-O Morgan dollar is an elusive date in Gem condition, and finer specimens are very rare and costly. PCGS has certified only 24 numerically finer representatives, while NGC has seen just five (9/14). NGC ID# 255E, PCGS# 7200

**1890-O Morgan Dollar, MS65  
Seldom Encountered Prooflike Example**

- 4654 1890-O MS65 Prooflike PCGS. CAC.** More than 10.7 million Morgan dollars were struck at the New Orleans Mint in 1890, with many pieces struck from worn out dies that had lost some of their intricate detail. Sharply struck examples with prooflike surfaces are especially elusive. This delightful Gem is such a coin, with frosty devices and deeply mirrored brilliant fields. Population: 39 in 65 (1 in 65+) Prooflike, 3 finer (10/14). NGC ID# 255E, PCGS# 7201

**1890-S Silver Dollar, MS66  
Vivid Reddish-Gold Toning**

- 4655 1890-S MS66 PCGS.** Dramatic reddish-gold toning covers the obverse with electric blue accents at the rims. The reverse shows a less-intense infusion of the same coloration, and both sides are boldly struck. Vivid mint luster shines over unmarked surfaces of this Premium Gem coin. PCGS and NGC combined have seen just eight numerically finer examples (10/14). NGC ID# 255F, PCGS# 7202

- 4656 1890-S MS64 Deep Mirror Prooflike ANACS.** The flashy fields provide obvious contrast against the devices on this nicely struck piece. Toning appears at the outer edges in hues of golden-brown. Scattered marks hold this dollar from a higher grade. As a point of reference, PCGS and NGC have each graded 29 examples at the MS64 level, with a combined total of only 14 finer (10/14). NGC ID# 255F, PCGS# 97203

**1891 Silver Dollar, MS65  
Multihued Obverse Toning**

- 4657 1891 MS65 PCGS.** Multiple hues and shades of aquamarine, orange, red, and lemon-gold cover the obverse in a vivid calico display of earthy colors, while the reverse shines with brilliant-white silver luster. The strike is bold for this Philadelphia date, which is often found weak and unattractive. Not so with this high-end, gleaming Gem. PCGS and NGC have certified just six numerically finer coins (10/14). NGC ID# 255G, PCGS# 7204

**1891 Morgan Dollar, MS65  
Spectacular Multicolor Toning**

- 4658 1891 MS65 PCGS.** The well-preserved surfaces of this spectacular Gem display vivid shades of turquoise, golden-brown, and violet toning, with vibrant mint luster underneath and only minor signs of contact. The 1891 Morgan dollar is a prime condition rarity in grades above the MS65 grade level. PCGS has graded three numerically finer examples (10/14). NGC ID# 255G, PCGS# 7204
- 4659 1891 MS64 Prooflike PCGS.** David Bowers described this Philadelphia date as "often insipid and grainy, not at all attractive," so this appealing example offers an excellent opportunity. Untoned and brilliant silver-white surfaces are fully prooflike and reflective. The strike is surprisingly bold for this issue. Only a few tiny abrasions are seen anywhere on the coin and determine the near-Gem grade. Population: 18 in 64 Prooflike, 0 finer (10/14). NGC ID# 255G, PCGS# 7205
- 4660 1891-CC MS64 NGC.** The reflective fields of this Choice Mint State piece are brilliant, shining through dappled gold and pale blue toning. An attractive Carson City dollar for the Nevada aficionado. NGC ID# 255H, PCGS# 7206
- 4661 1891-CC MS64+ PCGS.** Small splashes of lavender and navy-blue toning grace the peripheral recesses, leaving the remainder of each side with just wisps of light champagne color. A touch of the usual softness is seen above Liberty's ear and on the eagle's talons, though the frosty, minimally abraded surfaces are the chief draw for the viewer's eye. NGC ID# 255H, PCGS# 7206

- 4662 1891-CC MS64 Prooflike PCGS.** This well-struck near-Gem is free of mentionable abrasions and shows sharp contrast on surfaces that are also free of roller marks, a nice, untoned silver-white example of this late Carson City issue. NGC ID# 255H, PCGS# 7207

- 4663 1891-CC MS64 Prooflike PCGS.** Brilliant field luster enriches each side of this late Carson City issue, creating bold contrast against well-frosted devices. The silver-white surfaces show generous eye appeal. An elusive issue especially in Prooflike, where PCGS has graded only 21 numerically finer (10/14). NGC ID# 255H, PCGS# 7207

- 4664 1891-CC MS64 Prooflike PCGS.** A gorgeous piece showing stark field-to-device contrast and pleasingly preserved surfaces. The fields are glassy and highly reflective. Few Prooflikes are available any finer than this attractive near-Gem, at either of the major grading services. NGC ID# 255H, PCGS# 7207

- 4665 1891-CC Spitting Eagle, VAM-3, MS64 PCGS. CAC.** A Top 100 Variety. The mintmark is lightly repunched, perhaps of greater numismatic significance than the die lump beneath the eagle's beak. The variety was found on many 1891-CC GSA dollars, but its popularity is undeniable. Lustrous and minimally toned with a good strike and the expected number of wispy abrasions. PCGS# 133937

**1891-CC Silver Dollar, MS65  
'Spitting Eagle' VAM-3**

- 4666 1891-CC Spitting Eagle, VAM-3, MS65 PCGS.** A Top 100 Variety. The familiar VAM with a die lump situated beneath the eagle's beak. In addition, the mintmark is lightly repunched. A lustrous and virtually brilliant Gem that exhibits a good strike and smooth fields. Liberty's cheek and the eagle's breast display faint contact. PCGS# 133937
- 4667 1891-S MS65 PCGS.** A carefully preserved, Gem example of this elusive S-mint issue. Radiant, frosty mint luster yields to orange-gold, violet, and aquamarine toning over each side, while boldly struck design elements complete the overall appeal. NGC ID# 255K, PCGS# 7210
- 4668 1891-S MS65 PCGS.** A flashy Gem with full cartwheel luster, a frosty obverse and a semiprooflike reverse, as well as beautifully preserved fields. Seldom seen in better grades despite a plentiful mintage. NGC ID# 255K, PCGS# 7210
- 4669 1891-S MS65 PCGS.** It is difficult to discern why this piece did not receive a Prooflike designation, as substantial mirroring provides noticeable contrast with the well-struck, frosty devices. A few minute luster grazes limit the numeric grade. This better San Francisco issue is seldom available in numerically finer condition. NGC ID# 255K, PCGS# 7210

**1891-S Dollar, MS66**  
**Seldom Seen This Well-Preserved**

**4670 1891-S MS66 PCGS.** The 1891-S is a favorite issue among collectors seeking Morgan dollars with ample eye appeal, as the typical piece is well-struck and frosty. Examples are usually available in the MS63 and MS64 grade range, and a number of Gem pieces are also known. At the MS66 level, this date becomes scarce, and will prove quite difficult to locate. The example here offered shows vibrant, untuned luster and characteristically sharp motifs. A few faint grazes on the cheek limit the grade, but are hardly detracting to the unaided eye. Population: 81 in 66 (4 in 66+), 8 finer (9/14). NGC ID# 255K, PCGS# 7210

**4671 1892-CC MS62 PCGS.** Mottled gold and blue toning cover the obverse, with peripheral gold toning around brilliant silver on the reverse. This pleasing Mint State piece has reflective fields and good overall eye appeal. NGC ID# 255M, PCGS# 7214

**4672 1892-CC MS62 NGC.** Semiprooflike fields illuminate soft shades of amber-gold, violet, and aquamarine toning on the reverse, and small tinges of sun-gold on the obverse. Scattered abrasions limit the grade, though this remains a fairly attractive coin for the MS62 level. NGC ID# 255M, PCGS# 7214

**4673 1892-CC MS62 PCGS.** This brilliant Carson City dollar has frosty silver luster with untuned obverse and reverse surfaces. Delicate clash marks are visible in the fields of this pleasing piece. NGC ID# 255M, PCGS# 7214

**4674 1892-CC MS62 PCGS. CAC.** Light peach-gold toning adorns the peripheries of this lustrous and well struck scarcer date Carson City dollar. The reverse has the look of a higher grade, although the cheek displays distributed minor grazes. Encapsulated in an old green label holder. NGC ID# 255M, PCGS# 7214

**4675 1892-CC MS63 PCGS.** A slightly more challenging Carson City issue, despite a substantial mintage of more than 1.3 million coins. This brilliant example displays sharp, frosty devices set against semiprooflike mirroring in the fields. Light, scattered luster grazes on the cheek preclude a finer grade. NGC ID# 255M, PCGS# 7214

**4676 1892-CC MS63 PCGS. VAM-4B.** An interesting die variety due to its repunched mintmark and a multiply clashed N in IN. A hint of tan toning visits this lustrous scarcer date Carson City dollar. No marks are mentionable but the centers show minor inexactness of impression. NGC ID# 255M, PCGS# 7214

**4677 1892-CC MS63+ NGC.** In its next-to-last year of coin production, the Carson City Mint struck 1.3 million Morgan dollars, and survivors have proven to be relatively available and much more affordable than their 1893 counterparts. This is a nicely preserved, beautifully toned example showing deep layers of rainbow toning, especially across the reverse. NGC ID# 255M, PCGS# 7214

**1892-CC Dollar, Richly Toned MS64**

**4678 1892-CC MS64 NGC.** Deep original toning in shades of olive-gray, violet-red, and teal blankets each side of this Choice 1892-CC Morgan. The strike is sharp and any grade-limiting luster grazes are well-hidden by the rich patina. The 1892-CC was not as well-represented in the GSA sales as were some other Carson City issues, and it is proportionately more elusive in the finer Mint State grades. NGC ID# 255M, PCGS# 7214

**1892-CC Dollar, MS64 Prooflike**  
**Appealing Field-Motif Contrast**

**4679 1892-CC MS64 Prooflike PCGS.** Both sides are fully prooflike with mirrored fields and lustrous devices. Light marks are reflected in the fields and prevent a Gem grade for this piece. The otherwise fully brilliant surfaces show a slight trace of light gold toning near the borders on each side. Population: 84 in 64 (4 in 64+) Prooflike, 13 finer (9/14).  
*Ex: Charlotte ANA Signature (heritage, 2007), lot 1237.* NGC ID# 255M, PCGS# 7215

**4680 1892-S AU50 PCGS.** The green-and-gold border toning that is barely visible on the obverse is more prominent on the reverse. Semireflective luster remains in the fields, though the lightly abraded devices show distinct (if minor) wear. NGC ID# 255P, PCGS# 7218

**4681 1892-S AU50 PCGS.** The 1892-S is among the rarest issues in the series in Mint State, and AU examples are also desirable. This essentially untuned Morgan dollar lacks distracting marks and has luminous luster within the legends and wings.  
*Ex: Dallas Signature (Heritage, 10/2009), lot 1043.* NGC ID# 255P, PCGS# 7218

**4682 1892-S AU53 PCGS.** Bright centers yield to vivid orange-gold and teal peripheral toning, giving this still-lustrous AU example pleasing eye appeal. The 1892-S Morgan is particularly difficult to locate in Mint State, making attractive AU coins high on many collectors' want lists. NGC ID# 255P, PCGS# 7218

**4683 1893 MS63 PCGS. VAM-3.** The top of the 3 is repunched. Liberty's profile and UNITED are lightly die doubled. But any Select 1893 silver dollar is desirable, given the low mintage of the issue. Brilliant and lustrous with a good strike and a few marks on the left obverse. NGC ID# 255R, PCGS# 7220

**4684 1893 MS63 PCGS.** An attractive Select specimen of this low-mintage issue, this coin exhibits well-detailed design elements and vibrant mint luster. The surfaces display a scattering of minor contact marks that explain the grade. NGC ID# 255R, PCGS# 7220

**4685 1893-CC XF40 PCGS.** The Carson City Mint struck 677,000 Morgan dollars in its final year of production. This lightly circulated example features faint russet toning around the borders that yields to steel-gray centers. Grade-consistent wear occurs over the high points, and scattered marks do not detract. NGC ID# 255S, PCGS# 7222

**4686 1893-CC XF45 NGC.** The 1893-CC is the final Morgan dollar struck at the Carson City Mint, and also stands as one of the more elusive issues from that facility overall. This Choice XF example displays remnants of original mint luster shining through light golden toning on each side. Slight high-point friction is noted, but the devices retain strong detail. NGC ID# 255S, PCGS# 7222

**4687 1893-CC AU53 PCGS.** Bright, reflective surfaces exhibit just a trace of light golden color, while the surfaces are free of distractions. The centers are deficiently struck, an unusual characteristic for a Carson City issue. The 1893-CC was the final Morgan dollar issue from this mint, as the facility ceased coinage operations in June of that year. NGC ID# 255S, PCGS# 7222

#### 1893-CC Silver Dollar, Unc Details Last of the Carson City Coinage

**4688 1893-CC — Cleaning — PCGS Genuine. Unc Details.** Although faint evidence of cleaning prevents a numerical grade, this exceptional dollar has surfaces that suggest a Select Mint State or finer grade. The combination of strong eye appeal and light cleaning will result in an attractive and affordable example of this final Carson City dollar. NGC ID# 255S, PCGS# 7222

**4689 1893-O AU58 PCGS.** Although not held in quite as high esteem as the San Francisco and Carson City issues of this year, the 1893-O Morgan is an elusive key date in its own right, with a low mintage of only 300,000 pieces. This nearly Mint State example exhibits substantial mint luster beneath faint traces of light golden color. Friction is limited to the high points of the eagle's breast and the hair above Liberty's ear. NGC ID# 255T, PCGS# 7224

**4690 1893-O AU58 NGC.** A mintage of only 300,000 pieces ensures the key date status of this elusive New Orleans issue. This near-Mint example displays substantial mint luster beneath light golden toning on each side. No significant abrasions are observed. NGC ID# 255T, PCGS# 7224

#### 1893-O Morgan Dollar, MS61 Lowest-Mintage O-Mint Morgan

**4691 1893-O MS61 PCGS.** The 1893-O claims the lowest mintage of any Morgan dollar from the New Orleans Mint at a meager 300,000 pieces. This attractive MS61 example displays well-detailed design elements and bright mint luster on both sides, with a minimum number of minor contact marks for the grade. NGC ID# 255T, PCGS# 7224

**4692 1893-S AG3 NGC.** The allure of the 1893-S Morgan transcends the Mint State grade range, and the date is heavily sought even in the lower circulated grades. For the collector on a budget, this well-circulated example offers an important opportunity. The rims are incomplete in spots, reducing the numeric grade, but the devices are boldly outlined and the legends are clear. Original pewter-gray patina blankets smooth, problem-free surfaces. NGC ID# 255U, PCGS# 7226

**4693 1893-S Good 4 ANACS.** Although well-worn, this key-date Morgan dollar is attractive with grayish-champagne surfaces and only trivial surface marks. A slight thickening of the border over PL of PLURIBUS suggests a minuscule rim bruise. NGC ID# 255U, PCGS# 7226

**4694 1893-S Good 4 PCGS.** A few trivial scratches appear on the well worn surfaces of this Morgan key. Both sides are natural light gray with good eye appeal for the grade. NGC ID# 255U, PCGS# 7226

**4695 1893-S Good 6 NGC.** Natural silver-gray surfaces are somewhat darker in the protected areas of this key-date representative. Uniform wear is seen throughout, and each side exhibits nice design detail. Some scattered marks are fewer and much lighter than would be expected for a heavy, large silver dollar that has seen extensive circulation. This is a great piece for a lower-grade Morgan dollar collection. NGC ID# 255U, PCGS# 7226

**4696 1893-S — Polished — PCGS Genuine. Fine Details.** A collectible example of the rarest business issue of the series. Bright from a wipe, but the margins have partly retoned caramel-gold. The die markers within the RT in LIBERTY are readily observed. NGC ID# 255U, PCGS# 7226

#### 1893-S Morgan Dollar, Fine 12 Sought-After Issue in Any Grade

**4697 1893-S Fine 12 NGC. CAC.** A pleasing collectible example of the most sought-after issue in the Morgan dollar series, this coin retains much interior design detail, including a bold ear and some detail in the hair and wing feathers. Two vertical scratches in the left obverse field are the only marks of note and the surfaces are blanketed in light shades of pink and silver-gray toning. NGC ID# 255U, PCGS# 7226

#### 1893-S Morgan Dollar, VF Details

**4698 1893-S — Improperly Cleaned — NGC Details. VF.** The Morgan dollar series includes many scarce and low-mintage dates, but few can rival the appeal of the 1893-S. Only 100,000 examples were produced, the lowest business strike mintage figure in the series, and the issue has long been heralded as a major key date. This lightly circulated example shows signs of old cleaning, but has since acquired pleasing golden-gray patina. No other surface flaws are observed on either side.

**1893-S Dollar, VF30**  
**Pleasing Mid-Grade Example**

**4699 1893-S VF30 NGC.** A seldom-seen mid-grade example of this key San Francisco issue, this example displays bold detail for the grade, beneath pale golden-gray toning. Due to the large number of collectors who specialize in Morgan dollars, the low-mintage 1893-S (only 100,000 coins struck), is widely sought in all grades. NGC ID# 255U, PCGS# 7226

**4700 1894 XF40 NGC.** The 1894 Morgan is one of the scarcest and most popular Philadelphia issues in the series, boasting a low mintage of only 110,000 pieces. This lightly circulated, steel-gray example shows a blush of light golden color on each side, with subtle remnants of luster in the recesses. NGC ID# 255V, PCGS# 7228

**4701 1894 — Improperly Cleaned — NGC Details. AU.** No hairlines are readily apparent on this momentarily circulated key date silver dollar. The lustrous surfaces are attractive and display wisps of chestnut toning. Minor field grazes are noted near the arrowheads, and the reverse rim has small marks at 9 and 12 o'clock. NGC ID# 255V, PCGS# 7228

**4702 1894 AU53 NGC.** Substantial mint luster remains in the recesses of this About Uncirculated example. A faded crescent of lemon-gold toning graces the right obverse periphery, but the surfaces are otherwise nearly brilliant. Slight friction over the central high points defines the grade. NGC ID# 255V, PCGS# 7228

**4703 1894 AU53 NGC.** Well-known as the key date among business strike Philadelphia Mint Morgan dollars, this 1894 is an attractive piece with subdued gold and heather toning over light gray surfaces. NGC ID# 255V, PCGS# 7228

**4704 1894 AU55 PCGS.** Substantial original luster remains in the recesses of this Choice AU example. A faint blush of light golden color warms each side, and only minor wear is evident over the high points of the design. With a mintage of only 110,000 pieces, the 1894 Morgan is one of the more challenging Philadelphia issues in the series. NGC ID# 255V, PCGS# 7228

**4705 1894 AU58 NGC.** An undeniably original example, this near-Mint piece exhibits substantial frosty mint luster in the recesses, with a thin veil of light golden toning over each side and small tinges of olive color in the protected regions around the obverse border. Grade-limiting friction is only discernable with magnified examination. NGC ID# 255V, PCGS# 7228

**1894 Silver Dollar, MS62**  
**Appealing for the Grade**

**4706 1894 MS62 NGC.** A very appealing Uncirculated representative of this challenging issue, especially when one considers its rather modest Mint State rating. The vibrant, satiny surfaces are virtually untuned except for occasional golden peripheral color and most of the noticeable contact is confined to Liberty's cheek and nose. Ex: *Central States Signature (Heritage, 5/2004)*, lot 8647. NGC ID# 255V, PCGS# 7228

**4707 1894-O MS60 PCGS.** A strictly Mint State example, but with the usual striking deficiency seen over the eagle's breast and the hair above Liberty's ear. Satiny luster and tinges of light golden toning improve the eye appeal, giving this minimally abraded example a pleasing appearance for the grade. NGC ID# 255W, PCGS# 7230

**4708 1894-S MS63 PCGS.** Semiprooflike mirroring in the fields complements minimally abraded surfaces on this semikey-date example. Some minor striking deficiency is noted on the hair above Liberty's ear, but the strike is otherwise pleasing. Traces of light golden toning on each side attest to the originality of the luster. NGC ID# 255X, PCGS# 7232

**4709 1894-S MS63 PCGS.** This Select Mint State Morgan dollar has exceptional eye appeal with brilliant silver surfaces, combining frosty motifs with satiny, semi-reflective fields. A few trivial marks prevent a higher grade. NGC ID# 255X, PCGS# 7232

**4710 1894-S MS63 PCGS. CAC.** Gold, rose-gray, and blue hues mingle on this Select S-mint from a more challenging issue. Lightly abraded under the patina with slight blending of detail on the high points. NGC ID# 255X, PCGS# 7232

**1894-S Morgan, MS64+**  
**Well-Preserved, Frosty Surfaces**

**4711 1894-S MS64+ PCGS.** This semikey San Francisco issue is only marginally available in lower Mint State grades, and is distinctly scarce at the Gem level. This Plus-graded near-Gem displays faint traces of light golden color over otherwise brilliant, frosty surfaces. Surface abrasions are minimal for the grade, though softness on the hair above Liberty's ear and the eagle's breast precludes full Gem status. NGC ID# 255X, PCGS# 7232

**4712 1895-O AU55 PCGS.** A challenging New Orleans issue, seldom seen in the upper AU and Mint State grade range. This example displays slight high-point wear, but retains nearly complete detail. Substantial luster remains beneath a faint golden hue. NGC ID# 255Y, PCGS# 7236

- 4713 1895-O AU55 PCGS.** Light gray patina crosses much of each side, though hints of gold are visible along parts of the margins. A Choice AU coin with ample luster and considerable charm. NGC ID# 255Y, PCGS# 7236
- 4714 1895-S — Cleaning — PCGS Genuine. Unc Details.** The brilliant surfaces are prooflike due to a proliferation of die polish lines, as made. Well struck aside from the hair above the ear. Although dipped, this much better date dollar is only lightly abraded. NGC ID# 255Z, PCGS# 7238
- 4715 1895-S/S VAM-3 AU55 PCGS.** A Hot 50 Variety. The mintmark was initially entered with a blundered counterclockwise rotation, then repunched in a correct position. But any variety of the scarce 1895-S is desirable at the Choice AU level. The present almond-gold example retains substantial luster and shows only inoffensive marks. A small spot is noted on the right (facing) wing. PCGS# 134020

**1896 Dollar, MS67  
Vivid Obverse Color**

- 4716 1896 MS67 PCGS.** An outstanding strike and exceptional surface preservation only reflect about half of this Superb Gem's immense visual appeal; the reverse is nearly untuned, though the obverse showcases a deep crescent of forest-green, cherry-red, blue, and lemon-gold toning around the lower periphery, and softer shades of lime-green, powder-blue, and lavender-gold over the upper margin. Only two pieces have been certified numerically finer, both PCGS coins (9/14). NGC ID# 2562, PCGS# 7240

**1896 Silver Dollar, MS67  
Superb Type Coin**

- 4717 1896 MS67 PCGS.** The 1896 Morgan is one of the most plentiful issues of the period in high grades, well-suited for type representation. This Superb Gem example boasts frosty, nearly brilliant luster, with a small rainbow crescent seen around the upper-left obverse periphery. Some slight softness is noted on the hair immediately above Liberty's ear, though the exceptional surface preservation gives this piece impeccable visual appeal. PCGS has certified just two numerically finer representatives (9/14). NGC ID# 2562, PCGS# 7240
- 4718 1896 MS65 Deep Mirror Prooflike PCGS.** This plentiful Philadelphia issue becomes much more elusive when searching for a Gem Deep Mirror Prooflike example. This piece displays glassy reflectivity in the fields and sharp, satiny devices. A veil of light golden toning warms each side, adding to the eye appeal. PCGS has certified only 19 numerically finer Deep Mirror Prooflike representatives (10/14). NGC ID# 2562, PCGS# 97241

- 4719 1896 MS65+ Deep Mirror Prooflike PCGS.** Each side displays a high degree of mirrorlike reflectivity and thick mint frost, providing unusual Prooflike contrast for the issue. This Gem is well-struck and brilliant. PCGS has certified 19 pieces finer (10/14). NGC ID# 2562, PCGS# 97241
- 4720 1896-O MS60 NGC.** Similar to its 1886-O predecessor, the 1896-O is plentiful in VF but emerges as a conditional rarity in Uncirculated grades. The present unworn example displays vibrant luster and medium caramel-gold toning. Marks on Liberty's neck and behind her mouth correspond to the grade. NGC ID# 2563, PCGS# 7242
- 4721 1896-O MS61 PCGS.** The 1896-O is a semikey-date issue in pleasing Mint State condition. This example is near the lower end of that grade range, but exhibits only minor abrasions. A faint blush of light golden color blankets each side, while the centers show a touch of the usual weakness that is characteristic of New Orleans issues from this period. NGC ID# 2563, PCGS# 7242
- 4722 1896-O MS61 PCGS.** While its Philadelphia counterpart is readily available in most grades, the 1896-O Morgan is a major condition rarity in pleasing Mint State condition. This is lower-grade example with moderate surface contact on the obverse, but the luster is frosty with a light golden hue, and the overall eye appeal is substantial for the grade. Some minor striking weakness is noted on the hair above Liberty's ear. NGC ID# 2563, PCGS# 7242

**1896-O Morgan Dollar, MS62  
Challenging Issue in High Grade**

- 4723 1896-O MS62 PCGS.** The 1896-O Morgan dollar is known as a poorly produced issue, often seen with a soft strike, insipid mint luster, and excessive surface marks. High-grade examples are truly rare and attractive MS62 examples, like the present coin, are prized by series specialists. This well-detailed specimen is lightly marked, with lustrous surfaces that show highlights of apple-green toning at the borders. NGC ID# 2563, PCGS# 7242

**1896-S Morgan Dollar, Brilliant MS63**

- 4724 1896-S MS63 PCGS. VAM-2.** The top of the 6 is repunched. This lustrous, stone-white, scarcer date dollar has pleasing preservation, but may be kept from the Choice level by lightness of strike in the centers. The mintage of 5 million pieces suggests the 1896-S is common, and while circulated pieces are plentiful, Uncirculated examples are elusive.  
*Ex: Long Beach Signature (Heritage, 9/2011), lot 3750.* NGC ID# 2564, PCGS# 7244

**4725 1897-O MS61 PCGS.** A typical strike results in obvious central weakness on this scarce New Orleans dollar. Unlike some other issues, the 1897-O was not saved in the Treasury vaults, and the supply of Mint State examples is far less than collector demand. Several die cracks appear on the reverse. NGC ID# 2566, PCGS# 7248

**4726 1897-O MS62 NGC.** For the MS62 grade level, this 1897-O Morgan exhibits exceptional eye appeal, with minimal abrasions and frosty, glowing mint luster shining through a blanket of original golden toning. The hair above Liberty's ear and the eagle's breast are slightly soft, as is typical of this New Orleans issue. NGC ID# 2566, PCGS# 7248

**4727 1897-O MS62 PCGS.** Rich orange and claret border-toning is dappled around medium-gray interiors. Well struck on the reverse with satiny luster and solid eye appeal for the date. NGC ID# 2566, PCGS# 7248

### 1897-O Dollar, MS63+ Challenging O-Mint Issue

**4728 1897-O MS63+ PCGS.** The 1897-O Morgan is somewhat more elusive in Mint State grades than its mintage of more than 4 million coins would suggest. The issue is also known for being rather poorly struck with deficient luster. This Plus-graded representative exhibits the usual softness on the hair above Liberty's ear, but the luster is above-average, with frosty luminance and faint traces of light golden toning. A few light luster grazes on Liberty's cheek preclude Choice status. PCGS has seen only 48 numerically finer representatives (9/14). NGC ID# 2566, PCGS# 7248

### 1897-S Silver Dollar, MS66 Prooflike Starkly Contrasted, Few Finer

**4729 1897-S MS66 Prooflike PCGS.** Prooflike examples of this San Francisco issue are scarce at the Premium Gem grade level, and extremely rare any finer. This representative shows bold design definition and stark field-motif contrast. Faint traces of light golden color grace the softly frosted devices, while the fields are void of any mentionable flaws. Population: 31 in 66 (2 in 66+) Prooflike, 3 finer (9/14). NGC ID# 2567, PCGS# 7251

**4730 1898 MS66 Prooflike PCGS.** A highly appealing Premium Gem, this brilliant type coin displays subtle cameo contrast and vibrant mint bloom. No significant marks are observed, even under close examination. Population: 16 in 66 (1 in 66+) Prooflike, 0 finer (10/14). NGC ID# 2568, PCGS# 7253

**4731 1898-O MS67 PCGS. CAC.** Untoned silver-white surfaces beam with luster on this Superb Gem 1898-O Morgan dollar, a coin with great eye appeal and a nice, bold strike. Both sides show evidence of light die clashing, but there are few contact marks or other distractions. The CAC population in MS67 is 47 pieces between NGC and PCGS combined (9/14). PCGS has never certified an MS68 of this issue. NGC ID# 2569, PCGS# 7254

**4732 1898-O MS67 PCGS. CAC.** Thick, untoned mint frost and a lack of any readily distinguishable abrasions are among the eye-catching attributes this Superb Gem possesses. The strike is bold and, for a New Orleans issue, the eye appeal is seemingly unrivaled. None have been certified numerically finer at PCGS (10/14). NGC ID# 2569, PCGS# 7254

**4733 1898-S MS65 PCGS.** A lovely Gem with fully brilliant, untoned silver surfaces. The 1898-S is a condition rarity, and only 76 examples are PCGS certified in higher grades (9/14). This example has excellent eye appeal, with only scattered and trivial marks. NGC ID# 256A, PCGS# 7256

**4734 1898-S MS65 NGC.** An impressive Gem, this brilliant and lustrous silver dollar has frosty white surfaces with delicate gold, lilac, and blue peripheries. NGC ID# 256A, PCGS# 7256

### 1898-S Morgan Dollar, MS64 Spectacular Deep Mirror Prooflike Example

**4735 1898-S MS64 Deep Mirror Prooflike PCGS. CAC.** The 1898-S Morgan dollar enjoyed a mintage of more than 4 million pieces, but few survivors can match the quality and eye appeal of this spectacular piece. The design elements are sharply detailed throughout, with frosty texture that contrasts boldly with the deeply reflective fields. Population: 34 in 64 (1 in 64+) Deep Mirror Prooflike, 7 finer (10/14). NGC ID# 256A, PCGS# 97257

**4736 1899 MS65 Prooflike NGC.** This low-mintage issue of 330,000 pieces is represented here by a nice, sharply struck Gem with little toning and generous field-device contrast. A few small ticks on Liberty are all that preclude an even finer grade. Seldom seen in Prooflike. Census: 20 in 65 Prooflike, 2 finer (10/14). NGC ID# 256B, PCGS# 7259

**4737 1899-O MS67 PCGS.** The seemingly pristine surfaces and heavily frosted, brilliant luster of this Superb Gem deliver virtually unmatched eye appeal. The eagle's talons are not fully defined, but the strike is otherwise sharp for this New Orleans issue. PCGS has seen only one numerically finer example, with none so-graded at NGC (9/14). NGC ID# 256C, PCGS# 7260

**4738 1899-S MS65 PCGS.** A moderately scarce San Francisco dollar in Gem or finer condition. This silver-white example is brilliant, frosty, and fully struck. A thin sheen of almond-gold patina floats amid the cartwheel luster. NGC ID# 256D, PCGS# 7262

**4739 1899-S MS65 PCGS. CAC.** Dusky gold-gray and violet shadings enrich the eye appeal of this captivating Gem. Powerful luster filters through the deep patina. NGC ID# 256D, PCGS# 7262

**4740 1899-S MS64+ Prooflike PCGS.** Both sides of this sharply defined and brilliant near-Gem have fully mirrored fields around satiny, lustrous devices. PCGS has certified 72 MS64 Prooflike 1899-S dollars, including this piece that is the only one to receive the Plus designation (9/14). NGC ID# 256D, PCGS# 7263

**4741 1899-S MS65 Prooflike PCGS.** The 1899-S Morgan is a particularly elusive date in Prooflike grades, and is genuinely scarce at the Gem level. This is a deeply reflective, golden-toned example, with satiny devices and well-preserved surfaces. The strike is lacking slightly on the hair above Liberty's ear, though the devices are otherwise pleasing. Population: 39 in 65 Prooflike, 4 finer (10/14). NGC ID# 256D, PCGS# 7263

**4742 1900 MS66+ PCGS. CAC.** The 1900 Morgan dollar is challenging issue at the Premium Gem grade level, and finer pieces are scarcely seen. This Plus-graded piece displays frosty, nearly uninterrupted cartwheel luster, with a pale champagne tinge over each side. Some minor striking deficiency on the hair above Liberty's ear is characteristic of this issue, but hardly detracts from the overall appeal. PCGS has encapsulated 36 numerically finer representatives (10/14). NGC ID# 256E, PCGS# 7264

**1900-O Dollar, MS66+ Prooflike  
Sole Finest Prooflike Example at PCGS**

**4743 1900-O MS66+ Prooflike PCGS. CAC.** The 1900-O Morgan dollar is readily available in all grades, but Prooflike examples are scarce. Certified at the Premium Gem level with a Plus designation, this brilliant, sharply struck piece represents an important opportunity for the specialist. Ample mirroring illuminates the fields, with swirling, wispy die polishing marks visible upon close examination. Surface abrasions are nearly nonexistent. Population: 26 in 66 (1 in 66+) Prooflike, 0 finer (9/14). NGC ID# 256F, PCGS# 7267

**4744 1900-O/CC VAM-11 MS65 PCGS. CAC.** A Top 100 Variety. The undertype CC is visible on close inspection without a loupe. This attractive Gem displays vibrant mint luster and sharply detailed design elements throughout. Population for VAM-11: 7 in 65, 2 finer (10/14). PCGS# 133963

**1900-O/CC Dollar, MS65+  
Important Guide Book Variety**

**4745 1900-O/CC VAM-11 MS65+ PCGS. CAC.** A must-have Guide Book variety, with an O mintmark entered over a partially effaced CC. This high-end Gem example displays bold motifs and attractively clean surfaces. Just a suggestion of light golden color graces each side, giving this piece ample eye appeal for the grade. Finer representatives are scarcely seen. PCGS# 133963

**4746 1901 AU58 PCGS.** A trace of high-point wear prevents a Mint State grade assessment to this brilliant and attractive silver dollar. Both sides have virtually full luster with scattered, inconsequential marks. NGC ID# 256J, PCGS# 7272

**1901 Doubled Die Reverse Dollar, AU55  
VAM-3, Rare Guide Book Variety**

**4747 1901 Doubled Die Reverse, VAM-3, AU55 PCGS. CAC.** Ex: California-Michigan Collection. A Top 100 Variety. Along with the 1888-O "Hot Lips," the 1901 VAM-3 is the best known doubled die variety of the series. The second hubbing was north of the initial hubbing, and fortunately for collectors, the initial hubbing was strong. The pick-up point is the eagle's tail. A nearly white example with peripheral luster and relatively few marks. Ex: Long Beach Signature (Heritage, 2/2008), lot 1493. PCGS# 133965

**1901-S Dollar, Frosty MS65**

**4748 1901-S MS65 PCGS.** A somewhat better San Francisco issue, seldom seen at the Gem grade level and rare any finer. This representative displays frosty luster with a few small hints of color throughout. The eagle's breast and the hair above Liberty's ear are not fully defined, though the well-preserved surfaces are more than sufficient for eye appeal. PCGS has certified only 36 numerically finer representatives (10/14). NGC ID# 256L, PCGS# 7276

**4749 1902 MS66+ PCGS. CAC.** Peach-gold, aquamarine, and plum-mauve toning is confined to the margins of this lustrous and sharply struck high-grade silver dollar. Trivial surface imperfections fail to affect the exceptional eye appeal. NGC ID# 256M, PCGS# 7278

**4750 1902 MS64 Prooflike PCGS. CAC.** The fields are appreciably reflective, though contrast is minimal as is often the case with this issue. The surfaces show well-detailed devices and areas of light golden patina over otherwise silver-gray surfaces. Population: 27 in 64 Prooflike, 21 finer (10/14). NGC ID# 256M, PCGS# 7279

**4751 1902-O MS66+ PCGS. CAC.** This brilliant Premium Gem exhibits intense mint frost and fully struck design elements. Both sides reveal a few minuscule marks that fail to limit the grade or the eye appeal of this remarkable example. Population: 49 in 66+, 15 finer (10/14). NGC ID# 256N, PCGS# 7280

**4752 1903 MS65 Prooflike PCGS.** Even though struck in an amount exceeding 4.6 million coins, the 1903 Morgan dollar seldom appears in high grade with Prooflike surfaces. This untuned piece shows generous luster and abundant contrast, a happy exception. Population: 31 in 65 Prooflike, 6 finer (10/14). NGC ID# 256R, PCGS# 7285

**4753 1903-O MS65 Prooflike NGC.** The 1903-O Morgan dollar issue is one with enormous cachet, due to its status as among the rarest series members in pre-GSA times. This Gem Prooflike example doubles down on that appeal with sparkling silver-white surfaces that show great contrast and fulsome luster. Census: 10 in 65 Prooflike, 7 finer (10/14). NGC ID# 256S, PCGS# 7287

- 4754 1903-S — Cleaning — PCGS Genuine. Unc Details.** The 1903-S is the scarcest post-1895 San Francisco issue. This lustrous and nearly brilliant example is minutely granular and slightly subdued but lacks hairlines. The cheek displays minor abrasions. NGC ID# 256T, PCGS# 7288

**1903-S Silver Dollar, MS65  
Seldom Available in Mint State**

- 4755 1903-S MS65 PCGS.** A late-series semikey, the 1903-S is elusive in grades through MS65 and is rare any finer. This Gem example exhibits radiant mint bloom shining through a blanket of forest-green, cherry-red, and golden-brown toning on each side. The strike is sharp and the surfaces are free of any mentionable abrasions. PCGS has certified 40 numerically finer representatives (9/14). NGC ID# 256T, PCGS# 7288

- 4756 1904 MS65 PCGS.** Remarkably clean surfaces, especially Liberty's cheek, characterize this solid Gem 1904. Each side is covered in medium to deeper shades of olive, rose, and gray. Sharply, but not quite fully struck in the centers. NGC ID# 256U, PCGS# 7290

**1904-S Dollar, Lustrous MS62**

- 4757 1904-S MS62 NGC.** The 1904-S Morgan dollar is plagued by weak strikes and deficient luster, a factor that no doubt contributes to its scarcity in higher Mint State grades. This example is softly struck in the centers, as usual, but exhibits unusually radiant luster with just a faint suggestion of light golden color. Light surface grazes are observed when tilted beneath a light, though the preservation is excellent for the grade. NGC ID# 256W, PCGS# 7294

**1904-S Silver Dollar, MS62  
Above-Average Eye Appeal**

- 4758 1904-S MS62 NGC.** The 1904-S is an elusive issue in Mint State condition when compared with the active demand for such coins, and the typical piece is deficiently struck with less than exciting luster. This representative is a rather pleasing coin for the grade, with radiant cartwheel luster and a ring of lemon-gold toning around the outer borders. The strike is weak in the centers, as expected, but the surfaces are unusually clean for the grade. NGC ID# 256W, PCGS# 7294

- 4759 1904-S AU58 Prooflike NGC.** Distinct reflectivity in the fields accounts for the Prooflike designation. This near-Mint semikey example is almost entirely untuned, save for a small area of mauve color on the lower reverse. A number of small abrasions are scattered throughout. Census: 3 in 58 Prooflike, 20 finer (10/14). NGC ID# 256W, PCGS# 7295

- 4760 1921 MS66+ PCGS. CAC.** The 1921 Morgan dollar was produced in huge numbers, but the issue is conditionally rare in grades above the MS66 level. This high-end Premium Gem displays sharply detailed design elements and the pristine surfaces radiate vibrant mint luster. PCGS has graded eight numerically finer examples (10/14). NGC ID# 256X, PCGS# 7296

- 4761 1921 MS64 Deep Mirror Prooflike NGC.** While the typical 1921 Morgan dollar is poorly struck, this near-Gem is nicely detailed, including excellent definition in the hair over Liberty's ear, and fairly strong impressions on the eagle's breast. Untoned surfaces reveal just a few minute grade-defining marks. Census: 51 in 64 Deep Mirror Prooflike, 6 finer (10/14). NGC ID# 256X, PCGS# 97297

- 4762 1921-D MS66 PCGS. CAC.** Shimmering, frost-white mint bloom engulfs each side of this Premium Gem in brilliant radiance. Some minor luster grazes are noted on the cheek, but the surfaces are otherwise pristine. The eagle's breast exhibits the usual softness, but the eye appeal is hardly inhibited. PCGS has certified only eight numerically finer examples (9/14). NGC ID# 256Y, PCGS# 7298

- 4763 1921-D MS66 PCGS. CAC.** The only Denver issue in the series, mandatory for a complete mintmark set. This Premium Gem example shows peripheral violet, blue, and orange-gold toning that softens toward the centers. The eagle's breast is characteristically weak, though the coin is otherwise well-struck, with no mentionable abrasions. Only eight pieces are numerically finer at PCGS (10/14). NGC ID# 256Y, PCGS# 7298

**1921-D Silver Dollar, MS66+  
Myriad Toning Hues**

- 4764** 1921-D MS66+ PCGS. CAC. A sliver of brilliance on each side is nearly engulfed by teal, russet, and forest-green toning, while frosty mint luster illuminates the patina. The eagle's breast is lacking complete definition, as usual, though the coin is otherwise well-struck. PCGS has certified only eight numerically finer examples (9/14). Ex: Long Beach Signature (Heritage, 9/2006), lot 5580. NGC ID# 256Y, PCGS# 7298

- 4765** 1921-S MS65 PCGS. A fine Gem example of this San Francisco issue, with lustrous, pleasingly clean surfaces. Traces of light toning accompany the mostly stone-white coloration. NGC ID# 256Z, PCGS# 7300

- 4766** 1921-S MS65 PCGS. CAC. The San Francisco variant is the most elusive of the three 1921 Morgan dollar issues, and is also the most difficult to find with a sharp strike. This Gem example displays frosty luster shining through varying shades of light golden toning, with the colors deeper over the obverse. Liberty's hair is sharply detailed, but the eagle's breast and portions of the wreath are not fully defined. PCGS has certified 61 numerically finer examples (9/14). NGC ID# 256Z, PCGS# 7300

**1921-S Morgan Dollar, MS66  
Seldom Seen So Fine**

- 4767** 1921-S MS66 PCGS. The 1921-S Morgan dollar issue, like its P- and D-mint siblings, is a one-year type coin due to the new hub design implemented for their issuance, with lower relief — in reality, a one-year subtype. The 1921-S is seldom found in Premium Gem condition. This example boasts surfaces that are remarkably well-preserved and attractive, with an even pinkish-gold patina and a credible strike. Population: 64 in 66 (2 in 66+), 0 finer (10/14). NGC ID# 256Z, PCGS# 7300

**PROOF MORGAN DOLLARS**

- 4768** 1879 — Questionable Color — PCGS Proof Genuine. Unc Details. The PCGS label may appear contradictory, and this coin is a true proof with no signs of wear, thus the "Uncirculated Details" description. Deep steel-gray and pale gold toning appears original, although that is uncertain. Light cameo contrast is preserved. NGC ID# 27Z2, PCGS# 7314

**1880 Morgan Dollar, PR64 Cameo  
Untoned, Contrasted Proof**

- 4769** 1880 PR64 Cameo PCGS. A large proof production of 1,355 pieces (the highest proof mintage of the entire Morgan series) was bolstered by speculators in the 1880 Trade dollar proofs. This silver-white example will satisfy those who prefer untuned proofs. Stark contrast between the frost-white motifs and the silver-mirrored fields emphasizes the bold strike and seemingly flawless, undisturbed portrait of Liberty. Population: 38 in 64 (1 in 64+) Cameo, 48 finer (10/14). PCGS# 87315

- 4770** 1883 — Questionable Color — PCGS Proof Genuine. Unc Details. Pastel ocean-blue and straw-gold toning is deemed suspicious by PCGS. Mildly granular on the obverse field near the UR and US in PLURIBUS, and on the reverse field above the leaves of the olive branch. NGC ID# 27Z7, PCGS# 7318

- 4771** 1884 — Altered Surfaces — PCGS Proof Genuine. Unc Details. The reverse field near the arrowheads has a textured appearance suggestive of smoothing. Nonetheless, this fully struck specimen offers consistent light almond-gold toning and noticeable cameo contrast. NGC ID# 27ZB, PCGS# 7319

- 4772** 1887 — Questionable Color — PCGS Proof Genuine. Unc Details. A fully struck specimen that exhibits obvious cameo contrast between the frosty motifs and the glassy fields. The iridescent peach-gold, rose-red, and cobalt-blue shades are attractive, although regarded with skepticism by PCGS. NGC ID# 27ZG, PCGS# 7322

**1887 Morgan, Toned PR64**

- 4773** 1887 PR64 NGC. From a mintage of 710 pieces, this Choice proof exhibits original toning in shades of orange-gold and lavender-gray over deeply mirrored fields. The devices are sharply struck and provide subtle contrast with the more deeply toned recesses. This issue can be challenging to locate in finer numeric grades. Housed in a prior generation holder. NGC ID# 27ZG, PCGS# 7322

**1892 Dollar, PR62 Cameo**  
**Pleasing and Deeply Mirrored**

**4774 1892 PR62 Cameo NGC.** A somewhat larger-than-average mintage figure of 1,245 pieces makes this Morgan dollar proof date a bit more available than others. Cameo coins are relatively scarce, however. This piece exhibits stark contrast between the fields and devices, and an attractive original appearance overall. Slide marks on Liberty's cheek limit the grade. PCGS# 87327

**4775 1899 — Stained — NGC Details. Proof.** One of just 846 proofs struck, this fully impressed specimen has a stone-white obverse and light butter-gold toning on the reverse. Inspection beneath a lens reveals parallel hairlines. NGC ID# 27ZX, PCGS# 7334

**4776 1901 — Altered Surfaces — PCGS Proof Genuine. Unc Details. VAM-4.** ONE DOLLAR is lightly die-doubled, diagnostic for proofs of this date. A nicely struck specimen with blended cream-gray and almond-gold toning. The cheek is micro-granular, as issued. The fields exhibit wispy hairlines. NGC ID# 27ZZ, PCGS# 7336

## PEACE DOLLARS

**4777 1922 MS66+ NGC.** An exceptional Peace dollar, this Plus-designated Premium Gem exhibits brilliant and frosty silver luster with pristine surfaces. A single mark on Liberty's cheek precludes a finer grade. NGC has certified just 36 finer examples (10/14). NGC ID# 257C, PCGS# 7357

**4778 1922 MS66+ PCGS. CAC.** One of the most visually pleasing examples of this second-year issue that we have ever examined, this piece is intensely lustrous and fully brilliant, with outstanding strike definition. A mere handful of minuscule marks keep this piece from an even finer grade. Population: 46 in 66+, 25 finer (10/14). NGC ID# 257C, PCGS# 7357

**4779 1922-S MS65 PCGS.** The lustrous surfaces of this S-mint Peace dollar display soft lavender and silver-gray color and are devoid of significant marks. While this issue is typically very poorly struck (as are most San Francisco Mint Peace dollars) because the mint reduced striking pressure to extend die life (Burdette, 2011), the present Gem exhibits better detail than typically seen. The hair over the ear, for example, is not flat as usually encountered. The remaining design elements also exhibit above-average definition. NGC ID# 257E, PCGS# 7359

**4780 1922-S MS65 PCGS.** A well-detailed Gem, with vibrant mint luster under shades of apple-green, silver-gray, and lavender toning. The 1922-S is reasonably available in MS65 condition, but PCGS has graded only seven numerically finer examples (10/14). NGC ID# 257E, PCGS# 7359

**4781 1922-S MS65 PCGS. CAC.** This well-preserved Gem displays sharply detailed design elements and vibrant mint luster, with a few hints of golden-tan toning. PCGS has graded only seven numerically finer examples (10/14). NGC ID# 257E, PCGS# 7359

**4782 1923 MS66+ PCGS. CAC.** The strike is razor-sharp at the centers, though obverse peripheral elements show slight incompleteness. Light golden toning visits this lustrous, high-grade silver type coin. The cheek is remarkably smooth. NGC ID# 257F, PCGS# 7360

**1923 Peace Dollar, MS67**  
**Shimmering Mint Luster, Great for Type**

**4783 1923 MS67 NGC.** This second-year issue has seen a high number of examples graded at the Gem and Premium Gem grade levels. Superb Gems are less numerous, but more available than for other early Peace dollar dates. This is an exceptional coin in every respect, from razor-sharp strike definition to impeccable surface preservation. Census: 97 in 67, 0 finer (10/14). NGC ID# 257F, PCGS# 7360

**1923-S Silver Dollar, MS65**  
**Only One Numerically Finer at NGC**

**4784 1923-S MS65 NGC.** Thick mint frost resides beneath a thing golden veil on the obverse, and rich honey-gold and gunmetal-blue toning on the reverse. The strike is lacking slightly in central definition, though the outstanding preservation of the surfaces fully balances the eye appeal. The 1923-S is readily available in Choice and lower grades, but is scarce at the Gem level and decidedly rare any finer. Census: 80 in 65, 1 finer (9/14). NGC ID# 257H, PCGS# 7362

**4785 1924 MS66+ PCGS. CAC.** One of the more plentiful issues overall, ideal for type representation. This high-end example displays wisps of light golden color over heavily frosted mint luster. The surfaces are especially clean, even for the Premium Gem grade level, and the devices are sharply impressed. PCGS has certified 29 numerically finer representatives (10/14). NGC ID# 257J, PCGS# 7363

**4786 1924 MS66+ PCGS. CAC.** This high-end Premium Gem displays sharply detailed design elements, with slightly subdued mint luster, under delicate shades of silver-gray, pale gold, and amber patina. PCGS has graded 29 numerically finer examples (10/14). NGC ID# 257J, PCGS# 7363

**4787 1924-S MS64 PCGS.** The frosted, ice-white surfaces of this splendid near-Gem 1924-S Peace dollar appear to verge on an even finer grade, as there are few mentionable signs of contact. The strike through the hair over Liberty's ear is a bit soft, however. Some faint blushes of lilac appear on the reverse. NGC ID# 257K, PCGS# 7364

**4788 1924-S MS64 PCGS.** Butter-gold and ice-blue toning adorns this lustrous and sharply struck silver dollar. The fields are well preserved, and only a tick on the cheekbone precludes a much higher grade. Housed in an old green label holder. NGC ID# 257K, PCGS# 7364

- 4789 1924-S MS64 PCGS.** Vibrant cartwheel luster exhibits faint lavender hues on the obverse, and frosty brilliance on the reverse. The devices are sharply impressed, with just a few light abrasions which limit the grade. Scarcely seen finer. NGC ID# 257K, PCGS# 7364
- 4790 1924-S MS64 PCGS.** Thick mint frost and sharply struck design elements are the hallmarks of this Choice example. A few light luster grazes on Liberty's cheek limit the grade, but are not overly detracting. The 1924-S Peace dollar is frequently seen in MS64 and lower grades, but Gem examples are scarce. NGC ID# 257K, PCGS# 7364
- 4791 1924-S MS64 PCGS.** Delicate champagne and pale blue toning appear over the brilliant and frosty silver luster of this Choice Mint State Peace dollar. The 1924-S is a condition rarity, with only 84 finer examples submitted to PCGS. NGC ID# 257K, PCGS# 7364
- 4792 1924-S MS64+ NGC. CAC.** The 1924-S Peace dollar had a fairly low mintage for the period (only 1.7 million coins), and is distinctly scarce finer than the MS64 grade level. This Plus-graded Choice example displays frosty cartwheel luster with just a few light golden wisps of color. The strike is sharp, and the surfaces exhibit only grade-consistent disturbances. NGC ID# 257K, PCGS# 7364
- 4793 1925-S MS64+ PCGS.** An available date in MS64 and lower grades, the 1925-S Peace dollar becomes a significant condition rarity at the Gem level. This Plus-graded example shows pale golden toning over satiny luster. The design is well brought up, and no singularly detracting abrasions are noted. Only 39 numerically finer coins are certified by PCGS (10/14). NGC ID# 257M, PCGS# 7366
- 4794 1925-S MS64+ PCGS.** Luminous champagne toning warms softly frosted luster on each side of this high-end near-Gem example. The strike is well-executed and there are no abrasions of note. A mere 39 pieces have been certified numerically finer at PCGS (10/14). NGC ID# 257M, PCGS# 7366
- 4795 1925-S MS64+ PCGS. CAC.** Thickly frosted luster accents dusky golden-gray toning on each side of this Plus-graded example, with small russet accents also seen in the border recesses. No significant abrasions are present, though some minor striking weakness is noted in the centers. Numerically finer examples are distinctly scarce. NGC ID# 257M, PCGS# 7366
- 4796 1925-S MS64+ PCGS. CAC.** A typical San Francisco issue from the period, the 1925-S is usually available in MS64 and lower grades, but is seldom seen finer. This is a well-struck, high-end example for the Choice level, with tinges of light golden toning seen over satiny luster on each side. Grade-limiting abrasions are at a minimum. Only 39 coins are numerically finer at PCGS (10/14). NGC ID# 257M, PCGS# 7366
- 4797 1926 MS66 NGC.** Largely brilliant and lustrous with areas of faint olive toning, this Premium Gem representative offers well-detailed devices and few flaws worthy of mention. Registry Set specialists should note that NGC reports just 49 coins in MS66 and only a single coin finer (10/14). NGC ID# 257N, PCGS# 7367
- 4798 1926 MS66 NGC.** Almond-gold toning adds to the visual appeal of this Premium Gem representative. Tiny splashes of plum, gray-blue, and golden-brown appear in the right obverse field. The coin exhibits a sharp strike. Remarkably clean surfaces. Census: 49 in 66, 1 finer (10/14). NGC ID# 257N, PCGS# 7367
- 4799 1926-D MS66 PCGS.** An above average D-Mint Peace dollar, this piece shows relatively few marks atop the surfaces and attractive iridescent patina. The strike is also notable as few design elements show excessive weakness. A great candidate for a high-end type set. PCGS has graded only eight numerically finer examples (10/14). *Ex: Pittsburgh Signature (Heritage, 8/2004), lot 7062.* NGC ID# 257P, PCGS# 7368

## 1927 Peace Dollar, MS65 Conditionally Very Rare in Finer Grades

- 4800 1927 MS65 PCGS. CAC.** The 1927 Peace dollar claims the second-lowest mintage of the series, at 848,000 pieces. The 1927 is reasonably available in grades up to the MS65 level, but finer examples are very rare. This attractive Gem displays sharply detailed design elements and lustrous well-preserved surfaces, under light shades of gold and amber toning. PCGS has graded nine numerically finer examples (10/14). NGC ID# 257S, PCGS# 7370
- 4801 1927-S MS64 PCGS.** Trivial grade-limiting marks appear on each side of this frosty and brilliant Peace dollar. The strike is above average, as is the eye appeal. PCGS has only certified 73 finer examples of this conditionally scarce issue (10/14). NGC ID# 257U, PCGS# 7372
- 4802 1927-S MS64 PCGS.** The 1927-S Peace dollar boasts a mintage of just 866,000 pieces, one of only three dates in the series with a production total of less than 1 million coins. This Choice example displays satiny, silvery-white luster and well-defined motifs. A couple minor abrasions on the cheek and the eagle's wing contribute to the grade. NGC ID# 257U, PCGS# 7372
- 4803 1927-S MS64+ PCGS. CAC.** Exceptionally clean surfaces warrant the Plus designation from PCGS, but vibrant luster and pleasing design definition also contribute to the overall appeal. Mottled lavender-gold and pale olive hues blanket each side. This issue is seldom available numerically finer, making this high-end Choice example an excellent opportunity for the date collector. NGC ID# 257U, PCGS# 7372
- 4804 1927-S Doubled Leaves, VAM-3, MS64 PCGS.** A Top 50 Variety. Undesignated as such on the insert, but this is the popular VAM with a die double branch and a broad, dull, diagonal die line near the designer's initials. A conditionally rare San Francisco issue. Lustrous and minimally toned with a bold strike and minor grazes on the cheek and left reverse field. PCGS# 133778
- 4805 1927-S Doubled Leaves, VAM-3, MS64 PCGS.** The leaves of the eagle's branch are lightly die doubled south. A diagonal die gouge near the designer's monogram further confirms the variety, which is undesignated on the PCGS insert. Blushes of caramel-gold overlie lustrous pearl-white surfaces. Crisply struck and minimally marked. PCGS# 133778
- 4806 1928 MS64 NGC.** Sharply defined throughout, the mint luster is bright and shines through the medium-density gray-rose toning that covers each side. Remarkably free from abrasions. NGC ID# 257V, PCGS# 7373
- 4807 1928 MS64 NGC.** Always-popular because of its low mintage, the 1928 is seldom located finer than MS64. This is a satiny example with a strong strike. Both sides are covered with steel-gray patina. NGC ID# 257V, PCGS# 7373
- 4808 1928 MS64 PCGS.** An untuned, radiantly lustrous example of this key Philadelphia issue. The surfaces are remarkably clean for the grade, and the devices are boldly impressed. An always popular date, due to its low mintage of little more than 360,000 coins. NGC ID# 257V, PCGS# 7373

**4809 1928 MS64 PCGS.** Brilliant and silver-white, with only a few pinprick marks separating this sharply lustrous dollar from full Gem status. Strong detail on Liberty's hair offsets minor blending at the eagle's leg and shoulder. Coruscating mint luster reveals not a bit of the faded yellow toning that often haunts this key Peace dollar issue. Frosty and attractive. NGC ID# 257V, PCGS# 7373

**4810 1928-S MS64+ PCGS. CAC.** Light chestnut toning overlies smooth pearl-gray surfaces. Nicely struck, and as close to a PCGS Gem as can be obtained for under five figures. The TR in TRVST is die doubled, as seen on many high grade examples of this conditionally scarce issue. PCGS has only certified 56 finer examples (9/14). NGC ID# 257W, PCGS# 7374

**4811 1935-S MS65 PCGS.** Three rays below ONE. A stone-white Gem with dazzling luster and a suitable strike. Infrequent wispy grazes emerge when the coin is rotated beneath a light. The final collectible issue of the popular series. NGC ID# 2583, PCGS# 7379

## COMMEMORATIVE SILVER

**4812 1893 Isabella Quarter MS65 PCGS.** Pastel-lavender, gold, and ice-blue toning grace vibrant, satiny luster on each side of this Gem example. The strike is well-executed, and the surfaces are void of noticeable flaws. Isabella quarters were moderately well-cared-for following their issuance, making high-end survivors collectible today. NGC ID# 28HR, PCGS# 9220

**4813 1893 Isabella Quarter MS65 PCGS.** Subtle lavender, blue, and olive-gold hues reside beneath a thin veil of gunmetal-gray toning on each side of this Gem Isabella quarter. This commemorative issue, struck in conjunction with the World's Columbian Exposition, held in Chicago in 1893, had a limited distribution of just 24,214 pieces, but enough high-grade examples were saved that the date is obtainable today. This piece is sharply struck and carefully preserved, with pleasing overall appeal. NGC ID# 28HR, PCGS# 9220

### 1893 Isabella Quarter, MS66 Lovely Iridescent Toning

**4814 1893 Isabella Quarter MS66 PCGS.** This ivory Premium Gem 1893 Isabella quarter has beautiful gold, lilac, turquoise, and blue toning on both sides with considerable frosty silver luster. An exceptional example and rarely found finer, with only 46 higher grade PCGS submissions (10/14). NGC ID# 28HR, PCGS# 9220

**4815 1900 Lafayette Dollar MS64 PCGS. DuVall 1-B.** A coruscating silver-gray and caramel-brown near-Gem. Marks are minimal and the strike is bold. Lafayette's cheek has a small strike-through, as coined. An impressive example of this better silver commemorative type. NGC ID# 28N8, PCGS# 9222

**4816 1900 Lafayette Dollar MS64 PCGS. DuVall 2-C.** There are very few abrasions on either side of this deeply toned, reddish-copper example. Electric-blue accents appear at the peripheries on each side. The underlying cartwheel luster is visible as the surfaces rotate beneath a light. A near-Gem, high-quality survivor from a commemorative issue that is usually represented by lower quality coins. NGC ID# 28N8, PCGS# 9222

### 1900 Lafayette Dollar, MS64 Conditionally Scarce Commemorative

**4817 1900 Lafayette Dollar MS64 NGC. CAC. DuVall 2-C.** This commemorative silver dollar becomes progressively more difficult to locate the closer one gets to the MS65 level. This just-miss example is premium quality for the grade. There are no noticeable distractions and the otherwise silver-gray surfaces show mottled olive-russet rim iridescence. Fully lustrous and appealing. Ex: *Long Beach Signature* (Heritage, 6/2000), lot 8136. NGC ID# 28N8, PCGS# 9222

**4818 1937 Antietam MS67 PCGS.** This impressive Superb Gem offers sharply detailed design elements and brightly lustrous surfaces that show highlights of champagne-gold and lavender toning. PCGS has graded 17 numerically finer examples (10/14). NGC ID# 28HV, PCGS# 9229

**4819 1937 Antietam MS67 NGC.** Considerable gold toning ranges from pastel to vibrant on this lustrous Superb Gem. Both sides exhibit frosty mint surfaces beneath the toning. NGC has only certified 21 finer examples (10/14). NGC ID# 28HV, PCGS# 9229

**4820 1937 Antietam MS67+ PCGS. CAC.** Struck for the 75th anniversary of the September 17, 1862, Battle of Antietam, this commemorative half dollar showcases razor-sharp design definition, and luminous, shimmering luster. Mint-green and lavender-gold peripheral hues yield to brilliant, frosted centers, while the surfaces are seemingly perfect in all regards. An immensely appealing coin that will satisfy even the most discerning collector. PCGS has encapsulated only 17 numerically finer pieces (9/14). NGC ID# 28HV, PCGS# 9229

### 1936 Arkansas Centennial Half Dollar, MS67 Splendidly Preserved and Visually Appealing

**4821 1936 Arkansas MS67 PCGS.** Rarely seen this nice, this Superb Gem example of the Arkansas commemorative half dollar was the only one of the five issues, released in P-D-S sets, to be produced and dated in the actual year of the Arkansas Centennial. This is a lovely piece with smooth, satiny surfaces that are splendidly preserved. A slight band of orange-gold, red, and olive-gold peripheral toning enhances the appearance of the obverse. Population: 13 in 67 (2 in 67+), 0 finer (10/14). NGC ID# 28HZ, PCGS# 9237

**4822 1936-D Arkansas MS67 PCGS. CAC.** An appealing Superb Gem from a small distribution of 9,660 pieces, this coin offers sharply detailed design elements and impeccably preserved lustrous surfaces, under shades of greenish-gold and silver-gray toning. Population: 34 in 67 (4 in 67+), 1 finer (10/14). NGC ID# 28J2, PCGS# 9238

**4823 1937-D Arkansas MS67 NGC.** This sharply detailed Superb Gem exhibits satiny mint luster and well-preserved silver-gray surfaces, with a few hints of pale gold toning. Census: 12 in 67 (1 in 67 ★), 0 finer (10/14). NGC ID# 28J5, PCGS# 9242

**4824 1937-D Arkansas MS67 PCGS.** Only 5,505 Arkansas half dollars were distributed at the Denver Mint in 1937. This sharply detailed Superb Gem displays lustrous impeccably preserved surfaces, with highlights of greenish-gold and lavender-gray toning. Population: 27 in 67 (4 in 67+), 1 finer (10/14). NGC ID# 28J5, PCGS# 9242

**1938-D Arkansas Half, MS67  
Satiny, Well-Preserved Example**

**4825 1938-D Arkansas MS67 PCGS.** The Denver Mint distributed only 3,150 Arkansas Centennial half dollars in 1938 (plus five pieces for assay purposes), and these were all sold as part of three-coin sets along with an example each from Philadelphia and San Francisco. This is a rare Superb Gem survivor. Both of the profiles on the obverse are essentially free of contact, and the surfaces are well-preserved throughout with just the barest hint of amber-copper color near the rims. Population: 23 in 67 (1 in 67+), 1 finer (9/14). NGC ID# 28J8, PCGS# 9246

**4826 1938-S Arkansas MS66 PCGS.** This Premium Gem offers mostly silver-gray color with blue accents and peripheral golden-tan elements. Two small reed marks at the upper-left reverse contribute to the grade. Population: 95 in 66 (6 in 66+), 2 finer (9/14). NGC ID# 28J9, PCGS# 9247

**4827 1939-S Arkansas MS66 PCGS.** The surfaces feature light silver-gray overall with blue accents and lavender touches toward the peripheral reverse. This Premium Gem is one of just 2,105 examples struck, and PCGS has certified only 10 coins in numerically higher grades (9/14). NGC ID# 28JC, PCGS# 9251

**4828 1936-S Bay Bridge MS67 NGC.** A delightful Superb Gem that marks the opening of the San Francisco-Oakland Bay Bridge in 1936, this piece has frosty silver luster with hints of peripheral iridescence. NGC ID# 28JD, PCGS# 9254

**1935-D Daniel Boone Half Dollar, MS67  
Among the Finest Certified**

**4829 1935-D Boone MS67 PCGS.** Varieties of the 1935-D Daniel Boone Bicentennial half dollars were coined both with and without an added "1934" date in the right reverse field. This piece represents the slightly more available "Plain" variety, of which only 5,000 pieces were struck (plus five coins for assay purposes). This lustrous example displays mottled hues of amber and olive gold over each side, with deeper green and orange tinges seen periodically around the rims. The strike is well-executed, and the surfaces are free of any noticeable flaws. Population: 13 in 67 (1 in 67+), 0 finer (9/14). NGC ID# 28JG, PCGS# 9259

**1935/34-S Boone Half Dollar, MS67  
Only Two Finer at PCGS**

**4830 1935/34-S Boone MS67 PCGS.** This low-mintage issue consisted of 2,004 pieces and included the addition of the commemorative date 1934 above the words PIONEER YEAR. The issue is sometimes referred to as "1935 small 1934." Golden-gray patina is imbued with wisps of green and lilac. Well-struck with lustrous, impeccably preserved surfaces. Population: 18 in 67 (3 in 67+), 2 finer (9/14). Ex: Central States Rosemont Signature (Heritage, 4/2008), lot 1635. NGC ID# 28JL, PCGS# 9264

**4831 1938-S Boone MS67 PCGS.** A splendidly preserved example of this low-mintage Boone — only 2,100 pieces were struck. Each side displays oil-slick iridescence over the mint frost. NGC ID# 28JW, PCGS# 9276

**4832 1925-S California MS66 NGC. CAC.** A highly popular issue in the classic commemorative series, struck to commemorate the 75th anniversary of California's statehood. This piece is deeply toned in multiple hues, including sky-blue, russet-orange, sun-gold, forest-green, and cherry-red, with the deeper colors seen primarily around the margins. A bold strike completes the eye appeal. NGC ID# 28JY, PCGS# 9281

**4833 1925-S California MS67 PCGS.** Vibrant mint luster shines through shades of greenish-gold and lavender-gray toning on the well-preserved surfaces of this impressive Superb Gem. The design elements are sharply detailed, adding to the considerable appeal. PCGS has graded six numerically finer examples (10/14). NGC ID# 28JY, PCGS# 9281

**4834 1925-S California MS67 PCGS.** The California Diamond Jubilee half dollars were struck to mark the 75th anniversary of California's statehood, and are a favorite with collectors today. Most certified examples are in the MS62 to MS65 range. Very pretty mottled multicolored toning graces the lustrous surfaces of both sides of this Superb Gem. Well-struck and minimally marked. NGC ID# 28JY, PCGS# 9281

**1925-S California Half Dollar, MS67  
Attractive Multicolor Toning**

**4835 1925-S California MS67 PCGS.** An attractive mix of lavender, blue, silver-gray, and apple-green toning blankets the well-preserved surfaces of this spectacular Superb Gem. The design elements are sharply detailed and vibrant mint luster shines through the patina. PCGS has graded only six numerically finer examples (10/14). NGC ID# 28JY, PCGS# 9281

**4836 1936-D Cincinnati MS67 NGC.** Smooth and unblemished, the mint luster rolls around each side uninterrupted by the abrasions that are so often seen on this popular Cincinnati commemorative half. The obverse is pearl-gray while the reverse has iridescent amber-gold toning, suggestive of many years residency in an original holder of issue. Census: 35 in 67 (1 in 67+, 5 in 67 ★), 3 finer (9/14). Ex: *Long Beach Signature* (Heritage, 5/2003), lot 7114; *New York Bulletin Sale* (Heritage, 12/2003), lot 2440; *Portland Signature* (Heritage, 3/2004), lot 6897. NGC ID# 28K2, PCGS# 9284

**4837 1936-D Cincinnati MS67 NGC.** Delicate heather and gold toning visit the obverse, combined with peripheral gold and iridescent toning on the reverse of this Superb Gem. Both sides exhibit brilliant, satin luster. Census: 35 in 67 (1 in 67+, 5 in 67 ★), 3 finer (10/14). NGC ID# 28K2, PCGS# 9284

**1892 Columbian Half, MS67  
Splendidly Preserved and Nicely Toned**

**4838 1892 Columbian MS67 NGC.** Ex: Richard Jewell Collection. This is a splendidly preserved Columbian Exposition half that is attractively toned in turquoise-blue and reddish-gold on each side. The quality and originality of this piece is nearly unsurpassable. Census: 45 in 67 (11 in 67 ★, 3 in 67+★), 0 finer (9/14). Ex: *Dallas Signature* (Heritage, 12/2004), lot 7882; *Pittsburgh Signature* (Heritage, 8/2004), lot 8075; *FUN Signature* (Heritage, 1/2007), lot 7729. NGC ID# 26H5, PCGS# 9296

**4839 1892 Columbian, Repunched Date, FS-302, MS66+ PCGS.** The variety is undesignated on the PCGS insert, but the 2 in the date is repunched northeast. Of perhaps greater interest is the attractive toning. Aquamarine, autumn-gold, and ruby-red peripheral shades frame the brilliant centers. PCGS# 145422

**4840 1936 Gettysburg MS67 PCGS.** The tab-toned obverse has rich lavender shades where the coin remained undisturbed within the cardboard holder for many years. Exposed areas of the obverse display are green-gold and pearl-white. The reverse offers vibrant olive and lilac patina. Encapsulated in a green label holder. NGC ID# 28KB, PCGS# 9305

**4841 1922 Grant No Star MS66+ PCGS.** The interiors are a mix of pale silver and yellow, while the margins show touches of deeper blue. The surfaces are better-defined than often seen, although Grant still has a small "bald spot" at the back of the head. NGC ID# 28KD, PCGS# 9306

**1922 Grant No Star Half, MS67  
Essentially Unobtainable Any Finer**

**4842 1922 Grant No Star MS67 NGC.** Although the With Star variety is significantly more challenging because of its low distribution of just 4,256 coins (compared to 67,405 No Star representatives), this otherwise available variant is undeniably rare in Superb Gem condition. Subtle light-gold and sky-blue accents color mostly brilliant surfaces. Luster radiates throughout, and imperfections are virtually non-existent. Census: 35 in 67 (4 in 67+, 5 in 67 ★), 1 finer (10/14). NGC ID# 28KD, PCGS# 9306

**1922 No Star Grant Memorial Half, MS67  
None Numerically Finer at PCGS**

**4843 1922 Grant No Star MS67 PCGS.** The small incuse star that was present in the right obverse field when the Grant Memorial half dollar debuted in early 1922, was later removed, likely to create a new variety to offer to collectors, with the result that the majority of the Grant halves struck were of this later, No Star variant. The present example is well-struck and equally well-preserved, with satiny, gold-tinted luster. Splashes of olive-brown toning are seen periodically around the margins, primarily on the obverse, confirming the originality of the surfaces. Population: 46 in 67 (2 in 67+), 0 finer (9/14). NGC ID# 28KD, PCGS# 9306

**1922 Grant No Star Half Dollar, Toned MS67**

**4844 1922 Grant No Star MS67 PCGS.** Splashes of peach-gold, bluish-gray, and lavender visit the lustrous surfaces of this Superb Gem Grant commemorative. The design elements are well-struck and both sides have been well-preserved. The No Star variety, having a relatively large mintage exceeding 67,000 pieces, is more frequently seen than its With Star counterpart. Population: 46 in 67 (2 in 67+), 0 finer (9/14). NGC ID# 28KD, PCGS# 9306

**1922 Grant Half Dollar, MS67  
No Star Variant**

- 4845 1922 Grant No Star MS67 PCGS.** The 1922 Grant No Star half dollar is very scarce in MS67 condition and almost unobtainable in finer grades. This spectacular Superb Gem is sharply detailed and lustrous, with immaculate surfaces that show vivid highlights of apple-green, cerulean-blue, and lavender toning. Housed in a green label holder. Population: 46 in 67 (2 in 67+), 0 finer (10/14). NGC ID# 28KD, PCGS# 9306

- 4846 1928 Hawaiian — Cleaning — PCGS Genuine. AU Details.** An untoned and satiny example of the key classic silver commemorative type. Both sides display wispy hairlines, but the strike is sharp and the glossy surfaces display minimal bagmarks. NGC ID# 28KE, PCGS# 9309

- 4847 1928 Hawaiian MS63 PCGS.** The highly popular Hawaiian commemorative half dollar marks the sesquicentennial of the discovery by Captain James Cook. This example has gold and iridescent toning over lustrous pewter-gray surfaces. NGC ID# 28KE, PCGS# 9309

- 4848 1928 Hawaiian MS63 PCGS.** Dusky gold toning resides on the satiny surfaces of this Select Mint State Hawaiian commemorative half dollar. Trivial contact marks and faint hairlines limit the grade. NGC ID# 28KE, PCGS# 9309

**1928 Hawaiian Half, MS65  
Unquestionably Original Surfaces**

- 4849 1928 Hawaiian MS65 PCGS.** One of the keys to the commemorative set, this is a coin whose toning ensures originality. Lavender and lemon-yellow patina is seen over both sides, and the coin's appearance is abrasion-free. Modest, yet appreciable cartwheel luster makes this a gorgeous survivor from an original mintage of a mere 9,958 pieces.  
*Ex: Philadelphia Bullet Sale (Heritage, 8/2000), lot 815.* NGC ID# 28KE, PCGS# 9309

**1928 Hawaiian Half Dollar, MS65  
Key Silver Commemorative**

- 4850 1928 Hawaiian MS65 PCGS.** This impressive Hawaiian half dollar, from a small distribution of 9,958 pieces, is certified in a prior generation green label holder. The design elements are sharply detailed throughout and the well-preserved surfaces radiate vibrant mint luster, under delicate shades of champagne-gold and lavender toning. NGC ID# 28KE, PCGS# 9309

**1928 Hawaiian Half, MS65  
Lightly Toned Example**

- 4851 1928 Hawaiian MS65 PCGS.** Hints of iridescence complement the light-gold toning covering three-quarters of the obverse, while the reverse presents a blush of rose-gold color behind the chieftain. The strike is sharp on Captain Cook's portrait and the chief's regalia. A challenging issue in Gem condition, this lightly-toned example will fill an empty slot in an advanced collection of classic commemoratives. NGC ID# 28KE, PCGS# 9309

- 4852 1935 Hudson MS65 PCGS.** This issue commemorates the sesquicentennial of the founding of Hudson, New York, a small community about 30 miles south of Albany on the eastern bank of the Hudson River. A total of 10,008 pieces was produced. The silver-gray surfaces of this lustrous Gem display soft golden-tan color around the reverse periphery. A nicely struck specimen with just a few grade-consistent marks. NGC ID# 28KE, PCGS# 9312

- 4853 1935 Hudson MS66 NGC.** This Premium Gem Hudson half dollar features the distinctive satin luster that is typical of the issue. Both sides have pleasing surfaces with mint brilliance beneath delicate champagne toning. NGC ID# 28KE, PCGS# 9312

- 4854 1924 Huguenot MS67 PCGS.** A lovely Superb Gem representative, this coin displays pleasing, satiny luster, while yellow-gold, orange, auburn, and lime-green toning is present on both sides, primarily at the outer edges. The devices are sharply struck with very few abrasions. Population: 57 in 67 (8 in 67+), 2 finer (9/14). NGC ID# 28KG, PCGS# 9314

- 4855 1924 Huguenot MS67 PCGS.** This Superb Gem Huguenot half dollar is housed in a green-label holder. Both sides have frosty silver luster with full mint brilliance beneath delicate gold, pale blue, and peripheral russet toning. Population: 57 in 67 (8 in 67+), 2 finer (10/14). NGC ID# 28KG, PCGS# 9314

**4856 1925 Lexington MS66+ PCGS.** Faintly speckled olive toning blankets pastel rainbow hues over each side of this high-end Lexington-Concord Sesquicentennial half dollar. The central definition is bold, and no mentionable surface flaws are noticed upon close examination. PCGS has certified 22 numerically finer representatives (10/14). NGC ID# 28KK, PCGS# 9318

**4857 1918 Lincoln MS67 PCGS.** The issue celebrates the 100th anniversary of Illinois' entry into the Union. Delicate pastel toning colors this well-struck Superb Gem in shades of powder-blue, lavender, and orange with peripheral green and yellow elements on the obverse. PCGS has seen only 2 numerically finer examples (9/14). PCGS# 9320

**4858 1918 Lincoln MS67 NGC.** A reflective Lincoln peers across a field devoid of marks or distractions. A splash of dark orange-gold toning supports the portrait on the obverse, while hints of toning surround a reverse thick with frost. The eagle is confrontational in its prominence due to the superior strike. Only seven coins are graded numerically higher than this piece by NGC and PCGS combined (10/14).  
Ex: FUN Signature (Heritage, 1/2005), lot 10640. PCGS# 9320

**4859 1920 Maine MS66+ PCGS. CAC.** Remember the Maine with this Premium Gem, an exceptional example with frosty silver luster and delicate hints of gold toning. An exceptional example, rarely found finer, with only 37 higher grade PCGS submissions (10/14). NGC ID# 28KN, PCGS# 9326

**4860 1934 Maryland MS67 PCGS.** A bold strike and carefully preserved surfaces are among the pleasing attributes this Superb Gem possesses, though rich satiny luster with pale golden-gray toning also contributes to the overall appeal. Population: 60 in 67 (2 in 67+), 0 finer (10/14). NGC ID# 28KP, PCGS# 9328

**4861 1934 Maryland MS67 PCGS.** Celebrating the 300th anniversary of the founding of the Maryland Colony in 1634, this Superb Gem Maryland Tercentenary half dollar displays satiny luster with shades of pale golden and iridescent ice-blue color. The fields are not subject to any discernable surface flaws. Population: 60 in 67 (2 in 67+), 0 finer (10/14). NGC ID# 28KP, PCGS# 9328

**4862 1934 Maryland MS67 PCGS.** The occasion of this 1934 commemorative was the 300th anniversary of the founding of the Maryland Colony by Cecil Calvert, who is portrayed on the obverse of the coin. This boldly struck piece displays satiny golden-gray luster, with a thin crescent of rainbow color also seen along the lower obverse periphery. No marks of consequence are observed on either side. Population: 60 in 67 (2 in 67+), 0 finer (10/14). NGC ID# 28KP, PCGS# 9328

**4863 1921 Missouri MS65 PCGS.** The Missouri is one of the first issues in the early silver commemorative series, and one that helped to establish the popularity of the commemorative half dollar type. This Gem is well-struck and appealing, with satin luster and light toning seen mostly near the peripheries. Just 38 pieces are graded finer at PCGS (10/14). NGC ID# 28KS, PCGS# 9330

**4864 1921 Missouri MS65 PCGS.** A lustrous and splendidly preserved straw-gold Gem of this challenging silver commemorative type. The strike is bold except on the shoulder strap of the frontiersman. Certified in a green label holder. NGC ID# 28KS, PCGS# 9330

**4865 1921 Missouri 2x4 MS65 NGC.** Silver centers on this Gem are encircled by rich rim accents of amber-gold, copper, and lavender, a bit more prominent on the obverse. Minor high-point contact marks are undistracting and grade-consistent. NGC ID# 28KR, PCGS# 9331

**4866 1921 Missouri 2x4 MS65 PCGS.** A boldly struck example, this Gem displays satiny mint luster underlying shades of lavender-gold and champagne toning. No mentionable surface abrasions are observed. Only 33 numerically finer coins are certified at PCGS (10/14). NGC ID# 28KR, PCGS# 9331

**4867 1921 Missouri 2x4 MS65 PCGS.** Satiny, golden-gray luster blankets each side of this Gem representative, with a few deeper orange-gold accents also seen in the peripheral recesses. The strike is bold throughout, and the surfaces are free of any significant abrasions. Only 33 coins are numerically finer at PCGS (10/14). NGC ID# 28KR, PCGS# 9331

**4868 1921 Missouri 2x4 MS65 NGC.** Nicely lustrous, with a virtual absence of mentionable marks. The strike is solid and the coin is firmly within the Gem grade parameters, worthy of any high-grade set. Numerically finer representatives are only infrequently encountered.  
Ex: Pittsburgh Signature (Heritage, 8/2004), lot 8126; FUN Signature (Heritage, 1/2005), lot 10658. NGC ID# 28KR, PCGS# 9331

**4869 1921 Missouri 2x4 MS65 PCGS.** Light tan-gold patina hugs the borders, while the centers exhibit steel-gray color. A shimmering Gem with a bold strike and a well preserved reverse. The obverse is also free from mentionable contact. Only 5,000 pieces were struck with the 2x4 feature above the date, which signifies that Missouri was the 24th state to join the union. NGC ID# 28KR, PCGS# 9331

**4870 1923-S Monroe MS65 NGC.** Beautiful, vivid rainbow hues form concentric ribbons around the reverse margins and spill over onto the obverse periphery. Pale lavender and golden-gray toning encompasses the centers, complementing the carefully preserved surfaces. Some minor lightness of strike on the highest details does not detract. NGC ID# 28KT, PCGS# 9333

**4871 1923-S Monroe MS65 PCGS.** The Monroe commemorative half dollar, with its shallow design relief, is difficult to locate in top grades. PCGS has only certified 82 finer examples (10/14). This ivory Gem has brilliant silver luster with faint champagne toning. NGC ID# 28KT, PCGS# 9333

**4872 1938 New Rochelle MS67 PCGS.** Beautiful apple-green and autumn-gold toning endows the reverse and the obverse periphery. The central obverse is close to brilliant. Lustrous and precisely struck with a few minor obverse grazes. Encapsulated in a green label holder. NGC ID# 28KU, PCGS# 9335

**4873 1938 New Rochelle MS67 PCGS. CAC.** Struck from a fresh die pair, as evidenced by crisp design definition and semiprooflike mirroring in the fields. Amber-orange and sun-gold peripheral hues surround lighter lime-green and lavender-blue colors in the centers. Only five coins have been graded numerically finer by PCGS (9/14). NGC ID# 28KU, PCGS# 9335

**4874 1938 New Rochelle MS67 PCGS. CAC.** Semiprooflike fields frame bold devices on this carefully preserved New Rochelle commemorative half dollar. A tinge of pale lemon-gold color graces each side, with an area of deeper peach toning seen in the left reverse field. PCGS has certified only five numerically finer representatives (10/14). NGC ID# 28KU, PCGS# 9335

---

### 1938 New Rochelle Half, MS67+ Superb Luster and Appeal

**4875 1938 New Rochelle MS67+ PCGS. CAC.** Lemon-yellow and fire-orange toning hugs the rims and coruscating luster emphasizes the silver-white centers of this Superb Gem New Rochelle half. The PCGS Plus designation combined with CAC's endorsement confirm the high quality of this lustrous, frosty example. PCGS has certified just five numerically finer coins (10/14). NGC ID# 28KU, PCGS# 9335

---

**4876 1936 Norfolk MS68 PCGS.** Ruby-red, jade-green, and orange-gold patination illuminates portions of the peripheries. The strike is full, and the surfaces are flawless save for a tiny tick on the 1 in the date. Housed in a green label holder.  
*Ex:* FUN Signature (Heritage, 1/2005), lot 10687, which realized \$1,495. NGC ID# 28KV, PCGS# 9337

**4877 1936 Norfolk MS68 PCGS. CAC.** An especially bold strike and simply exceptional preservation combine to make this Superb Gem one of the most attractive Norfolk, Virginia, Bicentennial half dollars this cataloger has ever seen. Soft ice-blue and champagne hues encompass much of each side, with deeper coppery-red toning also seen in the peripheral recesses. This coin will impress even the most scrutinizing collector. One coin is numerically finer at PCGS (10/14). NGC ID# 28KV, PCGS# 9337

**4878 1926 Oregon MS67 PCGS.** Dusky gunmetal-gray and olive shades embrace this coruscating and pristine Superb Gem. Sharply struck except for the Indian's feet. Encased in a green label holder. Population: 89 in 67 (7 in 67+), 3 finer (10/14). NGC ID# 28KW, PCGS# 9340

#### 1926-S Oregon Trail, Fully Struck MS68

**4879 1926-S Oregon MS68 NGC.** This super 1926-S Oregon Trail appears fully struck throughout, even the small details on the oxen and pioneers heading westward into the setting sun. The centers are satiny silver-white, ringed with copper-gold and russet for superlative effect. Certified in a "no line fatty" holder. Census: 15 in 68 (3 in 68 ★, 1 in 68+ ★), 0 finer (9/14).  
*Ex:* Chicago Signature (Heritage, 8/2011), lot 5006. NGC ID# 28KX, PCGS# 9341

**4880 1937-D Oregon MS68 PCGS. CAC.** This splendid commemorative showcases the outstanding craftsmanship of the husband and wife engraving duo of James Earle and Laura Gardin Fraser. The Oregon Trail half dollars are also remarkable because they were originally released in 1926 and were struck intermittently through 1939—a span of some 14 years. Silver-gray patina drapes the surfaces, with deep olive-golden toning scattered around the perimeter of the obverse. A remarkable, fully original, and carefully preserved Superb Gem. Population: 50 in 68 (2 in 68+), 1 finer (10/14).  
*Ex:* Central States Signature (Heritage, 5/2004), lot 11043; Central States Signature (Heritage, 5/2007), lot 5325; ANA Signature (Heritage, 7/2008), lot 2570. NGC ID# 28L5, PCGS# 9347

**4881 1939-D Oregon MS67 NGC.** The year 1939 had the lowest distribution of this popular commemorative in its sporadic 14-year production run. Each of the three mints struck only 3,000 coins (plus a few additional pieces for assay purposes), these being sold in three-coin sets. This is a richly toned, high-end example of the Denver issue, with vivid forest-green, violet, and sun-gold toning over each side. The strike is well-executed and the surfaces are free of discernable imperfections. Only 27 coins are numerically finer at NGC (10/14). NGC ID# 28LA, PCGS# 9353

**4882 1915-S Panama-Pacific MS65 NGC.** Pale olive-gold toning with a few tinges of lavender and aquamarine blankets satiny luster on each side of this Gem example. Close examination reveals some minor softness on the high points of the devices, but the strike is otherwise sharp. NGC ID# 26H7, PCGS# 9357

#### 1915-S Panama-Pacific Half, MS66 Pleasing Olive-Gold Patina

**4883 1915-S Panama-Pacific MS66 PCGS.** The bounty of the American West is celebrated by Columbia, while a perched eagle on a shield is flanked by oak and olive branches. This Premium Gem displays a strong strike on the eagle's breast feathers with rim-to-rim sharpness not often seen on the issue. Rich, olive-gold patina is obviously original and highly pleasing, with plentiful mint luster beneath the toning. NGC ID# 26H7, PCGS# 9357

**4884 1920 Pilgrim MS66 ★ NGC.** Shimmering satiny luster delivers exceptional visual appeal on this carefully preserved Pilgrim Tercentenary half dollar, well-deserving of the NGC Star designation. The design elements are well-defined, and only a few microscopic grazes are noticed under magnification. NGC has certified 24 numerically finer representatives (10/14). NGC ID# 28LC, PCGS# 9359

#### 1920 Pilgrim Half Dollar, MS67 Only One Numerically Finer at PCGS

**4885 1920 Pilgrim MS67 PCGS.** The 1920 Pilgrim half dollar enjoyed a large distribution of 152,112 pieces. This delightful Superb Gem exhibits sharply detailed design elements and satiny mint luster throughout. The well-preserved surfaces are blanketed in light shades of lavender and gold toning. Housed in a green label holder. Population: 47 in 67 (6 in 67+), 1 finer (10/14). NGC ID# 28LC, PCGS# 9359

**4886 1936 Rhode Island MS67 PCGS. CAC.** A peerless example bathed in milky gray patina, with occasional flashes of orange-gold color at the borders. Rhode Island commemorative half dollars are seldom seen this well-preserved, and are almost unknown finer. Population: 37 in 67, 0 finer (9/14).  
*Ex:* Baltimore Signature (Heritage, 7/2003), lot 9511. NGC ID# 28LE, PCGS# 9363

**4887 1936-S Rhode Island MS67 PCGS.** Splendid rose-red, ocean-blue, ruby-red, and orange toning endow the borders of this lustrous Superb Gem. The strike is good and the eye appeal is imposing. Encapsulated in a green label holder. Population: 29 in 67 (7 in 67+), 0 finer (10/14). NGC ID# 28LG, PCGS# 9365

**4888 1936 Robinson MS67 NGC.** Dusky gold and iridescent toning visits the surfaces of this Superb Gem, with underlying satin luster. This example is tied for the finest that NGC has certified. Census: 34 in 67 (1 in 67+, 2 in 67 ★), 0 finer (10/14). NGC ID# 28LJ, PCGS# 9369

- 4889 1935-S San Diego MS67 PCGS.** Beautiful ocean-blue, apricot-gold, and lilac toning embraces this lustrous and nicely struck Superb Gem. An outstanding example of this exposition variety. Certified in a green label holder. NGC ID# 28LK, PCGS# 9371
- 4890 1926 Sesquicentennial MS65 PCGS.** The finer details on this Gem American Independence commemorative are well-delineated, with satiny luster illuminating soft champagne and lavender-blue toning on each side. Only eight coins are numerically finer at PCGS (10/14). NGC ID# 28LM, PCGS# 9374
- 4891 1926 Sesquicentennial MS65 NGC.** Attractively merged lavender and powder-blue hues spread across the central regions, while the peripheries display brighter rose-gold toning. The strike is sharp throughout, and Washington's cheek exhibits the only grade-limiting disturbances, as usual. NGC has encapsulated only 19 numerically finer examples (10/14). NGC ID# 28LM, PCGS# 9374
- 4892 1935 Spanish Trail MS64 NGC.** Struck to commemorate the 400th anniversary of the Cabeza de Vaca Expedition through the Gulf coast states in 1535. The surfaces exhibit satiny luster beneath a thin veil of light golden toning. Sharply impressed design elements complete the overall appeal of this Old Spanish Trail half dollar. NGC ID# 28LN, PCGS# 9376
- 4893 1935 Spanish Trail MS65 PCGS.** ANA President L.W. Hoffecker was the force behind the Spanish Trail half dollar, which ranks among the lowest mintage silver commemorative types. The present lustrous Gem displays pastel gold and green patina. The strike is sharp, and the obverse field shows only delicate marks. Encapsulated in an old green label holder. NGC ID# 28LN, PCGS# 9376
- 4894 1935 Spanish Trail MS65 PCGS.** This attractive Gem displays vibrant luster and well-struck design features. Were it not for a couple of minute marks on either side of the steer's head and in the Texas panhandle this piece may have claims to Premium Gem status. Nevertheless, this is a very pleasing specimen for the aficionado of classic commemorative coins. NGC ID# 28LN, PCGS# 9376
- 4895 1935 Spanish Trail MS65 PCGS.** This Gem Spanish Trail half dollar, housed in a green-label PCGS holder, exhibits delicate gold toning over its satiny silver surfaces with brilliant mint luster. NGC ID# 28LN, PCGS# 9376
- 4896 1935 Spanish Trail MS66 PCGS.** The typical Spanish Trail half dollar has soft, frosty silver luster as seen on this Premium Gem. The ivory surfaces exhibit peripheral gold accents. An exceptional example that lacks the usual marks in the fields of this uncomplicated design. NGC ID# 28LN, PCGS# 9376

**1935 Spanish Trail Half, MS67  
Scarce Low Mintage Type**

- 4897 1935 Spanish Trail MS67 PCGS.** Light gold and sky-blue toning adorns this satiny and essentially unabraded Superb Gem. The Spanish Trail is among the lowest mintage types, and the ample open fields ensure the rarity of high grade examples. Encapsulated in a green label holder.  
Ex: *FUN Signature (Heritage, 1/2012), lot 7442, which realized \$6,325.* NGC ID# 28LN, PCGS# 9376

- 4898 1935 Spanish Trail MS67 PCGS.** Strong, satiny luster illuminates pale champagne toning on each side of this Superb Gem Old Spanish Trail commemorative half. The strike is bold throughout, and the surfaces are devoid of any discernable imperfections. Only two coins are numerically finer at PCGS (10/14). NGC ID# 28LN, PCGS# 9376
- 4899 1935 Spanish Trail MS67 PCGS.** Evenly blended lavender-gray, powder-blue, and pale gold toning blanket satiny luster on each side of this beautifully preserved representative. A bold strike further heightens the immense visual appeal. PCGS has certified only two numerically finer representatives (10/14). NGC ID# 28LN, PCGS# 9376
- 4900 1935 Spanish Trail MS67 PCGS.** Unusually vibrant mint luster resides beneath blended shades of orange-gold, lavender, and olive-gray toning, while the underlying surfaces are devoid of contact marks. The Old Spanish Trail half dollars are only marginally available in this grade, and finer pieces are prohibitively rare, with only two so-graded examples at PCGS (10/14). NGC ID# 28LN, PCGS# 9376
- 4901 1935 Spanish Trail MS67 NGC.** Among the best-preserved of this famously elusive commemorative issue, this representative has subtle reddish-gold and violet patina over each side. The detail is strong, and only infinitesimal marks appear in the fields. It is difficult to imagine a Spanish Trail commemorative with greater eye appeal. Census: 115 in 67 (6 in 67+, 6 in 67 ★), 7 finer (10/14).  
Ex: *FUN Signature (Heritage, 1/2007), lot 7841.* NGC ID# 28LN, PCGS# 9376

**1935 Spanish Trail Half, MS67  
Far Better Strike Than Normal**

- 4902 1935 Spanish Trail MS67 PCGS. CAC.** A delightfully mark-free Superb Gem example. The wide-open fields invite all kinds of marks and abrasions, but this coin escaped those indignities. The silver surfaces are softly iridescent and attractive. Most notably, the steer head and yucca tree are especially bold for the issue. With CAC approval, this coin is among the best-preserved Spanish Trails, with just two coins graded numerically finer at PCGS (9/14). NGC ID# 28LN, PCGS# 9376
- 4903 1925 Stone Mountain MS67 PCGS.** This frosty Superb Gem Stone Mountain half dollar features a sharp strike, showing full facial features on the obverse, and breast feathers on the reverse. Those features are typically indistinct. The surfaces exhibit pastel heather, gold, turquoise, and pale blue toning. NGC ID# 26H8, PCGS# 9378
- 4904 1937-S Texas MS67+ PCGS. CAC.** Narrow bands of plum-red, sea-green, and lemon-gold fill the lower reverse and upper obverse borders. The remainder of this lustrous Superb Gem remains brilliant. The strike is crisp except on the knee of the Winged Victory. Population: 109 in 67 (8 in 67+), 0 finer (10/14). NGC ID# 28LZ, PCGS# 9392

**1925 Vancouver Half Dollar, MS67  
Vivid Peripheral Toning**

- 4905 1925 Vancouver MS67 NGC.** The 1925 Vancouver commemorative half dollar has a reported distribution total of just 14,994 pieces and examples in MS67 condition are quite elusive in today's market. The well-preserved surfaces of this delightful Superb Gem radiate vibrant mint luster, with brilliant centers and highlights of greenish-gold and lavender toning at the peripheries. Census: 51 in 67 (1 in 67+, 11 in 67 ★), 1 finer (10/14). NGC ID# 28M5, PCGS# 9399

**1925 Fort Vancouver Half, MS67  
Lovely, Original Toning**

- 4906 1925 Vancouver MS67 PCGS.** Ex: Bruce Scher. A bust of Dr. John McLoughlin, builder of Fort Vancouver, is on the obverse. The intricately designed fort, built on the Columbia River in 1825, is depicted in the reverse background, with a defending frontiersman shown in the foreground. This piece displays dazzling luster overlain by low-intensity cobalt-blue and tan-beige tan patina on the obverse, and pale magenta and sky-blue on the reverse. The design elements are well-defined, including most of the minute details on the fort itself. The well-preserved surfaces are virtually free from noticeable blemishes. A coin with greater eye appeal would be hard to imagine. Population: 52 in 67 (8 in 67+), 1 finer (9/14). NGC ID# 28M5, PCGS# 9399

- 4907 1946 Booker T. Washington MS67 PCGS. CAC.** This intensely toned Booker T. Washington half dollar has frosty silver luster beneath vibrant gold and rose toning across both sides, with lighter silver limited to the central reverse. Population: 81 in 67 (8 in 67+), 1 finer (10/14). NGC ID# 28M7, PCGS# 9404

- 4908 1946-S Booker T. Washington MS67+ PCGS. CAC.** This amazing Superb Gem has intense gold and iridescent toning on both sides, masking the frosty silver luster. An important condition rarity in the series. Population: 94 in 67 (10 in 67+), 2 finer (10/14). NGC ID# 28M9, PCGS# 9406

- 4909 1948-D Booker T. Washington MS67 PCGS. CAC.** Following a substantial mintage of 1946 Booker T. Washington half dollars, the series continued on for five more years with low mintage issues each year from the three operating mints at the time. Just 8,005 examples were produced at each mint in 1948, for example. This Superb Gem, one of the finest of its kind, has frosty silver luster and bold design definition with splashes of iridescent toning. Population: 23 in 67, 0 finer (10/14). NGC ID# 28ME, PCGS# 9413

- 4910 1948-D Booker T. Washington MS67 PCGS. CAC.** This Superb Gem exhibits frosty silver luster with extraordinary eye appeal. Delicate peripheral gold and champagne toning frames the otherwise untuned surfaces. Population: 23 in 67, 0 finer (10/14). NGC ID# 28ME, PCGS# 9413

- 4911 1948-S Booker T. Washington MS67 PCGS. CAC.** Mottled toning appears on the obverse of this piece, while the reverse is only lightly toned with most of the color appearing at the peripheries. The obverse displays shades of russet, wine, olive-green, cherry-red, and apple-green. Rich luster adds to the eye appeal of this Superb Gem. Population: 24 in 67 (3 in 67+), 0 finer (9/14). NGC ID# 28MF, PCGS# 9414

- 4912 1949-D Booker T. Washington MS67 PCGS. CAC.** Brilliant surfaces and shimmering luster furnish this piece with tremendous eye appeal. This Superb Gem reveals few marks and they are minor. The Hall of Fame displays a small area of as-made struck-in grease. Population: 36 in 67 (3 in 67+), 0 finer (9/14). NGC ID# 28MH, PCGS# 9417

**1951 Booker T. Washington Half, MS67  
Top-of-the-Line Strike and Eye Appeal**

- 4913 1951 Booker T. Washington MS67 PCGS. CAC.** An unusually sharp strike and a colorful, naturally acquired patina set this final-year Booker T. Washington half apart from other examples. The often-seen marks from careless Mint handling and planchet nicks are few, and bold mint luster radiates beneath the attractive coloration. Iridescent shades of blue, forest-green, russet, and reddish-gold cover both sides. Population: 13 in 67 (2 in 67+), 0 finer (10/14). NGC ID# 28MN, PCGS# 9424

- 4914 1951-D Booker T. Washington MS67 PCGS. CAC.** Both sides of this Superb Gem have brilliant silver luster with only a few splashes of vibrant gold and iridescent toning along the borders. Sharply struck and highly attractive. Population: 25 in 67 (1 in 67+), 0 finer (10/14). NGC ID# 28MP, PCGS# 9425

- 4915 1951 Washington-Carver MS66+ PCGS. CAC.** Dappled gold toning appears across the entire obverse and reverse, with lovely peripheral iridescent accents. An extraordinary Premium Gem with grand eye appeal. Population: 73 in 66 (5 in 66+), 3 finer (10/14). NGC ID# 28MS, PCGS# 9430

- 4916 1952 Washington-Carver MS67 PCGS.** This satiny Superb Gem boasts small iridescent freckles of color that provide an overall pinkish-gray appearance that is more prevalent on the obverse. Areas of golden-brown toning are present at the upper portion of the reverse. Both sides are splendidly preserved and well-struck. Population: 16 in 67 (2 in 67+), 1 finer (9/14). NGC ID# 28MV, PCGS# 9434

- 4917 1952 Washington-Carver MS67 PCGS. CAC.** The 1952 Washington-Carver half dollar saw the largest distribution by far of the various series issues, meaning the largest number remaining after unsold examples were melted. The net number disbursed was slightly more than 1.1 million pieces. Nonetheless, the issue has attained conditional rarity status, as Superb Gem examples of the 1952 have recently traded in the range of \$8,225-\$13,500. This piece displays great eye appeal over pristine surfaces that are mostly pinkish with accents of jade and blue. A top-notch example with the CAC endorsement, to boot. Population: 16 in 67 (2 in 67+), 1 finer (9/14). NGC ID# 28MV, PCGS# 9434

- 4918** 1954-D Washington-Carver MS66 PCGS. CAC. This satiny Premium Gem has brilliant luster beneath intermingled gold, rose, and iridescent toning with excellent eye appeal. Population: 46 in 66 (3 in 66+), 0 finer (10/14). NGC ID# 28N4, PCGS# 9443

**1936 Wisconsin Half Dollar, MS68  
None Numerically Finer at Either Service**

- 4919** 1936 Wisconsin MS68 PCGS. The miner's arm is generally considered the single design area where abrasions are most likely to be seen on the Wisconsin half. This is a refreshingly clean example. Each side displays just the slightest pastel iridescence when closely examined, but still retains much underlying brilliance and softly frosted mint luster. Population: 31 in 68 (4 in 68+), 0 finer (9/14). NGC ID# 28N6, PCGS# 9447

**1936 Wisconsin Commemorative, MS68  
Exceptional Overall Quality**

- 4920** 1936 Wisconsin MS68 PCGS. Not surprisingly at this grade level, this coin displays exceptional visual appeal. Although the obverse is the side with the badger, these coins are dated on the reverse and are encapsulated displaying that side. This MS68 specimen exhibits pale pearl hues overall, with areas of iridescent blue-green and lavender present along with splashes of golden brown. Population: 31 in 68 (4 in 68+), 0 finer (10/14). NGC ID# 28N6, PCGS# 9447

- 4921** 1936 Wisconsin MS68 NGC. Sun-gold, rose-red, and blue-green endow the borders while the centers are almond-gold and stone-gray. Lustrous and immaculate with remarkable eye appeal. Census: 36 in 68 (7 in 68 ★, 1 in 68+★), 0 finer (10/14). Ex: Santa Clara Signature (Heritage, 11/2002), lot 8322. NGC ID# 28N6, PCGS# 9447

## COMMEMORATIVE GOLD

- 4922** 1903 Louisiana Purchase, Jefferson, MS66 PCGS. The portrait of Thomas Jefferson is remarkably pristine on this pretty apricot-gold Premium Gem piece. Exuberant luster emanates from both sides, and even under a loupe only tiny distractions reveal themselves, along with a particularly robust strike throughout. NGC ID# 26HA, PCGS# 7443

- 4923** 1903 Louisiana Purchase, McKinley, MS65 PCGS. A lovely peach-gold Gem that boasts lustrous and essentially unabraded surfaces. One small spot is near the L in LOUISIANA. Well struck except for portions of the dentils. Certified in a green label holder. NGC ID# 26HB, PCGS# 7444

- 4924** 1903 Louisiana Purchase, McKinley, MS66+ PCGS. The McKinley variant of the Louisiana Purchase gold dollar had a distribution of fewer than 17,500 pieces, and high-grade survivors are always in demand among classic commemorative collectors. This Plus-graded example displays seemingly undisturbed, frosty mint bloom, with a bold strike and rich yellow-gold color. NGC ID# 26HB, PCGS# 7444

**1904 Lewis & Clark Gold Dollar, MS64  
Prooflike Designation**

- 4925** 1904 Lewis & Clark MS64 Prooflike NGC. Both sides of this brilliant yellow near-Gem exhibit lovely orange overtones, with prooflike fields and boldly defined devices. At first glance, this highly appealing gold dollar could be mistaken for a proof. Only 16 of the 1,282 NGC-certified 1904 Lewis & Clark gold dollars have earned the prooflike designation. Census: 6 in 64 Prooflike, 1 finer (10/14). PCGS# 77447

- 4926** 1905 Lewis and Clark MS61 NGC. This low-mintage issue was one of earliest U.S. gold commemoratives to be produced, after its 1904 counterpart. This lustrous example has a pleasing appearance despite a few noticeable abrasions, including a reeding mark on the upper obverse field. NGC ID# 26HD, PCGS# 7448

- 4927** 1905 Lewis and Clark MS61 NGC. A well-struck piece with pleasing, light coloration and shimmering mint luster. Faint lines across each side limit the grade. NGC ID# 26HD, PCGS# 7448

- 4928** 1905 Lewis and Clark MS61 NGC. A few faint hairlines limit the grade of this pleasing light yellow gold dollar. The strike is a trifle deficient as usual. NGC ID# 26HD, PCGS# 7448

- 4929** 1915-S Panama-Pacific Gold Dollar MS65 PCGS. Splashes of light blue toning appear on the orange-gold surfaces of this brilliant and highly lustrous Panama-Pacific gold dollar. A canal laborer appears on the obverse, and two dolphins on the reverse represent the Atlantic and Pacific oceans that were connected by the massive Panama Canal. NGC ID# 26HE, PCGS# 7449

- 4930** 1915-S Panama-Pacific Gold Dollar MS66 PCGS. One of five different commemoratives issued in conjunction with the prestigious Panama-Pacific International Exposition, held in San Francisco in 1915, following the completion of the Panama Canal the year before. This coin displays rich honey-gold luster over the obverse, while the reverse shows brighter shades of rose and mint-gold color. NGC ID# 26HE, PCGS# 7449

- 4931 1915-S Panama-Pacific Gold Dollar MS66 PCGS.** Rich honey-gold luster illuminates exceptionally well-preserved surfaces and boldly struck design elements. From a limited distribution of only 15,000 pieces, and seldom available numerically finer. NGC ID# 26HE, PCGS# 7449

**1915-S Panama-Pacific Dollar, MS67  
Repunched Mintmark**

- 4932 1915-S Panama-Pacific Gold Dollar MS67 NGC.** The mintmark is repunched southwest. *Cherrypickers'* lists two RPM varieties for the Panama-Pacific half dollar but currently omits a listing for the gold dollar counterpart. This lustrous Superb Gem is primarily peach-gold but displays sea-green in protected regions. The strike is sharp except on the jaw of the lower dolphin.  
*Ex: Long Beach Signature (Heritage, 2/2009), lot 2197.* NGC ID# 26HE, PCGS# 7449

- 4933 1915-S Panama-Pacific Quarter Eagle AU55 NGC.** Circulated examples of the Panama-Pacific commemorative gold coins are infrequently encountered, and provide collectors with an affordable opportunity to acquire the design. This example shows a trace of wear on the highest design points of its lustrous yellow surfaces. NGC ID# 26HK, PCGS# 7450

- 4934 1916 McKinley MS65 PCGS.** Luminous apricot-gold luster highlights well-cared for surfaces on this Gem McKinley Memorial gold dollar. The 1916 is the more available of the two dates for this issue, ideal for the classic commemorative type collector. Struck from mildly rotated dies. NGC ID# 26HF, PCGS# 7454

- 4935 1916 McKinley MS66+ NGC.** Lush orange-gold color complements a nicely preserved portrait of President McKinley, save for a couple of minuscule ticks at the temple area and under the neck. The reverse is especially clean. A nice example of this popular commemorative issue. NGC ID# 26HF, PCGS# 7454

- 4936 1916 McKinley MS66+ PCGS. CAC.** A fully struck caramel-gold Premium Gem with exemplary luster and a virtual absence of contact. A pinpoint spot appears near the top of the L in MCKINLEY, and a small as-made strike-through is noted northeast of the 6 in the date. NGC ID# 26HF, PCGS# 7454

**1916 McKinley Gold Dollar, MS67  
Impeccably Preserved**

- 4937 1916 McKinley MS67 PCGS.** This low-mintage issue was intended to fund a memorial to the late President William McKinley, who was assassinated in 1901. The current specimen is a conditionally rare Superb Gem with unimpeachable technical quality and outstanding, unusually bright luster. The surfaces are impeccably preserved. Population: 85 in 67 (1 in 67+), 0 finer (10/14). NGC ID# 26HF, PCGS# 7454

**1916 McKinley Memorial Dollar, MS67  
Splendid, Flawlessly Preserved Example**

- 4938 1916 McKinley MS67 PCGS.** This is a splendid Superb Gem example of the 1916 McKinley Memorial gold dollar. Fully struck with shimmering mint luster and seemingly flawless surfaces. Only one coin has received a numerically higher grade: an MS68 example at NGC. Population: 85 in 67 (1 in 67+), 0 finer (10/14). NGC ID# 26HF, PCGS# 7454

**Sharp 1916 McKinley Gold Dollar, MS67**

- 4939 1916 McKinley MS67 NGC.** This pinpoint-sharp Superb Gem has satin luster and essentially pristine preservation. Dusky green-gold toning further promotes the eye appeal. The second McKinley commemorative gold dollar, following his appearance on a 1903 Louisiana Purchase variety. Census: 82 in 67 (2 in 67+, 2 in 67 ★), 1 finer (10/14). NGC ID# 26HF, PCGS# 7454

**1916 McKinley Gold Dollar, MS67  
Among the Finest Known**

- 4940 1916 McKinley MS67 NGC.** Bright, sparkling mint luster is seen over both sides with a richly frosted texture. Shades of orange and sky-blue dominate. The strong technical merits of this coin are undeniable, and they include full strike details and smooth, essentially pristine surfaces. Proceeds from the sale of the 1916 and 1917 McKinley gold dollars helped fund a memorial to the assassinated president in his birthplace of Niles, Ohio. While we have offered several Superb Gems, the majority of survivors we handle grade no finer than MS65. This issue is a true condition rarity with only one piece that is finer, an NGC MS68 (10/14).  
*Ex: Palm Beach Signature (Heritage, 11/2004), lot 7977.* NGC ID# 26HF, PCGS# 7454

**4941 1917 McKinley MS65 PCGS.** An originally toned Gem with orange-gold, rose-red, and aquamarine toning. Lustrous and devoid of contact. A trace of struck-in grease is noted above the first M in MEMORIAL. Encapsulated in a green label holder. NGC ID# 26HG, PCGS# 7455

**4942 1917 McKinley MS66 PCGS.** A pristine and lustrous Premium Gem, attractively patinated in rose-gold and olive-green shades. The strike is precise at the centers although peripheral elements show minor blending. Certified in a green label holder. NGC ID# 26HG, PCGS# 7455

### 1917 McKinley Gold Dollar, MS67 Pleasing and Flawlessly Preserved

**4943 1917 McKinley MS67 PCGS.** This is a lovely Superb Gem example of the low-mintage McKinley gold dollar. The immaculately preserved surfaces are intensely lustrous and exhibit pleasing rose-gold toning. This was the second year of the McKinley gold dollar series. Population: 67 in 67 (2 in 67+), 0 finer (10/14). NGC ID# 26HG, PCGS# 7455

### 1917 McKinley Memorial Gold Dollar, MS67 None Certified Numerically Finer

**4944 1917 McKinley MS67 NGC.** The 1917 McKinley Memorial gold dollar had a scant distribution of only 5,000 coins, and is significantly scarcer in high grades than its 1916 counterpart, which was distributed to the extent of 15,000 pieces. This Superb Gem shows deep coppery-gold accents over satiny honey-gold luster. The surfaces are devoid of faults and the motifs are sharply impressed. Census: 57 in 67 (5 in 67 ★), 0 finer (10/14). NGC ID# 26HG, PCGS# 7455

**4945 1922 Grant No Star AU58 NGC.** Each side of this near-Mint No Star variety commemorative displays lustrous yellow-gold color and only slight traces of friction. Laura Gardin Fraser's designs were employed on the silver half dollar and gold dollar to celebrate the 100th anniversary of Grant's birth. NGC ID# 26HJ, PCGS# 7458

**4946 1922 Grant No Star MS64 NGC.** A green-gold near-Gem whose vibrant luster and pleasing surfaces suggest a conservative third party assessment. The strike is good and marks are minimal, though a minute flan flaw is noted above the jaw. NGC ID# 26HJ, PCGS# 7458

**4947 1922 Grant No Star MS64 NGC.** An attractive Choice Mint State example of the No Star variant, this Grant gold dollar exhibits lustrous yellow surfaces and above average design definition. NGC ID# 26HJ, PCGS# 7458

**4948 1922 Grant No Star MS65 PCGS.** Housed in a green-label PCGS holder, this Gem Grant No Star gold dollar has frosty yellow-gold luster, showing brilliant mint surfaces and sharp design details. NGC ID# 26HJ, PCGS# 7458

**4949 1922 Grant No Star MS66 PCGS. CAC.** A splendidly preserved peach-gold example of this scarce commemorative issue. As is the case with the Grant half dollar, the Star and No Star variants served no apparent purpose other than to provide additional revenue for the distributor. Certified in a green label holder. NGC ID# 26HJ, PCGS# 7458

### 1922 No Star Grant Dollar, MS67 Exemplary Preservation

**4950 1922 Grant No Star MS67 PCGS. CAC.** Bold luster, strike, and rich sun-gold coloration put this Superb Gem No Star dollar near the top of the ladder for PCGS-certified examples. Housed in a green label holder, this coin visited PCGS before the Plus designation was available. It has since received CAC endorsement. An exemplary example — no PCGS coins are certified numerically finer, with a mere two MS67 pieces earning the Plus recognition (10/14). NGC ID# 26HJ, PCGS# 7458

**4951 1922 Grant With Star MS65 PCGS.** Rich peach-gold coloration displays traces of mint-green. The surfaces show intense luster and exhibit well-impressed design elements. There are no mentionable marks on either side. The coin displays pleasing overall eye appeal that is sure to draw serious attention from aficionados of commemorative coinage.

*Ex: Dallas Signature (Heritage, 11/2006), lot 1771, which realized \$3,220. NGC ID# 26HH, PCGS# 7459*

### 1922 Grant Gold Dollar, MS67 With Star, Lemon Patina

**4952 1922 Grant With Star MS67 PCGS.** Rich lemon-gold patina bathes this pristine Superb Gem. The coruscating surfaces exhibit superlative eye appeal. The strike is sharp aside from customary blending on the tree trunk near the frame house window. Certified in a green label holder. Essentially unobtainable any finer. NGC ID# 26HH, PCGS# 7459

**1922 Grant With Star Gold Dollar, MS67  
Very Rare Any Finer**

- 4953 1922 Grant With Star MS67 PCGS.** Two varieties of 1922 Grant commemorative gold dollars were made, one with a star above GRANT and one without a star. A little over 5,000 pieces of each were produced, and none were melted. These were companions to the half dollars of the same general style, the first instance in which silver and gold denominations were both produced of the same design for the same event. This example reveals radiant luster overlain by alternating orange-gold and yellow-gold patina imbued with faint greenish undertones on the obverse. The design elements are sharply impressed, with nice definition on Grant's hair and on the tree foliage. There are no marks worthy of mention. Ex: FUN Signature (Heritage, 1/2005), lot 10851. NGC ID# 26HH, PCGS# 7459

**1922 Grant Gold Dollar, MS67  
With Star Variant**

- 4954 1922 Grant With Star MS67 PCGS.** Congress approved the Grant commemorative coinage on February 2, 1922, with funds earmarked for two buildings and a five mile highway from New Richmond to Point Pleasant in southwestern Ohio. U.S. Highway 52 connects the two communities today. An absolutely gorgeous Superb Gem, this 1922 Grant With Star gold dollar has brilliant orange-gold luster and frosty surfaces. PCGS has only certified one finer example (10/14). NGC ID# 26HH, PCGS# 7459
- 4955 1926 Sesquicentennial MS65 PCGS.** The 1926 Sesquicentennial quarter eagle was produced with rather low relief, and this must be taken into account when evaluating strike quality. This Gem example, fully frosted with rich golden color, displays sharply delineated design elements, with the sun rays faintly visible on either side of Independence Hall on the reverse. NGC ID# 26HL, PCGS# 7466
- 4956 1926 Sesquicentennial MS65 PCGS.** Struck to commemorate the 150th anniversary of the signing of the Declaration of Independence, this Gem Sesquicentennial half dollar boasts luminous lemon-gold luster and sharply impressed motifs. No singularly significant surface flaws are observed upon close examination. NGC ID# 26HL, PCGS# 7466

**1926 Sesquicentennial Quarter Eagle, MS65+  
Beautifully Preserved Example**

- 4957 1926 Sesquicentennial MS65+ PCGS.** This beautifully designed type was struck to commemorate the 150th anniversary of American Independence. Lilac and yellow-gold toning grace the smooth surfaces of this highly lustrous Gem. There are no mentionable or distracting marks noted on either side of the coin. NGC ID# 26HL, PCGS# 7466

**1926 Sesquicentennial Quarter Eagle, MS65  
Lustrous and Appealing**

- 4958 1926 Sesquicentennial MS65 PCGS. CAC.** This commemorative quarter eagle issue was struck to the extent of 200,000 examples, but the mintage proved to be excessive and more than three-quarters of the coins were eventually melted; leaving a net figure of 46,019 pieces. The current representative is a lovely Gem with typical strike definition and well-preserved, lustrous surfaces. NGC ID# 26HL, PCGS# 7466

**MODERN ISSUES**

- 4959 1997-W Jackie Robinson Gold Five Dollar MS69 PCGS.** This near-perfect five dollar gold piece displays a satiny sheen and lemon-gold color with touches of copper-orange. The devices feature outstanding definition. A minuscule tick below the C in COURAGE is all that precludes an MS70 designation. NGC ID# 28UG, PCGS# 9759
- 4960 1997-W Jackie Robinson Gold Five Dollar MS69 PCGS.** This impressive, near-perfect five dollar gold commemorative has distinct lemon-yellow toning over lighter yellow surfaces with brilliant, frosty luster. NGC ID# 28UG, PCGS# 9759
- 4961 2000-W Library of Congress Bimetallic Ten Dollars MS69 PCGS.** A near-perfect example of this popular modern commemorative, the nation's first bimetallic issue. The surfaces appear perfect. Certified in an old-style PCGS blue-label holder with bar code on the reverse and seven-digit certification number. NGC ID# 28V5, PCGS# 9784
- 4962 2000-W Library of Congress Bimetallic Ten Dollars MS69 PCGS.** This nearly perfect modern commemorative represents the nation's first bimetallic issue. Virtually perfect surfaces exhibit brilliant and satiny yellow luster on the outer ring, and light gray luster at the centers. NGC ID# 28V5, PCGS# 9784

- 4963** 2000-W Library of Congress Bimetallic Ten Dollar PR70 Deep Cameo PCGS. Ex: U.S. Vault Collection. A perfect coin in both strike and preservation, this Library of Congress Bicentennial exhibits the beautiful bimetallic composition consisting of a gold ring surrounding a platinum center. Fully mirrored fields, with heavily frosted design elements. NGC ID# 28V6, PCGS# 99784

## MODERN BULLION COINS

- 4964** 1980 Grant Wood, One-Ounce Gold, MS67 PCGS. Grant Wood was a noted American painter, and his most famous work, American Gothic, is featured on the reverse. This orange-gold Superb Gem is pristine except for a minute tick on the reverse rim near 4:30. First year of the American Arts U.S. gold bullion series, predecessors to the American eagle coins. Population: 50 in 67, 10 finer (9/14). PCGS# 20501
- 4965** 1991 Quarter-Ounce Gold Eagle MS70 PCGS. A quarter-ounce of pure deep golden-orange perfection. Struck in the smallish amount of 36,100 pieces, making it one of the semikeys to the set along with the later W-mint burnished issues. Population: 17 in 70 (10/14). NGC ID# 26M7, PCGS# 9850
- 4966** 1992 Silver Eagle MS70 NGC. A perfect, silver-white representative of one of the in-demand earlier issues in this long and popular series, the modern American equivalent of the Morgan silver dollar. The pristine surfaces are distraction-free and uniformly frosted, front and back. It has been nearly a year since we offered an MS70 NGC example. NGC ID# 26JG, PCGS# 9856
- 4967** 1992 Silver Eagle MS70 NGC. A perfect MS70 untuned silver-white example of this high-mintage conditional rarity within the American Silver Eagle series, struck in excess of 5.5 million pieces but seldom seen so fine. NGC ID# 26JG, PCGS# 9856
- 4968** 1994-P Silver Eagle PR70 Deep Cameo PCGS. From the lowest proof mintage of the series (excluding reverse proofs), at 372,168 pieces, this is a flawlessly preserved example showing stark, deep cameo contrast on each side. NGC ID# 26JM, PCGS# 9877
- 4969** Five-Piece 1995-W 10th Anniversary American Eagle Set. A complete five-piece 10th Anniversary American Eagle proof set. Contains the one-ounce \$50, half-ounce \$25, quarter-ounce \$10, and tenth-ounce \$5 gold eagles, but as always, the star is the one-ounce silver eagle, the key to its widely collected series. All coins appear pristine. Included with the lot is the square government-issued box and inset. NGC ID# 28WZ, PCGS# 9887
- 4970** 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, MS69 PCGS. Fully struck and almost flawlessly preserved. Struck with a proof die pair, but lacking the mirrored finish, likely due to the dies being used without the normal chromium plating. PCGS has certified only a single example numerically finer than this piece (9/14). NGC ID# 26MG, PCGS# 99942
- 4971** 1999-W Quarter-Ounce Gold Eagle, Unfinished Proof Dies, MS69 PCGS. A virtually perfect example in both strike and preservation. Struck from unfinished proof dies with the West Point mintmark. The exact number produced is unknown, though it is undoubtedly small, likely no more than 10,000 pieces (the *Guide Book* estimate). According to Ron Guth, Fred Weinberg once examined 1,500 coins, with only 21 being of the Unfinished Die variety. NGC ID# 26MG, PCGS# 99942
- 4972** 1999-W One-Ounce Platinum Eagle PR70 Deep Cameo PCGS. A deeply contrasted, distraction-free example of this second issue from the Vistas of Liberty series which began in 1998. This reverse is the Southwestern Wetlands reverse. NGC ID# 293P, PCGS# 99776
- 4973** 2004-W Platinum PR70 Deep Cameo PCGS. A flawless example of one of our favorite reverse designs for the American Platinum Eagle series, given the unusual perspective on the seated Liberty and her pet eagle. NGC ID# 293J, PCGS# 921106

## 2004-W \$100 One-Ounce Platinum Eagle PR70 Deep Cameo

- 4974** 2004-W One-Ounce Platinum Eagle PR70 Deep Cameo PCGS. This elegant-looking specimen is from a low mintage of 6,007 pieces, and PR70 Deep Cameo examples are rare. This example displays the expected full strike definition and the surfaces are obviously as struck and pristine. NGC ID# 293U, PCGS# 921107
- 4975** 2006-W Half-Ounce Gold Eagle MS70 PCGS. The "burnished" or specially prepared planchets for this issue were introduced at the Mint via the 2006-W Mint State coins, which command a premium compared to other 2006 American Gold Eagles. This piece is problem-free, certified in a regular PCGS holder. NGC ID# 26NV, PCGS# 79983
- 4976** 2006-W Half-Ounce Gold Eagle MS70 PCGS. The 2006-W fractional American Gold Eagles (five, ten, and twenty-five dollar coins) were struck on blanks that were roll around in the presence of small steel balls before striking to "burnish" the planchets. The 2006-W burnished half-ounce saw a low mintage of 15,164 pieces and is among the W-mint keys to the complete series. This khaki-gold example is sheer perfection. NGC ID# 26NV, PCGS# 79983
- 4977** 2006-W Half-Ounce Gold Eagle MS70 NGC. A perfect sandy-tan MS70 example of this special "burnished" issue struck on specially prepared planchets, the first year such were struck. Encased in a special West Point Mintmark Issue NGC slab. NGC ID# 26NV, PCGS# 79983
- 4978** 2006-W 20th Anniversary One-Ounce Gold Eagle PR70 Deep Cameo PCGS. The American Eagle bullion coins were developed to provide a local alternative to the bullion coins of other countries, and especially the Kruggerand. With the addition of proofs, they quickly became collectible. This gorgeous orange-gold example has impressive contrast with majestic eye appeal. NGC ID# 2TTS, PCGS# 99984
- 4979** Four-Piece 2007 Gold Eagle Set, Early Releases, MS70 NGC. This lot includes separately certified examples of the tenth-ounce \$5, quarter-ounce \$10, half-ounce \$25, and one-ounce \$50. A pristine and fully impressed quartet with exemplary sweeping luster. (Total: 4 coins) PCGS# 146921
- 4980** 2007-W One-Ounce Platinum Eagle PR70 Deep Cameo PCGS. A flawless one-ounce platinum 2007-W with the reverse design that saw a few of the "Frosted FREEDOM" variety. This is the regular, nonfrosted type. NGC ID# 26UF, PCGS# 149579
- 4981** 2008-W Half-Ounce Gold Buffalo PR70 Ultra Cameo NGC. A flawless, impressively preserved representative from the first year of the 24-karat Buffalo gold series. This lovely piece shows meticulous strike definition on the beloved Buffalo nickel design motifs. PCGS# 399936
- 4982** 2008 One-Ounce Gold Buffalo, Fraser MS70 PCGS. Currently this 2008 gold Buffalo one-ounce is the sole Mint State example certified at PCGS with the special James Earle Fraser Signature label, although there are many with the First Strike label. A nice coin with the appealing, softly frosted texture. PCGS# 91011

- 4983 Four-Piece 2008-W Gold Buffalo Set MS70 NGC.** The set consists of a tenth-ounce \$5, quarter-ounce \$10, half-ounce \$25, and one-ounce \$50. All four coins originated from the same NGC submission, and are separately housed. The coins are pristine and precisely struck with vibrant satin sheen. (Total: 4 coins) PCGS# 400037
- 4984 Four-Piece 2008-W Gold Buffalo Set MS70 NGC.** The set includes the tenth-ounce \$5, quarter-ounce \$10, half-ounce \$25, and one-ounce \$50, separately housed in holders bearing the ideal third party grade. All four coins are pristine and intricately struck. (Total: 4 coins) PCGS# 400037
- 4985 Four-Piece 2008-W Gold Buffalo Set PR70 Ultra Cameo NGC.** Included are the \$5 tenth-ounce, \$10 quarter-ounce, \$25 half-ounce, and \$50 one-ounce coins. An immaculate and needle-sharp quartet with luminous motifs and sparkling fields. The \$5, \$10, and \$25 Buffalo denominations were coined only in 2008. (Total: 4 coins) PCGS# 393329
- 4986 2010-W One-Ounce Gold Eagle PR70 Deep Cameo PCGS.** A deeply toned and beautifully contrasted reddish-orange example of this recent W-mint one-ounce American Gold Eagle issue. The surfaces are essentially flawless. NGC ID# 26RA, PCGS# 415544
- 4987 2012-W One-Ounce Gold Eagle PR70 Deep Cameo PCGS.** Deep orange-gold device color contrasts beautifully against jet-black fields on this one ounce of pure gold perfection as certified by PCGS. NGC ID# 2TY9, PCGS# 512111
- 4988 2012-W One-Ounce Gold Buffalo, First Strike PR70 Deep Cameo PCGS.** A beautifully contrasted and problem-free example of this recent West Point issue, which saw a reported proof production of only 19,765 pieces. Certified in one of the popular First Strike holders. PCGS# 511524
- 4989 2013-W One-Ounce Gold American Eagle PR70 Deep Cameo PCGS.** These one-ounce American Gold Eagle coins show the "updated" design of Augustus Saint-Gaudens to full advantage, even though some numismatists prefer the original design. This is a fault-free and deeply contrasted example of this recent issue. PCGS# 518214
- 4990 2013-W One-Ounce Gold Buffalo, Reverse Proof, First Strike PR70 PCGS.** An ounce of pure gold (and pure perfection) in the popular Buffalo format, even more appealing as the reverse proof motif introduced in 2006 and with the hotly pursued First Strike Black Diamond PCGS label commemorating the 100th anniversary of the original Buffalo nickel introduction by James Earle Fraser. PCGS# 520051
- 4991 Four-Piece 2014 Gold Eagle Set, First Strike MS70 PCGS.** The set includes a \$5 tenth-ounce, \$10 quarter-ounce, \$25 half-ounce, and \$50 one-ounce gold eagle. All four coins are flawless and nicely struck. The one-ounce eagle has hints of orange toning on its rims. (Total: 4 coins) PCGS# 521921
- 4992 (2014) "1787 Brasher Doubloon" Ungraded NGC.** 26.4 gm .9999 fine gold. #100 of 500 novodels privately struck for the Monaco booth at the 2014 ANA convention in Chicago, as a promotion for a genuine Brasher doubloon exhibited by the firm. Ron Landis, formerly of the Gallery Mint, served as engraver and coiner. EB "hallmark" on left (facing) wing. Although NGC has omitted a numerical or descriptive grade, the piece is essentially as struck.

## COINS OF HAWAII

### 1847 Hawaiian Cent, MS64 Brown Medcalf 2CC-2, Crosslet 4

- 4993 1847 Hawaii Cent MS64 Brown PCGS. CAC. M. 2CC-2. Crosslet 4, 15 berries.** The most often seen variety. This example is boldly struck in the centers, but exhibits slight softness on the upper wreath ends. Glossy auburn-brown toning blankets each side, with soft underlying luster. No signs of carbon spotting or significant abrasions are present, giving the coin ample visual appeal. Population: 40 in 64 Brown, 6 finer (9/14). PCGS# 10965

## GSA DOLLARS

- 4994 1881-CC GSA MS66 NGC. VAM-2.** A fully struck and brilliant high grade Carson City dollar. The reverse is essentially pristine, and the obverse exhibits only incidental contact. A desirable example of the low mintage issue. No certificate or box is included. PCGS# 518863
- 4995 1882-CC GSA MS66 NGC.** Aquamarine and straw-gold intermingle across most of the obverse, although an arc of forest-green and cherry-red is noted near 1 o'clock. Conversely, the reverse is primarily brilliant, but the lower margin displays dusky tan toning. No box or certificate accompanies the lot. PCGS# 518866
- 4996 1884-CC GSA MS66 NGC. VAM-3.** The 1 in the date is repunched. Delicate gold toning visits this lustrous and crisply struck Carson City type coin. A lens locates minor grazes on the portrait and right reverse field. There is no box or certificate included. PCGS# 518872

### 1884-S Dollar, Choice AU GSA Soft Pack

- 4997 1884-S GSA Soft Pack AU55 NGC.** The conditionally rare 1884-S dollar is elusive in AU55, but downright rare in a GSA soft pack holder. A partly lustrous cream-gray example with a few moderate marks on the left obverse. The lot is accompanied by an envelope and two informational cards of GSA issue. NGC ID# 254P, PCGS# 7156

## REDFIELD DOLLARS

- 4998** 1883-S MS65 Paramount (MS64 NGC). Ex: Redfield Collection. Brilliant fields and motifs are framed by attractive autumn-brown and jade-green border toning. Well struck and lustrous with the expected number of minor abrasions. The 1883-S is common in VF but surprisingly scarce in better Uncirculated grades. NGC ID# 254K, PCGS# 7148

### 1891-CC Silver Dollar, MS65 Ex: Redfield, Paramount Holder

- 4999** 1891-CC MS65 Paramount (MS65 NGC). VAM-2. Ex: Redfield Collection. Liberty's profile is die doubled, most evident on her lip. Light autumn-brown borders frame brilliant fields and devices. A sharply struck and lustrous Gem with smooth fields, a clean cheek, and moderate contact on the eagle's breast. NGC ID# 255H, PCGS# 7206

- 5000** 1891-CC Spitting Eagle, VAM-3, MS65 Paramount (MS64 NGC). Ex: Redfield Collection. The familiar 1891-CC variety with a die lump beneath the eagle's beak. The present Carson City near-Gem is lustrous and fully struck with peripheral peach-gold toning and minor grazes on the left obverse. PCGS# 133937

### 1892-CC Morgan Dollar, MS63 Better Redfield Carson City Issue

- 5001** 1892-CC MS65 Paramount (MS63 NGC). VAM-8A. Ex: Redfield Collection. La Vere Redfield was a hard money advocate whose estate held a vast quantity of silver dollars, including many better dates. Circa-1980, Paramount had the then-novel idea of encapsulating his dollars in graded holders, although only two grades were used, MS60 (black holder) and MS65 (red holder). This lustrous representative has golden-brown peripheries and unmarked fields. The cheek is typically abraded for the MS63 level. NGC ID# 255M, PCGS# 7214

## ERRORS

### 1981-P Nickel, Misaligned Obverse Die MS66 Five Full Steps

- 5002** 1981-P Jefferson Nickel — Obverse Misaligned Die — MS66 Five Full Steps NGC. The obverse is several degrees off center toward 8 o'clock. IN GOD WE TRUST is tight but mostly intact. The obverse rim is absent near 9 o'clock and is broad and lumpy near 3 o'clock. The reverse has a normal appearance. A high grade, brilliant, and well struck Premium Gem.

### 1964-D Half Dollar, MS62 Struck on a Quarter Planchet

- 5003** 1964-D Kennedy Half Dollar — Struck on a Quarter Planchet — MS62 PCGS. Type Two Reverse. The centering favors the portrait and eagle, which are fully intact. The peripheral legends, including the date, are partially present. The Denver mintmark near the branch stem confirms status as a 1964-D. Well preserved, since the mostly retained lamination on Kennedy's neck is a secondary mint error.

### 1854 Type Two Gold Dollar XF Details, Reverse Lamination

- 5004** 1854 Type Two Gold Dollar — Reverse Lamination, Damaged — NGC Details. XF. After the strike, the upper half of the reverse separated from the remainder of the coin. Although the NGC holder does not indicate a weight, the absent portion likely constitutes approximately one-quarter of the weight prior to the separation. The upper reverse has a granular, recessed appearance and shows partial design detail. The obverse is wavy and displays a few intermittent linear marks. A scarce gold type.

## CIVIL WAR TOKEN

Extremely Rare G.G. Sawtell Sutler Token  
8th Virginia Regiment, Choice VF, S-H25B

**5005** (1861-65) G.G. Sawtell, 8th Virginia Regiment Sutler Token - Improperly Cleaned - NGC Details. VF. VA S-H25B, R.9. The left obverse bears the counterstamp "15." The deep counterstamp is visible on the reverse, and causes a moderate bend. The obverse legends are G. G. SAWTELL / 8TH VIR. REG / 25 / CENTS IN GOODS. The reverse inscription is JOHN STANTON / STAMP / BRAND / CUTTER / CINCINNATI within a beaded circle. The olive-toned brassy surfaces are lightly hairlined and show slight corrosion inside the counterstamp. Only three or four examples of the 25 cent denomination Sawtell sutler token are believed to exist.

Gilbert G. Sawtell (1838-1897) and his brother, William D. Sawtell, appear in the 1864 and 1865 Wheeling, West Virginia city directories as "Merchant Tailors and Manufacturers and Dealers in Clothing, Gents Furnishing Goods, &c." with their business located on Monroe Street in Wheeling.

A United States military telegraph dated September 12, 1864, and documented at Fold3.com, was sent to the Adjutant General's Office, asking if G.G. Sawtell was recorded as sutler of the 15th West Virginia Volunteer Infantry. The unit was organized at Gilbert Sawtell's home of Wheeling, West Virginia in 1862, after the Wheeling Conventions of 1861, but before West Virginia statehood in 1863.

## U.S. MINT MEDAL

U.S. Grant Indian Peace Medal

**5006** 1871 U.S. Grant Indian Peace Medal. Julian-IP-42. Silver, 62 mm. In our opinion, this medal has the details of an XF specimen that has environmental damage and tooling. The pearl-gray surfaces are lightly granular overall, although the left obverse field is granular and displays a small smoothed area. A cluster of small marks is noted near 3 o'clock. Holed near 12 o'clock, likely as issued. Awarded silver Indian Peace medals are much rarer than their bronze counterparts made for collectors.

## MISCELLANEOUS MEDALS AND TOKENS

**5007** (1983) Libertas Americana Medal, Paris Mint Restrike, MS63 NGC. Silver, 78 mm. Edge engraved "No. 0114" at 6 o'clock, visible within the NGC holder. Crisply struck and satiny with a few gray flecks above the French shield. The fields display parallel hairlines.

## CERTIFIED MODERN PROOF SET

**5008** Five-Piece 1937 Proof Set PR63 to PR65 PCGS. The set includes: cent PR64 Red and Brown, fully struck, orange-gold, distributed minute reverse flecks; nickel PR65, well struck, light golden toning, a few tiny spots; dime PR65, a needle-sharp Gem with attractive peripheral chestnut patina; quarter PR65, light tan and aqua toning, the obverse field exhibits subtle retained laminations; and a half dollar PR63, intricately impressed, flashy fields, dappled caramel-gold toning, the sun's rays are partially lapped. (Total: 5 coins)

## MINT SETS

**5009** Uncertified 1942 Mint Set. The U.S. Mint did not sell mint sets to the general public prior to 1947. But an intrepid collector in 1942 received a mostly complete mint set for that year by writing the Treasury Department and paying \$2.98, which covered the \$2.68 face value plus a mail charge of 30 cents. The one-page letter Mint receipt accompanies the lot, and includes the name and address of its original owner. The set includes Uncirculated PDS examples of the cent, dime, quarter, and half dollar, plus the Type Two 1942-P and 1942-S nickels. The 1942-S cent, dime, quarter, and half dollar all have trumpet tail mintmarks. No Type One nickels were included. The silver coins and nickels display deep peripheral toning. (Total: 14 coins)

**5010** Uncertified 1951 Double Mint Set. Two of each denomination from the Philadelphia, Denver, and San Francisco Mints, all MS63 to MS67 examples with light to medium toning. (Total: 30 coins)

*End of Session Three*

# SESSION FOUR

## PATTERNS

1854 Judd-160 Cent, MS64 Brown  
First Generation Holder

**5011** 1854 One Cent, Judd-160, Pollock-187, R.4, MS64 Brown PCGS. Judd-160 was part of a part of the Mint's experiments with a smaller diameter cent. The design is similar to the contemporary large cent but omits the stars and shrinks the wreath. Struck in copper with a plain edge. This fully struck chocolate-brown pattern is certified as a business strike within its first generation holder, but if resubmitted today would likely be designated as proof. Conservatively assessed despite a few minute flecks on the lower left obverse quadrant. PCGS# 11659

**5012** 1854 One Cent, Judd-161 Original, Pollock-187, R.4, PR64 Brown PCGS. The design is similar to that of contemporary large cents except the diameter is close to a quarter dollar, there are no stars on the obverse, and the wreath is proportionately smaller. Struck in bronze with a plain edge. Glossy auburn-brown patina blankets both sides, with moderate reflectivity in the fields and bold definition on the devices. No carbon spotting is observed. Housed in an old green label holder. PCGS# 11663

1858 Flying Eagle Cent, PR64+  
Judd-206, Exceptional Toning

**5013** 1858 Flying Eagle Cent, Judd-206, Pollock-242, R.5, PR64+ PCGS. Snow-PT16. A doubled die reverse with the close E in ONE rehubbbed with an open E. Paquet's Small Eagle obverse is paired with the regular issue Low Leaves reverse. Struck in copper-nickel with a plain edge. A needle-sharp near-Gem with beautiful ruby-red, sea-green, and peach-gold patina. The satiny surfaces are undisturbed. PCGS# 11877

1859 Judd-237 Half Dollar, PR63  
French Liberty Head Design

**5014** 1859 Half Dollar, Judd-237, Pollock-293, R.4, PR63 PCGS. CAC. The Longacre-designed French Liberty Head, facing right with laurel and vine in her hair. A ribbon below the bust is inscribed LIBERTY, with UNITED STATES OF AMERICA around, and the date below. The reverse displays the agricultural wreath of the Seated dime, resized to appropriate scale, around the denomination HALF DOLLAR. Struck in silver with a reeded edge. Hints of bluish-steel toning appear along the borders of this pleasing Select proof. Silver brilliance accompanies bold design definition. PCGS# 11966

1859 Half Dollar Pattern, PR64 Brown  
Judd-242, Pollock-298

**5015** 1859 Half Dollar, Judd-242, Pollock-298, R.5, PR64 Brown PCGS. The Longacre design for the half dollar that features a bust of Liberty facing right, draped with a ribbon inscribed LIBERTY with a wide wreath of oak and vine on her head. The reverse is a large format version of the wreath of the issued 1859 dime, except the denomination is expressed as 50 / CENTS. Struck in copper with a reeded edge. Both sides exhibit a wire rim. A well struck chocolate-brown near-Gem with glimpses of the initial orange-gold within the obverse legends. One small spot noted near the 18 in the date. Population: 6 in 64 Brown, 6 finer (10/14). PCGS# 11980

**1866 Washington Five Cent Pattern in Nickel  
Judd-461, Bright, Lustrous PR65**

- 5016** 1866 Five Cents, Baker-45, Judd-461, Pollock-535, R.5, PR65 NGC. CAC. Ex: Eric P. Newman Collection. A bust of George Washington faces right on the obverse, UNITED STATES OF AMERICA surrounds, and the date is below. The reverse features the denomination 5 CENTS within a laurel wreath with IN GOD WE TRUST above. Struck in nickel with a plain edge. Washington patterns were a popular Mint product in the mid-1860s. This is one of the more available patterns, with perhaps three dozen known survivors. The base of an errant 1 is visible to the left of the date on all examples seen of this issue. An early auction appearance was in the Idler Collection (Haseltine, 4/1870), lot 233. Idler was one of the main outlets for the sale of numismatic delicacies from the Mint.

This nickel retains its original brightness over each side. Slight porosity is seen in the fields, a trait often seen on early nickel patterns as well as early Shield nickels. Nevertheless, the fields are bright and exhibit moderate reflectivity with slight contrast against the softly frosted devices. The strike is remarkably strong for a nickel pattern with just the slightest high-point softness seen on Washington's hair. A tiny triangular-shaped planchet chip is seen on the upper reverse to the left of the upper part of the first T in TRUST. Each side is mostly brilliant with just a hint of pale golden patina. Ex: "Colonel" E.H.R. Green; Green Estate; Partnership of Eric P. Newman / B.G. Johnson d.b.a. St. Louis Stamp & Coin Co.; Eric P. Newman @ \$17.50; Eric P. Newman Numismatic Education Society. PCGS# 60656

**1866 Washington Head Five Cent  
Judd-470, PR65 Cameo**

- 5017** 1866 Five Cents, Baker-42, Judd-470, Pollock-562, Low R.6, Nickel, Plain Edge, PR65 Cameo NGC. On the obverse, a bust of George Washington faces right, the legend IN GOD WE TRUST above and the date below. A wreath of laurel on the reverse encloses the so-called Short 5 with the legend UNITED STATES OF AMERICA around. Struck in nickel with a plain edge. The Judd-470 and related patterns are popular, not only with pattern enthusiasts but also Washingtonia collectors. This faintly peach-tinged Gem has strong mirrors and attractive contrast. Ex: Dallas Signature (Heritage, 10/2009), lot 1258. PCGS# 60666

**1867 Five Cents Judd-566 Pattern  
PR65 Cameo**

- 5018** 1867 Five Cents, Judd-566, Pollock-627, Low R.6, PR65 Cameo PCGS. The obverse features a bust of Liberty facing left, wearing a coronet, surrounded by the legend and date. The denomination is within a laurel wreath that is close to the edges on the reverse, with a tiny IN GOD WE TRUST above. Struck in nickel with a plain edge. One of many similar five cent patterns of the year based on the contemporary three cent nickel design, Judd-566 features CENTS in straight rather than curved letters, and Liberty's coronet does not have a star. Brilliant throughout, the striated fields give this pattern a deep reflectivity that sets off the lightly frosted devices with a mild cameo contrast. A delightful example of this popular design. Ex: Western Hills Collection (Heritage, 6/2005), lot 7399; Long Beach Signature (Heritage, 9/2008), lot 3437. PCGS# 60776

**1870 Standard Silver Half, PR61  
Judd-957, Silver, Reeded Edge**

- 5019** 1870 Standard Silver Half Dollar, Judd-957, Pollock-1108, R.5, PR61 PCGS. A bust of Liberty faces right and is surrounded by UNITED STATES OF AMERICA. She wears a headband inscribed LIBERTY, and has a large star on her forehead. IN GOD WE TRUST is below on a banner. The reverse features 50/ CENTS/1870 within a wreath of cotton and corn. STANDARD is centered above the wreath. Struck in silver with a reeded edge. Generally untuned with good reflectivity in the fields. The centers of each side show slight softness of detail from die opposition. Ex: Long Beach Signature (Heritage, 9/2004), lot 8245. PCGS# 61203

**1870 Standard Silver Half Dollar, PR61  
Judd-963, Reeded Edge**

- 5020 1870 Standard Silver Half Dollar, Judd-963, Pollock-1059, Low R.7, PR61 PCGS.** The central obverse features a capped head of Liberty with two stars, UNITED STATES OF AMERICA above, and the motto in a banner below. The reverse shows an open oak and laurel wreath surrounding the denomination, with Standard Silver above, the date below, and two stars separating the date and legends. Struck in silver with a reeded edge. Brilliant and fully struck with faint horizontal hairlines and a coat of lacquer on both fields, most evident at the denomination. PCGS# 61209

**1884 'Holey' Cent Pattern in Nickel  
Judd-1721, PR65**

- 5021 1884 One Cent, Judd-1721, Pollock-1929, R.5, PR65 PCGS. CAC.** Eastman Johnson's "holey" design for the cent with the center perforated with an irregular circumference. The obverse bears the legend UNITED STATES OF AMERICA about the upper rim and the date at the bottom. The reverse shows the denomination ONE CENT at the top with an inverted shield and two laurel sprigs below. Struck in nickel with a plain edge. The surfaces appear original and untampered with a medium density gray patina that covers each side. PCGS# 62150

**1884 'Holey' Five Cent Pattern in Nickel  
Judd-1724, PR65**

- 5022 1884 Five Cents, Judd-1724, Pollock-1934, Low R.6, PR65 PCGS. CAC.** Another version of Eastman Johnson's "holey" design. Here for a proposed five cent coin. The obverse shows FIVE above and CENTS below a roughly octagonal opening in the planchet, with shields on either side. The reverse shows UNITED STATES OF AMERICA at the outer rim, with an inner circle of 13 stars and date 1884 below. Struck in nickel with a plain edge. The fields are moderately reflective and there is a layer of medium gray patina on each side. PCGS# 62154

**GOLD DOLLARS**

- 5023 1849 No L MS62 PCGS.** This popular first-year variety omits the designer's initial (L for Longacre). The design elements are well-detailed and the lustrous peach-gold surfaces show only minor signs of contact. NGC ID# 25B7, PCGS# 7501
- 5024 1849 No L MS64 NGC.** This *Guide Book* variety is popular as a first-year type. Garrett and Guth report that approximately 1,000 gold dollars were struck without the designer's initials, and many were set aside as novelties. This Choice example shows orange-gold color over strongly detailed, smooth surfaces. NGC ID# 25B7, PCGS# 7501
- 5025 1849 Closed Wreath MS64+ PCGS.** The Closed Wreath 1849 gold dollar is significantly scarcer than its Open Wreath counterpart, and is genuinely rare above the MS64 grade level. This Plus-graded Choice example displays satiny yellow-gold luster and attractively smooth surfaces. The strike is bold throughout, with particular notice given to the wreath berries and the central reverse lettering. Population: 45 in 64 (3 in 64+), 20 finer (9/14). PCGS# 7503
- 5026 1849-D — Improperly Cleaned — NGC Details. Unc. Variety 1-A.** The introductory Dahlonega gold dollar issue is very scarce in all grades, since only 21,588 pieces were struck. The present butter-gold representative has an incomplete strike on Liberty's hair near the ear, but the borders display luminous luster.
- 5027 1850-O AU58 NGC.** The lowest mintage New Orleans gold dollar, far scarcer than the adjacent 1849-O and 1851-O issues. Well-struck and unblemished with orange-gold centers and sea-green margins. Luster illuminates the legends, stars, and motifs. NGC ID# 25BJ, PCGS# 7512

**1851 Gold Dollar, MS65  
Popular Type Issue**

- 5028 1851 MS65 PCGS.** The 1851 gold dollar enjoyed a large mintage of 3.3 million pieces, and the date is reasonably available in all grades up to the MS65 level today. This impressive Gem offers well-detailed design elements and vibrant mint luster, and the well-preserved orange-gold surfaces add to the considerable eye appeal. Population: 76 in 65, 35 finer (10/14). NGC ID# 25BK, PCGS# 7513
- 5029 1851-D XF45 PCGS. Variety 3-E.** Original peach-gold and gunmetal-gray toning aids the eye appeal of this low mintage Dahlonega dollar. Actual circulation wear is minimal, though the strike shows blending on the hair near the ear. A thin mark is noted near the profile. Housed in a green label holder. NGC ID# 25BM, PCGS# 7515

**1851-D Gold Dollar, AU55**  
**Original Green-Gold Surfaces**

- 5030 1851-D AU55 NGC. Variety 3-E.** Not all Dahlonega gold dollars retain their original “skin,” but here is pleasing example with rich olive-green toning and traces of dirt in protected areas. The “look” is exactly that preferred by experienced collectors, and we suspect that this minimally abraded example will require a strong bid to secure. NGC ID# 25BM, PCGS# 7515

**1853 Gold Dollar, Bold MS65+**  
**Immensely Attractive Type One Example**

- 5031 1853 MS65+ PCGS Secure.** This early Type One gold dollar is readily obtainable in grades through MS65, but finer examples are somewhat of a challenge, with only 44 such pieces certified by PCGS (10/14). As affirmed by the Plus designation, this piece is firmly near the upper end of the Gem grade level. Frosty lemon and mint-gold luster cartwheels uninterrupted around both sides, with tack-sharp definition on the central devices and peripheral stars. The type collector will find it difficult to secure a visually finer representative. NGC ID# 25BU, PCGS# 7521

- 5032 1854-S AU55 PCGS.** An attractive Choice AU example of this first-year branch mint type issue, with well-detailed design elements that show just a trace of actual wear, and lustrous lightly marked surfaces. NGC ID# 25C2, PCGS# 7527

- 5033 1854 Type Two MS62 PCGS.** From the first year of the short-lived Type Two design, the 1854 gold dollar is doubly important to type collectors. This attractive MS62 piece displays well-detailed design elements, with lustrous surfaces and interesting clash marks on both sides. NGC ID# 25C3, PCGS# 7531

- 5034 1857 MS64 NGC.** A well-preserved Choice example of this early Type Three issue. Satiny yellow-gold luster complements well-struck devices, while light clash marks are noted in the fields on each side. Census: 34 in 64 (1 in 64+), 18 finer (9/14). NGC ID# 25CD, PCGS# 7544

**1857 Gold Dollar, MS65**  
**Rich Peach Patina**

- 5035 1857 MS65 PCGS.** The 1857 gold dollar was a higher-mintage issue with 774,789 pieces struck, but because of the earliness of the date, it is scarce in Gem condition. Only 13 other MS65 coins have been certified by PCGS with 14 finer (10/14). This piece displays even reddish-gold mint luster, and light die clashing appears on each side. This piece is sharply defined in all areas and housed in a green-label holder.

*Ex: Long Beach Signature (Heritage, 9/2011), lot 4178. NGC ID# 25CD, PCGS# 7544*

- 5036 1862 MS64 PCGS. CAC.** The 1862 gold dollar had a mintage in excess of 1.3 million coins, and is proportionately available in high grades for the budget-minded type collector. This Choice example shows softly frosted yellow-gold luster and smooth, carefully preserved surfaces. The strike is bold throughout. NGC ID# 25CW, PCGS# 7560

- 5037 1871 MS62 Prooflike NGC.** An attractive prooflike representative, from a mintage of 3,930 pieces, this coin offers sharply detailed design elements and lightly marked reflective fields with outstanding eye appeal for the grade. Census: 2 in 62 Prooflike, 7 finer (10/14). PCGS# 77571

- 5038 1873 Open 3 MS65 PCGS.** A delightful Gem example of the popular Open 3 variety, with well-detailed design elements and especially vibrant mint luster. The well-preserved yellow-gold surfaces show no mentionable distractions and eye appeal is extraordinary. Population: 47 in 65 (2 in 65+), 15 finer (10/14). NGC ID# 25DB, PCGS# 7573

**1879 Gold Dollar, MS66**  
**Deeply Patinated and Boldly Struck**

- 5039 1879 MS66 NGC.** This Premium Gem 1879 gold dollar is certified in one of the popular early NGC “no line fatty” holders, showing deep reddish-orange patina throughout, with a touch of cherry-red showing in Liberty’s headdress. The boldly struck surfaces display only the most picayune signs of contact. This later-series issue was only struck to the extent of 3,000 circulation strikes. NGC ID# 25DH, PCGS# 7580

- 5040 1880 MS65 PCGS. CAC.** From a low mintage of 1,636 pieces, this delightful Gem displays prooflike yellow-gold surfaces with few signs of contact and sharply detailed design elements throughout. Eye appeal is terrific. NGC ID# 25DJ, PCGS# 7581

- 5041 1881 MS66 PCGS. CAC.** The 1881 gold dollar claims a mintage of 7,620 pieces, but the issue was hoarded by collectors and coin dealers at the time of issue. As a result, the 1881 is a relatively available issue in high grade today. This impressive Premium Gem displays sharply detailed design elements and well-preserved yellow-gold surfaces that show prooflike reflectivity in most areas. NGC ID# 25DK, PCGS# 7582
- 5042 1883 MS65 NGC.** From a business-strike mintage of 10,800 pieces, this delightful Gem is sharply detailed throughout and the pristine yellow-gold surfaces radiate vibrant mint luster on both sides. The eye appeal is terrific. NGC ID# 25DM, PCGS# 7584
- 5043 1886 MS65 PCGS.** A spectacular Gem from a small mintage of 5,000 pieces, this coin displays sharply detailed design elements and well-preserved prooflike fields, with outstanding eye appeal. Population: 44 in 65, 21 finer (10/14). NGC ID# 25DR, PCGS# 7587
- 5044 1888 MS65 PCGS.** The 1888 gold dollar is extremely popular with type collectors, because of its availability in high grade. This delightful Gem exhibits sharply detailed design elements and pristine yellow-gold surfaces with vibrant mint luster and outstanding eye appeal. NGC ID# 25DT, PCGS# 7589
- 5045 1889 MS65 PCGS. CAC.** A spectacular Gem from the final year of the denomination, this coin displays well-preserved surfaces with prooflike reflectivity in the fields and sharply detailed design elements throughout. NGC ID# 25DU, PCGS# 7590
- 5046 1889 MS66 PCGS.** The 1889 gold dollar (28,950 coins struck) issue is obtainable well into the upper Gem grade levels, making it ideal for type purposes. This amazing MS66 example exhibits swirling luster with russet accents over yellow-gold surfaces. Each side is carefully preserved and sharply detailed. NGC ID# 25DU, PCGS# 7590

**1889 Gold Dollar, Sharp MS66+  
Beautifully Preserved Final-Year Example**

- 5047 1889 MS66+ PCGS. CAC.** The 1889 gold dollar was saved in substantial numbers at the time of issue, largely due to its status as the final issue in the series, and is readily available for type purposes. This high-end Premium Gem example displays frosty honey-gold luster, with deeper orange-gold accents seen periodically around the obverse border. The strike is full and the preservation is seemingly flawless. An immensely eye-appealing representative. NGC ID# 25DU, PCGS# 7590

## CLASSIC QUARTER EAGLES

- 5048 1834 AU55 NGC. Breen-6140, Variety 2, R.3.** A Large Head obverse is paired with the wide AM reverse. The hardy reverse die was later used to strike the 1835 Variety 6 and the 1836 varieties 9 and 12. A well defined apricot-gold Classic type coin. Marks are relatively minor, and bright luster accompanies protected areas. NGC ID# 25FS, PCGS# 7692
- 5049 1835 AU55 NGC. Variety 6, R.2.** Luster outlines the stars and legends of this lightly circulated Classic quarter eagle. No abrasions are of individual consequence. The stars are well struck with full centril detail, while the centers are incompletely brought up, as usual for the variety.  
*Ex: Long Beach Signature (Heritage, 9/2010), lot 5186.* NGC ID# 25FT, PCGS# 7693

## LIBERTY QUARTER EAGLES

- 5050 1843-D Small D VF25 NGC. Variety 4-H (formerly 4-D).** An originally toned honey-gold Dahlonega representative with glimpses of dirt in protected areas, as esteemed by specialists. The centers are typically struck, but the stars are well defined. A trace of green residue is noted near the left (facing) wingtip, and the field beneath the hairbun shows a faded thin mark. NGC ID# 25GP, PCGS# 7730
- 5051 1843-D Small D VF35 PCGS. Variety 4-H,** low mintmark, as often seen for this Dahlonega issue of 36,209 pieces, making it the highest-mintage quarter eagle from that mint. This piece displays considerable wear, as expected, but the bold strike remains on sandy-gold surfaces that show few singular marks. NGC ID# 25GP, PCGS# 7730
- 5052 1846 AU58 NGC.** Nearly full luster remains on the lemon-yellow surfaces of this lightly marked quarter eagle. The date shows evidence of repunching on each digit. Census: 44 in 58, 25 finer (10/14). NGC ID# 25GZ, PCGS# 7740
- 5053 1856-S AU58 NGC.** The 1856-S quarter eagle is much scarcer than its mintage of over 72,000 coins suggests, and is particularly elusive in Mint State. The present wheat-gold example exhibits flashes of luster and is without any reportable abrasions. Census: 43 in 58, 27 finer (9/14). NGC ID# 25JB, PCGS# 7781
- 5054 1857-D — Mount Removed — NGC Details. AU. Variety 21-N.** From a low mintage of only 2,364 pieces, this still-pleasing 1857-D quarter eagle exhibits above-average design definition for a Dahlonega issue, with only light wear over the high points and uniformly bright, green-gold color. NGC notes the coin has been removed from a jewelry mount, though the evidence is not immediately obvious. A thin, faint scratch is noted in the upper-right reverse field. NGC ID# 25JD, PCGS# 7783

**1857-O Quarter Eagle, MS61  
Final-Year New Orleans Issue**

- 5055 1857-O MS61 NGC. Variety 1.** Although the New Orleans Mint did not permanently cease coinage operations until 1909, 1857 was the final year that the facility coined the quarter eagle denomination. A meager mintage of 34,000 pieces was accomplished, with most of the coins experiencing extensive circulation. Mint State pieces are seldom seen in any grade. This representative displays bright yellow-gold color and only mild surface abrasions. The eagle's neck, talons, and left (facing) leg are softly struck, as is typical of this O-Mint issue, though the obverse is well-defined. Census: 35 in 61, 15 finer (9/14). NGC ID# 25JE, PCGS# 7784
- 5056 1857-S AU55 NGC.** A pleasing wheat-gold example, this Choice AU quarter eagle features a large mintmark (relative to the coin's size) that overlaps the arrow feather. A trace of wear and trivial surface marks are expected for the grade. NGC ID# 25JE, PCGS# 7785
- 5057 1868-S AU58 NGC.** The 1868-S had a limited mintage of 34,000 coins, and survivors are usually in lower circulated grades. This near-Mint example has subdued yellow luster and scattered marks. Census: 77 in 58, 15 finer (10/14). NGC ID# 25KC, PCGS# 7808

**5058 1868-S AU58 NGC.** The average certified grade of 1868-S quarter eagles certified at NGC and PCGS is just AU50. This near-Mint example is therefore above average, with lustrous yellow surfaces and splashes of orange toning. Census: 77 in 58, 15 finer (10/14). NGC ID# 25KC, PCGS# 7808

**5059 1876-S AU55 NGC.** The pleasing orange and rose-gold surfaces of this attractive Choice AU specimen are lightly abraded and retain much original mint luster. The well-detailed design elements show just a trace of wear and eye appeal is quite strong for the grade. Census: 24 in 55, 67 finer (10/14). NGC ID# 25KV, PCGS# 7825

**5060 1878 MS64 PCGS.** A well-produced issue of 286,260 pieces, the 1878 quarter eagle is an obvious choice for type purposes. This is a typically well-struck example with remarkably clean surfaces and vibrant mint luster. No obvious surface distractions are seen to prevent an even finer grade assessment. NGC ID# 25KY, PCGS# 7828

**1878 Quarter Eagle, MS66  
Generous Luster and a Bold Strike**

**5061 1878 MS66 NGC.** The honey-gold surfaces show a nearly full strike on each side, save for star 1 on the obverse. Both sides shimmer with generous luster and are free of any mentionable distractions. The mintage of 286,260 pieces today translates into only seven submissions in this grade at NGC, with but two finer (10/14). NGC ID# 25KY, PCGS# 7828

**1887 Quarter Eagle, MS64  
Low-Mintage Issue**

**5062 1887 MS64 PCGS.** Struck in limited quantities (only 6,160 coins), the 1887 quarter eagle is scarcely seen in any condition and is rare finer than MS63, with Gem survivors virtually unobtainable. This near-Gem example displays lightly frosted yellow-gold luster with faint orange-gold overtones. The surfaces are well-preserved, with only a few insignificant disturbances seen upon close examination. A well-struck representative of this elusive issue. Population: 19 in 64, 1 finer (9/14). NGC ID# 25LB, PCGS# 7839

**5063 1891 Doubled Die Reverse, FS-801, MS63 NGC.** All business strike 1891 quarter eagles exhibit strong die doubling on AMERICA, since just one reverse die was used to coin the 10,960-piece mintage. A fully struck and lustrous apricot-gold representative. Marks are minor aside from two faint lines above star 1. PCGS# 145709

**1893 Quarter Eagle, MS66  
Seldom-Seen in Higher Grades**

**5064 1893 MS66 NGC.** Razor-sharp definition, reddish-gold coloration, and abundant luster are attributes of this amazing Premium Gem quarter eagle. A mintage of 30,000 coins makes this issue more accessible than the 1892 and 1894 dates, though it is far less available than later-date emissions and certainly rare in this lofty grade. Census: 28 in 66 (1 in 66+), 5 finer (10/14). NGC ID# 25LH, PCGS# 7845

**1898 Liberty Quarter Eagle, MS66  
Low-Mintage 19th Century Issue**

**5065 1898 MS66 PCGS. CAC.** From a small mintage of 24,000 pieces, this delightful Premium Gem exhibits razor-sharp definition on all design elements and the well-preserved yellow and rose-gold surfaces radiate vibrant mint luster. Eye appeal is terrific. Population: 36 in 66 (2 in 66+), 9 finer (10/14). NGC ID# 25LN, PCGS# 7850

**5066 1899 MS66 NGC.** A fully struck and richly lustrous example of this high-quality issue. The reddish-orange surfaces show simply no mentionable distractions; on the contrary, they demonstrate the many virtues, both of the issue and this representative of it. Census: 34 in 66, 7 finer (10/14). NGC ID# 25LP, PCGS# 7851

**1899 Liberty Quarter Eagle, MS66  
Vivid Color, Vibrant Luster**

**5067 1899 MS66 PCGS. CAC.** The mintage of quarter eagles in 1899 was only 27,200 pieces, slightly larger than the previous year, but substantially smaller than any other issue from 1899 to the end of the series. This spectacular Premium Gem displays vibrant mint luster and sharply detailed design elements, with well-preserved peach-gold surfaces. Population: 21 in 66 (1 in 66+), 7 finer (10/14). NGC ID# 25LP, PCGS# 7851

- 5068 1902 MS65 PCGS. CAC.** Bold sunset-gold hues grant this Gem 20th century quarter eagle great eye appeal. Well-defined overall and smooth, a worthwhile type coin from a mintage of 133,500 pieces. NGC ID# 25LT, PCGS# 7854
- 5069 1903 MS65 NGC. CAC.** The 1903 is a relatively available date with mintage of 201,060 coins, and it is often found in type collections. Radiant mint frost blankets light yellow-gold surfaces. The design elements are fully struck, and the eye appeal is pronounced. A small area of copper toning occurs below the A in AMERICA. NGC ID# 25LU, PCGS# 7855
- 5070 1903 MS66+ NGC. CAC.** Luminous, frosty shades of yellow and green-gold luster engulf each side of this boldly struck, high-end Premium Gem example. A single, tiny tick on Liberty's lower jaw appears to be the only discernable surface flaw, leaving this early 20th century type coin with a high degree of visual appeal. NGC ID# 25LU, PCGS# 7855
- 5071 1904 MS65+ NGC.** A minuscule obverse rim flaw appears at 8 o'clock on the otherwise pristine surfaces of this brilliant yellow-gold quarter eagle. Examination with a loupe reveals a few trivial copper toning spots. NGC ID# 25LV, PCGS# 7856
- 5072 1904 MS66 PCGS.** Splendid orange-gold toning dominates the fields and devices. The peripheries are apple-green. Fully struck and thoroughly lustrous with a virtually pristine obverse. Certified in a green label holder. NGC ID# 25LV, PCGS# 7856
- 5073 1904 MS66 NGC.** An impressive Premium Gem that survives from a modest mintage of 160,000 pieces, this example features highly lustrous light yellow surfaces and frosty mint brilliance. NGC ID# 25LV, PCGS# 7856
- 5074 1906 MS65 PCGS.** This attractive Gem representative displays well-preserved apricot-gold surfaces with vibrant mint luster on both sides. The design elements are sharply detailed throughout and eye appeal is outstanding. NGC ID# 25LX, PCGS# 7858

## PROOF LIBERTY QUARTER EAGLE

### 1896 Liberty Quarter Eagle, PR62 Subtle Contrast

- 5075 1896 PR62 ANACS.** Although the surfaces have a few faint hairlines and trivial contact marks that limit the grade, this exceptional proof Liberty quarter eagle has excellent eye appeal. The sharply defined devices exhibit slight contrast with the fully and deeply mirrored fields. NGC ID# 288K, PCGS# 7922

## INDIAN QUARTER EAGLES

- 5076 1908 MS64 PCGS.** A softly lustrous first-year type with surfaces displaying lemon-gold color. The obverse is sharply impressed throughout while the reverse shows a touch of softness on the eagle's wing feathers, normal for the issue. NGC ID# 288Y, PCGS# 7939
- 5077 1908 MS64+ PCGS.** This is the first year of the Indian Head quarter eagle series, many of which were saved by the public as novelty items. Consequently, the 1908 is a popular type coin. The lustrous surfaces of this high-end near-Gem display attractive yellow-gold coloration and well-struck design elements, though the eagle's shoulder is somewhat weak. A few light marks on the raised exposed fields preclude Gem status. NGC ID# 288Y, PCGS# 7939

### 1908 Indian Two and a Half, MS65 First-Year Type Coin

- 5078 1908 MS65 NGC.** Orange and green-gold surfaces feature vibrant luster. Aside from typical weakness on the eagle's wing feathers, the devices show a sharp impression. Marks are minimal on this pleasing first-year Gem, given its rimless nature. NGC has only graded 64 numerically finer examples (10/14). NGC ID# 288Y, PCGS# 7939
- 5079 1909 MS64 PCGS.** Even reddish-gold color appears on both sides of this near-Gem piece. The design motifs exhibit strong detail, and a pleasing degree of luster is present. The few scattered marks are minuscule and undistracting. NGC ID# 288Z, PCGS# 7940
- 5080 1909 MS64 PCGS.** The obverse of this early Philadelphia type coin appears at least a grade point finer, though enough minor luster grazes are present in the reverse fields to preclude such an assignment from PCGS. The strike is bold throughout, and soft honey-gold luster gives this piece substantial visual appeal. A very high-end coin for the grade. NGC ID# 288Z, PCGS# 7940
- 5081 1910 MS64 NGC.** The strike appears slightly incomplete over the lower portion of the Indian's headdress, with the remaining elements well-detailed. Orange-gold paints surfaces that show only a few wispy marks, preventing a Gem designation. NGC ID# 2892, PCGS# 7941
- 5082 1910 MS64 NGC.** The distinctive rims on each side are typical of genuine 1910 quarter eagles. This frosty Choice Mint State piece has an above-average strike with brilliant yellow-gold surfaces and frosty luster. NGC ID# 2892, PCGS# 7941
- 5083 1910 MS64 NGC.** The devices exhibit excellent striking definition, with satiny yellow-gold luster in the fields. A few minor surface grazes limit the numeric grade, but leave this piece with ample appeal. Marginally available in Choice condition, the 1910 quarter eagle is scarcely seen any finer. NGC ID# 2892, PCGS# 7941
- 5084 1910 MS64 NGC.** Bold striking definition and largely clean surfaces are hallmark attributes of this Choice representative. A sharp strike and original honey-gold luster further contribute to the overall appeal. NGC ID# 2892, PCGS# 7941

### 1910 Quarter Eagle, MS65

**5085 1910 MS65 NGC.** An impressive Gem, this orange-gold Indian quarter eagle has solid design features and frosty luster with excellent eye appeal. Finer examples of this conditionally elusive issue are seldom available, with only 14 higher grade coins submitted to NGC (10/14). NGC ID# 2892, PCGS# 7941

**5086 1911 MS64 NGC.** In contrast to its Denver counterpart, the 1911 quarter eagle is readily available in most grades, making it a strong contender for type representation. This Choice example shows frosty, honey-gold luster and well-defined motifs. A few minute ticks in the obverse fields limit the grade, but are not outwardly obvious. NGC ID# 2893, PCGS# 7942

**5087 1911-D PCGS Genuine.** The PCGS number ending in .92 suggests Cleaning as the reason, or perhaps one of the reasons, that PCGS deemed this coin not gradable. In our opinion, this coin has the details of an XF specimen that has been cleaned. The Denver mintmark has low relief but is completely visible. The lemon and straw-gold surfaces are moderately bright and glossy, but no abrasions are readily evident. NGC ID# 2894, PCGS# 7943

**5088 1911-D — Improperly Cleaned — NGC Details. AU.** The Denver mintmark is bold on this key date quarter eagle. The well-defined sun-gold centers are glossy from a thorough wipe. The borders are retoned in rose and russet shades.

### 1911-D Quarter Eagle Pleasing AU53 Representative

**5089 1911-D AU53 NGC.** The Strong D variety. The mintmark is indistinct, due only to light wear, but is easily discernable with a low-power glass. For the grade, this piece is rather attractive, showing a blend of orange and honey-gold color, and no singularly detracting abrasions. This key date remains highly popular in all grades, especially with original coloration. NGC ID# 2894, PCGS# 7943

**5090 1914 MS62 NGC.** Satiny honey-gold luster complements minimal abrasions on this Mint State example. Some striking weakness is noted on the Indian's temple and the arrowheads, but the coin is otherwise appealing for the grade. NGC ID# 2898, PCGS# 7946

**5091 1914 MS62 NGC.** The orange-gold surfaces of this pleasing MS62 example show red highlights and a scattering of minor contact marks. The design elements are sharply rendered, and vibrant mint luster is apparent on both sides. The 1914 claims the second-lowest mintage in the series after the 1911-D, with a production of 240,000 coins. NGC ID# 2898, PCGS# 7946

### 1914 Indian Quarter Eagle, MS63

**5092 1914 MS63 PCGS.** A distant second in terms of mintage (240,000 pieces versus just 55,680 pieces), the 1914 quarter eagle is only marginally more available than the key-date 1911-D in the finer Mint State grades. This bronze-gold example is remarkably clean for the grade, with sharp design elements and satiny luster. A pleasing representative of this popular semikey issue. NGC ID# 2898, PCGS# 7946

### 1914 Quarter Eagle, MS63 Better Philadelphia Issue

**5093 1914 MS63 NGC.** This issue boasts the second-lowest mintage of the series (240,000 pieces), aiding in its ranks as one of the more challenging dates overall in high grades. This Select example displays a sharp strike, with satiny rose-gold luster and only minimal abrasions for the grade. The surfaces display an attractive, shimmering effect when tilted beneath a light. NGC ID# 2898, PCGS# 7946

### 1914 Quarter Eagle, MS63 Series Condition Rarity

**5094 1914 MS63 PCGS.** Depending on grade the 1914 quarter eagle is either second or third in the lineup of conditional rarities in the Indian Head series behind the 1914-D and the absolute key in all grades, the 1911-D. This Select example of the 1914 displays excellent eye appeal on wheat-gold surfaces with a sharp strike. A few minor ticks and scrapes, including a couple on the Indian's profile, are grade-consistent, and a small patch of reddish alloy appears below the B in LIBERTY. NGC ID# 2898, PCGS# 7946

---

**1914-D Quarter Eagle, MS64  
Well-Struck and Well-Preserved**

- 5095 1914-D MS64 PCGS.** Khaki-gold and pink hues blend across both sides of this satiny near-Gem. The surfaces are boldly struck with good luster and excellent preservation. The Indian's cheek is noticeably clean. A tiny fragment of lint inside the holder between stars 4 and 5 should not be mistaken for a scratch. This is the second-rarest Indian Head quarter eagle issue in Gem or finer grades. NGC ID# 2899, PCGS# 7947

---

**1914-D Quarter Eagle, MS64  
Rich Original Coloration**

- 5096 1914-D MS64 NGC.** At the Gem grade level, the 1914-D quarter eagle ranks as one of the rarest dates in the series, about on par with the 1914 and a close second to the key-date 1911-D. As a result, Choice examples of this issue experience somewhat stronger collector demand than do those of more readily available dates. This piece displays deep orange-gold patina, with sharp motifs and grade-consistent abrasions. Only 43 coins are numerically finer at NGC (10/14). NGC ID# 2899, PCGS# 7947

---

**1914-D Quarter Eagle, MS64  
Shimmering Original Luster**

- 5097 1914-D MS64 NGC.** The 1914-D is one of the most elusive Indian quarter eagle issues in Gem condition, making attractive Choice examples, such as the piece here offered, widely sought by casual date collectors. The surfaces are rich in honey-gold brilliance, with only a few light luster grazes in the reverse fields limiting the grade. The strike is crisp throughout. NGC has certified only 43 numerically finer representatives (9/14). NGC ID# 2899, PCGS# 7947

---

**1914-D Quarter Eagle, MS64+  
Unusually Sharp for the Issue**

- 5098 1914-D MS64+ NGC.** The 1914-D ranks as one of the rarest issues in the series in Gem condition, putting increased demand on high-end Choice examples. The typical piece also suffers from varying degrees of striking softness on high points of the devices, and boldly struck representatives often trade for a premium among knowledgeable specialists. This Plus-graded Choice example displays remarkable definition on the eagle's feathers and the Indian's headdress, and the surfaces are free of significant contact marks. Attractive, satiny luster and warm peach-gold color complete the visual appeal. NGC has certified just 43 numerically finer representatives (9/14). NGC ID# 2899, PCGS# 7947

- 
- 5099 1915 MS64 NGC.** Hallmarks of this appealing near-Gem two and a half include sun-gold coloration, radiant mint luster, and sharply rendered design elements. A tiny copper spot occurs on the upper portion of the headdress and another appears on the eagle's wing. NGC ID# 289A, PCGS# 7948

- 5100 1915 MS64 PCGS.** This Choice Mint State Indian quarter eagle concludes the early run of dates before a 10-year intermission until 1925. This example has a few trivial marks that prevent a higher grade. Both sides are sharply detailed with satiny yellow luster. NGC ID# 289A, PCGS# 7948

---

**1915 Quarter Eagle, MS65  
Appealing Luster**

- 5101 1915 MS65 NGC.** This midseries Gem 1915 quarter eagle displays appealingly lustrous wheat-gold surfaces with minimal distractions on either side. The Indian's profile is free of mentionable contact, although a few stray marks appear in the obverse field nearby. The reverse is well-preserved and both sides show a sharp strike. NGC shows eight submissions numerically finer (10/14). NGC ID# 289A, PCGS# 7948

**1915 Quarter Eagle, MS65**  
**Rarely Found Finer**

**5102 1915 MS65 PCGS.** The rich reddish-gold surfaces of this Gem exhibit splashes of deep orange on the obverse. Adding to the eye appeal, the strike is sharp and the coin is minimally abraded. Strong mint luster is also present. Only four examples have surpassed the MS65 level at PCGS (10/14). NGC ID# 289A, PCGS# 7948

**5103 1926 MS65 PCGS.** A lustrous Gem, this coin features attractive butter-gold surfaces and sharply struck devices. A handful of marks are lightly scattered over each side, and a minuscule struck-in grease mark (as made) occurs on the Indian's neck. PCGS has seen just 42 numerically finer examples (10/14).

*Ex: Palm Beach Signature (Heritage, 3/2006), lot 791. NGC ID# 289C, PCGS# 7950*

**5104 1926 MS65 PCGS.** Honey and apricot hues visit frosty green-gold luster on each side of this Gem type candidate. The design elements are sharply impressed, and the surfaces are devoid of any singularly noticeable imperfections. Only 42 pieces are numerically finer at PCGS (10/14). NGC ID# 289C, PCGS# 7950

**1929 Quarter Eagle, MS65**  
**Excellent Preservation**

**5105 1929 MS65 NGC.** The 1929 quarter eagle is fairly abundant in Gem grade, given its production of more than a half-million pieces during the year the Great Depression began. This piece shows subtle luster on golden-tan surfaces with no mentionable marks in the focal areas. A small dark spot appears on the bottom of the 2 in the date. Both NGC and PCGS each report only four submissions numerically finer (10/14). NGC ID# 289F, PCGS# 7953

**1929 Indian Two and a Half, MS65**  
**Final Quarter Eagle Issue**

**5106 1929 MS65 PCGS.** An attractive Gem from the last year of the denomination, this coin will make a welcome addition to a fine type collection or date set. The well-preserved surfaces display vivid orange-gold luster, with only minor signs of contact. The design elements are sharply detailed and eye appeal is terrific. PCGS has graded only four numerically finer examples (10/14). NGC ID# 289F, PCGS# 7953

**THREE DOLLAR GOLD PIECES**

**5107 1854 AU50 PCGS.** A pleasing orange-gold example from the first year of the denomination, this lightly abraded AU specimen shows a few touches of wear on the design elements, and the surfaces retain traces of original mint luster. NGC ID# 25M3, PCGS# 7969

**5108 1854 AU58 PCGS.** One of the more readily obtainable dates in the series, popular among type collectors. This near-Mint example displays rich apricot-gold luster and only slight friction over the high points of the design. The strike is sharp and the eye appeal is exceptional for the grade. NGC ID# 25M3, PCGS# 7969

**5109 1854 AU58 NGC.** Partial mint luster remains in the border recesses of this nearly Mint State type coin. Slight friction appears over the high points of the design, leaving the exposed regions with a soft bronze-gold hue. No singularly obvious abrasions are noted. NGC ID# 25M3, PCGS# 7969

**5110 1854 — Improperly Cleaned — NGC Details. Unc.** A lightly hairlined but well struck and coruscating caramel-gold example. Minimally abraded, and attractive given its mild cleaning. A single-year type with small letters in DOLLARS. NGC ID# 25M3, PCGS# 7969

**1854 Three Dollar Gold, MS62**  
**Rich Original Patina**

**5111 1854 MS62 NGC.** Original, shimmering luster imparts hues of honey and olive-gold to each side of this boldly struck example, while the surfaces are devoid of any singularly obvious abrasions. The 1854 three dollar gold piece had one of the highest mintages in the series (more than 138,000 coins), and is readily available for type representation. NGC ID# 25M3, PCGS# 7969

**5112 1854-O — Improperly Cleaned — NGC Details. AU. Variety 2.** A straw-gold New Orleans representative that displays luster within the legends and headdress. Minor mint-made strike-throughs are noted near the CA in AMERICA and the second L in DOLLARS. The surfaces are subdued but only lightly marked. NGC ID# 25M5, PCGS# 7971

**1855 Three Dollar, MS61  
Softly Lustrous Surfaces**

**5113 1855 MS61 NGC.** Although not quite as available as the 1854, the 1855 three dollar gold piece is still plentiful enough to be considered for type representation. This is a pleasing lower-grade Mint State example, with shimmering yellow-gold luster and sharp design definition. No individually significant abrasions are observed on either side. NGC ID# 25M6, PCGS# 7972

**5114 1855-S XF40 NGC.** As a rule, the San Francisco Mint seldom struck any three dollar gold pieces, the exceptions being in 1855, 1856, 1857, 1860, and 1870. Apparently, the pieces were not well-accepted even in the specie-starved West. Quarter eagles and especially half eagles were the small denomination gold coins of choice. The small mintage of 6,600 pieces (plus a couple of known proofs) yields few examples of the 1855-S for collectors today. This yellow-gold example is moderately worn and abraded, with nice remaining detail and a hint of mint luster. NGC ID# 25M7, PCGS# 7973

**1856-S Three Dollar, AU53  
Popular San Francisco Issue**

**5115 1856-S AU53 NGC. CAC.** Medium S. The most available San Francisco date from a quintet of S-Mint three dollar issues, all of which are scarce (1856-S and 1857-S), very scarce (1855-S and 1860-S), or unique (1870-S). This example displays light, olive-gold patina with a trace of mint luster that remains along the obverse margin. A few tiny marks are softened by light wear. An attractive coin, CAC-approved. NGC ID# 25M9, PCGS# 7975

**5116 1857 AU53 PCGS.** The yellow-gold surfaces of this AU53 piece display luster in the recessed areas, and the design elements exhibit nice definition despite high-point wear. A few scattered light marks do not detract. The 1857 becomes difficult to locate in mint condition above MS63. NGC ID# 25MA, PCGS# 7976

**5117 1857 — Improperly Cleaned — NGC Details. Unc.** A flashy sun-gold representative. The strike is sharp and no marks are evident to the unaided eye, although tiny mint-made strike-throughs are scattered. Lightly hairlined but nonetheless attractive. Coined from prominently clashed dies. NGC ID# 25MA, PCGS# 7976

**5118 1860 — Improperly Cleaned — NGC Details. Unc.** A mildly prooflike honey-gold example. No bagmarks are noticeable, but both sides are moderately hairlined. The high points of the curls and wreath are incompletely brought up. Just 7,036 pieces were issued for this better date. NGC ID# 25ME, PCGS# 7980

**5119 1866 AU50 NGC.** Orange-gold coloration covers the surfaces of this lightly circulated three dollar gold piece, from a mintage of just 4,000 coins. A small horizontal linear depression appears on Liberty's cheek. Sharply impressed with small grade-consistent abrasions. NGC ID# 25MM, PCGS# 7987

**5120 1866 AU55 NGC.** From a mintage of 4,000 pieces, the 1866 Three dollar gold piece is an elusive issue in high grade. This attractive Choice AU specimen offers lightly abraded orange-gold surfaces that retain traces of original mint luster. Census: 36 in 55 (1 in 55+★), 88 finer (10/14). NGC ID# 25MM, PCGS# 7987

**5121 1868 AU53 NGC.** Yellow-gold and deeper orange-gold in some of the protected areas compete for turf on this lightly circulated 1868 three, from a mintage of 4,850 circulation strikes. This piece sports a decent strike and plenty of remaining eye appeal, despite a scattering of minor marks. NGC ID# 25MP, PCGS# 7989

**5122 1868 AU58 PCGS.** Intermingled apricot-orange and yellow-gold toning cover both sides of this near-Mint example. Only a trace of wear is evident over the well-defined motifs, and subtle remnants of semiprooflike mirroring are seen in the protected regions of the fields. From a low mintage of only 4,850 pieces. NGC ID# 25MP, PCGS# 7989

**5123 1878 AU58 NGC.** A trace of wear appears on the high points of this frosty and lustrous near-Mint example. This issue claims the second-highest mintage of any three dollar gold issue, and serves ideally for type collecting purposes. NGC ID# 25MZ, PCGS# 8000

**5124 1878 AU58 NGC.** Substantial luster swirls across peach-gold and olive surfaces. Smooth aside from wispy contact on the reverse exergue. The reverse is lightly die doubled, mostly evident on the upper right portion of the wreath. NGC ID# 25MZ, PCGS# 8000

**5125 1878 — Improperly Cleaned — NGC Details. Unc.** The present honey-gold type coin appears to be a Gem upon initial inspection, but careful rotation reveals delicate obverse hairlines. The reverse is unimpaired. Well struck except on the knot of the wreath bow. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar, MS62  
CAC Endorsement**

**5126 1878 MS62 NGC. CAC.** The expectation of parity between gold and paper currency resulted in the production of 82,304 three dollar coins 1878. However, public demand for gold failed to materialize when the market reached equilibrium, and the majority of the mintage never circulated. Thus, Uncirculated examples such as this are fairly available and frequently serve as type representatives. Sharp definition, frosty luster, and yellow-gold color generate excellent eye appeal. NGC ID# 25MZ, PCGS# 8000

**1878 Three Dollar, MS62  
Excellent Type Acquisition**

- 5127** 1878 MS62 NGC. CAC. Areas of golden-orange complete with deeper reddish-orange for territory on this MS62 1878 three dollar, an example of the last great type-coin issue within this popular series. Scattered small contact marks appear amid good luster and strong eye appeal. An excellent acquisition for type-set purposes. NGC ID# 25MZ, PCGS# 8000

**EARLY HALF EAGLE**

**1806 Half Eagle, AU Details  
BD-6, Knobbed 6 Variety**

- 5128** 1806 Round Top 6, 7x6 Stars, BD-6, R.2 — Obverse Scratched — NGC Details. AU. Bass-Dannreuther Die State c/d. BD-6 is far and away the most plentiful variety of the issue (600 to 900 examples are believed extant), ideal for type or date purposes. This is the only use of the Knobbed 6 obverse, though this reverse die was previously used for the BD-5 variety. This coin displays medium green-gold color with tinges of luster remaining in the recesses. Some minor striking weakness is seen on the arrowheads and upper-left portion of the shield, not uncommon for BD-6. NGC draws attention to a faint hairline scratch in the left obverse field near the stars, though it is barely discernable to the unaided eye. NGC ID# 25P5, PCGS# 8089

**CLASSIC HALF EAGLES**

- 5129** 1834 Plain 4 AU55 NGC. Breen-6502, McCloskey 2-A, R.1. Second Head. The 4 in the date is triple-punched. An original olive and orange-gold Choice AU Classic type coin. Marks are minimal and luster is obvious within the legends and plumage. NGC ID# 25RR, PCGS# 8171
- 5130** 1834 Crosslet 4 — Mount Removed — PCGS Genuine Secure. AU Details. Breen-6503, McCloskey 5-D, R.4. Key to a collection of Philadelphia Mint Classic fives, the Crosslet 4 is far scarcer than its Plain 4 counterpart. This lightly circulated sun-gold example appears problem-free upon first glance. Close inspection shows a solder remnant on the edge near the 18 in the date. PCGS# 8172
- 5131** 1835 AU53 NGC. Breen-6504, McCloskey 1-A, R.2. First Head. A butter-gold Classic type coin that shows only light wear on the curls and the top of the wings. Marks are minor despite a few faint vertical lines on the right obverse field. Luster illuminates the borders and devices. NGC ID# 25RV, PCGS# 8173
- 5132** 1835 AU53 NGC. Breen-6504, McCloskey 1-A, R.2. This sun-gold Classic five displays semiprooflike luster in protected areas. Minor marks are scattered but none are offensive. The eagle is well struck. Liberty's curls display slight wear. A small copper spot is near star 2. NGC ID# 25RV, PCGS# 8173
- 5133** 1835 AU55 NGC. Breen-6504, McCloskey 1-B, R.3. A charming butter-gold Classic type coin. Well defined, lightly abraded, and partly lustrous. Clashed from the shield near Liberty's ear and the TY in LIBERTY. NGC ID# 25RV, PCGS# 8173
- 5134** 1836 AU53 NGC. Breen-6509, McCloskey 2-B, R.4. Second Head, Large Date. Nine die marriages of 1836 fives are known. The "B" reverse is unique to McCloskey 2-B, and is notable for a missing middle arrow shaft. The obverse has a bisecting crack between star 8 and the 6 in the date. A luminous sun-gold example with unobtrusive marks near star 13 and the N in UNITED. NGC ID# 25RY, PCGS# 8174
- 5135** 1836 AU53 NGC. Breen-6509, McCloskey 6-E, R.4. Second Head, Large Date. This scarce die variety is often seen with two bisecting obverse cracks, but the present early die state lacks cracks and shows repunching beneath the 3 in the date. Pockets of bright luster emerge from this well defined and unblemished lemon-gold example. NGC ID# 25RY, PCGS# 8174
- 5136** 1836 AU55 NGC. Breen-6508, McCloskey 5-D, R.3. Second Head, Small Date. An attractive honey-gold representative. The forehead curls show light wear but luster brightens the borders and motifs. The strike is sharp on the shield although several stars exhibit incompleteness. NGC ID# 25RY, PCGS# 8174
- 5137** 1837 XF45 PCGS Secure. Breen-6513, McCloskey 3-C, R.4. Small Date, Script 8. An unheralded but scarce variety. A supermajority of 1837 half eagles are the Large Date variety with a Block 8. The Small Date variety is distinctive but has yet to attain a *Guide Book* listing. This almond-gold representative is nicely defined and free from noticeable abrasions. Luster glimmers from design crevices. NGC ID# 25RZ, PCGS# 8175
- 5138** 1837 XF45 PCGS Secure. Breen-6512, McCloskey 2-B, R.2. Block 8. A lemon-gold Classic type coin that retains ample bright luster. The fields display distributed abrasions but none require singular mention. Wear is chiefly evident on the curls and wingtips. NGC ID# 25RZ, PCGS# 8175
- 5139** 1837 AU53 PCGS Secure. Breen-6512, McCloskey 2-B, R.2. Large Date, Block 8. A charming peach-gold Classic half eagle. The reverse field displays distributed minor abrasions but the obverse is only lightly marked. The strike is bold, and luster illuminates design recesses. NGC ID# 25RZ, PCGS# 8175

1837 Classic Five, MS61  
Large Date, McCloskey 2-B

**5140** 1837 MS61 NGC. Breen-6512, McCloskey 2-B, R.2. Large Date, Block 8. This well struck sun-gold Classic type coin has a lightly abraded obverse and a moderately marked reverse field. Luster dominates the borders, curls, and eagle. The usually encountered die variety among three known for the date. Census: 20 in 61, 28 finer (10/14). NGC ID# 25RZ, PCGS# 8175

**5141** 1838 XF45 PCGS. Breen-6514, McCloskey 1-A, R.2. Large Arrows, Small 5. A butter-gold Classic type coin with lightly marked but minutely granular surfaces. The wingtips and curls show minor wear, and the reverse periphery exhibits traces of struck-in grease. NGC ID# 25S4, PCGS# 8176

**5142** 1838 XF45 PCGS. Breen-6515, McCloskey 2-B, R.1. The curls and forehead display moderate wear, but luminous luster fills protected regions. Marks are minor except for a tiny dig above the eagle's neck and a thin line centered over the 5 in the denomination. NGC ID# 25S4, PCGS# 8176

**5143** 1838 XF45 PCGS Secure. Breen-6515, McCloskey 2-B, R.1. The Small Arrows, Large 5 variety. An attractive peach-gold representative. No marks are of any consequence, and moderate wear is confined to high points such as the eyebrow and shoulder curl. Luster illuminates the plumage, legends, and stars. NGC ID# 25S4, PCGS# 8176

**5144** 1838-C — Surface Damage — PCGS Genuine Secure. VF Details. Breen-6517, Variety 1. The 1838-C is the rarest and lowest mintage Classic issue. From the production of 17,179 pieces, two die pairs are known. The Normal 5 variety (represented here) is slightly less rare than its Repunched 5 alternative. This dusky apricot-gold example will please many Southern type collectors despite a few moderate marks on the upper left reverse quadrant. NGC ID# 25S5, PCGS# 8177

**5145** 1838-D — Filed Rims — PCGS Genuine Secure. VF. McCloskey 1-A, R.3. A glossy orange-gold example of the sole Dahlonega Mint Classic half eagle die marriage. Faint rim filing is evident near UNITED but no abrasions are consequential, and the types are nicely defined. NGC ID# 25S6, PCGS# 8178

LIBERTY HALF EAGLES

1839-D Half Eagle, XF Details  
Pleasing Coloration

**5146** 1839-D — Improperly Cleaned — NGC Details. XF. Variety 2-A. The 1839-D half eagle ranks as an important one-year type issue. The bust was modified the following year, with the most obvious change seen on Liberty's neck, which is noticeably more curved on the 1839 obverse. This lightly circulated representative retains pleasing detail for the XF grade level. NGC noted signs of old cleaning, though the coin has long since acquired rich bronze-gold patina. NGC ID# 25S9, PCGS# 8193

1843-D Half Eagle, Unc Sharpness  
Medium D Variety

**5147** 1843-D Medium D — Improperly Cleaned — NGC Details. Unc. Variety 10-G. This lemon-gold Dahlonega type coin has an excellent strike and no obtrusive marks. Ample luster is present but the fields are slightly subdued from light cleaning. Most 1843-D fives have a Medium D mintmark, although a very scarce Small D variety is also known. As a date, this issue is one of the more available Dahlonega half eagles for type purposes, as 450 to 550 examples are believed to survive in all grades. NGC ID# 25T4, PCGS# 8215

**5148** 1843-O Small Letters XF40 PCGS. Variety 2. The late die state with a horizontal crack between star 12 and the lowest neck curl. A New Orleans No Motto five with refreshingly unabraded tan-gold surfaces. Liberty's curls and the eagle's extremities are typically brought up. NGC ID# 25T5, PCGS# 8217

**5149** 1844-D XF40 NGC. Variety 11-G (formerly 11-H). High date, Small D. A Dahlonega collector coin with problem-free wheat-gold surfaces. Liberty's wings are well defined and the shield lines are separated. The curls show blending, partly due to the strike in addition to circulation wear. NGC ID# 25T9, PCGS# 8221

**5150** 1847 MS61 NGC. From a mintage of 915,981 pieces, the 1847 Liberty half eagle is one of the most available and popular No Motto fives. This attractive Mint State example exhibits well-detailed design elements and lightly marked antique-gold surfaces that retain traces of original mint luster. NGC ID# 25TL, PCGS# 8231

**1852 Half Eagle, MS62**  
**Luminous, Original Surfaces**

**5151 1852 MS62 PCGS. CAC.** Half of the stars on the obverse are flat on this Mint State piece, although the balance of the design motifs on both sides are boldly detailed. The surfaces display frosty yellow-gold mint luster and excellent eye appeal. The 1852 is one of the more readily obtainable half eagle issues from the 1850s, but is still itself scarce in Mint State, and rare above the MS62 grade level. Population: 39 in 62 (1 in 62+), 29 finer (9/14). NGC ID# 25UA, PCGS# 8250

**5152 1853-D Large D — Tooled — PCGS Genuine. XF Details. Variety 34-Y.** Liberty's cheek and neck, and the nearby field, are smoothed to reduce the visual impact of several pinscratches. The eagle's neck has three parallel pinscratches, and the nearby field has been tooled. NGC ID# 25UF, PCGS# 8255

**5153 1856 MS61 PCGS. CAC.** The mintage of nearly 198,000 pieces for the issue is deceiving, as the 1856 half eagle is rare in Mint State. This piece shows scattered marks on each side that determine the grade, but the rich reddish-gold patina and a bold strike create much eye appeal. Population: 10 in 61, 19 finer (9/14). CAC reports eight in this grade with three finer between NGC and PCGS combined. NGC ID# 25UV, PCGS# 8266

**5154 1856-C XF45 PCGS. Variety 1.** A green-gold Charlotte No Motto half eagle that shows ample glimpses of peach-tinged luster, especially within the legends. Well defined and only lightly abraded for the designated grade. NGC ID# 25UW, PCGS# 8267

**5155 1856-S AU55 NGC.** Large S. No Motto San Francisco half eagles are very scarce, particularly with bright luster throughout the legends and motifs. This orange-gold representative is minimally abraded aside from a slender line on the cheek. NGC ID# 25UZ, PCGS# 8270

**5156 1872-S XF45 PCGS.** The San Francisco Mint struck 36,400 half eagles in 1872, almost all of which entered into circulation on the West Coast, rendering the issue challenging in all grades. This Choice XF example exhibits reddish-gold surfaces with a number of wispy marks scattered throughout. NGC ID# 25WH, PCGS# 8327

**5157 1885-S MS65 NGC.** This impressive Gem displays vibrant mint luster and sharply detailed design elements, with well-preserved orange-gold surfaces that show attractive highlights of rose. NGC has graded 13 numerically finer examples (10/14). NGC ID# 25XT, PCGS# 8368

**1886-S Half Eagle, Infrequently Seen MS65**

**5158 1886-S MS65 PCGS.** The 1886-S half eagle can be located with little difficulty through the Select level of preservation. Near-Gems are scarce and MS65 pieces are infrequently seen. Lustrous surfaces display hints of rose and exhibit well-defined design elements. Neither side reveals mentionable marks. Population: 15 in 65, 0 finer (9/14). NGC ID# 25XV, PCGS# 8370

**5159 1891-CC MS61 PCGS. Variety 1-A.** Lemon-gold borders frame sun-gold centers. A lustrous and well struck Carson City type coin that possesses considerably greater eye appeal than its implied by its numeral grade. A slender vertical streak of struck-in grease is noted west of the shield. NGC ID# 25Y5, PCGS# 8378

**5160 1892 MS64 PCGS.** The 1892 Liberty half eagle is quite scarce at the MS64 grade level. This impressive Choice example displays lustrous orange-gold surfaces and well-detailed design elements, with only minor signs of contact. Population: 64 in 64 (2 in 64+), 52 finer (10/14). NGC ID# 25Y6, PCGS# 8379

**1892 Liberty Half Eagle, MS65**  
**Seldom Encountered in High Grade**

**5161 1892 MS65 PCGS.** High-grade examples of the 1892 half eagle are quite scarce. The peach-gold surfaces of this Gem radiate nice luster and exhibit strong preservation. Sharply defined design features complement these attributes. Population: 29 in 65 (1 in 65+), 23 finer (10/14).  
*Ex: Long Beach Signature (Heritage, 2/2007), lot 4627.* NGC ID# 25Y6, PCGS# 8379

**5162 1893-CC AU55 NGC. CAC. Variety 1-A.** An original apricot-gold Carson City five from the final year of coinage at the facility. The strike is crisp, and luster fills the borders. Smooth except for a few thin marks near stars 8 and 12. NGC ID# 25YB, PCGS# 8384

**5163 1901/0-S FS-301 MS63 PCGS.** The curve of a 0 is evident near the northeast portion of the final 1 in the date. Sharply struck and coruscating with lovely dappled caramel-gold and olive-green toning. A loupe reveals infrequent unimportant marks. PCGS# 145720

**5164 1902 MS65 PCGS.** A charming Gem example, with sharply detailed design elements and vibrant mint luster on both sides. The well-preserved orange and rose-gold surfaces complement the other attractive attributes. Population: 24 in 65 (1 in 65+), 8 finer (10/14). NGC ID# 25YY, PCGS# 8405

**1902-S Half Eagle, MS66  
Radiant, Frosty Mint Bloom**

**5165 1902-S MS66 NGC.** Somewhat overshadowed by the readily available 1901-S, the 1902-S half eagle also survives in large enough numbers to be a strong type set candidate, but it becomes increasingly scarce in grades higher than MS64. Gem-quality pieces are available, but MS66 coins are elusive. This representative displays booming mint-fresh luster and nearly flawless surfaces. The strike is crisp, and the eye appeal is seemingly unparalleled. Census: 34 in 66 (1 in 66+, 1 in 66 ★), 9 finer (9/14). NGC ID# 25YZ, PCGS# 8406

**5166 1903-S MS65 PCGS.** Sharply detailed in most areas, this impressive Gem shows a touch of softness on the star centers. The lustrous peach-gold surfaces show no mentionable distractions. PCGS has graded 19 numerically finer examples (10/14). NGC ID# 25Z3, PCGS# 8408

**5167 1904 MS65 PCGS.** The 1904 Liberty half eagle claims a mintage of 392,000 pieces and the issue is very scarce at the MS65 grade level. This delightful Gem exhibits well-detailed design elements and vibrant mint luster, with well-preserved orange-gold surfaces. Population: 67 in 65 (1 in 65+), 22 finer (10/14). NGC ID# 25Z4, PCGS# 8409

**5168 1904 MS65 PCGS.** This impressive Gem offers well-preserved peach-gold surfaces, with vibrant mint luster and sharply detailed design elements throughout. Population: 67 in 65 (1 in 65+), 22 finer (10/14). NGC ID# 25Z4, PCGS# 8409

**5169 1905-S MS63 PCGS.** An elusive late-series San Francisco issue, scarcely seen in any Mint State grade. This Select example displays sharp devices and frosty, honey-gold luster. A few scattered abrasions limit the grade, but are not overly distracting to the unaided eye. Population: 33 in 63, 33 finer (9/14). NGC ID# 25Z7, PCGS# 8412

**1906 Half Eagle, MS65  
Elusive in Finer Grades**

**5170 1906 MS65 PCGS.** The Liberty half eagle of 1906 from the Philadelphia Mint had the highest production total of any gold denomination for the year, with a mintage of 348,700 coins. Few have survived in Gem or finer grades. This beauty has brilliant lemon-yellow luster with exceptional design definition. Population: 73 in 65 (3 in 65+), 26 finer (9/14). NGC ID# 25Z9, PCGS# 8413

**5171 1906/6 FS-301 MS64 NGC.** Per *Cherrypickers*’, “a secondary 6 is evident within the lower loop of the primary 6.” The variety is undoubtedly very scarce as a near-Gem. Lustrous and nicely struck with sun-gold centers framed by broad green-gold borders. PCGS# 145722

**5172 1906-S MS64 PCGS.** This delightful Choice specimen exhibits especially vibrant mint luster and sharply detailed design elements, with lightly marked yellow-gold surfaces and outstanding eye appeal. Population: 37 in 64, 15 finer (10/14). NGC ID# 25ZB, PCGS# 8415

**5173 1908 MS65 NGC.** A final-year Liberty type that features frosty luster and yellow-gold color over generally clean surfaces, although a loupe reveals minor ticks prohibiting an even higher grade. Crisp detail adds to this coin’s charm. NGC ID# 25ZE, PCGS# 8418

**1908 Liberty Half Eagle, MS66  
The Only 1908-Dated Liberty Gold Piece**

**5174 1908 MS66 PCGS.** The final year of the Liberty half eagle series, and the only 1908-dated Liberty gold piece, this issue is popular with type collectors for its transitional status. This Premium Gem exhibits brilliant yellow luster with bold design motifs. Population: 35 in 66, 8 finer (10/14). NGC ID# 25ZE, PCGS# 8418

**INDIAN HALF EAGLES**

**5175 1908-D MS63 PCGS.** Original olive and orange-gold patina blankets satiny surfaces on this Select Mint State example. Slight striking deficiency is noted on the lower headdress feathers, though the eagle’s feathers are well-delineated. Scattered abrasions in the fields limit the grade. NGC ID# 28DF, PCGS# 8511

**5176 1908-D MS63 PCGS. CAC.** This is a boldly struck, luminous example of this early Denver issue. Frosty yellow-gold luster in the recesses contrasts with deeper apricot-gold color over the fields. Light, scattered abrasions contribute to the grade. NGC ID# 28DF, PCGS# 8511

**1909 Half Eagle, MS64+  
Immensely Appealing**

**5177 1909 MS64+ PCGS.** Examples of this issue are often found with a bold strike, but most Mint State pieces are moderately abraded, grading no finer than MS63. Choice examples are elusive, and Gems are scarce. This Plus-graded piece displays sharp definition throughout the headdress feathers and the eagle’s feathers, while the satiny honey-gold surfaces reveal only a few minute ticks. The quality-conscious collector should not pass this one up. NGC ID# 28DH, PCGS# 8513

**1909 Half Eagle, MS64+  
Sharp Strike and Great Luster**

**5178 1909 MS64+ NGC.** This high-end 1909 half eagle certainly appears to be only a couple of small abrasions away from a full Gem grade. Great luster emanates from mattelike orange-gold surfaces with accents of amber-gold. The strike is uniformly bold throughout, creating excellent eye appeal. Census: 11 in 64+, 58 finer (10/14). NGC ID# 28DH, PCGS# 8513

**5179 1909-D MS64 PCGS.** A mintage of 3.4 million examples ensures the 1909-D half eagle issue as the most available date in the Indian Head series. This Choice coin shows lustrous, butter-gold surfaces with sharply executed devices. A nice piece for an MS64 type set. NGC ID# 28DJ, PCGS# 8514

**5180 1909-D MS64 PCGS.** With a mintage in excess of 3.4 million pieces, the 1909-D half eagle is the most plentiful date in the series overall, ideal for type representation. This Choice example exhibits razor-sharp design definition and satiny luster that shows varying shades of honey and orange-gold. Light, scattered surface grazes limit the grade, but hardly affect the overall appeal. NGC ID# 28DJ, PCGS# 8514

**1910 Five Dollar, MS64  
Boldly Impressed**

**5181 1910 MS64 NGC.** The 1910 is a readily collectible date in the Indian Head half eagle series with a mintage of 604,000 coins. The design elements exhibit strong striking detail, and ample mint frost swirls over orange-gold surfaces. Minor marks are evenly scattered throughout. NGC reports only 36 submissions in numerically higher grades (10/14). NGC ID# 28DK, PCGS# 8517

**1910 Half Eagle, Impressive MS64**

**5182 1910 MS64 PCGS.** The 1910 Indian half eagle claims a mintage of 604,000 pieces, but high-quality specimens are quite elusive in today's market. This impressive Choice example offers well-detailed design elements and lustrous yellow and rose-gold surfaces. PCGS has graded only 24 numerically finer coins (10/14). NGC ID# 28DK, PCGS# 8517

**1910 Half Eagle, MS64  
Relatively Unmarked Example**

**5183 1910 MS64 PCGS.** The obverse is notably free of mentionable abrasions, save for a couple of tiny ticks near the rims at the Y in LIBERTY. The Indian's cheek is clean, as is the obverse field before the face. A few minor marks appear on the reverse but are undistracting. Beautiful honey-gold color and copious luster complete the broad eye appeal. PCGS reports only 24 in numerically finer grades; the sole finest is one MS65+ coin (10/14). NGC ID# 28DK, PCGS# 8517

**1911 Half Eagle, MS64**

**5184 1911 MS64 PCGS.** Although the 915,000 coin production was the fourth highest of the Indian half eagle series, this issue is rare in MS65 or finer grades, and the MS64 grade is an excellent combination of quality and price. The collector who chooses an above average example for the grade, such as this piece, will make a wise decision. This Choice Mint State example has faint greenish overtones on its brilliant yellow surfaces. NGC ID# 28DP, PCGS# 8520

**1912 Indian Half Eagle, MS64+  
Conditionally Rare Issue**

**5185 1912 MS64+ PCGS.** An impressive, sharply detailed near-Gem, this 1912 is an important condition rarity in the series. PCGS has only certified 52 finer examples of this issue (9/14). Both sides have frosty gold luster with hints of orange on the light yellow surfaces. A few trivial marks prevent the coveted MS65 grade. NGC ID# 28DS, PCGS# 8523

**1913 Half Eagle, MS64+  
Rich, Attractive Mint Luster**

- 5186 1913 MS64+ PCGS. CAC.** The 1913 is one of the more plentiful Indian half eagle issues overall, though its availability declines sharply above the MS64 grade level. This Plus-graded piece exhibits luminous yellow-gold luster and well-defined motifs. A few faint grazes in the left obverse field limit the grade, but hardly inhibit the eye appeal. PCGS has certified 53 numerically finer representatives (9/14). NGC ID# 28DT, PCGS# 8525

**1914-S Half Eagle, MS61  
Eye-Appealing for the Grade**

- 5187 1914-S MS61 PCGS.** Scattered contact marks account for the grade, including a few on the high points of the Indian's cheekbone and the obverse left field before the profile; other ticks and light hairlines appear on the reverse. There is, however, a surprising amount of eye appeal present on the orange-gold surfaces. The 1914-S half eagle is a noted conditional rarity in the Indian Head series. NGC ID# 28DW, PCGS# 8529

- 5188 1915-S AU58 PCGS. CAC.** With a moderately low mintage of 164,000 coins, most of which experienced varying degrees of circulation, the 1915-S half eagle is an elusive semikey issue in Mint State grades. This near-Mint, sharply struck example offers the budget-conscious collector a more affordable but still pleasing alternative. Deep green-gold color blankets both sides, while a few small, scattered flecks attest to the originality of the surfaces. NGC ID# 25ZR, PCGS# 8531

**1915-S Half Eagle, MS61  
Underrated in Mint State**

- 5189 1915-S MS61 PCGS.** Myriad marks on both sides of this half eagle limit the grade. The surfaces exhibit satiny yellow-gold luster on this conditionally scarce issue. Only about 40% of PCGS submissions of this issue have achieved Mint State grades, compared to 74% for the Indian half eagle series as a whole. NGC ID# 25ZR, PCGS# 8531

- 5190 1916-S MS61 NGC.** The devices are sharply impressed, and only the mintmark is somewhat soft. Straw-gold color and frosty luster grace the minimally abraded surfaces of this Uncirculated example. A small struck-in grease mark (as made) occurs on the L in LIBERTY. NGC ID# 28DY, PCGS# 8532

**LIBERTY EAGLES**

- 5191 1841 AU55 PCGS.** The well-detailed design elements of this attractive Choice AU specimen show just a trace of wear on the high points, and the moderately abraded orange-gold surfaces retain traces of original mint luster. Population: 12 in 55, 14 finer (10/14). NGC ID# 262H, PCGS# 8582

- 5192 1844-O XF45 PCGS. Variety 5.** The mintmark is repunched within the loop, and die cracks wander near stars 3 through 7. This wheat-gold No Motto New Orleans ten is well defined aside from expected wear on the curl above the ear. No marks are remotely consequential. NGC ID# 262T, PCGS# 8591

**1845-O Eagle, AU53  
'Small Over Large Date' Variety**

- 5193 1845-O AU53 NGC. Variety 3.** As a date, the 1845-O is moderately elusive overall, with 175 to 225 pieces believed known, and is genuinely scarce in AU grades. This piece represents Doug Winter's "Small Over Large Date" variety, most easily identified by the presence of an errant 4 visible up and to the left of the primary. NGC has attributed a few examples, designating them as 1845/1845 under their VarietyPlus service. This piece displays original olive-gold patina with tinges of luster remaining in the border recesses. The strike is sharp, and only slight wear is observed over the relief elements. NGC ID# 262V, PCGS# 8593

- 5194 1851-O AU50 PCGS. Variety 1.** A New Orleans No Motto type coin with moderately abraded and mildly bright butter-gold surfaces. The major devices are well struck although a few stars are lightly brought up. As always for the '51-O, a shield ring rests atop the second vertical stripe. NGC ID# 263B, PCGS# 8607

- 5195 1851-O AU55 NGC. Variety 2.** The low date variant of this collectible New Orleans issue. As seen on all examples, a shield ring rests atop the second vertical stripe. A strike-through (as made) is noted near the F in OF, but the caramel-gold surfaces are only lightly marked. NGC ID# 263B, PCGS# 8607

**1851-O Ten Dollar, AU58**  
Rarely Seen Finer

**5196 1851-O AU58 NGC. Variety 1.** Overall, the 1851-O is one of the most plentiful No Motto eagles from this mint, but its availability is primarily restricted to XF and lower grades; AU examples are seldom seen, and Mint State coins are rare. This nearly Uncirculated example displays rich orange-gold patina with remnants of luster in the protected areas. The obverse stars are not fully brought up, though the strike is otherwise sharp. NGC has certified just 17 numerically finer representatives (9/14). NGC ID# 263B, PCGS# 8607

**5197 1853 AU55 NGC.** A pleasing Choice AU specimen, with just a trace of friction on the design elements and vivid orange-gold surfaces that show a moderate number of minor abrasions on both sides. NGC ID# 263E, PCGS# 8610

**1853 Ten Dollar, MS61**  
Attractive Original Color

**5198 1853 MS61 PCGS.** With fresh bullion still arriving from California in 1853, the Philadelphia Mint struck more than 200,000 eagles during the course of the year. The issue is one of the more plentiful No Motto eagles overall, but is nonetheless scarce in Mint State. This representative displays shimmering honey-gold luster and pleasantly smooth surfaces. Some of the obverse stars are not fully defined, though the strike is otherwise well-executed. Population: 15 in 61, 9 finer (9/14). NGC ID# 263E, PCGS# 8610

**1854-O Large Date Ten Dollar, AU53**  
Elusive at This Grade Level

**5199 1854-O Large Date AU53 NGC. Variety 4.** The lower loops of what appears to be a misplaced 8 and 5 are visible in the lower edge of the bust truncation, a diagnostic of this Large Date variety. This AU example displays bright yellow-gold patina, with small remnants of luster seen in the recesses. A touch of rub over the high points of the design limits the grade, but leaves sharp detail overall. Finer pieces are seldom encountered. PCGS# 98614

**5200 1854-S AU50 PCGS. FS-301.** Per Cherrypickers', "the base of a 1 is evident below the 1 and the 8." The variety is undesignated on the holder. The wheat-gold surfaces display scattered moderate abrasions. Although the 1854-S half eagle and quarter eagle are great rarities, the first year San Francisco eagle and double eagle can be acquired at a reasonable cost. NGC ID# 263K, PCGS# 8615

**1856-S Ten Dollar, Near-Mint**  
Generous Luster, Original Color

**5201 1856-S AU58 NGC.** Medium S. Luster illuminates the borders of this originally toned and well struck orange-gold Borderline Uncirculated No Motto eagle. Small marks are scattered but only those below the right (facing) wing merit mention. All pre-1879 San Francisco tens are scarce, especially at the near-Mint level. Census: 38 in 58, 2 finer (10/14). NGC ID# 263S, PCGS# 8621

**1858-O Eagle, AU55**  
Elusive New Orleans Issue

**5202 1858-O AU55 NGC. Variety 1.** Gold coin production at the New Orleans Mint was marginal in 1858. Only the eagle and double eagle denominations were coined, with the former limited to a mintage of only 20,000 coins. These circulated extensively and experienced a high attrition rate. Extant pieces are scarce in AU grades, and Mint State examples are distinctly rare. This Choice AU coin displays original green-gold patina and only slight wear. Several of the obverse stars are not fully defined, though the strike is otherwise sharp. Census: 50 in 55 (1 in 55+★), 44 finer (9/14). NGC ID# 263X, PCGS# 8626

**5203 1858-S — Improperly Cleaned — NGC Details. XF.** The 1858-S ten dollar is an elusive issue in all grades, as its low mintage of just 11,800 coins would suggest. This piece is well-detailed for the XF grade level. Lightly cleaned in the past, the surfaces have long since acquired rich honey-gold patina. A still-pleasing example of this scarce No Motto San Francisco issue. NGC ID# 263Y, PCGS# 8627

**1858-S Ten Dollar, XF45  
Unknown in Mint Condition**

- 5204 1858-S XF45 PCGS.** An issue that is today unknown in Mint State, with three AU55s at PCGS and 11 AU58s at NGC at the head of the class. Orange-gold surfaces on this piece display considerable luster remaining, with a few light abrasions consistent with the grade. A nice survivor from the original mintage of 11,800 coins.  
*Ex: ANA Signature (Heritage, 7-8/2008), lot 3132. NGC ID# 263Y, PCGS# 8627*

- 5205 1863-S Fine 12 PCGS.** This rare-date eagle features rich orange toning and has the expected number of small field marks. Encapsulated in a green label holder. Even more challenging to locate than its mintage of 10,000 pieces suggests. The PCGS Population is 32 in all grades.  
*Ex: Kiawah Collection (Heritage, 7/2009), lot 1779. NGC ID# 264C, PCGS# 8638*

- 5206 1868-S XF45 NGC.** One of the rare eagles from the 1860s, no Uncirculated examples have been certified by either service. XF and AU coins are few and far between, too. This orange-gold representative is minimally abraded with strong motifs showing little wear. Minor weakness shows on the deeply hubbed stars. Census: 14 in 45, 47 finer (10/14). NGC ID# 264P, PCGS# 8654

- 5207 1877-S XF40 NGC.** A seemingly underappreciated With Motto issue, the 1877-S eagle was only produced to the extent of 17,000 pieces, virtually all of which experienced light to moderate circulation. AU examples are seldom seen, and the date is prohibitively rare in Mint State, with only three such pieces certified (9/14). This XF representative displays original olive-gold patina, with well-detailed motifs. Light, scattered abrasions accompany the grade, as expected at this level. NGC ID# 265H, PCGS# 8679

- 5208 1878 MS62 NGC.** This is one of the more accessible eagle issues from the Philadelphia Mint, though it is scarce in MS62. Shimmering luster emanates from the rose-gold surfaces. The devices are largely well-struck with areas of mild incompleteness. Small abrasions are lightly scattered over each side. Census: 33 in 62, 15 finer (10/14). NGC ID# 265J, PCGS# 8680

- 5209 1878-S AU53 NGC.** The 1878-S, with only 26,100 pieces struck, is seldom seen above the XF grade level, and is extremely rare in Mint State. This AU representative displays sharp motifs and original orange-gold color. Remnants of mint luster shine through the patina on each side, giving this piece a high degree of visual appeal. NGC ID# 265L, PCGS# 8682

**1879 Liberty Eagle, MS63  
Surprisingly Elusive Issue**

- 5210 1879 MS63 PCGS.** The 1879 Liberty eagle claims a large mintage of 384,740 pieces, but the issue was released into circulation and few examples were saved by contemporary collectors. As a result, the 1879 has a low survival rate and high-quality examples are quite elusive in today's market. This attractive Select specimen offers sharply detailed design elements and vivid orange-gold surfaces that show a scattering of minor contact marks. Population: 28 in 63, 12 finer (10/14). NGC ID# 265M, PCGS# 8683

**1881 Eagle, MS64  
Only One Finer at PCGS**

- 5211 1881 MS64 PCGS.** For an issue with a mintage exceeding 3.8 million pieces, the 1881 eagle is surprisingly scarce at the near-Gem level of the present example. Shimmering butter-gold surfaces create lovely eye appeal for this piece. Surface marks precluded a higher grade and a small tick appears at the rim near 4 o'clock on the reverse. Population: 18 in 64 (2 in 64+), 1 finer (9/14). NGC ID# 265W, PCGS# 8691

- 5212 1882 MS64 PCGS.** The 1882 Liberty eagle is very scarce in MS64 condition, and finer examples are prohibitively rare. This sharply detailed Choice example offers vivid orange-gold surfaces, with vibrant mint luster and a scattering of minor contact marks. Population: 41 in 64 (1 in 64+), 1 finer (10/14). NGC ID# 2662, PCGS# 8695

- 5213 1882-S MS63 NGC.** The 1882-S Liberty eagle is seldom encountered at the MS63 grade level. This attractive Select specimen is sharply detailed and brightly lustrous, with a scattering of minor contact marks that explain the grade. Census: 22 in 63, 3 finer (10/14). NGC ID# 2665, PCGS# 8698

- 5214 1883-S AU58 NGC.** This is a great low-mintage date that has not been substantially repatriated from foreign bank holdings. Mint State survivors are particularly scarce. This is a highly lustrous, moderately abraded example that displays little evidence of high-point friction. NGC ID# 2669, PCGS# 8702

- 5215 1883-S MS61 PCGS.** A highly lustrous representative of this San Francisco issue, with a low mintage of only 38,000 coins. Higher-rated pieces are scarce. Outstanding deep coloration and bold strike definition increase the desirability of this sparkling example. Population: 22 in 61, 24 finer (10/14). NGC ID# 2669, PCGS# 8702

- 5216 1885 MS63 PCGS.** This attractive Select specimen offers well-detailed design elements and lustrous orange-gold surfaces that show scattering of minor contact marks on both sides. Population: 45 in 63, 13 finer (10/14). NGC ID# 266D, PCGS# 8706

**1886 Liberty Eagle, MS63  
Very Rare in Finer Grades**

**5217 1886 MS63 PCGS.** A low population coin in Select Mint State, this original example is boldly struck and richly lustrous. Frosted fields and devices convey the natural allure of fresh-minted gold. Minor abrasions confirm the grade but do not distract from the appeal. Population: 34 in 63, 8 finer (10/14). NGC ID# 266F, PCGS# 8708

**5218 1887-S MS63 PCGS.** The 1887-S Liberty half eagle is scarce in MS63 condition, and finer examples are very rare. This impressive Select example is well-detailed and lustrous, with a scattering of minor contact marks. Population: 95 in 63, 3 finer (10/14). NGC ID# 266J, PCGS# 8711

**5219 1889 — Scratches — NGC Details. Unc.** The 1889 eagle had a mintage of only 4,440 coins, an unusually low figure for a Philadelphia issue, and is notably scarce in Mint condition. This example displays frosty honey-gold luster and bold design definition. Heavy abrasions, primarily on the obverse, warranted the Details grade from NGC. NGC ID# 266N, PCGS# 8715

**5220 1890 MS62 PCGS.** Warm rose-gold colors the surfaces on this somewhat better-date eagle. Abrasions are minimally scattered in the fields, and the design elements are sharply detailed. PCGS has certified only 26 numerically finer (10/14). NGC ID# 266R, PCGS# 8717

**1890-CC Liberty Eagle  
Appealing Near-Mint Example**

**5221 1890-CC AU58 NGC. CAC. Variety 1-A.** Slight die doubling on IN GOD WE TRUST is diagnostic of this variety, the only known die pair for the issue. As a date, the 1890-CC is fairly scarce in AU and finer grades, having a mintage of only 17,500 pieces. This AU58 coin exhibits substantial luster in the recesses, with sharp motifs and only slight wear over the high points. A few faint grease stains in the lower obverse dentils (as struck), attest to the originality of the surfaces. NGC ID# 266S, PCGS# 8718

**1891-CC Ten Dollar, Appealing MS62**

**5222 1891-CC MS62 PCGS. Variety 1-A.** The 1891-CC eagle is one of the more plentiful Carson City issues in the series, ideal for the branch mint enthusiast seeking a single representative from this mint. This example displays bold design definition and strong honey-gold luster. Light, scattered abrasions limit the grade, though the eye appeal remains quite high for the MS62 level. Finer examples are elusive, and are extremely rare above MS63. NGC ID# 266U, PCGS# 8720

**5223 1891-CC/CC FS-501 MS61 PCGS. Variety 3-C.** A radiant apricot-gold Carson City type coin. The strike is sharp except on the hair near the ear. Abrasions are minor for the MS61 level. Mint luster is particularly vibrant at the borders. PCGS# 145728

**5224 1892-O MS61 NGC. Variety 1.** A low mintage New Orleans issue nearly unobtainable above the MS62 level. The present well struck example has radiant canary-gold color and the expected number of small abrasions. NGC ID# 266X, PCGS# 8723

**5225 1892-S MS62 NGC.** This issue had an adequate mintage of 115,000 coins, but it is conditionally scarce any finer than MS62. This champagne-tinged example is highly lustrous and shows scattered small-to-moderate abrasions. NGC ID# 266Y, PCGS# 8724

**1892-S Eagle, MS63+  
Low-Mintage Condition Rarity**

**5226 1892-S MS63+ PCGS.** This impressive Liberty eagle has brilliant and satiny yellow-gold luster with excellent eye appeal. The lightly marked surfaces include prooflike fields, especially on the reverse. This low mintage issue is infrequently found in Select Mint State or finer grades. Population: 80 in 63 (3 in 63+), 4 finer (10/14). NGC ID# 266Y, PCGS# 8724

**5227 1893-S MS63 NGC.** Mint State examples of this San Francisco issue are elusive, and are typically only seen in MS62 and lower grades. MS63 coins are genuinely scarce, and finer pieces are rare. This frosty example displays vibrant yellow-gold luster and sharp design elements. Light, scattered abrasions limit the grade, but are not overly detracting. Census: 18 in 63, 3 finer (9/14). NGC ID# 2674, PCGS# 8728

**5228 1894 MS64 NGC.** The 1894 Liberty eagle is an important condition rarity from a mintage of nearly 2.5 million coins. This example has scattered marks on its frosty yellow-gold surfaces with hints of pinkish-rose overtones. NGC has only certified 15 finer examples (10/14). NGC ID# 2675, PCGS# 8729

**1894 Eagle, MS64+**  
**Undeniably Original Luster**

- 5229 1894 MS64+ PCGS. CAC.** The 1894 eagle is a fairly plentiful issue in grades through MS63, but its availability declines somewhat at the Choice level, and finer pieces are genuinely rare. This Plus-graded example delivers excellent visual appeal with semiprooflike mirroring in the fields and noticeable frost over the central devices. Stars 12 and 13 are not fully defined, though the strike is otherwise well-executed. PCGS has only certified one numerically finer coin (10/14). NGC ID# 2675, PCGS# 8729

**1895-S Eagle, MS62**  
**Low-Mintage Issue**

- 5230 1895-S MS62 PCGS.** The khaki-gold surfaces show butter-gold accents amid a scattering of mostly small abrasions that determine the grade. The strike is well-impressed overall. One small dig in the fields appears near star 12 but is not overt, and another mark appears just under Liberty's nose. A nicely preserved example of this low-mintage issue of 49,000 pieces. Population: 5 in 62, 3 finer (10/14). NGC ID# 267A, PCGS# 8734
- 5231 1896-S MS61 NGC.** An attractive MS61 example, with sharply detailed design elements and vibrant mint luster throughout. The pleasing yellow-gold surfaces show a scattering of minor contact marks that explains the grade. Census: 35 in 61, 15 finer (10/14). NGC ID# 267C, PCGS# 8736
- 5232 1898 MS64 PCGS.** Tinges of orange and honey accent frosty green-gold luster on each side of this boldly struck Choice type coin. A couple faint luster grazes in the left obverse field are the only marks of note, leaving this piece with pleasing eye appeal. Population: 67 in 64 (1 in 64+), 10 finer (10/14). NGC ID# 267G, PCGS# 8740
- 5233 1901 MS64 NGC.** A beautiful orange and sea-green Liberty gold type coin. The strike is intricate, and the lustrous surfaces are uncommonly undisturbed by contact. Certified in a prior generation holder. NGC ID# 267P, PCGS# 8747
- 5234 1901-S MS64 PCGS.** This issue should be of particular interest to the high-grade type specialist, by virtue of its high mintage and easy availability. The current near-Gem example presents premium quality for the grade, with minimal surface marks, shimmering mint luster, and well-struck design elements. NGC ID# 267S, PCGS# 8749

- 5235 1901-S MS64 NGC.** A well-preserved Choice example of this popular mintmark type issue, with vibrant mint luster and sharply detailed design elements throughout. Vivid peach-gold surfaces add to the outstanding eye appeal. NGC ID# 267S, PCGS# 8749
- 5236 1901-S MS64+ PCGS. CAC.** This near-Gem example has obvious claims to even finer grade assessment, based upon sharp, nearly full-strike definition and well-preserved surfaces that are awash with radiant mint luster. A high number of Mint State survivors make this San Francisco date ideal for type purposes. NGC ID# 267S, PCGS# 8749
- 5237 1906-D MS64 PCGS.** An attractive MS64 example of this first-year Denver Mint type coin, with sharply detailed design elements and vibrant mint luster throughout. The lightly marked peach-gold surfaces add to the considerable eye appeal. PCGS has graded 28 numerically finer examples (10/14). NGC ID# 2685, PCGS# 8760
- 5238 1906-D MS64 PCGS.** A pleasingly original near-Gem example, with frosted medium-gold coloration. Rolling cartwheel luster reveals lilac and orange accents over the minimally marked surfaces of this first-year Denver eagle. NGC ID# 2685, PCGS# 8760

**INDIAN EAGLES**

- 5239 1908 Motto MS63 PCGS.** Lavish, rich, deep reddish-gold color and bold eye appeal prevail on this Select Mint State 1908 Motto eagle, a top-notch example for the Select grade level. A loupe reveals a couple of small marks on Liberty's cheek and neck that determine the grade, but the surfaces overall are clean. NGC ID# 28GJ, PCGS# 8859
- 5240 1908-S AU58 NGC.** A small tick near star 3 on the obverse and a pair on the eagle's breast are among the few marks on this lightly circulated orange-gold 1908-S eagle. The somewhat mattelike surfaces show good eye appeal amid the light high-point rub, with most of the luster still in evidence. NGC ID# 28GL, PCGS# 8861

**1908-S Eagle, AU58**  
**Low-Mintage Key, First S-Mint Indian Issue**

- 5241 1908-S AU58 NGC.** The mellow reddish-orange surfaces show a few distributed marks on the boldly struck surfaces, which retain much of their original luster. The touch of rub visible on the high points is consistent with the near-Mint State grade. A low-mintage key and the first S-mint issue in the series, the 1908-S eagle saw 59,850 coins struck. NGC ID# 28GL, PCGS# 8861
- 5242 1909 MS62 NGC.** This Philadelphia Mint issue is similar in rarity to the coveted 1908-S. This sharply struck representative exhibits attractive wheat-gold coloration and radiant mint luster. The surfaces display surprisingly few marks for the grade. NGC ID# 28GM, PCGS# 8862

### 1909 Indian Eagle, Luminous MS63

**5243 1909 MS63 NGC.** The 1909 is an available date in circulated grades, but it becomes scarce in MS63, and is seldom seen finer. This example displays radiant lemon-gold luster and well-defined motifs. Light, scattered abrasions limit the grade, but the eye appeal remains pleasing. An undeniably original example of this elusive Philadelphia issue. NGC ID# 28GM, PCGS# 8862

**5244 1909-D MS61 PCGS. CAC.** Scattered small scrapes on the devices and equally innocuous luster grazes in the fields account for the MS61 grade on this 1909-D eagle. The yellow-gold surfaces boast ample luster and generous eye appeal, a commendable example of this early D-mint issue. NGC ID# 28GN, PCGS# 8863

**5245 1910 MS64 NGC.** This issue is typically found sharply struck, and this Choice representative is no different. Only the eagle's breast shows minor strike softness. Light yellow-gold color and shimmering mint frost grace each side. Trivial marks are scattered evenly throughout. NGC ID# 28GR, PCGS# 8865

### 1910 Ten Dollar, MS64 Upper-End for the Grade

**5246 1910 MS64 NGC. CAC.** The 1910 Indian eagle's availability declines significantly in succeeding grades above MS63, becoming genuinely scarce at the Gem level. This piece is certified MS64, but exhibits above-average eye appeal for the grade, with largely smooth surfaces and razor-sharp design definition. Satiny green-gold luster illuminates each side. NGC ID# 28GR, PCGS# 8865

**5247 1910-D MS63 PCGS.** A lovely orange and olive Select Indian type coin. The lustrous surfaces display comparatively few marks for the conservatively assessed grade. The strike is good, but incomplete near the back claw. Housed in a green label holder. NGC ID# 28GS, PCGS# 8866

**5248 1910-D MS64 NGC.** Hints of rose appear on the brilliant yellow surfaces of this frosty and fully lustrous Choice Mint State Indian ten. A few wispy hairlines preclude a finer grade. An excellent candidate for a 20th century gold type collector. NGC ID# 28GS, PCGS# 8866

**5249 1910-S AU58 NGC.** This near-Mint State key-date Indian eagle shows fewer and less-severe marks than might be expected for the grade. Rich luster and reddish-gold coloration make this example a keeper, an extremely attractive coin. NGC ID# 268D, PCGS# 8867

**5250 1910-S MS61 NGC.** The 1910-S suffered from mass melting during the 1930s, making it a conditionally elusive date in the series. This Uncirculated example is lustrous and attractive with lavender hues that complement light yellow-gold color overall. Slight strike softness occurs at the centers. NGC ID# 268D, PCGS# 8867

### 1910-S Ten Dollar, MS62 Better San Francisco Issue

**5251 1910-S MS62 PCGS.** The 1910-S Indian eagle fell victim to the gold melts of the mid-1930s, and is significantly scarcer in high grades than its mintage of 811,000 coins would suggest, especially in Mint State, where examples are scarcely seen finer than MS62. This piece is fairly attractive for its assigned grade, with light, evenly dispersed abrasions and satiny orange-gold luster. The high points of the eagle's feathers are slightly soft, though the strike is otherwise pleasing. NGC ID# 268D, PCGS# 8867

**5252 1911 MS63 PCGS. CAC.** A coruscating green-gold representative that has a nice strike and a smooth obverse field. A loupe reveals moderate marks on the lower cheek and the field beneath the second T in TRUST. NGC ID# 28GT, PCGS# 8868

**5253 1911 MS64 NGC.** A pleasing lemon-yellow example, this Choice Saint-Gaudens eagle exhibits traces of darker patina on the high points, remaining from long-term bank storage. Both sides are frosty and nicely detailed. NGC ID# 28GT, PCGS# 8868

**5254 1911 MS64 NGC.** An attractive Choice Mint State Indian ten, this example has hints of orange toning on its brilliant and frosty yellow-gold surfaces. NGC ID# 28GT, PCGS# 8868

**5255 1911 MS64 NGC.** An available issue at the MS64 level, the 1911 Indian eagle becomes somewhat scarce in higher grades. This attractive Choice example displays sharply detailed design elements and pleasing orange-gold surfaces that show few signs of contact. NGC ID# 28GT, PCGS# 8868

**5256 1911 MS64+ NGC.** The 1911 Indian eagle is available through the Choice grade level, but is challenging any finer. This Plus-graded example exhibits satiny yellow-gold luster and a bold strike. A few faint surface grazes preclude full Gem status, but are not detracting to the unaided eye. NGC ID# 28GT, PCGS# 8868

**5257 1911 MS64+ NGC.** Radiantly lustrous and sharply defined, this high-end example displays a few grade-limiting abrasions on Liberty's cheek and jaw. A pleasing overall appearance helps to ensure the Plus grade of this near-Gem representative. NGC ID# 28GT, PCGS# 8868

**5258 1911-D — Improperly Cleaned — NGC Details. AU.** Excluding the first-year patterns, the 1911-D has the lowest business mintage of the series, and commands a premium in all grades. A briefly circulated and satiny pumpkin-gold example. Careful rotation beneath a lens reveals faint parallel hairlines. NGC ID# 28GU, PCGS# 8869

**5259 1911-S AU58 PCGS.** A light touch of wear and a few thin scrapes on Liberty's cheek and chin and in the left obverse field determine the grade on this nonetheless-attractive, somewhat mattelike S-mint eagle. A few islands of deeper copper color hug the rims on each side. NGC ID# 28GV, PCGS# 8870

**5260 1912-S AU58 NGC.** This San Francisco date is well known as a strike rarity. Most examples display weak details over the centers, including the current near-Mint specimen. Pleasing champagne-gold toning adorns the lightly abraded surfaces that offer a considerable degree of original mint luster. NGC ID# 28GX, PCGS# 8872

**5261 1913-S AU55 PCGS.** A low mintage of just 66,000 pieces ensures the key-date status of this elusive San Francisco issue. This Choice AU example displays original honey-gold patina with tinges of golden luster in the recesses. NGC ID# 28GZ, PCGS# 8874

**5262 1932 MS64 PCGS. CAC.** This coin would make an ideal near-Gem type representative of the Indian ten dollar series. Radiantly lustrous with rich orange-gold toning and few surface flaws, this piece seems high-end for the assigned grade. NGC ID# 28HB, PCGS# 8884

**5263 1932 MS64+ PCGS. CAC.** The 1932, from a mintage approaching 4.5 million pieces, is the most common date in the Indian Head ten dollar series. Pleasing luster emanates from the yellow-gold surfaces of this high-end near-Gem, and the design features are well-impressed. Light scuffs prevent Gem classification. An excellent coin for a high-grade type collection. NGC ID# 28HB, PCGS# 8884

**1932 Eagle, MS65+  
Frosty Type Coin**

**5264 1932 MS65+ PCGS.** The 1932 Indian eagle is a readily available issue for type purposes, as large enough quantities were hoarded that a significant portion of the mintage survived the melting pots of the mid-1930s. This high-end Gem example delivers impeccable visual appeal with frosty luster and bold design elements. Subtle tinges of rose and apricot color accent primarily green-gold surfaces, with no obvious abrasions present. NGC ID# 28HB, PCGS# 8884

## LIBERTY DOUBLE EAGLES

**1854 Small Date Twenty, AU55  
Smooth Original Patina**

**5265 1854 Small Date AU55 NGC.** The Small Date 1854 double eagle is slightly more available than its Large Date counterpart, but both are elusive in the finer AU grades and rare in Mint State. This is a pleasing Choice AU example of the Small Date variety, with tinges of honey-gold luster highlighting medium green-gold patina overall. The surfaces are unusually smooth for the grade. Struck from mildly rotated dies. NGC ID# 268P, PCGS# 8911

**5266 1856-S XF45 NGC.** An attractive example of this popular issue that will serve admirably as a Type One representative. The coin's well-balanced appearance includes uniform coloration and bold definition. NGC ID# 2692, PCGS# 8919

**1856-S Twenty Dollar, AU55  
Ex: S.S. Central America  
Full Serif, Bold S**

**5267 1856-S Full Serif, Bold S, Variety 17C, AU55 PCGS. Ex: S.S. Central America. SSCA 6118.** Although lightly circulated, this wheat-gold shipwreck survivor has luster throughout the reverse and the obverse margin. Devoid of consequential contact. Housed in a gold label holder. 18 different 1856-S die varieties were documented by Robert Evans circa-2000 from the bonanza of double eagles recovered from the steamship, which sank on September 12, 1857. PCGS# 70012

**1857 Twenty Dollar, AU58**  
**Well-Struck and Nicely Preserved**

**5268 1857 AU58 NGC.** Pieces such as this gently circulated 1857 double eagle demonstrate why high-grade P-mint Type Ones are so popular in many quarters. The New Orleans Type One issues in near-Mint State are quite elusive and extremely expensive, and the more-available S-mint issues from the mid-1850s and onward are generally seen heavily bagmarked when in the same grades. This 1857 shows lustrous honey-gold surfaces with few major marks and an extremely bold strike, a lot of coin for the money. NGC reports only 40 submissions in finer grades, despite the mintage of 439,375 pieces (10/14). NGC ID# 2693, PCGS# 8920

**5269 1857-S XF40 NGC.** A sun-gold representative of the popular Type One issue. Small to moderate marks are distributed, though none require mention. This example of this well-known Type One issue is not from the S.S. *Central America*, since the mintmark location (unusually low and tilted left) does not match any die variety recovered from that shipwreck. NGC ID# 2696, PCGS# 8922

**1857-S Double Eagle, AU58**  
**Deep Original Patina**

**5270 1857-S AU58 NGC.** An undeniably original, sharply struck example of this widely popular Type One San Francisco issue. The surfaces are moderately abraded, as can be expected at this grade level, though the deep orange-gold patina more than balances the visual appeal. The 1857-S is listed among Jeff Garrett and Ron Guth's *100 Greatest U.S. Coins*. NGC ID# 2696, PCGS# 8922

**1859-S Liberty Twenty, XF45**  
**Rich, Original Coloration**

**5271 1859-S XF45 PCGS. CAC.** The San Francisco Mint produced more than 600,000 double eagles in 1859, but the issue is not nearly as plentiful as are the 1856-S and 1857-S, which survived in large numbers via the S.S. *Central America* shipwreck. This Choice XF example displays original bronze-gold patina with tinges of honey-gold luster in the protected regions. NGC ID# 269C, PCGS# 8928

**5272 1859-S — Improperly Cleaned — NGC Details. AU.** The 1859-S is a high-mintage issue (more than 636,000 pieces), but is nonetheless rare in Mint State. This example is nearly unworn, with well-defined motifs and luminous orange and honey-gold luster. NGC notes light cleaning, though the evidence is not immediately obvious. NGC ID# 269C, PCGS# 8928

**5273 1860 AU50 NGC.** Struck during the era of the Pony Express, this sun-gold double eagle has substantial luster and outstanding eye appeal for its conservatively assessed grade. Liberty's eyebrow and the wing tips display light wear. No marks are remotely of interest. Certified in a prior generation holder. NGC ID# 269D, PCGS# 8929

**1861-S Liberty Twenty, XF45**

**5274 1861-S XF45 PCGS.** This issue experienced extensive circulation in the Western regions, and is somewhat more challenging in high grades than its mintage of 768,000 coins would suggest. This is a well-detailed example, with subtly lustrous green-gold surfaces. Scattered abrasions accompany the grade, but none are individually detracting. NGC ID# 269K, PCGS# 8935

**5275 1862-S XF40 PCGS.** The curls and wingtips exhibit wear customary for an XF Type One twenty, but luster glints from the legends, rays, and shield. Small marks are distributed but none are individually consequential. Although gold coins disappeared from circulation in most of the country by 1862, the West Coast continued to use gold coins in commerce, and discounted unbacked Federal currency. NGC ID# 269N, PCGS# 8938

**5276 1863-S AU50 NGC.** Small S, about equal in scarcity with its Medium S counterpart. An original apricot-gold Civil War double eagle that lacks any mentionable marks. Pockets of luster emerge from protected regions. An interesting rim-to-rim die crack looms over MERICA. NGC ID# 269R, PCGS# 8940

**1863-S Twenty Dollar  
Ex: S.S. Republic**

**5277 1863-S — Authentic Shipwreck Specie — NGC Details.** Ex: S.S. Republic. Medium S. NGC has demurred on grading the present shipwreck treasure double eagle, but in our opinion, the coin has Uncirculated details with rim damage on the reverse above the ST in STATES. A lustrous sun-gold Civil War twenty. Lightly abraded on the obverse and well-struck for the type.

**5278 1864-S AU50 ANACS.** Several notable reeding marks appear on the profile of Liberty, and one long, linear scrape appears above her head. Other mostly small marks are scattered on each side of this high-mintage Type One S-mint issue. The surfaces are attractive auburn-gold with some brownish rim accents on the reverse. NGC ID# 269T, PCGS# 8942

**5279 1866 — Improperly Cleaned — NGC Details.** AU. A peach-gold example of the introductory Motto issue. Lustrous and moderately bagmarked with a good strike. Patches of hairlines are noted near UNUM and the obverse stars. NGC ID# 269X, PCGS# 8949

**1866-S Double Eagle, XF45  
With Motto Reverse**

**5280 1866-S Motto XF45 NGC.** CAC. Small Squat S. This Choice XF double eagle marks the debut of the With Motto design, or Type Two, Liberty double eagle. Both sides have pleasing light yellow surfaces with scattered grade-consistent marks and a trace of luster that clings to the protected areas. NGC ID# 269Y, PCGS# 8950

**5281 1868-S AU50 NGC.** The 1868-S Liberty twenty claims a substantial mintage of 837,500 pieces, and the issue is not difficult to locate at the AU50 level. This lightly circulated example displays well-detailed design elements and lightly abraded orange-gold surfaces with traces of original mint luster. NGC ID# 26A4, PCGS# 8954

**1871-S Double Eagle, Flashy AU58**

**5282 1871-S AU58 NGC.** The 1871-S is a moderately plentiful Type Two branch mint issue, but its availability is primarily restricted to the XF and lower AU grade range. The typical piece is heavily abraded, and finding an eye-appealing coin in any grade is challenging. This near-Mint example has original honey-gold color with substantial semiprooflike mirroring in the recesses. Scattered abrasions are present, but none are individually detracting. NGC ID# 26AC, PCGS# 8962

**1871-S Twenty Dollar, AU58  
Lightly Circulated S-Mint**

**5283 1871-S AU58 PCGS.** Small Narrow S. Scattered small- to medium-sized abrasions appear on each side of this near-Mint State 1871-S twenty. Most of the original luster is intact, and attractive wheat-gold color and a decent strike are in evidence. Most of the 928,000 piece struck for circulation did just that, circulate, as the certified population averages AU53. NGC ID# 26AC, PCGS# 8962

**1872 Liberty Double Eagle  
Luminous Surfaces, Unc Sharpness**

**5284 1872 — Improperly Cleaned — NGC Details.** Unc. Despite a mintage in excess of 250,000 pieces, the 1872 double eagle is scarce in Mint State condition, and most such pieces are heavily abraded, grading no finer than MS61. This example reveals few noticeable abrasions and displays strong, honey-gold luster. Some faint hairlines in the fields, primarily on the obverse, suggest light cleaning, though the eye appeal is not overly affected. NGC ID# 26AD, PCGS# 8963

**1872-S Double Eagle, AU58**  
Seldom Available Finer

- 5285 1872-S AU58 NGC.** The 1872-S double eagle is similar in rarity to the 1871-S, being moderately available in circulated condition, but scarce in Mint State. This is a well-detailed, nearly Uncirculated example with substantial honey-gold luster remaining in the recesses. Light, scattered abrasions accompany the grade, but none are worthy of individual mention. NGC ID# 26AF, PCGS# 8965

- 5286 1873 Open 3 AU58 PCGS. CAC.** The 1873 double eagles with an Open 3 in the date were struck later in the year, after the numeral punch was changed because the Closed 3 looked too much like an 8. This attractive near-Mint specimen exhibits well-detailed design elements, with just a trace of wear, and vibrant mint luster throughout. The orange-gold surfaces show a number of minor abrasions on both sides. NGC ID# 26AH, PCGS# 8967

**1873 Open 3 Twenty, MS62**  
Heavily Frosted Luster

- 5287 1873 Open 3 MS62 NGC.** Vibrant yellow-gold mint bloom gives this Open 3 example exceptional visual appeal for the grade. The devices are boldly struck and the grade-limiting abrasions are of surprisingly little distraction when turned in-hand. This issue is readily obtainable in MS62 and lower grades, but finer pieces are seldom available. This coin will impress for the grade. NGC ID# 26AH, PCGS# 8967

**1873 Open 3 Twenty Dollar, MS61**  
Doubled LIBERTY, FS-101

- 5288 1873 Open 3, Doubled Die Obverse, FS-101, MS61 PCGS.** LIBERTY is nicely die doubled north. The top of the coronet also exhibits doubling. Gold die varieties have been the focus of increased interest since the turn of the millennium. A lustrous pumpkin-gold representative of the conditionally scarce Type Two design. Typically abraded for the MS61 level. Population: 6 in 61, 8 finer (10/14). PCGS# 148749

- 5289 1873-S Closed 3 AU55 PCGS.** This Choice AU example delivers a high degree of eye appeal with flashy yellow-gold surfaces and substantial prooflike mirroring in the fields. Faint traces of high-point friction preclude a Mint State grade, and scattered abrasions accompany the grade, as expected at this level. Overall, this is an immensely appealing example of this Type Three San Francisco issue. NGC ID# 26AL, PCGS# 8969

**1873-S Open 3 Twenty Dollar, AU58**  
Seldom Seen in Mint State

- 5290 1873-S Open 3 AU58 NGC.** Small Squat S. Partial luster appears on the caramel-gold surfaces of this near-Mint State 1873-S Open 3 double eagle. The scattered marks on each side are moderate and inoffensive, and the strike is sharp throughout both sides. Despite the mintage exceeding 1 million pieces for the Open 3 and Close 3 varieties combined, the Smithsonian Institution lacks an example of either. The Open 3 variety is the scarcer, and Mint State examples thereof are scarce. NGC ID# 26AM, PCGS# 8979

- 5291 1874-CC — Improperly Cleaned — NGC Details. AU. Variety 1-A.** At least five different obverse dies struck '74-CC twenties. Variety 1-A exhibits a tiny die lump centered beneath Liberty's jaw. This wheat-gold Carson City example has a dab of struck-in grease near obverse star 1. The obverse displays faint hairlines and both sides display marks consistent with brief Old West circulation. NGC ID# 26AP, PCGS# 8971

- 5292 1874-S MS60 NGC.** Radiant honey-gold luster and well-defined motifs deliver profound visual appeal for the grade. Scattered abrasions are present, but these are light and evenly dispersed, posing little distraction for the viewer. NGC ID# 26AR, PCGS# 8972

**1875 Twenty Dollar, MS62**  
Rich Original Patina

- 5293 1875 MS62 NGC.** Honey and orange-gold hues blanket radiant mint luster on each side of this well-struck example. Light, scattered abrasions limit the grade, but none are singularly bothersome. As a date, this issue is only marginally available in MS62, and scarcely seen finer, with only 33 such coins certified by NGC (10/14). NGC ID# 26AS, PCGS# 8973

**1875-CC Double Eagle, XF45  
Some Remaining Mint Luster**

**5294 1875-CC XF45 NGC. Variety 4-B.** The 1875-CC is one of the more plentiful Carson City double eagle issues due to the return of numerous examples from overseas bank hoards, making it an excellent choice for the collector seeking a single representative from this mint. This Choice XF example shows remnants of mint luster in the recesses amid pale yellow-gold patina. Light wear and consequential abrasions accompany the grade. NGC ID# 26AT, PCGS# 8974

**5295 1876-CC — Obverse Graffiti — NGC Details. AU. Variety 5-B.** This sun-gold Carson City twenty has minimal wear and no obtrusive bagmarks, but two "X" test marks bookend the date. The Centennial-year mintage of 138,441 pieces included at least ten different die marriages. Presumably, regular small deliveries were interspersed with the production of other denominations, especially Seated coinage, and suitable dies were selected at random upon denomination changeover. NGC ID# 26AW, PCGS# 8977

**5296 1877 MS61 PCGS. CAC.** Virtually all gold denominations were produced in extremely limited numbers in Philadelphia in 1877, with the double eagle being the only moderate exception. This issue also marked a change in the reverse design, with the denomination spelled out completely. Radiant, frosty green-gold luster illuminates each side of this representative, while the devices are well-defined. Numerous abrasions contribute to the grade. NGC ID# 26AY, PCGS# 8982

**5297 1878-S MS61 PCGS.** Many of the 1.7 million 1878-S double eagles were exported and have returned to the States over the last few decades, mostly heavily bagmarked, making the issue rare in MS63 and finer. This MS61 offering exhibits sharply struck devices, including Liberty's hair strands, the star radials, and the eagle's plumage. The yellow-gold surfaces reveal the expected abrasions that occasionally impact the luster flow. Nevertheless, a really nice piece for an MS61. NGC ID# 26B5, PCGS# 8987

**5298 1878-S MS61 PCGS.** Rich orange and olive-green toning graces this original and coruscating double eagle. The obverse field is typically abraded, but the remainder of the coin displays comparatively minor marks. NGC ID# 26B5, PCGS# 8987

**1882-CC Twenty Dollar, AU58  
Richly Lustrous**

**5299 1882-CC AU58 NGC. Variety 1-B.** The second C in the CC mintmark is slightly higher than the first, and a die crack encircles all of the letter tops on the reverse periphery. Rich luster emanates from this orange-gold near-Mint example, showing scattered ticks and marks among good eye appeal. A couple of copper-colored alloy spots appear on the reverse. The 1882-CC twenties saw a production of only 39,140 pieces. NGC ID# 26BF, PCGS# 8997

**5300 1882-S MS61 PCGS.** This issue saw a substantial mintage well in excess of a million coins, but survivors are relatively scarce in high Mint State grades. The design motifs are sharply defined on both sides of this wheat-gold example. The surfaces are intensely lustrous and moderately abraded, as expected for the grade. NGC ID# 26BG, PCGS# 8998

**5301 1884-S MS62 PCGS. CAC.** Vibrant cartwheel luster sweeps this crisply struck San Francisco double eagle. Scattered small to moderate abrasions correspond to the designated grade. Scarce any finer. NGC ID# 26BL, PCGS# 9002

**5302 1885-S MS61 PCGS.** The 1885-S double eagle can be located through MS62 without too much difficulty. The Select population (about 500 certified coins) is probably greatly inflated by resubmissions, and finer specimens are very rare. Nice luster radiates from the yellow-gold surfaces of this MS61 example despite occasional interruptions by abrasions. The devices are sharply defined. NGC ID# 26BP, PCGS# 9005

**5303 1885-S MS62 PCGS. CAC.** This attractive MS62 Liberty double eagle offers well-detailed design elements and lustrous reddish-gold surfaces that show a moderate number of minor contact marks for the grade. NGC ID# 26BP, PCGS# 9005

**1890-CC Twenty, AU53  
Deep, Original Coloration**

**5304 1890-CC AU53 NGC. Variety 1-A.** In the 1890s, die lapping was an efficient way of removing clash marks, rust, and light cracks on worn dies, prolonging their life. Extensive lapping sometimes weakened some of the higher design elements in the die face (the lower portions of the devices on the coins), and this is seen on the present double eagle in the form of a few partially effaced tailfeathers on the reverse. The coin is actually quite well-struck, with only slight wear. Remnants of mint luster illuminate original orange-gold patina on each side, giving this piece ample visual appeal. NGC ID# 26BY, PCGS# 9014

**1890-CC Double Eagle, Luminous AU53**

**5305 1890-CC AU53 NGC. Variety 1-A.** A late die state example, with several of the eagle's tailfeathers weakened by die lapping. This representative displays sharp, nearly complete detail, with subtle remnants of mint luster in the protected areas. Medium yellow-gold color blankets each side, and the surfaces exhibit only minor abrasions for the grade. NGC ID# 26BY, PCGS# 9014

**1890-CC Liberty Twenty, AU55  
Highly Lustrous and Appealing**

- 5306 1890-CC AU55 NGC. Variety 1-A.** The 1890-CC is one of the most readily available double eagles from the Carson City facility, but eye appeal is often lacking on coins in the XF and AU grade range. This piece is unusually attractive, with vibrant yellow-gold mint luster highlighting subtle orange-gold overtones in the recesses. The strike is sharp, with just a trace of friction over the high points of the design. Light, scattered surface ticks accompany the grade, but hardly inhibit the overall appeal. NGC ID# 26BY, PCGS# 9014

**1892-S Twenty, MS63  
Above Average Survivor**

- 5307 1892-S MS63 PCGS.** Although scattered marks appear on Liberty's profile and elsewhere, this Select Mint State double eagle offers excellent eye appeal, with frosty light yellow luster and sharp design motifs. A few minuscule copper toning spots attest to this coin's originality. This example is two points finer than the average certified grade. NGC ID# 26C7, PCGS# 9021

**1892-S Double Eagle, MS63  
Seldom Seen in Finer Grades**

- 5308 1892-S MS63 PCGS. CAC.** Double eagle production in San Francisco dipped below 1 million coins in 1892, but only slightly, with more than 930,000 pieces still produced. Examples can be easily found in MS62 and lower grades, and in MS63 with only slight difficulty, but finer examples are difficult. This Select piece displays frosty green-gold luster with subtle rose accents in the centers. The strike is crisp throughout. Light surface grazes on Liberty's cheek limit the grade. NGC ID# 26C7, PCGS# 9021

- 5309 1896 Repunched Date, FS-301, MS63 PCGS.** All four date digits are clearly repunched north. Booming luster sweeps the green-gold surfaces of this crisply struck and attractive double eagle. A difficult variety to acquire any finer. Population: 13 in 63, 1 finer (9/14). PCGS# 145739

- 5310 1896 Repunched Date, FS-301, MS63 NGC.** The date is repunched north, evident on all four digits. A crisply struck and lustrous canary-gold double eagle that exhibits the expected number of small marks on the fields and portrait. PCGS# 145739

**1897-S Twenty Dollar, MS64+  
Boldly Impressed**

- 5311 1897-S MS64+ PCGS.** Even though a couple of small grazes on Liberty's chin accompany one linear mark parallel to the nose, the surfaces on this lovely and well-struck yellow-gold piece are quite clean overall and seemingly close to a Gem grade. Trivial contact on the reverse is even more minor than on the obverse, and the boldly impressed strike brings up all details nicely. Population: 20 in 64+, 10 finer (10/14). NGC ID# 26CJ, PCGS# 9032

- 5312 1898 MS62+ PCGS.** Frosty yellow-gold luster illuminates sharp design elements on this Plus-graded representative. Scattered luster abrasions on the obverse limit the grade, but are not particularly distracting. Finer examples are scarcely seen. NGC ID# 26CK, PCGS# 9033

- 5313 1898-S MS63+ PCGS.** The surfaces shimmer with orange-gold luster and, save for one mark near star 13, show a few luster grazes rather than noticeable marks as the grade determinant. A nice, boldly struck example of this high-mintage issue of more than 2.5 million coins. NGC ID# 26CL, PCGS# 9034

- 5314 1898-S MS64 NGC.** From a mintage of just over 2.5 million coins, the 1898-S is readily collectible up to MS64, above which it becomes scarce. This Choice Mint State piece features attractive pinkish-gold coloration and frosty luster with lovely surfaces. Trivial grade-consistent marks are mostly limited to the obverse. NGC ID# 26CL, PCGS# 9034

**1899 Double Eagle, MS64  
Lustrous and Well Struck**

- 5315 1899 MS64 NGC.** A beautiful orange-gold and lime-green near-Gem. The strike is bold and the fields are exceptionally free from abrasions. A few specks of struck-in grease are relegated to the reverse near the arrowheads, and the reverse rim has a bagmark near 1:30. Housed in a former generation holder. Ex: Internet Auction #210023, (Heritage, 2/2010), lot 24364. NGC ID# 26CM, PCGS# 9035

- 5316 1904 MS64 NGC.** A splendid lemon-gold Liberty type coin whose dazzling luster and clean surfaces ensure impressive eye appeal. The strike is good except for minor blending on the curls of the hairpin. NGC ID# 26CY, PCGS# 9045

- 5317 1904 MS64 NGC.** A sharply detailed Choice example of this popular type issue, with pleasing orange and rose-gold surfaces that show vibrant mint luster and only minor signs of contact. Eye appeal is tremendous. NGC ID# 26CY, PCGS# 9045

- 5318 1904 MS64 PCGS.** A Choice Liberty twenty with rich green-gold and apricot toning. Well struck and lustrous. The fields show only unimportant grazes, and the left portion of the cheek has a couple of moderate marks. NGC ID# 26CY, PCGS# 9045
- 5319 1904 MS64+ PCGS.** The most popular type coin in the series, the 1904 double eagle is readily found in high grade with outstanding eye appeal. This high-end Choice example is no exception, with frosty green-gold luster and smooth surfaces. Sharp motifs further impress the eye upon close examination. NGC ID# 26CY, PCGS# 9045
- 5320 1904 MS64 PCGS. CAC.** Glowing luster on golden-orange surfaces, a bold strike, and a paucity of singular marks make this 1904 twenty a great candidate for a type set. The highest-mintage issue in the late series. NGC ID# 26CY, PCGS# 9045
- 5321 1904 MS64 NGC. CAC.** Potent luster sweeps the well preserved surfaces of this near-Gem honey-gold type coin. The left obverse displays scattered minute gray flecks. Encased in a prior generation holder. NGC ID# 26CY, PCGS# 9045

**1904 Double Eagle, MS65  
Old Green Label Holder**

- 5322 1904 MS65 PCGS.** The 1904 is far and away the most plentiful Type Three double eagle, and is a favorite among type collectors. This Gem example displays sharp motifs and smooth, minimally disturbed surfaces, while frosty orange-gold luster completes the eye appeal. Housed in an old green label holder. NGC ID# 26CY, PCGS# 9045

**1904 Liberty Double Eagle  
Gem Type Three Representative**

- 5323 1904 MS65 NGC.** As the most readily obtainable date in the Type Three series, the 1904 double eagle is widely popular for type purposes. Eye appeal is also typically excellent on this issue, a characteristic that is beautifully showcased on this Gem example. Radiant orange-gold luster illuminates bold devices and clean fields, with the full visual effect gained when tilted beneath a light. NGC ID# 26CY, PCGS# 9045

**1904 Double Eagle, MS65  
Ideal Type Coin**

- 5324 1904 MS65 PCGS.** This is the usually encountered date of the Type Three Liberty double eagle design, with the Philadelphia and San Francisco issues enjoying a substantial production. This Gem exhibits satin luster and brilliant yellow surfaces with trivial, grade-consistent marks. NGC ID# 26CY, PCGS# 9045

**1904 Double Eagle, MS65+  
Favorite Liberty Type Coin**

- 5325 1904 MS65+ PCGS.** Eye appeal alone may have earned this twenty the PCGS Plus designation, because it is a wonderfully patinated Gem. A perfect combination of green highlights over the lustrous, medium-gold surfaces also displays bright orange accents. Sharply struck and minimally marked, this common Liberty Head issue is uncommonly well-preserved. NGC ID# 26CY, PCGS# 9045

**1904 Double Eagle  
Amazing Premium Gem Blazer**

- 5326 1904 MS66 NGC.** Widely known for its sheer availability, the 1904 double eagle finally becomes elusive at the MS66 grade level, and finer pieces are prohibitively rare. Eye-catching yellow-gold mint bloom engulfs each side of this blazer in frosty radiance. The devices are tack-sharp and it is difficult to locate grade-limiting abrasions, even under magnified examination. A truly beautiful coin that will impress even the most scrutinizing collector. Only one piece is numerically finer at NGC (10/14). NGC ID# 26CY, PCGS# 9045

**1904 Double Eagle, MS66  
Only Two Numerically Finer at PCGS**

- 5327 1904 MS66 PCGS.** The satiny surfaces reveal scintillating cartwheel effects that highlight the razor sharp striking detail. Both sides are remarkably abrasion-free for a gold coin of this size. An important, reddish-gold colored example for the high quality type collector. PCGS has graded only two numerically finer examples (10/14). NGC ID# 26CY, PCGS# 9045

**1904 Double Eagle, MS66  
Green Label Holder**

- 5328 1904 MS66 PCGS.** A magnificent peach-gold Liberty type coin. Sharply struck and lustrous. The reverse is nearly pristine, as is the obverse field. The cheek displays only minor grazes. Although the most plentiful issue of the series, even the 1904 is seldom seen in such quality. Certified in a green label holder, and virtually unobtainable any finer. NGC ID# 26CY, PCGS# 9045

- 5329 1906-S MS63 PCGS.** A lustrous, well struck, and attractive peach-gold double eagle. The obverse displays comparatively few abrasions for the MS63 level. The reverse is well preserved. Encapsulated in a green label holder. NGC ID# 26D6, PCGS# 9051

**1907 Liberty Double Eagle, MS64+  
Well-Preserved Surfaces**

- 5330 1907 MS64+ PCGS.** The year 1907 saw the last of the Liberty Head twenties and the first of the new Saint-Gaudens design. This Liberty twenty shows well-struck apricot-gold surfaces bathed in generous luster. Scattered small marks are undisturbing, putting this example quite close to the Gem category. Population: 15 in 64+, 16 finer (10/14). NGC ID# 26D7, PCGS# 9052

- 5331 1907-S MS63 NGC.** An orange-gold San Francisco twenty from the final year of the Liberty type. Nicely struck and lustrous with a lightly marked reverse and grade-limiting obverse abrasions. NGC ID# 26D9, PCGS# 9054

**SAINT-GAUDENS DOUBLE EAGLES**

- 5332 1907 Arabic Numerals MS63 PCGS.** The 1907 double eagle with Arabic Numerals is readily available through MS65, making this a popular type coin selection. This Select example displays yellow-gold, lustrous surfaces and well-struck design features. Scattered marks determine the grade. NGC ID# 26F5, PCGS# 9141
- 5333 1907 Arabic Numerals MS63 PCGS.** The lustrous surfaces of this Select double eagle exhibit sharply struck design elements, including Liberty's fingers and the Capitol building. Scattered light marks are consistent with the grade designation. Along with the reduced relief, the numerals in the date were changed from Roman to Arabic in 1907. NGC ID# 26F5, PCGS# 9141
- 5334 1907 Arabic Numerals MS64 PCGS.** Bright luster envelopes the coppery-gold surfaces on both sides of this attractive near-Gem twenty and sharp detail characterizes the design elements, including Liberty's face and fingers, the Capitol building, and the eagle's plumage. Minuscule marks prevent the attainment of Gem classification. MS64 is the finest grade most likely to be chosen for type purposes, for while numerous Gems exist the relatively high demand for them prices them out of reach for many collectors. NGC ID# 26F5, PCGS# 9141
- 5335 1907 Arabic Numerals MS64 PCGS.** Honey-gold coloration runs over the lustrous surfaces of this near-Gem. Sharp detail is seen on the design elements, including the panes and pillars of the Capitol building. Light scattered marks do not detract from the coin's pleasing overall eye appeal. This piece is a great choice for a high-grade type collection. NGC ID# 26F5, PCGS# 9141

---

**1907 Arabic Numerals Twenty, MS65  
Strong Luster and Strike**

- 5336 1907 Arabic Numerals MS65 PCGS.** The first-year 1907 Arabic Numerals "Saint-Gaudens" twenty is the Charles Barber reinterpretation of the design, fitted for mass production on high-speed coinage presses. This honey-gold Gem boasts strong luster with a strong strike and a few scattered, unobtrusive marks, a nice representative of this first-year type. NGC ID# 26F5, PCGS# 9141

---

**1907 Saint-Gaudens Twenty, MS65  
First-Year Favorite for Type**

- 5337 1907 Arabic Numerals MS65 PCGS.** A highly lustrous, frosted Gem double eagle, with only minimal abrasions and excellent eye appeal. This first-year, Arabic numerals twenty is popular with type collectors both for its availability in Gem condition and its eye appeal. Charles Barber's low-relief design is somewhat lightly struck on the high points, but overall this is an attractive MS65 example. NGC ID# 26F5, PCGS# 9141

---

**1907 Saint-Gaudens Twenty, MS65  
Arabic Numerals**

- 5338 1907 Arabic Numerals MS65 PCGS.** Minor luster grazes at the upper obverse prevent a higher grade to this spectacular Gem. The strike is outstanding with frosty mint luster obverse wheat and lemon-yellow surfaces. This first-year Saint-Gaudens design enjoys considerable demand. NGC ID# 26F5, PCGS# 9141
- 5339 1908-D No Motto MS64+ PCGS.** Long Rays Obverse. A lustrous and lightly marked yellow-gold near-Gem. A good strike, although the high points display minor incompleteness. Much scarcer in better Mint State grades than its 1908 No Motto Philadelphia cousin. NGC ID# 26F7, PCGS# 9143
- 5340 1908 Motto MS63 PCGS.** The 1908 No Motto mintage was more than 27 times greater than its 1908 Motto successor. This Motto representative is lustrous and possesses a good strike. Marks are relatively inconsequential except for a cluster on the left obverse field. NGC ID# 26F8, PCGS# 9147

---

**1908 Double Eagle, MS64  
Scarcer With Motto Variant**

- 5341 1908 Motto MS64 PCGS.** This first-year With Motto issue is usually available in grades through MS64, but the scarcity of Gem examples drives moderate demand for pleasing Choice representatives. This near-Gem displays varying shades of apricot and yellow-gold luster, with well-struck design elements. Light, scattered surface ticks preclude full Gem status, but are not detracting to the unaided eye. NGC ID# 26F8, PCGS# 9147

---

**1909-D Twenty, MS61  
Low-Mintage Denver Issue**

- 5342 1909-D MS61 NGC.** The 1909-D double eagle had a small mintage of only 52,500 coins, but enough examples survived the 1930s gold melts via overseas bank hoards that the date is obtainable with some searching in Mint State grades. This piece is sharply struck with light honey-gold luster. Light, scattered abrasions limit the grade, but are not overly detracting. NGC ID# 26FD, PCGS# 9152

**1909-S Saint-Gaudens Twenty  
Radiantly Lustrous Gem Example**

- 5343 1909-S MS65 PCGS.** The 1909-S double eagle is not nearly as plentiful in high Mint State grades as its substantial mintage of nearly 2.8 million coins would suggest, and it is likely that a significant portion of the original mintage was melted during the mid-1930s. This Gem survivor shows satiny orange-gold luster and well-struck motifs. As the grade suggests, the surfaces are free of any mentionable abrasions. PCGS has certified only 11 numerically finer representatives (9/14). NGC ID# 26FE, PCGS# 9153

**1910-D Double Eagle, MS65  
Uncommonly Finer**

- 5344 1910-D MS65 PCGS.** An otherwise readily obtainable Saint-Gaudens double eagle in an uncommon state of preservation, this gorgeous Gem exhibits rich reddish-gold coloration. Lustrous throughout, the surfaces are both well detailed and free of all but a few scattered bagmarks. NGC ID# 26FG, PCGS# 9155

**1910-S Double Eagle, MS64+  
Seldom Available in Higher Grades**

- 5345 1910-S MS64+ PCGS. CAC.** Moderately available in Choice condition, the 1910-S Saint-Gaudens double eagle becomes scarce in finer grades. This Plus-graded example shows rich honey-gold luster and well-defined design elements. A few scattered abrasions limit the grade, though none are individually noteworthy. NGC ID# 26FH, PCGS# 9156

- 5346 1911 MS63 PCGS.** Deep rose-gold toning adorns the lustrous surfaces of this attractive Select Mint State specimen. The 1911 issue saw a lower mintage of 197,200 coins and relatively few exist in grades above MS64, but MS63 examples are plentiful and reasonably priced. NGC ID# 26FJ, PCGS# 9157

- 5347 1911-D MS65 NGC.** This delightful branch mint Gem displays vibrant mint luster and sharply detailed design elements throughout. The lightly marked orange-gold surfaces add to the considerable visual appeal. NGC ID# 26FK, PCGS# 9158

- 5348 1911-D MS65 PCGS.** The 1911-D is a popular date due to the key status of the quarter eagle, and the importance of the half eagle and eagle. In fact, the double eagle is the only reasonably common Denver Mint gold coin of the year. This sharply defined example has pleasing orange-gold luster with excellent eye appeal. NGC ID# 26FK, PCGS# 9158

**1911-D Double Eagle, MS66**

- 5349 1911-D MS66 PCGS.** This sharply defined Premium Gem has exceptional aesthetic appeal, with satiny light yellow luster and pristine surfaces. This Denver Mint issue is popular with collectors who seek single examples for each production year. PCGS has only certified seven finer examples (10/14). NGC ID# 26FK, PCGS# 9158

- 5350 1911-S MS64 PCGS.** A pleasing Choice example of this popular branch mint issue, with sharply detailed design elements and vibrant mint luster that radiates from the lightly marked reddish-gold surfaces. NGC ID# 26FL, PCGS# 9159

**1911-S Twenty, MS65  
Elusive in Finer Grades**

- 5351 1911-S MS65 PCGS.** Radiant luster over attractive orange-gold surfaces is among this Gem 1911-S double eagle's many positive attributes. Few marks of any significance appear on either side, and the strike is bold throughout. Although quite a few Gems are certified at each service, the attempt to find a numerically finer PCGS-certified example will limit the hunt to a maximum of 32 submissions (10/14). NGC ID# 26FL, PCGS# 9159

- 5352 1913 MS62 NGC.** Lustrous and boldly struck, with light wheat-gold and pale rose toning. A few scattered abrasions keep it from grading higher, but the overall visual appeal of this Mint State example is considerable. NGC ID# 26FN, PCGS# 9161
- 5353 1913 MS63 PCGS.** A pleasing example of this slightly better Philadelphia issue, this richly lustrous Saint-Gaudens double eagle displays soft green-gold patina over each side, with well-defined central devices. Scattered contact marks are in keeping with the grade. NGC ID# 26FN, PCGS# 9161

**Key 1913-S Double Eagle, MS63  
Only 34,000 Pieces Minted**

- 5354 1913-S MS63 PCGS.** A key issue in the Saint-Gaudens double eagle series, production of the 1913-S was halted after just 34,000 impressions were minted. This Select Mint State example has frosty luster and brilliant orange-gold surfaces with trivial marks of little consequence on each side. NGC ID# 26FR, PCGS# 9163
- 5355 1914-D MS65 PCGS.** Among early branch mint issues, the 1914-D is one of the more readily obtainable in the series, but its availability plummets above the MS65 grade level, putting increased demand on Gem examples. This piece displays satiny shades of orange and green-gold, with sharp design elements and only a few grade-consistent abrasions. NGC ID# 26FT, PCGS# 9165
- 5356 1914-D MS65 PCGS.** Despite an adequate mintage of 453,000 pieces, the 1914-D Saint-Gaudens double eagle is scarce in grades above the MS65 level. This sharply detailed Gem displays vibrant mint luster and the orange-gold surfaces show no mentionable distractions. NGC ID# 26FT, PCGS# 9165
- 5357 1914-S MS65 PCGS.** This plentiful San Francisco issue is readily obtainable through the Gem grade level, but finer pieces are somewhat of a challenge for the casual date collector. This example displays bold motifs and radiant, honey-gold luster. Grade-limiting surface flaws are minor and nearly undetectable to the unaided eye. NGC ID# 26FU, PCGS# 9166

**1915 Twenty Dollar, MS64**  
**Conditionally Elusive Philadelphia Issue**

**5358 1915 MS64 PCGS.** The 1915 Saint-Gaudens double eagle claims a low mintage of 152,000 pieces, and Choice examples are scarce in today's market. This sharply detailed representative is brightly lustrous, with attractive greenish-gold surfaces. Only 47 coins have been certified in higher numeric grades at PCGS (9/14).  
*Ex: Central States Signature (Heritage, 4/2011), lot 6997. NGC ID# 26FV, PCGS# 9167*

**5359 1915-S MS65 PCGS.** The well-preserved orange and rose-gold surfaces of this delightful Gem radiate vibrant mint luster on both sides, while the sharply detailed design elements add to the significant eye appeal. NGC ID# 26FW, PCGS# 9168

**1920 Double Eagle, MS64**  
**Only One Finer Coin at PCGS**

**5360 1920 MS64 PCGS.** The 1920 Saint-Gaudens double eagle can be located in MS64 condition with a little patience, but the population drops precipitously in higher grades. This attractive Choice example exhibits well-detailed design elements and vibrant mint luster, and the light orange-gold surfaces show only minor signs of contact. PCGS has graded only one numerically finer example (9/14). NGC ID# 26FY, PCGS# 9170

**1920 Double Eagle, MS64**  
**Extremely Rare Any Finer**

**5361 1920 MS64 PCGS.** The 1920 double eagle is frequently encountered with weak strikes and moderate bagmarks, contributing to its profound rarity at the Gem grade level. Choice examples are moderately available, and offer a somewhat more affordable, but still aesthetically pleasing option for the casual date collector. This representative is moderately well-struck for the issue, with sharp eagle's feathers and only slight softness on Liberty's figure. Grade-limiting abrasions are minimal and evenly dispersed beneath warm honey-gold patina. PCGS has certified only a single numerically finer example (9/14). NGC ID# 26FY, PCGS# 9170

**1922 Twenty Dollar, MS65**  
**Rich Luster and Great Color**

**5362 1922 MS65 NGC.** Deep, mellow orange-red patina covers both sides of this Gem double eagle, complementing the rich luster and excellent eye appeal. The well-executed strike produces a wealth of detail on the Capitol pillars and dome, Liberty's head and sandal, and other small design elements. A great-looking type acquisition. NGC ID# 26G3, PCGS# 9173

**1922 Twenty, MS65  
Rare in Finer Numeric Grades**

**5363 1922 MS65 PCGS.** A beautiful Gem example of an issue that is less often seen in high grades. Frosty green and honey-gold hues illuminate largely clean surfaces on each side, while the devices are sharply impressed and the eye appeal is correspondingly strong. PCGS has encapsulated only eight numerically finer representatives (10/14), making this attractive piece an important offering for the Saint-Gaudens gold enthusiast. NGC ID# 26G3, PCGS# 9173

**5364 1923-D MS66 PCGS.** As is a hallmark of the 1923-D double eagle in general, this Premium Gem type coin showcases radiant rose and green-gold luster, with bold design definition. The surfaces are free of any readily obvious abrasions, and the eye appeal is proportionately high. NGC ID# 26G6, PCGS# 9176

**5365 1924 MS65+ PCGS.** The 1924 Saint-Gaudens double eagle is a plentiful issue in high grade and a favorite choice of type collectors. This high-end Gem is sharply detailed and brightly lustrous, with pristine yellow and rose-gold surfaces. NGC ID# 26G7, PCGS# 9177

**5366 1924 MS65+ PCGS. CAC.** This high-end Gem exhibits sharply defined design elements and vivid yellow-gold surfaces, with vibrant mint luster and hints of green and red patina. The eye appeal is extraordinary. NGC ID# 26G7, PCGS# 9177

**5367 1924 MS66+ NGC.** The 1924 double eagle is available in staggering numbers for type representation, but pieces grading finer than this high-end example are seldom encountered. Rich honey-gold luster blankets nearly unabraded surfaces, while the design elements exhibit crisp definition on each side. NGC ID# 26G7, PCGS# 9177

**5368 1925 MS66 PCGS.** This Philadelphia issue had a high mintage of more than 2.8 million coins, but is nonetheless rare at the Superb Gem grade level, making high-end MS66 examples heavily pursued by the casual date collector. This piece exhibits luminous orange-gold luster and splendidly preserved, frosty surfaces. Sharply impressed motifs complete the eye appeal. PCGS has certified only seven numerically finer examples (9/14). NGC ID# 26GA, PCGS# 9180

**5369 1925 MS66 NGC. CAC.** This crisply struck, CAC-endorsed Premium Gem delivers profound visual allure with bold, heavily frosted mint bloom. Close examination is needed to detect any grade-limiting luster grazes, and these are primarily limited to Liberty's right (facing) knee, where they are not immediately obvious. NGC has certified 25 numerically finer coins (9/14), though it is doubtful if very many trump this piece in terms of sheer eye appeal. NGC ID# 26GA, PCGS# 9180

**5370 1926 MS65+ PCGS.** This high-end Gem displays the bountiful luster and bold strike that this issue is known for. The few scattered marks consistent with the grade are confined mostly to the obverse fields away from the focal points, although Liberty's exposed right (facing) leg shows a couple as well. NGC ID# 26GD, PCGS# 9183

**1926 Twenty Dollar, MS66  
Luminous High-End Type Coin**

**5371 1926 MS66 PCGS.** The 1926 double eagle can be easily found in grades through MS65; Premium Gems are only marginally scarce, but are in high demand due to the prohibitive rarity of finer coins. This satiny, apricot-gold example boasts well-preserved surfaces and bold design definition. PCGS has certified just four numerically finer representatives (9/14). NGC ID# 26GD, PCGS# 9183

**5372 1927 MS66 PCGS.** Potent luster sweeps this magnificently preserved Saint-Gaudens double eagle. The strike is sharp and the eye appeal is excellent. Ideal for type purposes, given the cost of an MS67. Certified in a first generation holder. NGC ID# 26GG, PCGS# 9186

**5373 1927 MS66 PCGS.** The 1927 double eagle is frequently pursued for type purposes, due in part to its characteristically sharp strike and dazzling luster. The present coin is an outstanding example in that regard, exhibiting frosty orange-gold mint bloom and almost flawless fields. PCGS has certified only 14 numerically finer representatives (9/14). NGC ID# 26GG, PCGS# 9186

**5374 1928 MS65+ PCGS.** A beautifully preserved type coin with a great deal of "pop." Frosty honey and yellow-gold luster illuminates razor-sharp motifs and nearly unabraded surfaces. This is the final issue in the Saint-Gaudens double eagle series that is readily collectible, as all later issues fell victim to the gold melts of the mid-1930s. NGC ID# 26GK, PCGS# 9189

**1928 Double Eagle, MS66  
Rich Green-Gold Toning**

**5375 1928 MS66 PCGS.** Broad sea-green margins encompass canary-gold centers. Sharply struck and coruscating with an excellent strike and uncommonly smooth surfaces. Despite the high mintage of the 1928, it would be difficult to locate an example with greater eye appeal. A small lamination (as issued) is on the reverse rim at 8:30. Encased in an old green label holder. NGC ID# 26GK, PCGS# 9189

**5376 1928 MS66 PCGS.** Few numismatic artifacts are as beautiful and sought-after as a high-grade Saint-Gaudens double eagle. The current offering is a beautifully preserved coin with frosty apricot-gold luster and boldly struck motifs. The 1928 is also the final readily collectible date in the series, as all later issues were largely destroyed during the gold melts of the mid-1930s. NGC ID# 26GK, PCGS# 9189

**5377 1928 MS66 NGC.** Alternating sea-green and peach toning encompasses this lustrous and fully struck Premium Gem. Marks are minimal although we note a single hair-thin vertical line on the sun. The final readily obtained issue of the series. NGC ID# 26GK, PCGS# 9189

## CALIFORNIA FRACTIONAL GOLD

**5378 1853 Liberty Octagonal 25 Cents, BG-102, Low R.4, MS65 NGC.** A well struck example with sharp stars and a bold eye. Compare with the plate coin in the second edition of Breen-Gillio, which has blobs for stars and an indistinct portrait. The 8 in the date is mostly lapped away, usual for BG-102. Lustrous and unblemished with orange toning along the obverse periphery. Census: 4 in 65, none finer (9/14). PCGS# 10371

**5379 1855/4 Liberty Octagonal 25 Cents, BG-106, R.3, MS66 NGC.** A Period One Premium Gem made during the Gold Rush era. Well struck and attractive. The fields are mirrored and void of marks. Minute strike-throughs are noted near the fraction, and the obverse border at 2 o'clock has a small retained lamination, all as made. Census: 6 in 66, 0 finer (10/14). PCGS# 10375

**5380 1865/4 Liberty Octagonal 25 Cents, BG-736, Low R.6, MS64 Prooflike NGC.** A rare, crude die variety attributed to Robert B. Gray & Co. of San Francisco. This yellow-gold representative exhibits dazzling reflectivity and shows substantial lapping (as made) on the portrait. No marks or spots are evident. Census: 2 in 64 Prooflike, 0 finer (10/14). PCGS# 710563

**5381 1873 Indian Octagonal 25 Cents, BG-794, High R.5, MS65 NGC.** A sharply struck Gem that boasts reflective olive-gold fields and impressive eye appeal. Mint-made hair-thin lint marks are noted above the date and near the fraction. Fractional gold researcher Kenneth W. Lee is credited as discoverer of the variety. Census: 2 in 65, none finer (9/14). PCGS# 10621

**5382 1859 Liberty Octagonal 50 Cents, BG-902, Low R.4, MS66 PCGS.** A pristine canary-gold representative. The fields are flashy and the strike is bold throughout. Minute retained obverse laminations (as made) near 12 and 5 o'clock are noted strictly as identifiers. Unimprovable quality. Population: 2 in 66, 0 finer (10/14). PCGS# 10760

**1870 Liberty Round Dollar, MS62  
BG-1202, Exceptional Toned Example  
Period Two Variety, Rare This Nice**

**5383 1870 Liberty Round 1 Dollar, BG-1202, High R.5, MS62 NGC.** A later Period Two piece, with the Nouizillet Liberty head, 13 five-pointed stars around, and the maker's mark G between stars 1 and 13 beneath the portrait. This is a Robert B. Gray & Co. issue, successor to Antoine Louis Nouizillet. The BG-1202 variety is confirmed by the date on the reverse of the coin. Further diagnostics include a recut R in DOLLAR and a vertical die crack from the edge through the bow knot, to the 7 in the date. Swirling die polish lines cover the prooflike surfaces on each side, with resultant deep iridescent toning from the alloyed gold and reddish-gold composition. Stunning magenta, cerulean-blue, and red-gold shades visit the margins surrounding rich, yellow-gold centers. Among the few finest known of the variety, with NGC listing just two examples led by a MS62 Prooflike. PCGS lists a single MS63 coin as its finest-certified (9/14). PCGS# 10947

## SEATED DIMES

- 7481 1837 No Stars, Large Date XF40 PCGS.** PCGS Population (40/310). NGC Census: (18/367). Mintage: 682,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$385. NGC ID# 237R, PCGS# 4561
- 7482 1838-O No Stars XF45 PCGS.** PCGS Population (31/85). NGC Census: (18/73). Mintage: 406,034. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF45: \$739. NGC ID# 237T, PCGS# 4564
- 7483 1838 Small Stars AU58 PCGS.** PCGS Population (15/35). NGC Census: (7/46). Mintage: 1,992,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$485. NGC ID# 2TVT, PCGS# 4569
- 7484 1838 No Drapery, Large Stars AU58 PCGS.** PCGS Population (36/218). NGC Census: (52/267). Mintage: 1,992,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$240. NGC ID# 237U, PCGS# 4568
- 7485 1840 Drapery XF40 PCGS.** PCGS Population (7/20). NGC Census: (4/12). Mintage: 377,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$350. NGC ID# 2383, PCGS# 4578
- 7486 1846 Fine 12 PCGS.** PCGS Population (17/93). NGC Census: (0/39). Mintage: 31,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fine 12: \$425. NGC ID# 238D, PCGS# 4588

- 7487 1852 MS67 PCGS.** PCGS Population (3/0). NGC Census: (1/0). Mintage: 1,535,500. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$5,975. NGC ID# 238N, PCGS# 4597
- 7488 1853 Arrows MS64 NGC.** NGC Census: (176/130). PCGS Population (154/124). Mintage: 12,078,010. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$775. NGC ID# 2398, PCGS# 4603
- 7489 1856 Small Date MS61 NGC.** NGC Census: (9/125). PCGS Population (5/96). Mintage: 5,780,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$275. NGC ID# 238S, PCGS# 4609
- 7490 1857 MS64+ NGC.** NGC Census: (89/47). PCGS Population (50/23). Mintage: 5,580,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$775. NGC ID# 238X, PCGS# 4614
- 7491 1858 MS64 PCGS.** PCGS Population (27/13). NGC Census: (39/26). Mintage: 1,500,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$725. NGC ID# 238Z, PCGS# 4616
- 7492 1858-O AU50 PCGS.** PCGS Population (5/31). NGC Census: (2/38). Mintage: 290,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$325. NGC ID# 2392, PCGS# 4617
- 7493 1858-S VF30 PCGS.** PCGS Population (13/36). NGC Census: (0/20). Mintage: 60,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF30: \$840. NGC ID# 2393, PCGS# 4618
- 7494 1859-S — Cleaning — PCGS Genuine. VF Details.** NGC Census: (1/10). PCGS Population (4/42). Mintage: 60,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$710.

- 7495 1860-O — Reverse Scratched — NGC Details. VF.** NGC Census: (4/24). PCGS Population (10/36). Mintage: 40,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$2,025.
- 7496 1861 MS64 NGC.** NGC Census: (31/33). PCGS Population (45/43). Mintage: 1,884,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$420. NGC ID# 239F, PCGS# 4633
- 7497 1862-S — Environmental Damage — PCGS Genuine. XF Details.** NGC Census: (1/9). PCGS Population (11/11). Mintage: 180,750. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$690.
- 7498 1868-S XF40 PCGS.** PCGS Population (5/30). NGC Census: (0/16). Mintage: 260,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$175. NGC ID# 239X, PCGS# 4648
- 7499 1870-S — Cleaning — PCGS Genuine. VF Details.** NGC Census: (1/25). PCGS Population (3/48). Mintage: 50,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$600.
- 7500 1870-S VF35 NGC.** NGC Census: (3/19). PCGS Population (8/33). Mintage: 50,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: \$661. NGC ID# 23A3, PCGS# 4652
- 7501 1872-CC — Tooled — PCGS Genuine. VG Details.** NGC Census: (3/32). PCGS Population (8/60). Mintage: 35,480. Numismedia Wsl. Price for problem free NGC/PCGS coin in VG8: \$1,650.
- 7502 1875 MS65 PCGS.** PCGS Population (41/31). NGC Census: (52/46). Mintage: 10,350,700. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$725. NGC ID# 23AC, PCGS# 4672
- 7503 1876-S MS64 NGC.** NGC Census: (19/23). PCGS Population (25/22). Mintage: 10,420,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$460. NGC ID# 23AK, PCGS# 4681
- 7504 1880 MS62 NGC.** NGC Census: (11/107). PCGS Population (7/125). Mintage: 36,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$475. NGC ID# 23AT, PCGS# 4688
- 7505 1880 MS63 NGC.** NGC Census: (14/93). PCGS Population (23/102). Mintage: 36,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$525. NGC ID# 23AT, PCGS# 4688
- 7506 1881 MS62 NGC.** NGC Census: (11/50). PCGS Population (5/55). Mintage: 24,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$560. NGC ID# 23AU, PCGS# 4689

- 7507 1884 MS66 PCGS.** PCGS Population (36/25). NGC Census: (34/31). Mintage: 3,365,505. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$925. NGC ID# 23AX, PCGS# 4692
- 7508 1885 MS65 PCGS.** PCGS Population (49/33). NGC Census: (65/60). Mintage: 2,532,497. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$685. NGC ID# 23AZ, PCGS# 4694
- 7509 1886 MS62 NGC. CAC. Ex: Eric P. Newman Collection.** NGC Census: (70/404). PCGS Population (74/377). Mintage: 6,376,684. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$155. NGC ID# 23B3, PCGS# 4696
- 7510 1886 MS64 PCGS.** PCGS Population (126/126). NGC Census: (162/143). Mintage: 6,376,684. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$360. NGC ID# 23B3, PCGS# 4696
- 7511 1887 MS64 NGC. Ex: Richmond Collection.** NGC Census: (150/110). PCGS Population (155/115). Mintage: 11,283,229. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$340. NGC ID# 23B5, PCGS# 4698
- 7512 1891 MS64 NGC.** NGC Census: (287/203). PCGS Population (221/185). Mintage: 15,310,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$340. NGC ID# 23BD, PCGS# 4706

- 7513 1891 MS65 PCGS.** PCGS Population (110/75). NGC Census: (124/79). Mintage: 15,310,600. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$650. NGC ID# 23BD, PCGS# 4706
- 7514 1891-O MS64 NGC. CAC.** NGC Census: (53/40). PCGS Population (63/34). Mintage: 4,540,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$480. NGC ID# 23BE, PCGS# 4707

## PROOF SEATED DIMES

- 7515 1861 PR64 PCGS.** PCGS Population (30/20). NGC Census: (41/19). Mintage: 1,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$725. NGC ID# 23CK, PCGS# 4754
- 7516 1877 PR64 PCGS.** PCGS Population (32/21). NGC Census: (25/31). Mintage: 510. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$725. NGC ID# 23D2, PCGS# 4774
- 7517 1879 PR63 Cameo NGC.** NGC Census: (7/50). PCGS Population (19/51). PCGS# 84776
- 7518 1880 PR62 Cameo NGC.** NGC Census: (6/62). PCGS Population (3/71). PCGS# 84777
- 7519 1881 PR62 NGC.** NGC Census: (13/178). PCGS Population (31/204). Mintage: 975. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR62: \$400. NGC ID# 23D6, PCGS# 4778
- 7520 1881 PR63 PCGS.** PCGS Population (63/141). NGC Census: (22/156). Mintage: 975. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: \$535. NGC ID# 23D6, PCGS# 4778
- 7521 1883 PR64 PCGS. CAC. Ex: Teich Family Collection.** PCGS Population (83/76). NGC Census: (68/106). Mintage: 1,039. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$750. NGC ID# 23D8, PCGS# 4780
- 7522 1887 PR61 PCGS.** PCGS Population (7/182). NGC Census: (5/169). Mintage: 710. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR61: \$300. NGC ID# 23DC, PCGS# 4784
- 7523 1887 PR64 NGC.** NGC Census: (63/73). PCGS Population (49/42). Mintage: 710. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$725. NGC ID# 23DC, PCGS# 4784

## BARBER DIMES

- 7524 1892 MS65 PCGS.** PCGS Population (140/97). NGC Census: (135/87). Mintage: 12,121,245. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$510. NGC ID# 23DK, PCGS# 4796
- 7525 1892 MS65 PCGS.** PCGS Population (140/97). NGC Census: (135/87). Mintage: 12,121,245. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$510. NGC ID# 23DK, PCGS# 4796
- 7526 1897 MS63 Prooflike NGC.** NGC Census: (77/199). PCGS Population (101/195). Mintage: 10,869,264. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$190. PCGS# 4812

**7527 1901 MS65 PCGS.** PCGS Population (37/16). NGC Census: (26/10). Mintage: 18,860,478. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$525. NGC ID# 23EF, PCGS# 4824

**7528 1901-O MS62 PCGS.** PCGS Population (7/47). NGC Census: (11/46). Mintage: 5,620,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$515. NGC ID# 23EG, PCGS# 4825

**7529 1907 MS65 PCGS.** PCGS Population (47/19). NGC Census: (46/45). Mintage: 22,220,576. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$500. NGC ID# 23F3, PCGS# 4842

**7530 1909 MS66 PCGS.** PCGS Population (10/3). NGC Census: (10/0). Mintage: 10,240,650. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$900. NGC ID# 23FB, PCGS# 4850

**7531 1911 MS66 PCGS.** Ex: Duckor. PCGS Population (84/16). NGC Census: (48/10). Mintage: 18,870,544. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$810. NGC ID# 23FJ, PCGS# 4857

**7532 1911-S MS66 PCGS.** PCGS Population (55/7). NGC Census: (23/6). Mintage: 3,520,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$975. NGC ID# 23FL, PCGS# 4859

**7533 1914 MS65+ PCGS. CAC.** PCGS Population (163/71). NGC Census: (143/43). Mintage: 17,360,656. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$500. NGC ID# 23FT, PCGS# 4865

**7534 1915 MS64 PCGS. CAC.** PCGS Population (118/59). NGC Census: (101/49). Mintage: 5,620,450. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$280. NGC ID# 23FW, PCGS# 4868

**7535 1915-S MS64 PCGS.** PCGS Population (49/26). NGC Census: (40/25). Mintage: 960,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$550. NGC ID# 23FX, PCGS# 4869

**7536 1916-S MS65 NGC.** NGC Census: (39/30). PCGS Population (48/18). Mintage: 5,820,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$525. NGC ID# 23FZ, PCGS# 4871

## PROOF BARBER DIMES

**7537 1892 PR64 Cameo PCGS.** PCGS Population (20/41). NGC Census: (9/35). PCGS# 84875

**7538 1901 PR64 PCGS.** PCGS Population (69/64). NGC Census: (59/105). Mintage: 813. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$710. NGC ID# 23GE, PCGS# 4885

**7539 1904 PR63 NGC.** NGC Census: (35/136). PCGS Population (69/164). Mintage: 670. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: \$480. NGC ID# 23GH, PCGS# 4888

**7540 1905 PR64 PCGS.** PCGS Population (57/98). NGC Census: (54/92). Mintage: 727. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$725. NGC ID# 23GJ, PCGS# 4889

**7541 1905 PR64 Cameo NGC.** NGC Census: (3/17). PCGS Population (11/31). PCGS# 84889

**7542 1906 PR64 PCGS.** PCGS Population (54/56). NGC Census: (57/69). Mintage: 675. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$735. NGC ID# 23GK, PCGS# 4890

**7543 1909 PR63 PCGS.** PCGS Population (45/139). NGC Census: (32/178). Mintage: 650. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: \$475. NGC ID# 23GP, PCGS# 4893

**7544 1911 PR63 PCGS.** PCGS Population (34/122). NGC Census: (11/161). Mintage: 543. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: \$480. NGC ID# 23GS, PCGS# 4895

**7545 1912 PR63 PCGS.** PCGS Population (54/133). NGC Census: (30/111). Mintage: 700. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: \$475. NGC ID# 23GT, PCGS# 4896

**7546 1912 PR63 PCGS.** PCGS Population (54/133). NGC Census: (30/111). Mintage: 700. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR63: \$475. NGC ID# 23GT, PCGS# 4896

**7547 1915 PR64 PCGS.** PCGS Population (46/33). NGC Census: (48/50). Mintage: 450. Numismedia Wsl. Price for problem free NGC/PCGS coin in PR64: \$750. NGC ID# 23GW, PCGS# 4899

## MERCURY DIMES

**7548 1916 MS67 PCGS.** PCGS Population (5/0). NGC Census: (11/1). Mintage: 22,180,080. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$575. NGC ID# 23GX, PCGS# 4904

**7549 1916 MS66+ Full Bands PCGS.** PCGS Population (406/124). NGC Census: (359/94). Mintage: 22,180,080. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$280. NGC ID# 23GX, PCGS# 4905

**7550 1916 MS67 Full Bands NGC.** NGC Census: (82/12). PCGS Population (114/10). Mintage: 22,180,080. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS67: \$850. NGC ID# 23GX, PCGS# 4905

**7551 1916-D Fair 2 PCGS.** PCGS Population (384/5903). NGC Census: (469/1497). Mintage: 264,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Fair 2: \$236. NGC ID# 23GY, PCGS# 4906

**7552 1916-D AG3 PCGS.** PCGS Population (2148/3748). NGC Census: (0/1493). Mintage: 264,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AG3: \$409. NGC ID# 23GY, PCGS# 4906

**7553 1916-D — Obverse Damage — NGC Details. AG.** NGC Census: (0/1495). PCGS Population (2148/3748). Mintage: 264,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AG3: \$409.

**7554 1916-D AG3 PCGS.** PCGS Population (2152/3751). NGC Census: (0/1497). Mintage: 264,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AG3: \$409. NGC ID# 23GY, PCGS# 4906

**7555 1916-D AG3 PCGS.** PCGS Population (2152/3751). NGC Census: (0/1497). Mintage: 264,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AG3: \$409. NGC ID# 23GY, PCGS# 4906

**7556 1916-D Good 4 ANACS.** NGC Census: (461/1036). PCGS Population (1280/2471). Mintage: 264,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4 : \$670. NGC ID# 23GY, PCGS# 4906

**7557 1916-D Good 4 NGC.** NGC Census: (461/1036). PCGS Population (1280/2471). Mintage: 264,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4 : \$670. NGC ID# 23GY, PCGS# 4906

**7558 1916-D Good 4 PCGS.** PCGS Population (1280/2471). NGC Census: (461/1036). Mintage: 264,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4 : \$670. NGC ID# 23GY, PCGS# 4906

**7559 1916-D Good 4 PCGS.** PCGS Population (1280/2471). NGC Census: (461/1036). Mintage: 264,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in Good 4 : \$670. NGC ID# 23GY, PCGS# 4906

**7560 1918-D MS65 NGC.** NGC Census: (45/14). PCGS Population (75/11). Mintage: 22,674,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$550. NGC ID# 23H6, PCGS# 4918

**7561 1923 MS66 Full Bands PCGS. CAC.** PCGS Population (185/70). NGC Census: (98/30). Mintage: 50,130,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$340. NGC ID# 23HG, PCGS# 4939

**7562 1923 MS66 Full Bands PCGS. CAC.** PCGS Population (185/71). NGC Census: (98/30). Mintage: 50,130,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$340. NGC ID# 23HG, PCGS# 4939

**7563 1924 MS65 Full Bands PCGS.** PCGS Population (151/119). NGC Census: (99/80). Mintage: 24,010,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$380. NGC ID# 23HJ, PCGS# 4943

**7564 1924 MS66 Full Bands PCGS.** PCGS Population (92/27). NGC Census: (64/16). Mintage: 24,010,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS66: \$750. NGC ID# 23HJ, PCGS# 4943

**7565 1924-S MS64 NGC.** NGC Census: (63/24). PCGS Population (63/20). Mintage: 7,120,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$560. NGC ID# 23HL, PCGS# 4946

**7566 1925-D MS62 PCGS.** PCGS Population (12/36). NGC Census: (18/36). Mintage: 5,117,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$450. NGC ID# 23HN, PCGS# 4950

**7567 1927-D MS64 PCGS.** PCGS Population (58/41). NGC Census: (42/25). Mintage: 4,812,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$525. NGC ID# 23HV, PCGS# 4962

**7568 1928-D MS62 Full Bands PCGS.** PCGS Population (18/299). NGC Census: (15/115). Mintage: 4,161,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$300. NGC ID# 23HY, PCGS# 4969

**7569 1928-S MS65 NGC.** NGC Census: (73/47). PCGS Population (58/33). Mintage: 7,400,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS65: \$330. NGC ID# 23HZ, PCGS# 4970

- 8828 1854 — Plugged — NGC Details. XF.** NGC Census: (81/3784). PCGS Population (88/2897). Mintage: 138,618. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$900.
- 8829 1854-O — Damaged — NGC Details. VF.** NGC Census: (3/786). PCGS Population (4/525). Mintage: 24,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$1,650.
- 8830 1855 — Improperly Cleaned — NGC Details. AU.** NGC Census: (78/938). PCGS Population (131/539). Mintage: 50,555. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,175.
- 8831 1856 — Improperly Cleaned — NGC Details. AU.** NGC Census: (45/607). PCGS Population (77/410). Mintage: 26,010. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,125.

- 8832 1857 — Mount Removed, Whizzed — ANACS. AU50 Details.** NGC Census: (39/508). PCGS Population (46/236). Mintage: 20,891. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,100.
- 8833 1868 — Improperly Cleaned — NGC Details. VF.** NGC Census: (0/349). PCGS Population (0/314). Mintage: 4,850. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF20: \$750.

- 8834 1874 — Cleaned — PCGS Genuine. XF Details.** NGC Census: (38/2687). PCGS Population (50/2147). Mintage: 41,800. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$900.
- 8835 1887 — Mount Removed — NGC Details. XF.** NGC Census: (1/195). PCGS Population (2/276). Mintage: 6,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$1,050.

## CLASSIC HALF EAGLES

- 8836 1834 Plain 4 VF35 PCGS.** PCGS Population (94/1119). NGC Census: (53/1896). Mintage: 657,460. Numismedia Wsl. Price for problem free NGC/PCGS coin in VF35: \$636. NGC ID# 25RR, PCGS# 8171
- 8837 1834 Plain 4 — Improperly Cleaned — NGC Details. XF.** NGC Census: (161/1734). PCGS Population (184/935). Mintage: 657,460. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$700.
- 8838 1834 Plain 4 — Scratched — NGC Details. XF.** NGC Census: (161/1734). PCGS Population (184/935). Mintage: 657,460. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$700.
- 8839 1834 Plain 4 — Scratched — NGC Details. AU.** NGC Census: (143/1292). PCGS Population (163/501). Mintage: 657,460. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,025.
- 8840 1834 Plain 4 — Surfaces Tooled — PCGS Genuine Secure. AU Details.** NGC Census: (144/1292). PCGS Population (163/501). Mintage: 657,460. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,025.

- 8841 1835 — Plugged — NGC Details. XF.** NGC Census: (55/585). PCGS Population (64/334). Mintage: 371,534. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$700.
- 8842 1836 — Improperly Cleaned — NGC Details. XF.** NGC Census: (91/945). PCGS Population (106/552). Mintage: 553,147. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$700.
- 8843 1836 — Improperly Cleaned — NGC Details. XF.** NGC Census: (91/944). PCGS Population (106/552). Mintage: 553,147. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$700.
- 8844 1836 — Cleaning — PCGS Genuine Secure. XF Details.** NGC Census: (91/945). PCGS Population (106/552). Mintage: 553,147. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$700.

- 8845 1836 — Improperly Cleaned — NGC Details. AU.** NGC Census: (90/685). PCGS Population (83/303). Mintage: 553,147. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,100.

- 8846 1837 — Improperly Cleaned — NGC Details. AU.** NGC Census: (33/256). PCGS Population (31/91). Mintage: 207,121. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,325.

- 8847 1838 — Surface Damage — PCGS Genuine Secure. AU Details.** NGC Census: (55/426). PCGS Population (49/175). Mintage: 286,588. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,350.

- 8848 1838 — Filed Rims — PCGS Genuine Secure. AU Details.** NGC Census: (55/426). PCGS Population (49/175). Mintage: 286,588. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU50: \$1,350.

## LIBERTY HALF EAGLES

- 8849 1843 AU53 NGC.** NGC Census: (46/304). PCGS Population (36/88). Mintage: 611,205. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$525. NGC ID# 25T2, PCGS# 8213
- 8850 1849 AU53 NGC.** NGC Census: (26/105). PCGS Population (7/22). Mintage: 133,070. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU53: \$615. NGC ID# 25TV, PCGS# 8240
- 8851 1851-O — Improperly Cleaned — NGC Details. XF.** NGC Census: (13/100). PCGS Population (10/48). Mintage: 41,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$1,550.
- 8852 1854 AU58 NGC.** NGC Census: (103/56). PCGS Population (21/41). Mintage: 160,675. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$775. NGC ID# 25UG, PCGS# 8256
- 8853 1854 AU58 NGC. CAC.** NGC Census: (103/56). PCGS Population (21/41). Mintage: 160,675. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU58: \$775. NGC ID# 25UG, PCGS# 8256
- 8854 1873 Open 3 MS61 NGC.** NGC Census: (28/35). PCGS Population (9/32). Mintage: 112,505. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$675. NGC ID# 25WK, PCGS# 8328
- 8855 1879-S — Cleaning — PCGS Genuine. Unc Details.** NGC Census: (31/149). PCGS Population (7/124). Mintage: 426,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$550.

**8856 1879-S MS61 NGC.** NGC Census: (67/82). PCGS Population (27/97). Mintage: 426,200. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$600. NGC ID# 25X9, PCGS# 8350

**8857 1880-S MS63 PCGS.** PCGS Population (265/86). NGC Census: (392/146). Mintage: 1,348,900. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$725. NGC ID# 25XC, PCGS# 8353

**8858 1881-S MS63 NGC.** NGC Census: (262/132). PCGS Population (196/98). Mintage: 969,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS63: \$835. NGC ID# 25XF, PCGS# 8357

**8859 1886-S MS61 PCGS.** PCGS Population (755/2613). NGC Census: (2244/4938). Mintage: 3,268,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS61: \$470. NGC ID# 25XV, PCGS# 8370

**8860 1891 — Improperly Cleaned — NGC Details. Unc.** NGC Census: (35/248). PCGS Population (14/137). Mintage: 61,300. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$400.

**8861 1891-CC — Improperly Cleaned — NGC Details. XF.** NGC Census: (27/1921). PCGS Population (31/1483). Mintage: 208,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in XF40: \$675.

**8862 1891-CC AU55 NGC.** NGC Census: (209/1500). PCGS Population (206/1005). Mintage: 208,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in AU55: \$975. NGC ID# 25Y5, PCGS# 8378

**8863 1891-CC — Reverse Scratched — NGC Details. Unc.** NGC Census: (72/968). PCGS Population (82/673). Mintage: 208,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS60: \$1,150.

**8864 1892-S MS62 PCGS.** PCGS Population (64/33). NGC Census: (67/9). Mintage: 298,400. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$765. NGC ID# 25Y9, PCGS# 8382

**9452 1926-S MS65 Paramount (MS64 NGC).** Ex: This is not an NGC holder. The NGC guarantee does not apply to this coin. NGC Census: (1794/433). PCGS Population (2145/713). Mintage: 6,980,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS64: \$240.

**9453 1928-S MS60 Paramount (MS62 NGC).** Ex: This is not an NGC holder. The NGC guarantee does not apply to this coin. NGC Census: (855/2620). PCGS Population (1048/3959). Mintage: 1,632,000. Numismedia Wsl. Price for problem free NGC/PCGS coin in MS62: \$260.

## PROOF SETS

**9454 1951 proof set.** A complete five-piece 1951 proof set in government packaging, plastic envelopes in paper wrappers and cardboard box. The coins grade PR63-PR66 Uncertified, with minimal toning. (Total: 5 coins)

**9455 1970 Proof Set Featuring No S Dime.** A complete five-piece 1970 proof set in government packaging, plastic case and blue box. The cent offers original red surfaces and the other coins are essentially brilliant, with just a whisper of pale gold patina. Surprisingly, the dime is the rare No S variety, with the mintmark inadvertently omitted from the die. (Total: 5 coins)

## End of Auction

# Terms and Conditions of Auction

## Auctioneer and Auction:

1. This Auction is presented by Heritage Auctions, a d/b/a/ of Heritage Auctioneers & Galleries, Inc., or Heritage Auctions, Inc., or Heritage Numismatic Auctions, Inc., or Heritage Vintage Sports Auctions, Inc., or Currency Auctions of America, Inc., as identified with the applicable licensing information on the title page of the catalog or on the HA.com Internet site (the "Auctioneer"). The Auction is conducted under these Terms and Conditions of Auction and applicable state and local law. Announcements and corrections from the podium and those made through the Terms and Conditions of Auctions appearing on the Internet at HA.com supersede those in the printed catalog.

## Buyer's Premium:

2. All bids are subject to a Buyer's Premium which is in addition to the placed successful bid:
  - Fifteen percent (15%) on Domain Names & Intellectual Property Auction lots;
  - Seventeen and one-half percent (17.5%) on Currency, US Coin, and World & Ancient Coin Auction lots, except for Gallery Auction lots as noted below;
  - Nineteen and one-half percent (19.5%) on Comic, Movie Poster, Sports Collectibles, and Gallery Auction (sealed bid auctions of mostly bulk numismatic material) lots;
  - Twenty-two percent (22%) on Wine Auction lots;
  - For lots in all other categories not listed above, the Buyer's Premium per lot is twenty-five percent (25%) on the first \$100,000 (minimum \$14), plus twenty percent (20%) of any amount between \$100,000 and \$1,000,000, plus twelve percent (12%) of any amount over \$1,000,000.

## Auction Venues:

3. The following Auctions are conducted solely on the Internet: Heritage Weekly Internet Auctions (Coin, Currency, Comics, Rare Books, Jewelry & Watches, Guitars & Musical Instruments, and Vintage Movie Posters); Heritage Monthly Internet Auctions (Sports, World Coins and Rare Wine). Signature® Auctions and Grand Format Auctions accept bids from the Internet, telephone, fax, or mail first, followed by a floor bidding session; HeritageLive! and real-time telephone bidding are available to registered clients during these auctions.

## Bidders:

4. Any person participating or registering for the Auction agrees to be bound by and accepts these Terms and Conditions of Auction ("Bidder(s)").
5. All Bidders must meet Auctioneer's qualifications to bid. Any Bidder who is not a client in good standing of the Auctioneer may be disqualified at Auctioneer's sole option and will not be awarded lots. Such determination may be made by Auctioneer in its sole and unlimited discretion, at any time prior to, during, or even after the close of the Auction. Auctioneer reserves the right to exclude any person from the auction.
6. If an entity places a bid, then the person executing the bid on behalf of the entity agrees to personally guarantee payment for any successful bid.

## Credit:

7. In order to place bids, Bidders who have not established credit with the Auctioneer must either furnish satisfactory credit information (including two collectibles-related business references) or supply valid credit card information along with a social security number, well in advance of the Auction. Bids placed through our Interactive Internet program will only be accepted from pre-registered Bidders. Bidders who are not members of HA.com or affiliates should preregister at least 48 hours before the start of the first session (exclusive of holidays or weekends) to allow adequate time to contact references. Credit will be granted at the discretion of Auctioneer. Additionally Bidders who have not previously established credit or who wish to bid in excess of their established credit history may be required to provide their social security number or the last four digits thereof so a credit check may be performed prior to Auctioneer's acceptance of a bid. Check writing privileges and immediate delivery of merchandise may also be determined by pre-approval of credit based on a combination of criteria: HA.com history, related industry references, bank verification, a credit bureau report and/or a personal guarantee for a corporate or partnership entity in advance of the auction venue.

## Bidding Options:

8. Bids in Signature, Auctions or Grand Format Auctions may be placed as set forth in the printed catalog section entitled "Choose your bidding method." For auctions held solely on the Internet, see the alternatives on HA.com. Review at <http://www.ha.com/c/ref/web-tips.zx#biddingTutorial>.
9. Presentment of Bids: Non-Internet bids (including but not limited to podium, fax, phone and mail bids) are treated similar to floor bids in that they must be on-increment or at a half increment (called a cut bid). Any podium, fax, phone, or mail bids that do not conform to a full or half increment will be rounded up or down to the nearest full or half increment and this revised amount will be considered your high bid.
10. Auctioneer's Execution of Certain Bids. Auctioneer cannot be responsible for your errors in bidding, so carefully check that every bid is entered correctly. When identical mail or FAX bids are submitted, preference is given to the first received. To ensure the greatest accuracy, your written bids should be entered on the standard printed bid sheet and be received at Auctioneer's place of business at least two business days before the Auction start. Auctioneer is not responsible for executing mail bids or FAX bids received on or after the day the first lot is sold, nor Internet bids submitted after the published closing time; nor is Auctioneer responsible for proper execution of bids submitted by telephone, mail, FAX, e-mail, Internet, or in person once the Auction begins. Bids placed electronically via the internet may not be withdrawn until your written request is received and acknowledged by Auctioneer (FAX: 214-409-1425); such requests must state the reason, and may constitute grounds for withdrawal of bidding privileges. Lots won by mail Bidders will not be delivered at the Auction unless prearranged.
11. Caveat as to Bid Increments. Bid increments (over the current bid level) determine the lowest amount you may bid on a particular lot. Bids greater than one increment over the current bid can be any whole dollar amount. It is possible under several circumstances for winning bids to be between increments, sometimes only \$1 above the previous increment. Please see: "How can I lose by less than an increment?" on our website. Bids will be accepted in whole dollar amounts only. No "buy" or "unlimited" bids will be accepted.

The following chart governs current bidding increments  
(see [HA.com/c/ref/web-tips.zx#guidelines-increments](http://HA.com/c/ref/web-tips.zx#guidelines-increments)).

Current Bid .....	Bid Increment
< - \$10 .....	\$1
\$10 - \$29 .....	\$2
\$30 - \$49 .....	\$3
\$50 - \$99 .....	\$5
\$100 - \$199 .....	\$10
\$200 - \$299 .....	\$20
\$300 - \$499 .....	\$25
\$500 - \$999 .....	\$50
\$1,000 - \$1,999 .....	\$100
\$2,000 - \$2,999 .....	\$200
\$3,000 - \$4,999 .....	\$250
\$5,000 - \$9,999 .....	\$500

Current Bid .....	Bid Increment
\$10,000 - \$19,999 .....	\$1,000
\$20,000 - \$29,999 .....	\$2,000
\$30,000 - \$49,999 .....	\$2,500
\$50,000 - \$99,999 .....	\$5,000
\$100,000 - \$199,999 .....	\$10,000
\$200,000 - \$299,999 .....	\$20,000
\$300,000 - \$499,999 .....	\$25,000
\$500,000 - \$999,999 .....	\$50,000
\$1,000,000 - \$4,999,999 .....	\$100,000
\$5,000,000 - \$9,999,999 .....	\$250,000
>\$10,000,000 .....	\$500,000

12. If Auctioneer calls for a full increment, a bidder may request Auctioneer to accept a bid at half of the increment ("Cut Bid") only once per lot. After offering a Cut Bid, bidders may continue to participate only at full increments. Off-increment bids may be accepted by the Auctioneer at Signature® Auctions and Grand Format Auctions. If the Auctioneer solicits bids other than the expected increment, these bids will not be considered Cut Bids.

## Conducting the Auction:

13. Notice of the consignor's liberty to place bids on his lots in the Auction is hereby made in accordance with Article 2 of the Texas Business and Commercial Code. A "Minimum Bid" is an amount below which the lot will not sell. THE CONSIGNOR OF PROPERTY MAY PLACE WRITTEN "Minimum Bids" ON HIS LOTS IN ADVANCE OF THE AUCTION; ON SUCH LOTS, IF THE HAMMER PRICE DOES NOT MEET THE "Minimum Bid", THE CONSIGNOR MAY PAY A REDUCED COMMISSION ON THOSE LOTS. "Minimum Bids" are generally posted online several days prior to the Auction closing. For any successful bid placed by a consignor on his Property on the Auction floor, or by any means during the live session, or after the "Minimum Bid" for an Auction have been posted, we will require the consignor to pay full Buyer's Premium and Seller's Commissions on such lot.
14. The highest qualified Bidder recognized by the Auctioneer shall be the Buyer. In the event of a tie bid, the earliest bid received or recognized wins. In the event of any dispute between any Bidders at an Auction, Auctioneer may at his sole discretion reoffer the lot. Auctioneer's decision and declaration of the winning Bidder shall be final and binding upon all Bidders. Bids properly offered, whether by floor Bidder or other means of bidding, may on occasion be missed or go unrecognized; in such cases, the Auctioneer may declare the recognized bid accepted as the winning bid, regardless of whether a competing bid may have been higher. Auctioneer reserves the right after the hammer fall to accept bids and reopen bidding for bids placed through the Internet or otherwise.
15. Auctioneer reserves the right to refuse to honor any bid or to limit the amount of any bid, in its sole discretion. A bid is considered not made in "Good Faith" when made by an insolvent or irresponsible person, a person under the age of eighteen, or is not supported by satisfactory credit, collectibles references, or otherwise. Regardless of the disclosure of his identity, any bid by a consignor or his agent on a lot considered by him is deemed to be made in "Good Faith." Any person apparently appearing on the OFAC list is not eligible to bid.
16. Nominal Bids. The Auctioneer in its sole discretion may reject nominal bids, small opening bids, or very nominal advances. If a lot bearing estimates fails to open for 40-60% of the low estimate, the Auctioneer may pass the item or may place a protective bid on behalf of the consignor.
17. Lots bearing bidding estimates shall open at Auctioneer's discretion (approximately 50%-60% of the low estimate). In the event that no bid meets or exceeds that opening amount, the lot shall pass as unsold.
18. All items are to be purchased per lot as numerically indicated and no lots will be broken. Auctioneer reserves the right to withdraw, prior to the close, any lots from the Auction.
19. Auctioneer reserves the right to rescind the sale in the event of nonpayment, breach of a warranty, disputed ownership, auctioneer's clerical error or omission in exercising bids and reserves, or for any other reason and in Auctioneer's sole discretion. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) and any other damages or expenses pertaining to the lot.
20. Auctioneer occasionally experiences Internet and/or Server service outages, and Auctioneer periodically schedules system downtime for maintenance and other purposes, during which Bidders cannot participate or place bids. If such outages occur, we may at our discretion extend bidding for the Auction. Bidders unable to place their Bids through the Internet are directed to contact Client Services at 877-HERITAGE (437-4824).
21. The Auctioneer, its affiliates, or their employees consign items to be sold in the Auction, and may bid on those lots or any other lots. Auctioneer or affiliates expressly reserve the right to modify any such bids at any time prior to the hammer based upon data made known to the Auctioneer or its affiliates. The Auctioneer may extend advances, guarantees, or loans to certain consignors.
22. The Auctioneer has the right to sell certain unsold items after the close of the Auction. Such lots shall be considered sold during the Auction and all these Terms and Conditions shall apply to such sales including but not limited to the Buyer's Premium, return rights, and disclaimers.

## Payment:

23. All sales are strictly for cash in United States dollars (including U.S. currency, bank wire, cashier checks, travelers checks, eChecks, and bank money orders, and are subject to all reporting requirements). All deliveries are subject to good funds; funds being received in Auctioneer's account before delivery of the Purchases; and all payments are subject to a clearing period. Auctioneer reserves the right to determine if a check constitutes "good funds": checks drawn on a U.S. bank are subject to a ten business day hold, and thirty days when drawn on an international bank. Clients with pre-arranged credit status may receive immediate credit for payments via eCheck, personal, or corporate checks. All others will be subject to a hold of 5 days, or more, for the funds to clear prior to releasing merchandise. (Ref. T&C item 7 Credit for additional information.) Payments can be made 24-48 hours post auction from the My Orders page of the HA.com website.
24. Payment is due upon closing of the Auction session, or upon presentment of an invoice. Auctioneer reserves the right to void an invoice if payment in full is not received within 7 days after the close of the Auction. In cases of nonpayment, Auctioneer's election to void a sale does not relieve the Bidder from their obligation to pay Auctioneer its fees (seller's and buyer's premium) on the lot and any other damages pertaining to the lot or Auctioneer, at its option, may charge a twenty (20%) restock fee on the amount of the purchase and offset the restock fee against any monies paid to the Auctioneer or against any of the purchaser's properties held by the Auctioneer.
25. Lots delivered to you, or your representative in the States of Texas, California, New York, or other states where the Auction may be held, are subject to all applicable state and local taxes, unless appropriate permits are on file with Auctioneer. (Note: Coins are only subject to sales tax in California on invoices under \$1,500, and there is no sales tax on coins in Texas.) Bidder agrees to pay Auctioneer the actual amount of tax due in the event that sales tax is not properly collected due to: 1) an expired, inaccurate, or inappropriate tax certificate or declaration, 2) an incorrect interpretation of the applicable statute, 3) or any other reason. The appropriate form or certificate must be on file at and verified by Auctioneer five days prior to Auction, or tax must be paid; only if such form or certificate is received by Auctioneer within 4 days after the Auction can a refund of tax paid be made. Lots from different Auctions may not be aggregated for sales tax purposes.
26. In the event that a Bidder's payment is dishonored upon presentment(s), Bidder shall pay the maximum statutory processing fee set by applicable state law. If you attempt to pay via eCheck and your financial institution denies this transfer from your bank account, or the payment cannot be completed using the selected funding source, you agree to complete payment using your credit card on file.
27. If any Auction invoice submitted by Auctioneer is not paid in full when due, the unpaid balance will bear interest at the highest rate permitted by law from the date of invoice until paid. Any invoice not paid when due will bear a three percent (3%) late fee on the invoice amount. If the Auctioneer refers any invoice to an attorney for collection, the buyer agrees to pay attorney's fees, court costs, and other collection costs incurred by Auctioneer. If Auctioneer assigns collection to its in-house legal staff, such attorney's time expended on the matter shall be compensated at a rate comparable to the hourly rate of independent attorneys.
28. In the event a successful Bidder fails to pay any amounts due, Auctioneer reserves the right to sell the lot(s) securing the invoice to any underbidders in the Auction that the lot(s) appeared, or at subsequent private or public sale, or relist the lot(s) in a future auction conducted by Auctioneer. A defaulting Bidder agrees to pay for the reasonable costs of resale (including a 15% seller's commission, if assigned to an auction conducted by Auctioneer). The defaulting Bidder is liable to pay any difference between his total original invoice for the lot(s), plus any applicable interest, and the net proceeds for the lot(s) if sold at private sale or the subsequent hammer price of the lot(s) less the 15% seller's commissions, if sold at an Auctioneer's auction.
29. Auctioneer reserves the right to require payment in full in good funds before delivery of the merchandise.

# Terms and Conditions of Auction

30. Auctioneer shall have a lien against the merchandise purchased by the buyer to secure payment of the Auction invoice. Auctioneer is further granted a lien and the right to retain possession of any other property of the buyer then held by the Auctioneer or its affiliates to secure payment of any Auction invoice or any other amounts due the Auctioneer or affiliates from the buyer. With respect to these lien rights, Auctioneer shall have all the rights of a secured creditor under Article 9 of the Texas Uniform Commercial Code, including but not limited to the right of sale (including a 15% seller's commission, if consigned to an auction conducted by Auctioneer). In addition, with respect to payment of the Auction invoice(s), the buyer waives any and all rights of offset he might otherwise have against the Auctioneer and the consignor of the merchandise included on the invoice. If a Bidder owes Auctioneer or its affiliates on any account, Auctioneer and its affiliates shall have the right to offset such unpaid account by any credit balance due Bidder, and it may secure by possessory lien any unpaid amount by any of the Bidder's property in their possession..

31. Title shall not pass to the successful Bidder until all invoices are paid in full. It is the responsibility of the buyer to provide adequate insurance coverage for the items once they have been delivered to a common carrier or third-party shipper.

## **Delivery; Shipping; and Handling Charges:**

32. Buyer is liable for shipping, handling, registration, and renewal fees, if any. Please refer to Auctioneer's website [www.HA.com/common/shipping.php](http://www.HA.com/common/shipping.php) for the latest charges or call Auctioneer. Auctioneer is unable to combine purchases from other auctions or affiliates into one package for shipping purposes. Lots won will be shipped in a commercially reasonable time after payment in good funds for the merchandise and the shipping fees is received or credit extended, except when third-party shipment occurs. Buyer agrees that Service and Handling charges related to shipping items which are not pre-paid may be charged to the credit card on file with Auctioneer.

33. Successful international Bidders shall provide written shipping instructions, including specified customs declarations, to the Auctioneer for any lots to be delivered outside of the United States. NOTE: Declaration value shall be the item(s) hammer price together with its buyer's premium and Auctioneer shall use the correct harmonized code for the lot. Domestic Buyers on lots designated for third-party shipment must designate the common carrier, accept risk of loss, and prepay shipping costs.

34. All shipping charges will be borne by the successful Bidder. On all domestic shipments, any risk of loss during shipment will be borne by Heritage until the shipping carrier's confirmation of delivery to the address of record in Auctioneer's file (carrier's confirmation is conclusive to prove delivery to Bidder; if the client has a Signature release on file with the carrier, the package is considered delivered without Signature) or delivery by Heritage to Bidder's selected third-party shipper. On all foreign shipments, any risk of loss during shipment will be borne by the Bidder following Auctioneer's delivery to the Bidder's designated common carrier or third-party shipper.

35. Due to the nature of some items sold, it shall be the responsibility for the successful Bidder to arrange pick-up and shipping through third-parties; as to such items Auctioneer shall have no liability. Failure to pick-up or arrange shipping in a timely fashion (within ten days) shall subject Lots to storage and moving charges, including a \$100 administration fee plus \$10 daily storage for larger items and \$5.00 daily for smaller items (storage fee per item) after 35 days. In the event the Lot is not removed within ninety days, the Lot may be offered for sale to recover any past due storage or moving fees, including a 10% Seller's Commission.

36A. The laws of various countries regulate the import or export of certain plant and animal properties, including (but not limited to) items made of (or including) ivory, whalebone, turtle shell, coral, crocodile, or other wildlife. Transport of such lots may require special licenses for export, import, or both. Bidder is responsible for: 1) obtaining all information on such restricted items for both export and import; 2) obtaining all such licenses and/or permits. Delay or failure to obtain any such license or permit does not relieve the buyer of timely compliance with standard payment terms. For further information, please contact Ron Brackemyre at 800- 872-6467 ext. 1312.

36B. California State law prohibits the importation of any product containing Python skin into the State of California, thus no lot containing Python skin will be shipped to or invoiced to a person or company in California.

36C. Auctioneer shall not be liable for any loss caused by or resulting from:

- a. Seizure or destruction under quarantine or Customs regulation, or confiscation by order of any Government or public authority, or risks of contraband or illegal transportation of trade, or
- b. Breakage of statuary, marble, glassware, bric-a-brac, porcelains, jewelry, and similar fragile articles

37. Any request for shipping verification for undelivered packages must be made within 30 days of shipment by Auctioneer.

## **Cataloging, Warranties and Disclaimers:**

38. NO WARRANTY, WHETHER EXPRESSED OR IMPLIED, IS MADE WITH RESPECT TO ANY DESCRIPTION CONTAINED IN THIS AUCTION OR ANY SECOND OPINE. Any description of the items or second opine contained in this Auction is for the sole purpose of identifying the items for those Bidders who do not have the opportunity to view the lots prior to bidding, and no description of items has been made part of the basis of the bargain or has created any express warranty that the goods would conform to any description made by Auctioneer. Color variations can be expected in any electronic or printed imaging, and are not grounds for the return of any lot. NOTE: Auctioneer, in specified auction venues, for example, Fine Art, may have express written warranties and you are referred to those specific terms and conditions. .

39. Auctioneer is selling only such right or title to the items being sold as Auctioneer may have by virtue of consignment agreements on the date of auction and disclaims any warranty of title to the Property. Auctioneer disclaims any warranty of merchantability or fitness for any particular purposes. All images, descriptions, sales data, and archival records are the exclusive property of Auctioneer, and may be used by Auctioneer for advertising, promotion, archival records, and any other uses deemed appropriate.

40. Translations of foreign language documents may be provided as a convenience to interested parties. Auctioneer makes no representation as to the accuracy of those translations and will not be held responsible for errors in bidding arising from inaccuracies in translation.

41. Auctioneer disclaims all liability for damages, consequential or otherwise, arising out of or in connection with the sale of any Property by Auctioneer to Bidder. No third party may rely on any benefit of these Terms and Conditions and any rights, if any, established hereunder are personal to the Bidder and may not be assigned. Any statement made by the Auctioneer is an opinion and does not constitute a warranty or representation. No employee of Auctioneer may alter these Terms and Conditions, and, unless signed by a principal of Auctioneer, any such alteration is null and void.

42. Auctioneer shall not be liable for breakage of glass or damage to frames (patent or latent); such defects, in any event, shall not be a basis for any claim for return or reduction in purchase price.

## **Release:**

43. In consideration of participation in the Auction and the placing of a bid, Bidder expressly releases Auctioneer, its officers, directors and employees, its affiliates, and its outside experts that provide second opines, from any and all claims, cause of action, those of action, whether at law or equity or any arbitration or mediation rights existing under the rules of any professional society or affiliation based upon the assigned description, or a derivative theory, breach of warranty express or implied, representation or other matter set forth within these Terms and Conditions of Auction or otherwise. In the event of a claim, Bidder agrees that such rights and privileges conferred therein are strictly construed as specifically declared herein; e.g., authenticity, typographical error, etc. and are the exclusive remedy. Bidder, by non-compliance to these express terms of a granted remedy, shall waive any claim against Auctioneer.

44. Notice: Some Property sold by Auctioneer are inherently dangerous e.g. firearms, cannons, and small items that may be swallowed or ingested or may have latent defects all of which may cause harm to a person. Purchaser accepts all risk of loss or damage from its purchase of these items and Auctioneer disclaims any liability whether under contract or tort for damages and losses, direct or inconsequential, and expressly disclaims any warranty as to safety or usage of any lot sold.

## **Dispute Resolution and Arbitration Provision:**

45. By placing a bid or otherwise participating in the auction, Bidder accepts these Terms and Conditions of Auction, and specifically agrees to the dispute resolution provided herein. Consumer disputes shall be resolved through court litigation which has an exclusive Dallas, Texas venue clause and jury waiver. Non-consumer dispute shall be determined in binding arbitration which arbitration replaces the right to go to court, including the right to a jury trial.

46. Auctioneer in no event shall be responsible for consequential damages, incidental damages, compensatory damages, or any other damages arising or claimed to be arising from the auction of any lot. In the event that Auctioneer cannot deliver the lot or subsequently it is established that the lot lacks title, or other transfer or condition issue is claimed, in such cases the sole remedy shall be limited to rescission of sale and refund of the amount paid by Bidder; in no case shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot. After one year has elapsed, Auctioneer's maximum liability shall be limited to any commissions and fees Auctioneer earned on that lot.

47. In the event of an attribution error, Auctioneer may at its sole discretion, correct the error on the Internet, or, if discovered at a later date, to refund the buyer's purchase price without further obligation.

48. Exclusive Dispute Resolution Process: All claims, disputes, or controversies in connection with, relating to and/or arising out of your Participation in the Auction or purchase of any lot, any interpretation of the Terms and Conditions of Sale or any amendments thereto, any description of any lot or condition report, any damage to any lot, any alleged verbal modification of any term of sale or condition report or description and/or any purported settlement whether asserted in contract, tort, under Federal or State statute or regulation or any claim made by you of a lot or your Participation in the auction involving the auction or a specific lot involving a warranty or representation of a consignor or other person or entity including Auctioneer { which claim you consent to be made a party} (collectively, "Claim") shall be exclusively heard by, and the claimant (or respondent as the case may be) and Heritage each consent to the Claim being presented in a confidential binding arbitration before a single arbitrator administrated by and conducted under the rules of, the American Arbitration Association. The locale for all such arbitrations shall be Dallas, Texas. The arbitrator's award may be enforced in any court of competent jurisdiction. If a Claim involves a consumer, exclusive subject matter jurisdiction for the Claim is in the State District Courts of Dallas County, Texas and the consumer consents to subject matter and in personam jurisdiction; further CONSUMER EXPRESSLY WAIVES ANY RIGHT TO TRIAL BY JURY. A consumer may elect arbitration as specified above. Any claim involving the purchase or sale of numismatic or related items may be submitted through binding PNG arbitration. Any Claim must be brought within two (2) years of the alleged breach, default or misrepresentation or the Claim is waived. Exemplary or punitive damages are not permitted and are waived. A Claim is not subject to class certification. Nothing herein shall be construed to extend the time of return or conditions and restrictions for return. This Agreement and any Claim shall be determined and construed under Texas law. The prevailing party (a party that is awarded substantial and material relief on its damage claim based on damages sought vs. awarded or the successful defense of a Claim based on damages sought vs. awarded) may be awarded its reasonable attorneys' fees and costs.

49. No claims of any kind can be considered after the settlements have been made with the consignors. Any dispute after the settlement date is strictly between the Bidder and consignor without involvement or responsibility of the Auctioneer.

50. In consideration of their participation in or application for the Auction, a person or entity (whether the successful Bidder, a Bidder, a purchaser and/or other Auction participant or registrant) agrees that all disputes in any way relating to, arising under, connected with, or incidental to these Terms and Conditions and purchases, or default in payment thereof, shall be arbitrated pursuant to the arbitration provision. In the event that any matter including actions to compel arbitration, construe the agreement, actions in aid or arbitration or otherwise needs to be litigated, such litigation shall be exclusively in the Courts of the State of Texas, in Dallas County, Texas, and if necessary the corresponding appellate courts. For such actions, the successful Bidder, purchaser, or Auction participant also expressly submits himself to the personal jurisdiction of the State of Texas.

51. These Terms & Conditions provide specific remedies for occurrences in the auction and delivery process. Where such remedies are afforded, they shall be interpreted strictly. Bidder agrees that any claim shall utilize such remedies; Bidder making a claim in excess of those remedies provided in these Terms and Conditions agrees that in no case whatsoever shall Auctioneer's maximum liability exceed the high bid on that lot, which bid shall be deemed for all purposes the value of the lot.

## **Miscellaneous:**

52. Agreements between Bidders and consignors to effectuate a non-sale of an item at Auction, inhibit bidding on a consigned item to enter into a private sale agreement for said item, or to utilize the Auctioneer's Auction to obtain sales for non-selling consigned items subsequent to the Auction, are strictly prohibited. If a subsequent sale of a previously consigned item occurs in violation of this provision, Auctioneer reserves the right to charge Bidder the applicable Buyer's Premium and consignor a Seller's Commission as determined for each auction venue and by the terms of the seller's agreement.

53. Acceptance of these Terms and Conditions qualifies Bidder as a client who has consented to be contacted by Heritage in the future. In conformity with "do-not-call" regulations promulgated by the Federal or State regulatory agencies, participation by the Bidder is affirmative consent to being contacted at the phone number shown in his application and this consent shall remain in effect until it is revoked in writing. Heritage may from time to time contact Bidder concerning sale, purchase, and auction opportunities available through Heritage and its affiliates and subsidiaries.

54. Rules of Construction: Auctioneer presents properties in a number of collectible fields, and as such, specific venues have promulgated supplemental Terms and Conditions. Nothing herein shall be construed to waive the general Terms and Conditions of Auction by these additional rules and shall be construed to give force and effect to the rules in their entirety.

## **State Notices:**

Notice as to an Auction in California. Auctioneer has in compliance with Title 2.95 of the California Civil Code as amended October 11, 1993 Sec. 1812.600, posted with the California Secretary of State its bonds for it and its employees, and the auction is being conducted in compliance with Sec. 2338 of the Commercial Code and Sec. 535 of the Penal Code.

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. # 41513036. The New York City licensed auctioneers are: Sam Foose, #095260; Kathleen Guzman, #0762165; Nicholas Dawes, #1304724; Ed Beardsley, #1183220; Scott Peterson, #1306933; Andrea Voss, #1320558, who will conduct the Sale on behalf of itself and Heritage Numismatic Auctions, Inc. (for Coins) and Currency Auctions of America, Inc. (for currency). All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders.

Notice as to an Auction in Texas. In compliance with TDLR rule 67.100(c)(1), notice is hereby provided that this auction is covered by a Recovery Fund administered by the Texas Department of Licensing and Regulation, P.O. Box 12157, Austin, Texas 78711 (512) 463-6599. Any complaints may be directed to the same address.

Notice as to an Auction in Ohio: Auction firm and Auctioneer are licensed by the Dept. of Agriculture, and either the licensee is bonded in favor of the state or an aggrieved person may initiate a claim against the auction recovery fund created in Section 4707.25 of the Revised Code as a result of the licensee's actions, whichever is applicable.

# Terms and Conditions of Auction

## Additional Terms & Conditions:

### COINS & CURRENCY

COINS and CURRENCY TERM A: Signature. Auctions are not on approval. No certified material may be returned because of possible differences of opinion with respect to the grade offered by any third-party organization, dealer, or service. No guarantee of grade is offered for uncertified Property sold and subsequently submitted to a third-party grading service. There are absolutely no exceptions to this policy. Under extremely limited circumstances, (e.g. gross cataloging error) a purchaser, who did not bid from the floor, may request Auctioneer to evaluate voiding a sale: such request must be made in writing detailing the alleged gross error; submission of the lot to the Auctioneer must be pre-approved by the Auctioneer; and bidder must notify Ron Brackemyre (1-800-872-6467 Ext. 1312) in writing of such request within three (3) days of the non-floor bidder's receipt of the lot. Any lot that is to be evaluated must be in our offices within 30 days after Auction. Grading or method of manufacture do not qualify for this evaluation process nor do such complaints constitute a basis to challenge the authenticity of a lot. AFTER THAT 30-DAY PERIOD, NO LOTS MAY BE RETURNED FOR REASONS OTHER THAN AUTHENTICITY. Lots returned must be housed intact in their original holder. No lots purchased by floor Bidders may be returned (including those Bidders acting as agents for others) except for authenticity. Late remittance for purchases may be considered just cause to revoke all return privileges.

COINS and CURRENCY TERM B: Auctions conducted solely on the Internet THREE (3) DAY RETURN POLICY: Certified Coin and Uncertified and Certified Currency lots paid for within seven days of the Auction closing are sold with a three (3) day return privilege unless otherwise noted in the description as "Sold As Is, No Return Lot". You may return lots under the following conditions: Within three days of receipt of the lot, you must first notify Auctioneer by contacting Client Service by phone (877-HERITAGE (437-4824)) or e-mail (Bid@HA.com), and immediately ship the lot(s) fully insured to the attention of Returns, Heritage, 3500 Maple Avenue, 17th Floor, Dallas TX 75219-3941. Lots must be housed intact in their original holder and condition. You are responsible for the insured, safe delivery of any lots. A non-negotiable return fee of 5% of the purchase price (\$10 per lot minimum) will be deducted from the refund for each returned lot or billed directly. Postage and handling fees are not refunded. After the three-day period (from receipt), no items may be returned for any reason. Late remittance for purchases revokes these Return privileges.

COINS and CURRENCY TERM C: Bidders who have inspected the lots prior to any Auction, or attended the Auction, or bid through an Agent, will not be granted any return privileges, except for reasons of authenticity.

COINS and CURRENCY TERM D: Coins sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for a guarantee by Auctioneer that they are genuine. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Numismatic Guaranty Corporation (NGC), P.O. Box 4776, Sarasota, FL 34230, <http://www.ngccoin.com/services/writtenguarantee.asp>; Professional Coin Grading Service (PCGS), PO Box 9458, Newport Beach, CA 92658, <http://www.pcg.com/guarantee.html>; ANACS, 6555 S. Kenton St. Ste. 303, Englewood, CO 80111; and Independent Coin Grading Co. (ICG), 7901 East Bellevue Ave., Suite 50, Englewood, CO 80111.

COINS and CURRENCY TERM E: Notes sold referencing a third-party grading service are sold "as is" without any express or implied warranty, except for guarantee by Auctioneer that they are genuine. Grading, condition or other attributes of any lot may have a material effect on its value, and the opinion of others, including third-party grading services such as PCGS Currency, PMG, and CGA may differ with that of Auctioneer. Auctioneer shall not be bound by any prior or subsequent opinion, determination, or certification by any grading service. Bidder specifically waives any claim to right of return of any item because of the opinion, determination, or certification, or lack thereof, by any grading service. Certain warranties may be available from the grading services and the Bidder is referred to them for further details: Paper Money Guaranty (PMG), PO Box 4711, Sarasota FL 34230; PCGS Currency, PO Box 9458, Newport Beach, CA 92658; Currency Grading & Authentication (CGA), PO Box 418, Three Bridges, NJ 08887. Third party graded notes are not returnable for any reason whatsoever.

COINS and CURRENCY TERM F: Since we cannot examine encapsulated coins or notes, they are sold "as is" without our grading opinion, and may not be returned for any reason. Auctioneer shall not be

liable for any patent or latent defect or controversy pertaining to or arising from any encapsulated collectible. In any such instance, purchaser's remedy, if any, shall be solely against the service certifying the collectible.

COINS and CURRENCY TERM G: Due to changing grading standards over time, differing interpretations, and to possible mishandling of items by subsequent owners, Auctioneer reserves the right to grade items differently than shown on certificates from any grading service that accompany the items. Auctioneer also reserves the right to grade items differently than the grades shown in the prior catalog should such items be reconsigned to any future auction.

COINS and CURRENCY TERM H: Although consensus grading is employed by most grading services, it should be noted as aforesaid that grading is not an exact science. In fact, it is entirely possible that if a lot is broken out of a plastic holder and resubmitted to another grading service or even to the same service, the lot could come back with a different grade assigned.

COINS and CURRENCY TERM I: Certification does not guarantee protection against the normal risks associated with potentially volatile markets. The degree of liquidity for certified coins and collectibles will vary according to general market conditions and the particular lot involved. For some lots there may be no active market at all at certain points in time.

COINS and CURRENCY TERM J: All non-certified coins and currency are guaranteed genuine, but are not guaranteed as to grade, since grading is a matter of opinion, an art and not a science, and therefore the opinion rendered by the Auctioneer or any third party grading service may not agree with the opinion of others (including trained experts), and the same expert may not grade the same item with the same grade at two different times. Auctioneer has graded the non-certified numismatic items, in the Auctioneer's opinion, to their current interpretation of the American Numismatic Association's standards as of the date the catalog was prepared. There is no guarantee or warranty implied or expressed that the grading standards utilized by the Auctioneer will meet the standards of any grading service at any time in the future.

COINS and CURRENCY TERM K: Storage of purchased coins and currency: Purchasers are advised that certain types of plastic may react with a coin's metal or transfer plasticizer to notes and may cause damage. Caution should be used to avoid storage in materials that are not inert.

COINS and CURRENCY TERM L: NOTE: Purchasers of rare coins or currency through Heritage have available the option of arbitration by the Professional Numismatists Guild (PNG); if an election is not made within ten (10) days of an unresolved dispute, Auctioneer may elect either PNG or A.A.A. Arbitration.

COINS and CURRENCY TERM M: For more information regarding Canadian lots attributed to the Charlton reference guides, please contact: Charlton International, PO Box 820, Station Willowdale B, North York, Ontario M2K 2R1 Canada.

COINS and CURRENCY TERM N: Some of the lots offered herein have been assigned to 1031 Services, Inc. for the purpose of consignor's tax deferred exchange.

COINS and CURRENCY TERM O: Financing. Auctioneer offers various extended payment options to qualified pre-approved persons and companies. The options include Extended Payment Programs (EPP) Flexible Payment Program (FPP) and Dealer Terms. Each program has its specific terms and conditions and such terms and conditions are strictly enforced. Each program has to be executed by the purchaser. Auctioneer reserves the right to alter or deny credit and in such case these auction terms shall control.

For wiring instructions call the Credit department at 877-HERITAGE (437-4824) or e-mail: CreditDept@HA.com

## New York State Auctions Only

Notice as to an Auction in New York City. These Terms and Conditions of Sale are designed to conform to the applicable sections of the New York City Department of Consumer Affairs Rules and Regulations as Amended. This sale is a Public Auction Sale conducted by Heritage Auctioneers & Galleries, Inc. #1364738. The New York City licensed auctioneers are: Samuel Foose 0952360; Robert Korver 1096338; Kathleen Guzman 0762165; Michael J. Sadler 1304630; Scott Peterson 1306933; Andrea Voss 1320558; Nicholas Dawes 1304724; Ed Beardsley 1183220; Bob Merrill 1473403; Paul Minshull 2001161; Fiona Elias 2001163; Brian Nalley 2001162; Jennifer Marsh 2009623; Alissa Ford 2009565, who will conduct the Sale on behalf of itself and Heritage Auctioneers & Galleries, Inc. All lots are subject to: the consignor's rights to bid thereon in accord with these Terms and Conditions of Sale, consignor's option to receive advances on their consignments, and Auctioneer, in its sole discretion, may offer limited extended financing to registered bidders, in accord with Auctioneer's internal credit standards. A registered bidder may inquire whether a lot is subject to an advance or a reserve. Auctioneer has made advances to various consignors in this sale. On lots bearing an estimate, the term refers to a value range placed on an item by the Auctioneer in its sole opinion but the final price is determined by the bidders. Rev 10-6-2014

# MyRECOMMENDATIONS

## ONLINE SUGGESTION TOOL

The last piece of the puzzle? Heritage has it.

Our new online tool, **MyRecommendations** looks at your collecting history and preferences, and notifies you when a potentially desired item becomes available – even items you have never bid on before.

MyRecommendations constantly combs Heritage's upcoming auctions and in-house inventory, and updates your personalized list as auctions open and close. It's a convenient new way to stay aware of the latest opportunities to expand and improve your collection.

Find that special piece with **MyRecommendations** visit Heritage's US Coin pages now at [HA.com/Coin](http://HA.com/Coin).
